post has already been read (though forgotten) by the reader, but often it has not yet reached the reader and the context is essential or your own
point gets lost.

However, if your post stands on its own even in the absence of context, then it is often better to top post. Those who want additional context can
see it below, but most people will not need this context and can just move on or reply after seeing your words. Most people will not need this
context =because= your post is self-contained; if your post is not self contained then obviously this doesn't apply in that case.

I suppose that problems arise because one =thinks= their post is self contained, (after all, the poster knows the context) but it in fact is not. I
won't venture a guess as to how many people think how many posts are how far past that line, except to say that it appears that enough do to sustain
this usenet perpetual motion machine.

Never confuse motion with action.
Never confuse action with results.

And never confuse results with what you wanted in the first place. :)

Jose

I am thinking about getting this scanner & I have questions that are not answered by the "product info" on most scanner selling sites.

First of all.... the backlit screen..... can it be turned on & left on.... or does it turn off by itself? (if i remember correctly the screen on my old bct-7 was always on)

Is there a limited number of available frequencies that you could lock out? My old bct-7 was severely limited & this annoyed me to no end.

The backlight is orange & not green like on the bct-7 (If i remember correctly)?

Thanks in advance

>
> I've never understood why top posting is seen as such an evil thing.
> What am I missing?

Two reasons:

One, as a thread progresses, a mix of top and bottom posting becomes confusing when someone wants to look back through the quoted material. Since most posters to newsgroups bottom post, that is the de facto standard method. Email users typically top post, so that becomes the standard for email.

Two, top posters often quote the entire text below their reply without editing it. That makes the replies longer than they need to be. You often see a one line "me too" post, followed by several hundred lines of quote. Bottom posters seem to be more into the habit of quoting only what is necessary to retain continuity, so it keeps the length of the posts under control.

Not saying please or thank you is not evil either but it IS bad manners
and goes against established protocals that have been around for many,
many years.

3339. Which older scanners support PL decoding?

Newsgroup: rec.radio.scanner
Date: 2004-11-16 17:18:39 UTC
From: Howard Bornstein <bornstein@designeq.com>
Message-ID: <bornstein-065FD0.12183916112004@my.usenetserver.com>
Source record: 16954

A friend, who's also on our local rescue squad, has reception problems in his house. His pager only works in his kitchen and if it goes off in the middle of the night, he has to run into the kitchen to hear the address of the call. I loaned him a scanner to see if it would pick up our rescue frequency (46.08 MHz) in his bedroom and it does.

So he'd like to buy a cheap, used scanner to monitor that frequency in his bedroom at night when he's on call. Our rescue squad is one of 5 fire department companies which use the same frequency and its calls are sent with a PL code. He doesn't want to hear the calls to the other companies, thus the need for a scanner that decodes PL.

Since he's only going to listen to one frequency and since PL is generally an "advanced" feature (i.e. on more expensive scanners), we thought the best bet would be to find a used PL-enabled scanner on eBay for this singular task.

Unfortunately, I've been away from scanners for a few years and don't have at my fingertips a list of older RS or Uniden scanners that support PL.

I'd appreciate it if anyone could provide the model numbers of any older scanner (base or portable) that supports PL. We can then look for these models on ebay.

Much thanks in advance.

Regards,

Howard Bornstein
Design EQ

Right. Got all that, guys, thanks. I guess I've always just posted the way Outlook Express defaults, which seems to be top posting. Can I change that default or do I just page down and delete bits as appropriate?

I guess I actually prefer top posting, especially when I'm reading a thread, as I've already read the original post and just want to read someone's reply, not page down through dozens of lines to see it.

Cheers,
Shawn

I own and like these models, too, but they are only suitable for
monitoring a single frequency in PL/DPL mode if you
set them up to scan.

They employ carrier squelch when placed in the manual mode.
Therefore, the fireman should program 2 channels in a bank with
the same frequency and other settings, lock out the remaining
channels, and scan only those 2 channels.

Dang... might have to hit the local RS early that morning.

About Skywarn... what freqs are preset in the scanner for this? 2 meter ham band?

Hi, EB, welcome to the hobby.
First, let's start with clarification on some terms you are using, and others that are good to know.
CB- Citizens Band- Uses 45 HF frequencies using 10 kHz steps ranging from 26.965 to 27.405. There are 5 of those Channels that are used for surface remote control of cars, boats, etc. CB radios are limited to 5 watts. This band does not require a license from the FCC for anyone to use it. Some other unlicensed services are FRS and MURS.
FRS- Family Radio Service- a low power (1/2 watt) limited distance (typically 1/4 to 1/2 mile and less in a building), that is supposed to be for families, but
businesses use it too. Handy for an intercom at the house, or keeping in touch with other people you are traveling with. The FCC rule is that the transmitter must be attached to the antenna, and the antenna can not be changed.
MURS- Multi User Radio Service- five channels on high band (see below) that you can do quite a bit one, but limited to (I believe) 2 watts, and a certain antenna height and gain. You can do digital and other modes also.
Hertz- A measurement of frequency, one cycle per second is one Hertz. Heinrich Rudolf Hertz was the first one to produce electromagnetic waves artificially. (Or at least he was the first one to realize it.)
HF- High Frequency- a range in the radio spectrum from 3 mHz to 30 mHz.
VHF- Very high Frequency- 30 to 300 mHz. There are two portions of this band that are commonly referred to as low band and high band in the scanning and two-way world. These are 30-50 mHz, and 150-174 mHz respectively.
Channel- typically a numerical representation of a frequency, such as channel 19. This can also refer to a pair of frequencies such as 444.175/449.175 or ones used for a service such as a fire or police repeater.
Two Way- typically used when talking about commercial applications, such as a landscaping company.

A modern scanner is frequency programmable, can scan 30 to 1000 channels at 10 to over 50 channels per second. Once you get into the 100 channel scanner range, most divide the total number of channels into 5 or 10 banks. Each of these banks can be turned on or off so you can scan any one or all at once. This is handy for separating agencies or geographic locations for ease of selection. A scanner you can stay well informed to what is happening in your community.

CB's come in all flavors, from ones with only a channel readout, volume, squelch and a place to plug in the mike, to ones with roger beeps, echo (one I haven't figured out the use of yet), talkback 'extra channels' (goes out of the CB band), and washes your dishes and does your laundry for you. CB's

you can talk to and listen to others on CB. This is good and bad. Good because it can be a nice way to keep in touch with your friends, and bad because there are plenty of morons on it too. Thankfully, that's one reason the power switch is there.

The smaller radio's are actually preferred by some since they are portable. Larger ones are inconvenient as a carry on in an airplane, or to mount under your dash. You will find you can fit many of these in a room. Your limitation on the lower bands (HF and low band) will be the portables' antenna. If you can connect an external antenna, that will improve performance dramatically when you don't need to be portable.
You won't find scanners heating up unless you overcharge the batteries while in it, or when it is placed near a heat source, and neither is recommended. A transmitter, on the other hand will heat up under normal use, and heat rapidly when a heat sink is missing or a high SWR is present. A high SWR can also damage the transmitter.

SWR- Standing Wave Ratio- This is a comparison of the transmitted (forward) power to the power that is being returned (reflected) from the antenna and/or feedline (coax). It is a ratio, written as 1:1, 1.2:1, 2:1, and said one to one, one point two to one, two to one swr. The goal is to have no reflected
power (1:1), but that usually isn't the case. A high swr is caused when the antenna system is not at the intended impedance, typically 50 ohms for all stock radio systems. 2:1 or below is acceptable.

Impedance- it's a complicated answer, just know that when they don't match between the transmitter, appliances, coax, and antenna, you have something other than a 1:1 match. Anyone have a simple answer?

As far as listening quantity, get an inexpensive scanner from a friend or someone from ebay with a 98%-100% feed back rating. You can always sell it if you decide you don't like the hobby.
If you wish to talk to your friends, get everyone who doesn't have one to buy a cb, and external antennas. I recommend the Anntron 99 for a vertical antenna, and what ever your budget allows for a cb. Use the RG-8 coax if you can, it has less loss
than RG-58. Your antenna is the limitation in all radio systems (just like the portables), so get the best antenna possible. Talking over the 5-8 miles can be done with a vertical, but if all of your friends
live in one general direction and you have the money and room, put up a beam. You get what you pay for, but don't get ripped off.

Coax loss- a number in deci-Bels showing how much of your signal is lost due to the design of the feedline. All feed line has loss, just some more than others. Generally, the smaller the diameter the more lossy the coax is. The higher the frequency you go, the more lossy feedline is. It won't be noticeable from one end of cb to the other, but going up to 144 or 440 for ham use is a major difference. A 3dB gain is twice as much, and a 3 dB loss is half as much. 10 dB is 10 times difference, It is logarithmic.

Vertical and beam- a vertical is a single element vertically polarized antenna, like the fm antenna on the fender of your car. A beam has 2 or more elements, is directional, and can be vertically or horizontally polarized. CB and FM (for the scanner) uses vertical polarization. Beans can be flat and many different shapes. More elements usually means more gain, which means you can talk farther. TV antennas on houses are horizontal beams.

Recommended reading: Radio Shack sells Police Call. Read the getting started section in the very front many times and this will be a great start to your radio hobby. Personally, I try to not go to Radio Shack except for emergency parts runs, but there are a few select items that they carry I am impressed with.
An advanced, detailed radio/electronics book is the ARRL handbook, and will explain enough to almost make you an electronics engineer. If you like it and get to a point you want more, get your ham ticket. Try your best to do the Morse code, that will give you HF/shortwave.

I personally have all types of comms available. CB, FRS, MURS, and ham radio. Scanners: Pro-96, BC-780, 2 Pro-2026's, Pro-2036. Ham: FT-747, SB-102, SB-220, IC-740, 3kW tuner, tri-band beam, G5RV, TH-F6, FT-50, FT-8900, IC-2700. I just built my first 440 repeater, too. That uses a Mitrek. I modified one of the Pro-2026's with a discriminator jack and built a data slicer for following a trunk system.
If I had to only choose one of the above, probably the TH-F6. I started in scanning and CB back in the eighties, and I have been a ham for 15 years.

I know I missed something and the way I write it may be a little confusing, but this will be enough for you to chew on for now. I think I need to find a hobby.

Just because I can't avoid it either, did you live under a rock for the last 50 years? Do you have a tube cell phone?

I assume, then, that in a conversation, you fully repeat the
prior speaker's points before adding your own comment at the bottom.

Can't speak for anybody else, but I top post so that those that have already read the previous messages can easily see my response, it's right there at the top. For those that need to be brought up to speed, (generally a minority), they can scroll down to read the previous messages, which are included intact (usually) so they can see everything in each message in it's proper context.

What amazes me is how bent out of shape some people get over top-posting. It's a matter of preference, what you like vs. what I like. Just like the people who can't/won't use proper, grammatically correct English (I'm speaking of those with English as their native language here), including proper capitalization and punctuation. It annoys me to read these posts, but I'm not going to make a big flaming war out of it. I don't insist on perfection from others, as I'm not perfect myself. Nor do I expect others to conform to my personal standards.

It just isn't that big a deal.

I might summarize the conversation for someone who just joined in, but
you're being an asshole just because you can.

Perhaps you're not aware that email and usenet are two different forms
of communication, with different propigation rates. Not everyone has
just read the same missive that you are responding to. It's easier to
killfile you than to expect you to follow the conventions adhered to
by others.

I just killfile them.

Now, tell me, what was the above comment saying what would cause me to kill file them?

Because someone top posts? Because people won't use proper English? Or is it the lack of punctuation some people use?

Top posting, as you see, does not do well at making it clear what the comment the poster is answering. Also, if you have many folks that are killfiled involved in the conversation, or your response is more than a day or so old, it is sometime very tricky figuring out who you are responding to.

There is also the fact that 90% plus do not top post. Is the rest of the world wrong?

The battery bit bothers me, because that could be indicative of a
nasty problem, but not a bad deal if it's a non-castrated version.

Otherwise it would be much smarter to spend the extra $90 on a brand
new one from a reputable dealer.

If you've been waiting on the right time to snag a beautiful MK3U handheld, this is it.

The rig I have for sale was purchased in August for $620. It comes with all the factory accessories and packaging, a soft-shell case, and the RU8200, TE8200, and VI8200 slot cards. It doesn't get nicer than this.

I avoid eBay like a foul wind and I'm not desperate to sell, so unless you're prepared to transact business the honorably human way, don't bother to reply.

The radio is in perfect condition (all my gear is), and since I have over $800 invested in this piece, the price is a non-negotiable $400 for everything.

I don't get to these groups very often, so if you're interested, drop me a direct line. Thanks.

Back a few wars ago, a F-86 Sabre turns off the active and comes
nose to nose with a C-124 Globemaster on the taxiway.

F-86 jockey radios tower and asks "What is the C-124's intentions?"

The Globemaster pilot starts the clamshell nose doors opening,
then keys the mike and says "I'm going to eat you."

3366. Pro-2006 software

Newsgroup: rec.radio.scanner
Date: 2004-11-18 01:28:43 UTC
From: macten <macten1010@hotmail.com>
Message-ID: <Xns95A4D0A4D7B59mineherecom@129.250.170.86>
Source record: 16981

I recently bought a Realistic Pro-2006 at a "Junk" store (estate liquidators) for $50. It seems to work good but I noticed it had an rs-232 jack on the back of it. When I opened it up I saw a board glued to the top of one of the Rf boxes with an 68HC11 chip and a tangle of wires. I think this is a Bill Cheek modification. When I looked it up I got a link to a site selling Pro-Turbo software. I thought this was great except for the fact that in the small print it says I need the original dos disk that came with the mod for the Turbo disk to work.
Does anyone know where to get the disk? I don't know if this is hb-232 or ce-232. Is there a way to tell?

EBAY ITEM: 5732935311

REALISTIC PRO-34 SCANNER SERVICE MANUAL

This auction is for a service manual for the REALISTIC PRO-34 scanner.
This is an original manual, NOT A COPY. It is printed on bright white
paper
and is highly readable.

The manual is 61 pages long and in very good condition.
The front cover has some writing in blue pen on the top right corner.

This manual is very detailed!

Some of the more notable features:

A conversational description of how the scanner works.
An alignment and adjustment chapter which covers tuning and adjusting
many different sections
Detailed pull-out schematics:
all circuits shown with reference designators, part values, and part
numbers
test point voltages (with variations for different modes of
operation)
LCD segment connections
keyboard connections
internal connector pinouts
IC pinouts including pin function names
Extensive parts lists:
reference designators which match the schematic
capacitor type (multilayer/electrolytic/mylar/chip)
tolerances for passive components
manufacturer part numbers (not radioshack!)
Circuit board layouts!
Thats right, the actual circuit board layouts with component legend
markings!
The layers are 'see through' gray so you can see all the connections
The layouts are extra large and pull out so you can easily see them.
An exploded view showing all the chassis and mechanical parts

The table of contents:

SPECIFICATIONS
BLOCK DIAGRAM
PRINCIPLES OF OPERATION
GENERAL OPERATION OUTLINE
ALIGNMENT/ADJUSTMENT

RECEPTION CHECK
MEMORY CHECK
TROUBLESHOOTING
WIRING DIAGRAM
JACK PCB (TOP VIEW)
JACK PCB (BOTTOM VIEW)
LINEAR PCB (TOP VIEW)
LINEAR PCB (BOTTOM VIEW)
LOGIC PCB (TOP VIEW)
LOGIC PCB (BOTTOM VIEW)
ELECTRICAL PARTS LIST
MECHANICAL PARTS LIST
DISASSEMBLY DIAGRAM/EXPLODED VIEW
SEMICONDUCTOR LEAD IDENTIFICATION AND IC CIRCUIT DIAGRAM
MICROPROCESSOR (IC1) PORT FORMAT
APPENDIX
SCHEMATIC DIAGRAM (LINEAR SECTION)
SCHEMATIC DIAGRAM (LOGIC SECTION)

Shipping is $7.00 to anywhere in the United States.

For shipping outside the United States, the buyer will pay actual
shipping costs.

Please ask any questions before bidding.

If you want to know if the manual covers a certain topic, please ask,
I am an engineer
and can answer technical questions.

No returns for any reason.

Payment by paypal only.

I was not really saying that I kilfile top posters. I was using another post to illustrate how illogical top posting is, but I usually struggle through, unless the content makes it "unworthwhile".

I can suggest the following:

-Uniden Bearcat BC580/590XLT with optional CTCSS board

-Uniden Bearcat BC760/950XLT with optional CTCSS board

-Radio Shack PRO-2045 with optional CTCSS board

-Uniden Bearcat BC895XLT (CTCSS board is standard)

This is not meant to be an all inclusive list, but these are units that I have owned and that work well. I have not included the BC8500/9000 because of problems that I have had with those.

Here is something that Rich Wells posted at his webpage http://www.strongsignals.net/access/content/features.html#CTCSS

CTCSS

I got the original floppy disk that came with my hb-232 kit (version
1.3 dated 1-16-1993). Probably the only way to know if it works is to
fire up the software and connect the scanner. If you got binary
access, I can upload the disk to the newsgroup of your choice.

Illogical? Nope, not really. What's illogical is how upset people get over it. BTW, all but one of the responders to my post top-posted their replies, and apparently nobody (including myself, of course) seem to have had any problems understanding.

You want to bottom-post, go ahead. I want to top-post, I will. If this is the biggest problem people have in their life, they are VERY lucky people!

If I understand this correctly then your previous messages was a 'top post', as is the one I'm sending right now. Is that correct?

Personally I see absolutely nothing wrong with this type of posting as 1) the reader does not have to scroll through god knows how much text to read the new reply that he clicked on, and 2) if they failed to read the original or have forgotten it, they can then scroll down to catch up.

What seems particularly annoying to me is when people post the original at the top of their reply and I have to scroll through all that just to get to their response. If the original was only a line or two, it's no big deal, but often it goes on and on and it gets tiresome and annoying to have to scroll through it over and over with each response.

There are a few names that I recognize on this board who are notorious for doing this and when I recognize them, I simply mark them as read and move right past them without reading. I'm curious why people think this is necessary or helpful. Is it something with the way that some readers are set up?

I have read this newsgroup for many years and I cant recall ever forgetting what a topic was about once I've seen the topic. I suppose if I did forget, all I'd have to do is go back to the original and read it (once) to refresh my memory, not each time someone replies.

I'll stick to this type of posting unless someone can explain why it's better to repost the entire message at the top of my reply.

Indeed.

> I'll stick to this type of posting unless someone can explain why it's
> better to repost the entire message at the top of my reply.

PJ,

your message nicely points to the core of the argument. In general, top-
posting reverses the normal flow of a (usenet) discussion and thus should
be avoided whenever possible. However if people cannot be bothered to trim
the quoted message down to the essential parts, then sifting through (long)
bottom-posts becomes even more annoying than reading top-posts.

Greetings,
Markus

Message-ID: <20041118104406.06349.00000465@mb-m27.aol.com>
Source record: 16993

It is 10:13am EST and we have tankers BOLT 41 (KC-135 from MacDill) and DUECE 92 (KC-10 from McGuire) active here. BOLT 41 is orbiting 28 DME on the Homestead 142 radial. Deuce 92 is orbiting over Avon Park Bombing Range in the altitude block FL240-260.
BOLT is up on 323.1. DEUCE is up with Avon on 292.2.
TIGER 11, a single F/A-18D from Beaufort MCAS VMFA(AW)-224 squadron, has just arrived at Avon Park Bombing Range and is also up with RedHorse on 276.6.
==========
It is 10:30am and BENGAL 41, a flight of two F/A-18Ds from Beaufort MCAS VMFA(AW)-224, has just arrived at Avon Park Bombing Range's Placid MOA. They are up on 292.2 with Avon Range Control.
I am also hearing Homestead F-16s MAKO 11 on Miami Ctr freq 323.1, probably to AAR with BOLT 41.
==========
Looks like there could be a traffic jam over Avon Park today. We still have a bevy of PA-ANG A-10s TDY at Patrick scheduled for the range today, as well as a TDY flight of AV-8B Harriers from Cherry Point. Yesterday they performed in UAV exercises there, so the comms were a bit more unusual than the normal strafing-bombing work.

Source record: 16996

I recall a few weeks ago someone here was asking about building a
stealth / undercover scanner antenna.

I happened to see just the thing while reading through an old
issue of Popular Electronics (Aug 96.)

Scanned it in and put it up at

http://spammedaddy.home.netcom.com/StealthAntenna/antenna.html

It's pretty much as folks here said. The earphone wire
capactively coupled to the antenna input on the scanner.

My guess is that a plain wire connected to the center of a BNC
plug and run down the inside of your pants leg would have worked
just as well. Perhaps not as practical, depending on the
circumstances.

Fooling around with my scanner, I came across these key pad codes. I was wondering if anyone has any information on these or any they could add?

When Turning On Scanner (While "Welcome To Dual Trunking" appears)

Press 0-0 ???
Press 0-1 Initialize scanner (WARNING-clears all programmed channels)
Press 0-2 displays "Test Set Please Wait"
Press 0-3 Displays upside-down @ symbol next to FM
Press 0-4 Same as 0-3
Press 0-5 displays "EEPROM Test Mode-Programming" (WARNING-initializes scanner afterwards)
Press 0-6 Same as 0-5
Press 0-7 ???
Press 0-8 ???
Press 0-9 ???
1 - Turn on key tone
2 - Turn off key tone
3 - Shows EEPROM version (I think?)
4 - ???
5 - ???
6 - ???
7 - ???
8 - ???
9 - ???

Interesting article... One little warning to note with some (if not all) Uniden Bearcat portable scanners, and maybe others... The earphone jack is directly fed full power audio, and is then reduced via a resistor place on the ground line of the earphone jack. Using this item, wired as indicated, would bypass the resistor (audio grounding would go through the unrestricted antenna ground) allowing full power audio out of the earphone jack once again. Audio output would be quite a bit higher than you would normally be used to! Be careful as to not damage your hearing because of this!

That little trick (jumpering the audio ground to the antenna connector) is commonly used by those that hook up small external speaker(s) to the headphone jack...

Apparently it's recent. I called the 1-800 number about 10 days ago and
after placing my order and then giving my Canadian address, I was told
that they cannot ship to Canada. Tried calling 1-800 again, and same
thing but this time the rep said that I should try again after a couple
of weeks -- she believes that Uniden may have a solution for Canadians.
I also tried email, and they gave me the name of a Canadian
"distributor" (AVS) but after checking this "distributer" only carries
Uniden cordless phones, not scanners. So I'll try the 1-800 number
again soon.

Frightening the yaks, PowerHouse Communications just had to say:

>Interesting article... One little warning to note with some (if not all)
>Uniden Bearcat portable scanners, and maybe others... The earphone jack is
>directly fed full power audio, and is then reduced via a resistor place on
>the ground line of the earphone jack. Using this item, wired as indicated,
>would bypass the resistor (audio grounding would go through the unrestricted
>antenna ground) allowing full power audio out of the earphone jack once
>again. Audio output would be quite a bit higher than you would normally be
>used to! Be careful as to not damage your hearing because of this!
>
>That little trick (jumpering the audio ground to the antenna connector) is
>commonly used by those that hook up small external speaker(s) to the
>headphone jack...

If that turned out to be the case, the project might work just as
well with the connection to the antenna ground omitted.
Depending on the RF impedance of the earphone, the whole thing is
close to ground potential anyway. The audio limiting resistor
inside the unit could only help lift that level.

It is 10:45am EST (1545z). The action has started at Avon Park Bombing Range again. . . bombing, strafing, laser guided munitions, etc. So far we have:
BULLDOG 11, flight of two AV-8B Harriers, from Cherry Point MCAS VMA-223 (TDY at Patrick all this week).
TIGER 11, F/A-18D (Bu #164711, Modex #04) from Beaufort's VMFA(AW)-224), acting as airborne FAC.
RAID 85, KC-135 tanker from Grand Forks AFB's 319ARW.
BENGAL 41, single F/A-18D (Bu #164702) from Beaufort's VMFA(AW)-224.
BENGAL 42 (Bu #164...) is just arriving at the range now, looking to top off his tanks with RAID 85.
The freqs they are using are:
292.2, 264.625, 285.725, 276.6, 293.7. The 293.7 is being used for air-air comms with the tanker during AARs. The 264.625 is being used for comms with the Ground FAC, callsign "Advance."

AL STERN Satellite Beach FL (28-11N 80-36W) monitoring
Patrick AFB (KCOF) NASA-KSC Shuttle Landing Fac (KX68)
Avon Park Bombing Range (KAGR) Cape Canaveral AFS (KXMR)
JSTARS E-8 Acft Integration Facility, Melbourne IAP (KMLB)
Worldwide Military HF Communications
Life Member: Missile, Space and Range Pioneers.

Do you see what has happened here?

Simplifying somewhat, the structure is something like:

> Comment 2
>
> > > Original text
> >
> > Comment 1

Yuck!

It is clearly preferable to maintain a *consistent* pattern, either
always placing new text before old ("top-posting"), or *always*
placing new text after old ("bottom-posting").

For *very good* historical reasons, the convention on Usenet is to
place new text *after* the old text on which you are commenting,
snipping out *surplus* old text and, when commenting on a number of
fragments, placing each comment immediately after the relevant bit
of the old text.

This way, reading an article from top to bottom should make sense
in a question-and-answer kind of way. Readers who are sufficiently
familiar with the thread can skip over the quoted text, but it will
generally be available for reference simply by looking a little way
up the screen, rather as one sometimes looks back at the previous
paragraph in a book.

One of the reasons for quoting and commenting in this way is that
Usenet articles are *not* guaranteed to arrive at a newsserver in

the "correct" order - heck, they are not *guaranteed* to arrive at all - and propagation delays can be quite substantial: Google take their time even now, and once upon a time delays measured in *days* were common.

In the early days of Usenet, *slow* and *expensive* net connections were very common, which made snipping out excess quoted material a Very Good Thing. Things aren't *as bad* these days, but some users are still on slowish connections where extra bytes cost extra bucks, so good snippage is still very good practice.

Usenet and email are two *very* different media: Usenet is a form of *broadcast* medium where readers often find themselves dealing with fragments of *many* threads at once; email is basically a one-to-one medium (yes, spammers abuse it as a broadcast medium) in which you can be far more certain that your correspondent is already familiar with the topic of your reply, so that *appending* the previous text for reference makes more sense. That said, interleaving old and new text in email responses can be very useful - particularly where the discussion *is* a series of questions and answers.

This is a bit longer than I had anticipated, but I hope you can now see why "bottom-posting" is conventional on Usenet.

3402. Re: O.T. Actual airline pilot conversations

Actually, "bottom-posting" is conventional on Usenet only among people who say "bottom-posting" is conventional on Usenet.

Most everyone else top-posts. If you are reading a top-posted thread, you open a message, read the top few lines, then move to the next message, no scrolling to the bottom required.

Much more convenient...

Answer: Because it disrupts the flow of thought.
Question: Why is top posting such a pain in the ass?

Thus said "PJ Hunt" <pj@REMOVEoffairport.com>:
>I'll stick to this type of posting unless someone can explain why it's
>better to repost the entire message at the top of my reply.

It isn't. If you're too lazy to edit the quoted content to include just the relevant portions that you're replying to, then by all means don't bottom post.

You could top-post, but better still, just don't post at all. There are plenty of other posters who value the reader's time enough to edit properly.

So why is it that you se the MAJORITY of usenet posts, using bottom posting
mixed in style? Does that not matter at all to you?

> Most everyone else top-posts. If you are reading a top-posted thread, you
> open a message, read the top few lines, then move to the next message, no

If, and only if, you only have one comment to make. Top posting does not
work any other way.

> Much more convenient...

The only thing convenient thing to do, is for you to piss people off, as you
are doing by your illogical insistence that you are right, and the other 90%
are wrong.

Right now, I think it will be more logical for me to plonk yur a**.

Perhaps the majority of the usenet posts you see are bottom posted, but the majority I see are top posted.

And there are a tremendous number of newsgroups out there; I seriously doubt that either of us have seen even a small fraction of them.

When I visit a newsgroup where bottom-posting seems to be the convention, I bottom-post; it's not a religion with me.

But it appears that most top-post on this newsgroup, so I top-post here.

And my initial comment: "Actually, "bottom-posting" is conventional on Usenet only among people who say "bottom-posting" is conventional on Usenet" was intended to be humorous; I picked up: ""bottom-posting" is conventional on Usenet" from someone else on this thread. I'm sorry you failed to see the humor on it.

Robert, Thank you for the explanation.

I've always wondered why people posted the entire message at the top and now I understand how it all started, but isn't it a bit archaic today? I'm referring to your explanation about the delays etc.. Personally I have never seen a response posted before I've seen the original post. If I had then perhaps this would make more sense to me. Is usenet still this slow and expensive today and if so, why on earth do people use it?

Keep in mind I'm not talking about quoting a portion of the message to bring attention to a specific matter. That makes total sense. However, just as I'm sure that no one here starts reading a book or the newspaper from the very beginning every they set it down and then pick it up again, I don't see why they feel we should have to re-read the original message over and over again every someone post a response to the original poster. Just imagine what it would be like if this was how we sent, received and re-sent letters to people.

Is there still more here that I'm missing or is this just a matter of some people have done it a certain way for so long and they're so set in their ways that nothing is going to convince them to change? Personally I don't really care if they change or not, if I don't want to scroll through all the previous message they have posted and re-posted, I just bypass it, which is what I find myself doing often.

Thanks again for your reply.

PJ

I guess I forgot to mention I also believe in interleaved
posting, where there are separate ressponses to different parts of a
longer posting. I also bottom post if the prior post is so short that
my comments are no more than a screen or so down. However, if there's
only a short response, I will not roll down a hundred lines to satisfy
the lunatics who insist that there is one and only one way to respond
and that way, goddamn all other opinions, is bottom posting.

In short, all three modes have their place.

Hi guys

Recently aquired a AOR5000+3 E and a SDU5000

Im looking to buy or lend software to control (mainly program a large amount of freqs) this baby. Possibly a hint to a freeware program would works aswell..

btw....My email can handle big files

TIA.

Stephan

Because USENET goes places where there is no Internet, like central
Africa and the South Pole.

I'm sure most of us long-timers here on rec.radio.scanner remember the antics of one Bill Cheek. Embroiled in constant cyberfeuds with his arch rivals: Glen Quarnstrom, Andy Moss, Peter Boe, and especially John Mackey.

From the Google archives, here's a timeless Cheek Classic from 8 years ago. Enjoy!

Subject: A Story of Petey Joe Boe
Date: Sat, 27 Jul 1996 06:20:15 GMT
From: bcheek@cts.com (Bill Cheek)
Organization: COMMtronics Engineering
Newsgroups: rec.radio.scanner

Listen, my friends, and I shall tell you a short story of the schizo-freako-paranoidal-hermaphrodyte fondly known as Petey Joe Boe (PjB). I repeat this story from memory as it was told to me by Captain Larry of "The River Dragon" fishing boat.

Now this lad, Petey, lives in Portland, Oregon, not far from the banks of the mighty Columbia River. Being an out-of-work piano teacher and in desperate need of something to eat, weary of a diet of Depo-Provera and Prozac, the fine strapping Petey found himself down by the river applying for work in the fishing fleet.

Much to his relief, the fine Petey was immediately hired, but because of no experience in the fishing industry, he was required to start at the bottom of the ladder as an Apprentice Baiter at minimum wage.

Not content with swimming around on the bottom of the barrel, the lad Petey learned about anchovies, cut mackerel, chum, and hooks, so that within about six months, he was advanced with a double-pay hike to Journeyman Baiter. His mother was so proud!

Thusly inspired and proud of his handiwork, the magnificent Petey got down to serious work with the arts and sciences of baiting like there was no tomorrow. Surprise, surprise, surprise! Three months later, the boy Petey achieved his crowning glory as he was elevated to the highest rank of all, Master Baiter.

Bravissimo, Boe! Way to go! <applause> <applause> <applause>

.....
.....<pausing for more applause>.....
.....

In another installment, if interest warrants, I'll relate the anecdote of how Master Baiter Boe got cured of a monstrous tapeworm.

I'm a bit confused. Have old scanners but new to trunking etc. Was
going to buy bc296 but like bc 246. Will the bc 246 do everything the
bc296 does , just smaller. I realize that bc296 is digtal and its
picks up local police. Does this mean bc 246 picks up only anlog
therefore will not pick up my local police? I confused.....
If bc246 p/u everything the bc296 then why would one pay more for the
bc296?
thanks Doug

I'm in the market for a digital scanner and I'm very loyal to Uniden/Bearcat
for a lot of reasons. I need one that does 9600bps for our local system, but
I'm told the Bearcats need some kind of tuning for them to operate properly
on the APCO25 systems. Can someone fill me in on this?
I'm not a big fan of Radio Shack scanners, I've had a few and they
don't impress me at all. My last one was a Pro-91, what a piece of garbage.
Rx was horrible, programming was a different story. They make the
programming so complex, for something very simple.
I've recently been told the Pro-96 is a better scanner than the 296D, so is
this just a personal opinion, or is it actually true.
Any information would be appreciated.

thnx

LOL, you realize that the PRO 91 you didn't like was
made by Uniden, don't you? I personally would take the
96 over the 296 anytime, for several reasons. First is
it's a better performer, RF wise. Quality control seems
to be something Uniden just hears about. I have seen
several 250's and 296's with unsoldered antenna and/or
speaker connections (the speaker conections being
unsoldered goes back all the way to the 235 for some
reason). A lot of them have the speaker wires stuck in
the epoxy they smear on the CPU to prevent "tampering"
and this makes taking the radio apart to fix the
unsoldered speaker connector a pain in the butt. Then
there's the battery pack nonsense, just use AA batts for
god's sake! I passed on the 235 and 245 for the battery
crap alone, not to mention all the repairs I made on
them due to factory screwups.

Uniden makes the PRO 94 BTW, it's ok, a 93 or 95 is a
lot better. IMO.

What is so hard about programming a 91 versus a 235 or
245? There is no Uniden branded equivilant to the 91, if
I remember correctly.

If I'm going to spend all that money for a digital
handheld, right now, it would be an easy choice, the 96.

BDK

I've not tried a 296, but I love my PRO-96. Super performance, AA
battery convenience, Easily available software to program ...I'd opt for
the PRO-96 hands down.

The BC296D is capable of receiving the newer "digital" systems, the BC246T is not. This is a major difference, but only if you need it.

Thanks for all the info. Although I've found Uniden service to be fairly
good. I sent one of my 780's back a month ago and the turn around time was
great and unit works better than when I first bought it.
So does the Pro-96 do 9600bps? Thats the most important question at the
moment.

Yes I realize some of RS scanner's have been made by Uniden, as was there
one of their 10 mtr radio's years ago.
But the programming methods are, or at least used to be very different from
the Unidens.
Thanks for your input.....

I am a Uniden fan also. The 780XLT was the last Uniden I have purchased since that was a classic radio.

When it comes to DIGITAL, I switched to the GRE PRO-96 as IMHO they make a much more user friendly digital scanner. You can generally buy one for around $399 or so at Radio Shack if you watch the sales and use other tricks for buying one.

I carry the PRO-96 everywhere!

If you want a base unit look for the new one they will start sellling in January 2005.

Thank you sir! I went to their website and looked at the specs., I noticed
it doesn't do PL/DPL or if it does, it's not listed. I doesn't do WFM, and
it doesn't do LTR.
So maybe I'll take my chances with the 296D. If there's a problem I'll send
it back..........

Thanks to all.............

It definitely does; Continuous Tone Controlled Selective Squelch (CTCSS) and Digital Coded Squelch (DCS) decoding. LTR, apparently it does not do, but then do you need it?

: That brings up a question you might be able to answer for me. I've never
: understood why top posting is seen as such an evil thing. What am I
: missing?

It depends on the group. Here in USENET world, bottom posting is common.
However in military circles, top posting is normal and most readers would
not see your reply if you posted on the bottom (it is an expedience thing).

If I'm shelling out $500.00, LTR sure would be nice.....Along with
WFM and better band coverage.

Does DoD still have any internal newgroups or newsfeeds? My command gave up
their DoD newsfeed close to a decade ago, so I lost visibility of it. Most
of the DoD content I used to get from RN and VN or dialup BBS's (remember
those?) soon showed up on web pages. Speaking of 'remember whens' (in
answer to another posters question about Usenet propogation), does Fidonet
still exist?

aem sends.....
(just another old fart who started on Usenet with a text interface and a
green screen, on a hard-wired dumb vt-100 or dialing in to the UNIX server
on an 8086 with a lightning-fast 1200 baud modem.)

3465. Seeking comments from Icom PCR1000 Users

Newsgroup: rec.radio.scanner
Date: 2004-11-22 01:22:57 UTC
From: nydxanet@yahoo.com
Message-ID: <jrf2q0pl8ed2664gddar5hm9hu4vc5jke9@4ax.com>
Source record: 16878

I'm thinking of purchasing an Icom PCR-1000 and I'd like to reach out
to anyine who has one or has used one. Reviewing the comments I find
on line, it's a 50-50 split; some love it while others hate it.

I live in New Jersey, not far from New York City so I'm in what most
would classify as a very heavily RF congested area.
" Thinking of using it DX'ing the AM Broadcast band, anyone have
any experience in how well it suppresses imtermod from nearby AM
stations?
" I do a lot of scanning in the VHF and UHF bands and I'm told
that the front end is similar to Swiss cheese when you connect it to a
good outdoor antenna. Any comments
" On HF I'm seeing comments that it's plagued by lots of RFI
from your PC.
" I'd like to use it to receive the VHF weather sats - anyone
have any suggestions for software that works well with the PCR-1000
for this task?
My access is often limited to USENET, so I'd appreciate if anyone can
offer any suggestions or comments would respond directly via e-mail.
NYDXANET@yahoo.com

Many thanks!

Hah! I started on a Victor 9000 8088 and a 300 baud modem in
1984. (Hmm. I'm sure about the Victor and the CPU. Please
don't make me swear in court about the modem.)

How the decades pass when you're messing with technology!

Marty

3475. Smallest RF-quiet wall wart?

Newsgroup: rec.radio.scanner
Date: 2004-11-22 13:54:22 UTC
From: Ken <cprstn54zz@att.net>
Message-ID: <phr3q0915jg2ooho9lv2k2ervaka2qumfm@4ax.com>
Source record: 16889

I am looking for a small travel wall wart (power supply) that converts
120VAC to 12VDC.

My Rat Shack supplies are very "noisy" when used with my R10 -- lotsa
60 cycle interference. My big shack supplies (Astron) are quiet but
too big.

This one looks pretty good:
http://www.allelectronics.com/cgi-bin/category.cgi?category=480&item=PS-1250&type=store

It would be nice if the prongs folded down, though.

Any recommendations?

Ken

If one is shelling out $500 then why would you want a radio you have to constantly dink the with the audio to hear anything? Many times the transmision is over before you get it right on those digital systems.

Now with the PRO-96 you just kick back and listen, the radio does it all automatically as it moves from analog to digital and back again.

3477. port blocking.

Why not just unblock the port in question?
If it's like most routers just login to 192.168.1.1 or what ever the routers IP address is. There is always a menu where you can allow certain ports and usually even place a specific computer outside the firewall.

The only one I have is 154.540 MHz. I have lots of frequencies for
other ski areas in VA, MD (by default, that is Wisp), and PA. Want
'em?

I am not the one at issue.

also, your search probably turned up about 50% duplicates (among other
things).

The point here is, you went about trying to stir up shit *AGAIN* by dragging
Bill's name through the mud. you were hot and heavy with that course of
things right along with John Mackey, toomanyradios, useay100, et al.

redirecting the conversation to something other than what you opened the
door on is a cheap shot at best. c'mon you can do much better than that!

Meanwhile, life goes on and I don't give a shit about my past. what's done
is done. We all make mistakes but only *some* of us ever bother to learn
from them.

No, I have not! But I need a radio that does what I need too. I not just buying it for digital. It needs to do everything the 780 does, and more.

Thanks to all for your comments..........

I doubt the supply itself is the source of noise- it i simply conducting
noise from the AC mains to your receiver. Try winding the DC leg on #43
toroids to choke off any RF along the line.

I have owned a PCR 1000 for about 3 months. My listening is fairly casual
so I can't address your question with depth of insight in which you ask.

I use a discone antenna with a 36 inch whip on top for HF reception.
While I'm not a DXer the PCR 1000 is allot of fun to listen
to the short wave bands with. I believe that this is a much better HF
receiver than given credit. (Note: check out some the Freeware DSP
software for processing audio from difficult signals, This is pretty
cool stuff, I believe the optional DSP hardware is unnecessary)

As for scanning, My listening has been primarily the VHF Marine
band. It does an excellent job at this simple task. The control software
(talkpcr) allows VOX recording of audio to the hardrive and many handy
features
such as logging of channel activity and band scope.

I would suggest you post your question to the following lists.

http://groups.yahoo.com/group/PCR-1000/

or

http://qsy.to/pcr/index.html

There's also a PCR1000 group on qth.net.
As an aside we have a few more PCR1000 compatible programs on the
software page on Strong Signals.

Source record: 16800

I've found the PCR-1000 to be a poor choice for AM and SW DXing. The lower the band... the poorer it performs. It works rather well in the VHF and UHF bands. If you want to hear anything at all on AM and SW, you'll need a good outdoor antenna well away from the computer and receiver.

Also, using the PCR-1000 with older computer equipment (especially older monitors) will result in lots of noise hash. Newer computers and monitors are better shielded and affect the PCR-1000 less, but IMO it's still far from "ideal".

To sum it up, I buy them when I can get them cheap to make a buck since they have excellent resale value, but I'd never keep one for my personal collection.

I have always been a PRO-43 fan but when LAPD went digital I gave up scanning. A friend who is commercial radio repair guy and general Motorola freak always carries a Motorola ASTRO Saber to listen to LAPD and other specific high dollar handhelds for each service he listens to. Nothing like having the same radio as your local PD for a scanner. When the PRO-96 came out our sick puppy bought one and shortly after sold all his expensive ASTRO and other P-25 handhelds. He claims the PRO-96 works the same and sounds almost as good as the Motorolaï¿½s and also uses the same ?? chip for demodulating or decoding the P-25 digital. He also tried the Uniden equivalent and rejected it completely because of the crappy audio in digital mode. I just picked up a PRO-96 and am completely thrilled with it. The only thing I miss is the 225 to 400MHz mil band but I still have a PRO-43 that will cover that. If you want to listen to P-25 digital, I canï¿½t imagine being unhappy with a PRO-96.

I was under the impression that you can use an undocumented PRO-96 "feature"
to open up the 225-400 band. I've also heard that the WIN96 program both
knows how to do this and has a setting to enable it. (I haven't yet used
WIN96 to load frequencies in that band, otherwise I'd know for certain.)

Personally I would not want to program a PRO-96 without using WIN96
(or for that matter, any scanner without using a similarly good program).

Yes the 95 has been on sale for a while, $50.00 off. If they were taking
$150.00 off 95's I don't think they would be able to keep up <G>
The sale does not show on the site, it does if you follow the link. It's
a one day, online only sale. On the site it just says to check back on
Thursday, does look like a good price break if you need a digital scanner.

It's in Rockingham County, Virginia. The FCC file shows one pending
application for MASSANUTTEN RESORT for 461.5125 MHz. No other
licensee's name seems suitable, with the possible exception of
MOUNTAINSIDE VILLAS OWNERS ASSOCIATION.

I recently purchased an interface cable that hooks up to My R7100 from
an Ebay seller. It has no CT-17 interface. Its just an RS-232
connector and some an RS-232 plug that contains asmall cicuit board in it.
Did I get scammed or is it really
impossible to operate a ICR-7100 without a CT-17 interface? I've thus
had no luck with it.

Charlie

The problem with top posting is:
(a) see witty earlier comment where someone wrote a conversation
bottom-to-top
(b) the vast majority (like 99.9%) of top posters do not trim what they
are quoting. Usenet isn't email, and repeated top-posting leads to two
line comments on top of 50K long top-posted trails of redundant
messages. Now you might say 'well, 50K - big deal' but replicated across
tens of thousands of news servers... not to mention most people STILL
are not on broadband and quote a few still pay for dialup by the minute.
A large NG with many top posted threads can soon add up to megabytes of
untrimmed quotes that a modem user must download (and possibly pay for).

Indeed they do. If you 'bottom post' (or more likely, quote selective
bits and comment right underneath the point you're replying to), by the
very nature of the activity there is an incentive to trim the quotations
down.

That I just don't believe. Many times and even in this group I've
scrolled down through pages of text to find a two or three line answer
to the whole thing.

OTOH I've never forgotten to snip the irrelevant text like a lot of
posters. <:-))

The problem with the top posted one liner is you need to look to see
if that was the only comment.

<and again>

Although this appears to be bottom posted, it was really a piece out
of the middle. (selective quoting) with the whole bottom snipped.

Incentive doesn't mean crap. I often top post, but still trim
the irrelevant stuff. Because I'm just a nice guy.

I also delete the ten sets of addrresses on jokes forwarded to
me and re-wrap the lines before sending them to anyone else.

Why so hostile?

Would it really have hurt you that much to say:

"I don't think that's true - I've seen plenty of 200-liners with not
much more than three lines up the end"

instead of spouting a bunch of invective?

I really have to wonder what's happened to the concept of "netiquette".
This has been a very long September indeed.

I live in Sacramento & do really well, you just need the right antenna.

> > " Thinking of using it DX'ing the AM Broadcast band, anyone have

I do really well with AM DX'ing

> > " I do a lot of scanning in the VHF and UHF bands and I'm told

It's perfect for v/uhf listening. I scan a lot there too.

> > " On HF I'm seeing comments that it's plagued by lots of RFI
> > from your PC.

You just need the right antenna set-up / I had to tweak and play around a
little.
The ut106 dsp module helps A LOT! It helps to ground properly. The only
rfi
problems I had didn't come from my computer. They came from outside
electrical
stuff. Keep the antenna away from powerlines, buildings, ground properly, &
if you have a noise problem in a particular band, be sure to use resonate
antenna
for that band.

> > " I'd like to use it to receive the VHF weather sats - anyone

The PCR1000 lacks the sensitivty for serious sat. work,
you could do ok with the right antenna / preamp setup.

Do you have a need for a high-quality SMA-to-BNC rubber covered
factory look antenna adapter that is custom made to fit and protect
your H.T. or scanner radio?

Adapter allows you to:
Quickly change antennas to base, mobile or different style use.
Use the more popular and wider selection available of BNC antennas.
Prevent chassis connector wear or from coming loose due to antenna
changes.

Adapter features:
Gold plated contacts with a teflon insulator.
A low profile design with a rubber covering for a factory antenna
look.
The rubber base seals to the top of the radio with no spacers needed
for moisture and dirt protection.
The base also provides an excellent support for any length of antenna
or application.
No need to remove adapter once installed to make a quick and safe
BNC style antenna change.

Sizes to fit radio models:
Yaesu: VX-5R, VX-7R, VX-2R, VX-1R, FT-50-R, FT-60-R, VX-10, VX-150,
VX-110, VXA-100, VXA-120, VX-800, VXA-700
Icom: IC-T90A, IC-R5, IC-R2, IC-T8A, IC-T81A, IC-Q7A, IC-M1V
Kenwood: TH-D7, TH-G71, TH-F6A, TH-59, TH-K2AT
Alinco: DJ-V5, DJ-X3, DJ-S40
Midland : G-11
Maycom : AR108
Standard: C508A, C510, HX-460S
Uniden : Atlantis(marine)
Tate Orca : Excel
Radio Shack: HTX-200, HTX-400, HTX-245, HTX-420

Previewed in the May 2000 Issue of CQ Magazine, and the Nov. 2000
Issue of QST Magazine.

$11.95 ea. + $1.50 S+H(One to unlimited)
(Check or money order only in U.S.Funds)
(Specify-radio-model)

> Any suggestion on a perfect or near perfect method to connect 2 scanners
> to 1 discone.

I use a MiniCircuits ZFSC-2-1, which is rated , from memory so it might
not be exact, 5~500MHz. I use two, one for my SW gear and it passes
the local NDB on 277KHz with no loss, and the other with my Pro2004 and
Pro34, go on an laugh but they work great, and back before the ECPA
went into effect it passed cell traffic with no noticiable loss.
I bought mine at a hamfeast for about $5 each. I have seen them
on Ebay for $12 or so. Be carefull that you get uits with the
correct connctors. Mine have BNC, but I did a quick search while
writting this and there are a lot with SMA connectors.

The next best bet is an active splitter from http://www.stridsberg.com/.

Be sure to use low loss coax to minimiz the system losses.
In an perfect world the best passive splitter will cut your signal
going to each radio in half. By reducing the loss before the splitter
you will really help pull in the weak signals.

> Many thanks!
The PCR1000 is botha great and lousy reciever.
Like you mention the front end is wide open.
That can be greatly helped by an inline low pass filter.
A friend who has one lives withen blocks of the local police
and sveral 15X-MHz paging transmitters. so he built a filter
that chopped out everthing above 80MHz. He is intersted in 6mtrs.
He has great SW performance. At the cost of lossing >80MHz.
I live about 15 miles from the closet VHF (other then hams)
and I had almost no bleed throught issues. Sometimes aircraft
overhead would create momentary problems.
The bandscope was nice, but since you can't use it with CW/SSB
it was far from perfect. Icoms software sucks. Peroid. There are great
3rd party programs.
The DSP unit is great, but the PCR1000 runs warm enough without the
additional heat. Stabilitly and sensitity are great. I could just
pick up the GOES west satellite on 46?MHz. And it is just over the
radio horizpon from me.
For most lsitening I preferr a "real" receiver and use a Kenwood
R2000,
or a Tandy DX398 for HF and my Pr02004 or Pro34 for VHF/UHF work.
The PCR1000 is great in one way. You can prebuild lists of frequencies

for specifc events. SssBig snow storm comming, load the road crew
list.
T-storm load the list for storm spotters. Big plane crash off shore,
load the CG list.
I traded mine for a recent vintage laptop for my wife. The guy that
I traded it to has offered to sell it, a nice newer Tandy Handheld
and a newwer laptop for $350. I will almost certainly go for it,
because
the PCR1000 is a nice useful tool. And I like the newer scanner which
will do trunking(and has a port so you can program it from a PC, but
it will operate stand alone!). And a newer laptop would be nice. But
for day in and
day out use I will stick to my "real" radios.
It was nice to take the PCR1000 to the woods with a PalmPilot and do a
sruvey from DC to light.
The PC noise issue can be greatly helped by the appropriate use of
feritte
cores. The more the better. Put them on every line into your PC, your
mouse and keyboard (they both have CPUs inside), printer, monitor,
audio
lines and maybe most important your coax lines. RF from the PC can
"creep"
up the coax shield to the antenna.
None friend has his PCR1000 mounted about 1000' away from his "shack".
He lives way out in the boonies, and has the PCR1000 in the barn. Runs
power/data/audio to/from the PCR1000 with a burried cable. With lots
of feritte cores on the line. He has a remote coax relay to switch
from
a Doty antenna (do a google on Doty Low Noise Antenna) and a simple
home
made diskcone. He has fantastic reception.

Brand New Pro-83 in factory blister pack
this unit is very small and uses only 2 "aa" batteries!
take this scanner anywhere with you.
FEATURES
• Compact—fits nicely in the hand
• Easy-to-read backlit screen and keypad
• Signal Stalker circuitry locks on to nearby signals like a frequency
counter
• Built-in NOAA receiver keeps you informed of current weather conditions
• Press Skywarn button to hear in-the-field storm spotters in your area
• 200-frequency memory
Frequency coverage
• 25-50MHz VHF-Lo
• 50-54MHz Ham
• 108-136.9875MHz Air
• 137-144MHz VHF Government
• 144-148MHz 2-meter Ham
• 148-174MHz VHF-Hi
• 162.4-162.55MHz WX
• AM CB
• 406-450MHz Government/70cm Ham
• 450-470MHz UHF-Lo
• 470-512MHz UHF-Hi
• 806-956MHz (except for cellular)

$85.00 plus $10.00 shipping cont. U.S.

Bob

Thanks all for the info! The local RS sure enough had them for $60. The sale runs all weekend... not just Friday morning.

I suggest everyone grab these up for $60 while you can. Awesome little scanner at a well below Ebay price.

Like I said. A one day sale. It will be on again and maybe they will close
them out at a good price like $39.99! That's about all they are worth.

Notice this is the same link as yours but the price went back up last night.

If you buy a scanner from another country not the US. May be the UK are they still cell blocked?
And if you can get a Uniden 250D 296D that is unblocked will it receive digital cell and cordless?
What country can a unblocked digital scanner be bought from? Can they be bought mail order? Any good mail order web sites. I am most interested in England Cuss I may be going there next year.

3584. Ham Radio Deluxe now with PCR1000 support!

Greetings, one and all!

The Ham Radio Deluxe Development Team is pleased to announce the release of Ham Radio Deluxe v3.1b as of today.

The major changes are the addition of Icom PCR1000 support, sat tracking for the FT-847, a re-vamped satellite tracking window - now called Ground Control - a bandscope (use a narrow filter and fast AGC for this option!) and Cabrillo format support for the logbook option. Lots of other detail work has been carried out, and you will find full details of changes since v3.0 at:

http://www.ham-radio.ch/forums/viewtopic.php?t=1725

Remember: Ham Radio Deluxe is FREEWARE - by radio amateurs for radio amateurs.

http://hrd.ham-radio.ch

and

http://www.ham-radio.ch/forums

for more info.

say it
will hurt security. The GAO says the same thing.

o Part 5: There is no part five.

o Part 6: Louis Freeh & The Creeping Police State

Basically, Louis Freeh is the anti-Christ leading us to Hell.
National ID cards are effectively being implemented without
needing to issue cards. The U.S. Government is trying to
monitor all phone calls and banking transactions, and have
all equipment worldwide designed for their monitoring. They
are bent on controlling the world to the point of there being
no crime left on the planet. Of course, democracy destroyed
is the direct result.

This publication advocates five major items:

o Passage of ProCode/SAFE legislation, allowing U.S. companies to
export unlimited strength cryptography, free from "Key Recovery".
Key Recovery means messages are no longer a secret, because the
Government has screwed around with it.

o Killing the CALEA legislation, which orders al

3590. Re: Nevada Scanmaster Airmaster antenna

data as needed; and whether there is a single centralized infrastruc-
ture, many decentralized infrastructures, or a collection of different
approaches.

All key-recovery systems require the existence of a highly sensitive and
highly-available secret key or collection of keys that must be maintained in a
secure manner over an extended time period. These systems must make decryption
information quickly accessible to law enforcement agencies without notice to
the key owners. These basic requirements make the problem of general key
recovery difficult and expensive - and potentially too insecure and too costly
for many applications and many users.

Attempts to force the widespread adoption of key-recovery encryption through
export controls, import or domestic use regulations, or international standards
should be considered in light of these factors. The public must carefully
consider the costs and benefits of embracing government-access key recovery
before imposing the new security risks and spending the huge investment
required (potentially many billions of dollars, in direct and indirect costs)
to deploy a global key recovery infrastructure.

and find target conversations
easily."

p126-127: Since the wiretap law barred the Bureau of Narcotics and
Dangerous Drugs from installing a tap on New York City's Grand Central
Station pay phones, bureau head John Ingersoll asked the NSA for help.

Within a few months the spy agency was sorting through all the
conversations it was already acquiring for general intelligence
purposes.

Of course, the technicians were required to acquire, monitor, and
discard a large number of calls made by people with no connection
with the cocaine business in South American cities.

But so pleased was Mr. Ingersoll with the tips he was getting from the
dragnet monitoring that he ultimately persuaded the NSA to monitor
simultaneously nineteen other U.S. communication hubs.

power in which an innocent person was led to commit a manufactured crime.
[NYT 4/7/1992, front page]

Guess what job he had for the two years the government repeatedly stroked
him to buy youth-oriented naked publications?

A children's school bus driver.

It's not a pretty thought, but legislators should consider that there is
a distinct category of child pornography possession that I would call
"Click-Crime".

People who come across child pornography, and for whatever wrong reason
save a copy of the picture. They didn't mean to become vile heinous
doomed-to-burn-in-hell creatures; it's just one of those things where people
make the wrong decisions when encountering something in the privacy of
their own home.

As the government monitors the Net closer, they will spot tens of
thousands of these people. They've already arrested hundreds of them.

* FBI sting nets over 200 arrests for child pornography
* 6/97 stat: 94 convictions, 104 "pending" convictions

It's not hard to spot them, and may I point out that it happens despite
free uncrackable encryption (PGP) being available worldwide for years.

Yeah, I know, it's heresy to try and suggest there's a category called
"child pornography light". Here are some sample cases of the broad base
of people involved:

* The New York Times, 3/6/97
* Minister Gets Probation in Pornography Case
*
* A Baptist minister who copied child pornography images off the
* Internet received three years' probation in exchange for his
* guilty plea to a reduced charge.
*
* He must pay a $1,000 fine, forfeit his home computer, not have
* any unsupervised contact with children under 17 and undergo
* counseling.
*
* The minister, 47, was arrested in January.
*

* Comp

It is technology driving the capabilities, it is our government using
them ruthlessly: without letting us vote on it.

Never before could someone walk up to you and number you by scanning
your fingerprints. A number that is yours and yours alone.

You have been numbered for all time.

No ID card needed once portable fingerprint scanners are deployed all over!

If the government suddenly ordered all citizens to be numbered with an
indelible invisible ink on their arms so they were permanently numbered;
so law enforcement could scan them at will: there would be a revolt.

Yet that is what is happening.

Fingerprints, scanned into a computer, are a number.

The number is inescapably yours.

Modern technology means they don't have to put the number on you, they can
read it off of you by minutely examining your body.

And: it is the NSA driving the fingerprint-rollout of the national ID card.

SECURITY INCIDENT REPORT, 7/3/96

OASYS SOURCE CODE:

38,696 PROPRIETARY LINES

This is a security incident report regarding the Internet (a public wire)
traffic of Salomon Brothers, which is monitored for security/compliance.

On Jul 3 1996, sara xxxxxxxxx of XXX-NJ emailed over the unprotected
Internet 38,696 lines of OASYS C++ code to vendor RogueWave for tech support

This code was clearly marked:

```
" This SOFTWARE is proprietary and confidential to \n"
" SALOMON BROTHERS INC. and may not be duplicated, \n"
" disclosed to third parties or used for any purpose \n"
" not expressly authorized by Salomon Brothers Inc.. \n"
" Any unauthorized use duplication or disclosure is \n"
" prohibited by law and will result in prosecution. \n";
```

SISS sincerely hopes noone was positioned to monitor this Internet
traffic, because they would have picked up the full transfer.

****
****
****

There are plenty of alternatives to

a) sending our proprietary code over the unprotected Internet
b) disclosing our code to a third party

The answer to a) is: don't do it. Get MD/S

I'm sure it did, sweetheart.
Say, shouldn't his show be cancelled?
After all -- there are STILL LIBERALS...

* "Can Unemployment Fall Further Without Setting Off Inflation?"
* By Richard W. Stevenson, The New York Times, September 7, 1996
*
* Six percent unemployment of the able-bodied population is the point where
* the Federal Reserve Board usually kicks in to raise interest rates. [the
* presidential campaigns are in their final stages between Dole and Clinton
* at this time]
*
* The Federal Reserve Board is expected to raise interest rates now that
* unemployment has reached 5.1 percent, so that the number of unemployed
* people will go up.
*
* SEVEN MILLION PEOPLE ARE CURRENTLY UNEMPLOYED.

Tom Tomorrow
#
Since the time in the 1970s when President Nixon ordered a nationwide
salary freeze to combat inflation, the Federal Reserve Board has
manipulated interest rates so that approximately 5 to 6 million people
are purposely kept unemployed at any given time.

What???

You mean the government purposely keeps millions and millions and millions
of people unemployed at any given time, yet put time limits on welfare?

I don't recall hearing that in the public debate.

Question: What will poor people who can't get
jobs do when their welfare runs out?
Keeping in mind that the government purposely
keeps approximately 5 to 6 million people unemployed.

Answer: Increasing crime, increasing tension and conflict with police
departments, some rioting, and politicians banging the Drum of
War to take stronger police and monitoring actions. "Law & Order"

Stronger police action mainly against black people.

This monitoring discrimination of blacks is demonstratedly nationwide.

Therefore, it is also a smoking gun for arguing
for retention of affirmative action programs.

You don'

Wittingly or unwittingly, this lack of
action assists large-scale spying against the individuals, businesses and
government and private organizations that innocently entrust their
communications to these companies.

ECHELON is a staggeringly comprehensive and highly secret global spying
system. Around the world there are networks of spy stations and spy
satellites which can intercept communications anywhere on the planet.

P18
Over the last 10 years a lot has been heard in New Zealand about the dangers
of 'bureaucratic capture', about senior officials controlling their ministers
rather than the other way around. The area of government activity described
in this book is the ultimate example of bureaucratic capture.

Politicians, whom the public has presumed will be monitoring the intelligence
organizations on their behalf, have been systematically denied the information
required to do that job.

If a democratic society wants to control its secret agencies, it is essential
that the public and politicians have the information and the will to do so.

P113
Good encryption systems, such as PGP, developed privately by American Phil
Zimmerman, are publicly available, although they are still used only by
relatively few people in the know.

The UKUSA agencies have been attempting to curb the spread of this technology,
which is a major threat to their influence, so fa

incorrect.

* Main Justice, by Jim McGee and Brian Duffy, 1996, ISBN 0-684-81135-9
*
* And it was not just the FBI. The CIA, the Pentagon and the National
* Security Agency [Military] had all turned their intelligence-gathering
* capabilities on American citizens.

And who was targeted?

Qubilah Shabazz, second oldest daughter of Malcom X.

* Both Sides in Shabazz Case Say Tapes Prove Their Point
* by Don Terry, The New York Times, April 1995
*
* Ms. Shabazz was indicted on Jan 11 on nine counts of using the telephones
* and travelling across state lines to hire a hit man to kill Mr. Farrakhan.
* Eight of the counts involved taped telephone calls between Ms. Shabazz and
* Mr. Fitzpatrick, a cocaine addict who faces a possible five-year prison
* sentence in an unrelated drug case. [read: blackmailed]
*
* Of the 40 recorded conversations, 38 were initiated by Mr. Fitzpatrick.
* "Most of the conversations during these calls consisted primarily of
* remarks by Mr. Fitzpatrick." said defense lawyer William M. Kunstler.
* [Kunstler was a silvered haired angel even while still on Earth]
*
* The Government had a statement initialed from Ms. Shabazz.
*
* "I jokingly asked Fitzpatrick if he would kill Louis Farrakhan."
*
* The statement was written by two FBI agents, who did not advise her of
* her right to remain silent and have a lawyer present.
*
* Federal officials in Washington and Minneapolis say Ms. Shabazz was
* 'obsessed' with killing Mr. Farrakhan, and they had enough on her to
* put her away for 90 years.
*
* Mr. Fitzpatrick prodded her: "I'm willing to do whatever you want me to
* do, this feels righteous." Ms. Shabazz replied "I don't really know
* what you're asking me." Mr. Fitzpatrick later told her "I'm just going
* to proceed."

Qubilah Shabazz was 4 when she saw her father die in a hail of bullets in
1965. She h

*
* A Nynex spokesman said today that they were offering to pay his complete
* four-year tutition bill, and that the offer was unconditional.

In Washington, D.C., police aggressively hassle motorists to give them
permission to search their vehicles. On C-SPAN, U.S. Attorney Eric Holder
further states that if a member of the car makes "furtive gestures" the
police may search the car.

Question: If sweating at the airport can get you a deep probing anal
search by a manly security guard, what "furtive gesture"
will get your car searched when the police stop you and
shine a flashlight in your face?

Answer: Blinking.

Point: They are almost not bothering to pretend.

Law enforcement hysteria.

The Miranda ruling by the 1966 Supreme Court requires the police inform
criminal suspects of their legal rights before questioning them.

It is classical poetry, even when recited by Dragnet's Joe Friday.

* Justice Department report: "Excerpt From the Report to Meese", NYT, 1/22/87
*
* The Miranda decision reflects a willful disregard of the authoritative
* sources of law. The decision flies in the face of the principals of
* constitutional government and impairs the ability of government to
* safeguard citizens from crime.
*
* It is difficult to conceive of a legislature enacting it into law, either.
*
* It has caused specific evils and is a discredited attempt at criminal
* jurisprudence. Overturning it would be t

foreign government or international terrorist organization
* EVEN WHEN THE TARGET IS NOT SUSPECTED OF COMMITTING ANY CRIME.
*
* The FISA court operates outside the normal constitutional standards for
* searches and seizures. Non-government personnel are not allowed.
* The courts files cannot be publicly reviewed.
*
* The average U.S. citizen might reasonably assume use of this court
* is at the least: unusual.
*
* It is not. In fact, in the United States today it is increasingly
* common. In 1994, federal courts authorized more wiretaps for
* intelligence-gathering and national security purposes than they
* did to investigate ordinary federal crimes.
*
* The review process to prevent legal and factual errors is virtually
* non-existent.
*
* And the FISA system's courtroom advocacy is monumentally one-sided.
*
* The court has never formally rejected an application. Not once.
*
* For the first time in modern U.S. history, the Congress had
* institutionalized a process for physical searches outside of
* Fourth Amendment standards.
*
* Not even Congress' intelligence oversight committees review these
* special cases on a regular basis.

Mini-recap:

o Congress voted into existence a court that bypasses our normal
Fourth Amendment constitutional rights. Poof they're gone.

o Congressional oversite is weak.

Such a special court should be subject to the
highest standard of continual scrutiny: it is not.

! The New York Times, December 29, 19??, by David Burnham
!
! Because the National Security Agency is actively involved in the
! design [of Key Recovery cryptography], the agency wi

for
fighting the drug war had grown from the hundreds into the thousands.

Even when Noel Gayler took over as Director of the NSA in August 1969,
NSA personnel waited a year or so before briefing even him on the NSA
watch list program.

P381-382: NSA Director General Allen testified to Congress that there is no
statute that prevents the NSA from interception of domestic communications.
Asked whether he was concerned about the legality of expanding greatly its
targeting of American citizens, the NSA replied: "Legality? That particular
aspect didn't enter into the discussions."

P459: Innocent Americans - people neither targeted nor watch-listed - are
scooped up into the NSA's giant vacuum cleaner. This happens with
considerable frequency because of the way in which names and phrases are
jam-packed into the computers. Even though NSA's specialized supercomputers
have enormous storage capacities, the tremendous number of targets forces
the Agency to squeeze the watch lists together as tightly as possible.

P462-465: Its power to eavesdrop, the NSA had always insisted, came under no
earthly laws but rather emanated from some celestial

of as many as eight A.T.F. agents.

o The F.B.I. cut off all utilities and sanitation. Government loudspeakers blared nonstop with such sounds as jet planes, and the cries of rabbits being slaughtered. [I have three loving bunnies who have free roam inside my apartment: the Feds are sick puppies. What would the public have thought if it were dying cats or dogs?] Tanks fired percussion grenades. Stadium lights kept the house illuminated around the clock.

Helicopters flew overhead. This does not contribute to trust in the government negotiators, nor does it help the Koreshians make rational decisions. Like walking out unarmed before a Federal army, using tanks from the U.S. Defense Dept. [It should still be called the War Dept.]

o C.S. gas is never supposed to be used inside a building. Used inside, it can create fires, and it can produce cyanide, which can immobilize and kill. The manufacturer of C.S. gas, Aldridge Chemicals emphasized that this product was intended for outdoor riot control only; it was not supposed to be a weapon.

In fact, the company says it stopped selling C.S. to Israel in 1988 because the government there was shooting the chemical into buildings occupied by Palestinians. Many of those people subjected to the gas became ill, and others died from the exposure in enclosed quarters. You would think Israelites would be sensitive to deadly gassing of people in enclosed areas. [Gas use as reported by Amnesty International's Chemical Report on C.S. Agen

for the crypto-crime provision of this bill too.

i.e. Cypherpunk Tim May's succinct complaint "It's wrong when I'm a felon under an ever increasing number of laws".

Because government will lean on you with it:

In the AA BBS case, a company delivering raunchy porn or just nude pictures, the government threat included prosecuting the person's wife too. Just like it could in the private home raid scenario above. Only now with a new club to swing. It was the main reason the husband agreed to plead guilty. He wouldn't risk his wife to a trial just to protect his own rights.

The government will use every available tool to menace crypto users.

NYT, quoting a Supreme Court member on police use of legislative language: "They will take it as far as they can."

They have absolutely no scruples, often.

In the AA BBS case, the Feds PURPOSELY PULLED graphics legal in California into hick Tennessee, and succeeded in jailing the CA owner.

Wow. The Feds must have been drooling when Congress passed the CDA.

In addition, they sent UNSOLICITED real child porno to the owner, and charged him with possession of child porno.

No code of ethics or conduct.

No scruples.

Predatory pinheads.

"The Emperor Wears No Clothes", by Jack Herer, 1992, ISBN 1-878125-00-1
#
FBI Director J. Edgar Hoover monitored Martin Luther King's sex life
for five years and, in the MOST SICK situation, deliberately drove
actress Jean Seburg to suicide with terrible ongoing federal letters
and information fed to tabloids exposing her pregnancies and private
dates with Negroes.

That's an overt use. Worse than that:

They can insidiously enter your life: Qubilah Shabazz was seduced.
Like Bill Murray elaborately seducing Andie MacDowell in 'Groundhog Day'
they can enter your life in an almost unconscious manner. Informants
manage to connect to criminals by running into them in the right place,
saying the right things.

It's the 1990s now:
Only, as we have seen, informants connecting to criminals means the FBI
targeting Randy Weaver WHO HAD NO CRIMINAL RECORD for blackmail. Anyone
can be made a criminal in the monitoring net. Or seduced into a "crime",
like Qubilah Shabazz. Without you realizing it, the person you met was
taking advantage of knowing all your most passionate likes and dislikes.

The first one is where an ex-worker ("Dumb") asks a current employee for something proprietary, in this case written by the ex-co-worker, and the current employee ("Dumber") gives it to them.

It happened again and again and again at all sites I've monitored.

They fired her.

One of the more unusual Dumb-and-Dumber incidents was when a new hiree who was quite happy with her new job - told all her friends in email - then sent an email "Subject: For your eyes only" into dttus.com, with an Excel spreadsheet attached.

It contained detailed compensation numbers for an entire trading desk.

Technically it wasn't a Dumb-and-Dumber, more like a Dumber-to-Luckless, because the recipient didn't request it.

Anyway, they fired her.

And Deloitte & Touche fired the recipient!!!

I guess they hold their people to very high standards: if you receive something proprietary of another company's,

different situation than Military defense
of our borders against a FOREIGN enemy.

I wonder how it all gets into the country. It's as if it has its own special
unmonitored border crossing, where it can drive truck after truck through.

And what happens when you bang the drum of hysteria long enough?

Bizarre distortions in our social fabric:
widespread fear, loathing and suspicion.

And: censorship.

Tom Petty wins MTV's highest video award, but they always censored the
word 'joint' in the video! MTV, the spirit of Rock'N'Roll...not.

Maybe they're just doing what they can: they played the word BACKWORDS
in the video...a British band was on trial in the U.S. a few years ago
charged with putting backward-playing lyrics on their album (acquitted).

But it's okay if Jay Leno shows a Clinton look-alike smoking a bong.

Drug addicts can't get clean needles, furthering the AIDS epidemic.

```
# "AIDS VIRUS FEEDS ON FEDERAL NEEDLE POLICY"
# By Steven Wishnia, High Times Magazine, July 1997
#
# No federal action is planned to end the ban on federal funding for needle
# exchange programs by the Clinton Administration, despite mounting scienti-
# fic evidence that shooting up with unclean needles is the second most
# common risk behavior (40%) for HIV infection.
#
# It is a very cost-effective way of saving lives.
#
# SIX federally funded studies done between 1991 to 1995 concluded that
# needle exchange programs reduce HIV transmission and do not encourage
# drug use.
#
# Someone who spoke with Senator Arlene Spector said that "Noone's willing
# to take the political step."
#
# Instead, the biggest federal funding for AIDS prevention in 1996 went to
# programs urging teenagers to abstain from sex ["have sex ou

quietly was brought into existence through
* presidential decree.
*
* The birth of the National Security Agency on that day so long ago
* heralded the beginning of the world's most sophisticated and all
* encompassing surveillance system, and the beginnings of the greatest
* threat to individual liberty and freedom not only in Australia, but
* the entire planet will ever see.
*
* The NSA grew out of the post war "Signals Intelligence" section of the
* U.S. War Department. It is unique amongst government organizations in
* America, and indeed most other countries, in that there are NO specified
* or defined limits to its powers.
*
* The NSA can (and does) do just about whatever it wants, whenever, and
* wherever it wants. Although little known in both the U.S. and elsewhere,
* the NSA is quite literally the most powerful organization in the world.
*
* Not limited by any law, and answerable only to the U.S. National Security
* Council through COMSEC, the NSA now controls an information and
* surveillance network around the globe that even Orwell, in his novel
* "1984", could not have imagined.
*
* Most people believe that the current "computer age" grew out of either
* the space program or the nuclear weapons race; it did not.
*
* ALL significant advances in computer technology over the last thirty
* years, from the very beginnings of IBM, through to the super computers
* of today, have been for the NSA. In fact, the world's very first super
* computer, the awe-inspiring CRAY, was built to specification for the
* NSA, and installed in their headquarters in 1976.
*
* The entire twentieth century of development of computer technology has
* been the result of the NSA's unquenchable thirst for ever bigger, ever
* faster machines on which to collect, collate, and cross-reference data
* on

a British cybernetician, and a 'research philosopher'.

In 1970, a Dr. Salvador Allende became president of Chile.

He was a democratically elected Marxist, with 37% of the vote.

Allende immediately embarked on a massive nationalization of
the banks and major companies/industries in Chile.

In 1971, Stafford Beer began a project for Allende
to put the Chilean economy under cybernetic control.

As far as I know, this is the only documented instance of someone
attempting this; deploying cybernetic controls nationwide.

* "Brain of the Firm", Stafford Beer, 1986, ISBN 0 471 27687 1
*
* All of this involved a massive and continuing exercise in (what I should
* call, in the original World War II sense) operational research. That is
* exactly what it was: research by highly qualified interdisciplinary teams,
* into operations, namely production companies, with the prospect of
* discovering models and sets of measures.
*
* We needed a group who understood the operational research techniques of
* data capt

After buying one, IMO their biggest shortcomming is the antenna.
What do you expect from a 5" antenna for performance? I hooked
it up to my discone and it holds its own against my BC 895. With
that being said it seems to work fairly well on state police and LEA
freqs. which is all I care about. It'll stay in my van, and if it gets
stolen, for 60$ I wont cry too hard.

3647. New 6.25kHz and 7.5kHz Channel Spacing -- Questions???

Newsgroup: rec.radio.scanner
Date: 2004-11-28 03:39:48 UTC
From: chet_morton@hotmail.com
Message-ID: <5c8519e5.0411271939.2388c492@posting.google.com>
Source record: 16662

I am thinking about updating my BC245XLT, and am considering the Uniden 250D (or 250DID). After searching the web and several back issues of Monitoring Times, I've read bits and pieces about the new federally mandated channel spacing for VHF (7.5 kHz) and UHF (6.25 kHz). After reading through the pdf manual for the 250D, it looks like that scanner will do 7.5 but not 6.25 kHz steps.

How much will this limitation affect my scanning ability in the near future?

Can anyone point me to some more information on this? I've tried googling it, but I didn't come up with anything very useful. I've seen a couple of references to it in MT, but I must have missed any articles about it -- I have a few years of back issues, so if anyone could give me a reference I could dig it out.

I never said he was.

He did have a few things going for him though:
1. college educated (wuth letters, etc)
2. published technical author
3. actual accomplishments (both esoteric and impiracle).

there aren't many in here that can claim that (I sure as hell can't, but I am working on it).

Most of the rest (like toomanyradios, FRANKBURNS, SouthDakotaradio, john mackey, et al) just take a bullshit storm and have NO accomplishments to their names. They talk a big line, make a big noise, and in the end, they signify NOTHING in this life.

The only acknowledgement they get from me is as member of speacies, and no more. until they grow up, they'll be treated like fools and little children 9and thats how I view them).

This feud between them and Bill cheek goes back almost 20 years (I know, I witnessed the start of it). it went round and round on fidonet and round and round on services such as genie, compuserv and prodigy and eventually hit the rest of the internet (al la usenet) in the late 1980's.

Some of the names have changed, but most of the games have remained the same. they lost, they still lose and they will always lose.

As for bill, I hate to think that his final months of life were of suffering (but they were, and some of it for no damned good reason at that). He (like many others) fought to the end for his point of view and even now, flakes such as the above named try to mitigate that into obscurity.

An old lesson: one should be careful not to speak ill of the dead. they tend to have a bad habit of coming back to bite you in the ass.

nuff said.

> 2. published technical author
> 3. actual accomplishments (both esoteric and impiracle).

So then why could he never produce the name of a college he graduated from?
(really nice "wuth letters" - aren't you SMART!!)

He was published by hobbyist magazines, hardly considered "technical"
publications.

His "actual accomplishments" were what?
1. getting run out of Colorado
2. getting kicked off of his cable company ISP for unacceptable behaviour
(after warnings!!)
3. getting kicked off of Peter Law's "Scan-L" mail list for unacceptable
behaviour
4. running afoul of the law with federal charges
5. smoking for most of his life & not carrying health insurance, leaving his
family to have to deal with his
medical bills to fight cancer.
6. faking his death to collect insurance & scamming donations from
individuals, only to later die in Vegas.

Does anyone know what airline/air entity uses callsign "cactus"?
It is heard on civilian air freqs.

Thanks in advance,

phil

It seems to have been used or is in current use by America West Airlines.

Anyone else have any idea?

This may not really be a good idea.
The aircraft band is a long way from the 2m bands and you will be using the antenna well outside its designed frequency band. Depending on the precise construction of the antenna, it may receive no better than a damp piece of string. My own 2m/70cms co-linear (well sited, outside) actually receives less than a discone in the loft on airband. No contest on 2m or 70cms though, the co-linear is far better.

And without the rubber, the flex and bending of the antenna gets directly transferred to the sma connector. You'll be wishing you'd had some sort of support before long, as the rig is in the shop with a broken sma connector. Stephens connectors work well, I've had one for years, and think it was one of the smarter accessories I've purchased. (Ft-50)

>> Hugh Duff VA3TO Toronto

Don't be misled: you are not qualified or capable of making any legitimate assertions about anyone or anything aside from your fat duff, and even then, there is *ample* room for doubt since you sit on it so much.

You might consider spraying some Windex on that little window in your lower belly......the one you look out of a lot. And get off your duff, Duff, and post something worthwhile.

Or pack sand.........

Dear Music Lovers,

I was going to buy my own commercial FM radio station and changed my mind. It feels like only rich people can buy radio stations anymore.

So I decided to start "Radio Free Colorado".

Radio Free Colorado's achievement is:

1. We play popular music you don't hear on the radio anymore since "Corporate America" (companies like Caelr lneahnc Mmconusniot) took over control of the radio broadcast industry and companies like nosoo took over control of the music recording/distribution industry. These corporations submit "playlists" to over 90% of the commercial radio stations in the U.S.

A playlist is just that: if a song isn't on the list, it doesn't get played.

2. To play carefully selected, current multi-genre popular music (no "Bratyen" or "Ashell" type artists - ever!) -- but we think Coldplay, Modest Mouse and Norah Jones are just fine.

Radio Free Colorado plays a lot of music you probably haven't heard in such a long time and have since forgotten how much you love. It's such a thrill when a forgotten song comes on and you say "Hey, I love this song" and all your fond memories of it come rushing back to you.

Radio Free Colorado is NOT beholden to anyone. There is no pre-approved "playlist", no one tells us what we can't play. Listeners can, however make song requests and if we have it we will play it.

Radio Free Colorado streams music LIVE over the Internet using a high-fidelity 128 kbps MP3 stream. We use professional and modified sound processing equipment to achieve a sound quality which we believe is superior to virtually all other 128 kbps streams.

Any computer with a DSL, Cable Modem (or faster) Internet connection that has a download speed capacity of at least 128 kbps can tune in.

No streams slower than 128 kbps are available.

Virtually all MP3 music players are capable of receiving live MP3 music streams over the Internet. Any music player compatible with streaming MP3 audio can receive Radio Free Colorado's broadcast.

Our MP3 broadcast stream is compatible with virtually all music software programs and works with PC's running Windows, Apple computers running OS X and other machines running Linux or Unix.

Our "Genre" (what kind of music we play) is VERY diverse. We play Modern/Classic Rock, Progressive Rock, Alternative (Modern and Retro), Pop, Billboard Classics, and Top Radio Hits from the 60's, 70's, 80's and 90's. We also play some Ambient/Instrumentals. No Rap or Hip-Hop, Classical, Jazz or Swing.

Radio Free Colorado is located at the website:

http://www.boomspeed.com/garyburke/radiofreecolorado/Radio_Free_Colorado.html

While you are listening to our stream, you will see the last 10 songs played along with complete information listing the Artist, Album Name and of course the Song Name.

To contact Radio Free Colorado during our broadcast for song suggestions, requests, questions, etc. you may:

1. Use our AIM address: radiofreeco
2. Use our e-mail: garyburke@boomspeed.com

3683. Pro-83 question

Newsgroup: rec.radio.scanner
Date: 2004-11-29 02:26:27 UTC
From: kscoinhutch@aol.com
Message-ID: <20041128212627.08281.00001584@mb-m04.aol.com>
Source record: 16697

I bought a new Pro-83 and the signal stalker won't detect a cordless phone beyond a few inches away with the stock antenna. A telescopic antenna extended to the correct length only improves the range by a few more inches. A couple feet away from my 900 Mhz analog cordless phone's base unit will not detect at all, nearly the same with my neighbor's 43 Mhz lowband cordless.

What kind of signal stalker performance are the rest of you Pro-83 owners getting? I'm wondering if I have a bad unit.

You should check out the BC-246T, it is the same size as the 83, follows LTR,
Motorola and EDACS analog voice systems. It also has programmable bank
sizes so big and small trunked systems don't tie up your channels
with empty frequencies.

I have a Pro 91 that I am looking to get rid of if anyone is interested before
I list it on ebay. Excellent condition. Thanks nascar24rulz@aol.com

The stock antenna is almost useless.

What frequency is the cordless on? I use a Active Hunter (probably
WORSE than the stock antenna, but better at being stealthy) but I can
pick up my cordless from about 10 feet away. Make sure you're in stalk
mode, and not in stalk BAND (i.e. UHF) mode.

>A telescopic antenna extended to the correct length only improves the range by a few more
inches.

A telescopic antenna on the cordless phone or scanner?

>What kind of signal stalker performance are the rest of you Pro-83 owners
>getting? I'm wondering if I have a bad unit.

Keep in mind, these cordless phones are EXTREMELY low power - I'm not
sure, but I'm guessing in the milliwatts.

I've picked up a handheld 5 watt VHF radio from over 300 feet.

YES THE SCANMASTER AIRBAND DOUBLE DISCONE WORKS WELL.

But you could make one for a few pounds.

Dual or Tri-band band amateur antennas have internal matching networks
which can give poor results when used outside their intendend
frequency ranges.

They can work reasonably well upto approx. +/- 20% outside their
design frequencies (plus a few odd harmonic resonses), which may be OK
for PMR monitoring. But it will not provide good coverage of the whole
of the UHF MIL air band.

I use a Double discone and can monitor re-broadcast satcom traffic in
the UHF Mil band, so I think it is good enough.....

Instead of a mechanical rotator system you need to look at the electronic
rotating systems. There is a design out that takes 4 antennas and
electronically rotates them and gives a direction.

I've been looking for a good wideband antenna for my Icom R75 and Uniden BC796D. I live in an appartment on the 3rd floor, the antenna would be mounted on the patio railing. The AOR SA7000 seems to be the best bet for my situation. I would like to know if anyone has any experience with this antenna before i lay down $200 for it.

Thanks

I suppose it will 'work' for HF, however it is only 6' long. Therefore, it will not 'work' very well for HF.

Each antenna has a PIN diode switch at its base- the diodes are each turned
on and off by a sequential clock.

I compared a Yaesu FT-840 with a 70' outdoor random wire against my AOR AR8600MkII with the SA7000 mounted 25' above ground outside. In a side-by side comparison, the 8600/SA7000 system picked up just as much on HF as the FT-840/wire system, and did very well in the AM broadcast band, too. The FT-840 had better selectivity, but the signal strength between the two was comparable. Since I, too, was looking for a single antenna solution, I took down the wire and rely solely on the SA7000 for all MF/HF/VHF/UHF work with my AR8600. I would expect your R75 to work even better on HF, since the AR8600 isn't the best HF receiver around.

For HF work, you might also consider a tabletop active loop like the LA350 in an apartment situation. Probably more effective than the SA7000 on HF, and you don't even have to mount it outside. OTOH, if you need to cover VHF/UHF with the same antenna, obviously the loop wouldn't be a good choice. I think the SA7000 is a good compromise if you have a very sensitive receiver, but realize it will not give you outstanding HF performance. Your results may vary.

- Doug

P.S. If you get the SA7000, don't try to use a standard UHF connector on it...although it looks the same, the threads are slightly different. You have to use the supplied cable assembly (unless you can find a connector with the correct thread).

3703. Who has experienced a lightning strike?

Newsgroup: rec.radio.scanner
Date: 2004-11-30 10:18:12 UTC
From: Sven <jemj8i502@sneakemail.com>
Message-ID: <ENXqd.5149$kt6.340105@phobos.telenet-ops.be>
Source record: 16567

Hi,

I am relatively new in the radio-amateur world and last summer we had a lot of thunder storms that passed by.

So my concern grew as to what will happen if lightning struck my antennas?

What is the best way to safeguard your equipment and house?

There are these lightning protectors that have a ground. But can they really direct all the volts to the ground?
How big should your ground cable be? Where to put the protector? As close as possible to the antenna?
Woulden't I "attrack" lightning that way by providing and easy path in the area?

There are so much questions and its very hard to find a conclusive answer.
But I am sure that "proffesional" radio-operators should know.

Is there maybe a website that gives a clear answer?

thanks for your help.

Hi,

My geographical location is not very "radio-reception" optimal so I am wondering what can improve my reception. I live relatively in a mild depression surrounded by many trees.

I currently have an ICOM PCR-1000 and a Bearcat 180XL. On my chimney (highest point) I have a "stick" antenna (http://www.scanman.nl/N_art_235.html) connected via a 24 meter RG-58 coax cable.

I must say when I use the Bearcat it seems to have better reception than the ICOM.

So now I am looking to improve my reception. I generally listen in the 118-500 Mhz ranges but nevertheless I would like to have a broad spectrum.

What would increase my reception and in what order would it be the most beneficial?

New antenna ? (Diamond Discone?, active antenna?)

Amplifier?

New cable?

New connectors?

Etc?

Thanks,

Sven

To identify the callsign of any airline and/or cargo carrier, just go to the website below. Then, just click on "callsign" after you get there.

http://airlinecodes.co.uk

To see the present location of airline flights that you happen to hear plus the flight routing and aircraft type, go to the website below. This site just lists the major airlines. There's a few other sites that do this too, but this one is my favorite.

http://flightview.com

The website below doesn't actually show the location of the airline flight as in the previous site, but it does say the departure city, arrival city, aircraft type plus a bit more info. This site lists all of the airline companies and cargo carriers.

http://flightarrivals.com

Probably no better than any other wideband antenna, and probably not quite as well as an optimized VHF/UHF scanner antenna like the Scantenna or a discone. Remember, we're talking about a passive antenna that's supposed to cover 30 kHz to 2 GHz with only two vertical elements and no radials. Unfortunately, I wasn't able to do any side-by-side comparisons with my discone due to the mounting/cabling limitations of my setup.

> What is the best way to safeguard your equipment and house?

Unplug your antenna and unplug all your equipment from the mains before a storm.

As for websites, here is a link to a three-part .pdf article on how to protect radio equipment during storms. It's aimed more towards amateur radio operators, but I'm sure much of the info would be helpful to anyone in the radio monitoring hobby as well.

http://www.arrl.org/tis/info/pdf/0206056.pdf
http://www.arrl.org/tis/info/pdf/0207048.pdf
http://www.arrl.org/tis/info/pdf/0208053.pdf

Good luck and be safe,

Jackie

>What is the best way to safeguard your equipment and house?

A lightning protector located at ther nearest point that your down
lead enters your home.
>
>There are these lightning protectors that have a ground. But can they really
>direct all the volts to the ground?

It isn't the volts, it's the current. Properly installed then the odds
become in your favor. Lightning is an act of God and it's going to do
what it wants to do.

>How big should your ground cable be?

In my case I go with a number 8 bare copper.

> Where to put the protector? As close as
>possible to the antenna?

See above.

>Woulden't I "attrack" lightning that way by providing and easy path in the
>area?

The "path" is already there. You would be attempting to divert the
energy.

>

yet another cheap shot on your part.
hey, my fingers are faster than other things here, so expect a few typos.
as for the institution.. well, he didn't discuss it (and why should he
have?).

However, the wall in his shack certainly did have a lot of "papers" on it...

>
> He was published by hobbyist magazines, hardly considered "technical"
> publications.

heh. interesting you should take that POV.
gee? ever hear of COMMTronics Engineering?

then there are these: scanner report, world radio (just 2 I could find
immediately).

his published works are still available on Amazon.com (among others).

>
> His "actual accomplishments" were what?
> 1. getting run out of Colorado
oh really? explain...

> 2. getting kicked off of his cable company ISP for unacceptable behaviour
news to me? which cable ISP (oh yeah, where's the e-mail he got, eh?)?

> (after warnings!!)
> 3. getting kicked off of Peter Law's "Scan-L" mail list for unacceptable
> behaviour
rewriting history?
it was John Mackey that got shitcanned from there (and a few other places as
well).

> 4. running afoul of the law with federal charges
pardon? charges were filed, but never adjudicated (in other words, no
convictions). since they couldn't go that route, they simply litigated him
into obscurity and eventually, contributed to his death (he died as a
direct result of cancer, but that level of harassment didn't help).

> 5. smoking for most of his life & not carrying health insurance, leaving
> his family to have to deal with his
> medical bills to fight cancer.
smoking I can believe, as for the health insurance issue, I am afraid you
are going to have to supply evidence to support that contention.

> 6. faking his death to collect insurance & scamming donations from
> individuals, only to later die in Vegas.
Negative on that Houston. that was one of the many rumors started by
Lisa Smith on 2003-11-03 at 01:56:16.0.
it was later proven to be false (seems there are many people with the name
bill cheek, including a college professor in southern California).

besides, from where I sit, it appears you have a real beef with folks who
don't share your particular view of things (me among them). I'd hate to be
in your shoes right now. you must have an awful lot of enemies...

My first suggestion would be to try a good discone antenna, assuming your existing cable and connectors are in good shape.

A discone is not the worst choice.
But a Diamond X-5000 is by far better.
For sure a good coax cable will help much too. The RG58 is nearly the
worst cable for VHF/UHF. Get at least RG-213 coax or -even better-
AirComm-Plus. This will increase gain drastically by 2-3 S-unit wich is
up to 10 times more of signal voltage reaching yot receiver.
Use N-Connectors on the cable and get a short adaptor cable to connect
to your receiver.

Hi,

What is the range of the Diamond X-5000?

In what way does it outperform a discone?

Most people promote the discone, but I am very interested in the Diamond X-5000.

See the specs here:
http://www.rigpix.com/antennas/diamond_x5000.htm

This antenna works _very_ well in receiving between the specified
TX-frequencies too!

> In what way does it outperform a discone?

A discone has up to only 2dBi or less gain over its frequency coverage.
I met a ham who is specialised in VHF/UHF some weeks ago. He tried all
sorts of discones and verticals and stayed on the X-5000. It has as much
gain as a 3-6-element yagi or LDPA on the advantage beeing
omnidirectional, not needing a rotator.

In case you don't need/ want to receive above 500Mhz the X-50 should do
a fine job too.

>
> Most people promote the discone, but I am very interested in the Diamond
> X-5000.
>

I'm also saving some money to get one soon hopefully.
I have a good quality diamond discone too for years and I will do a
side-by-side comparison when I get the X-5000 in next spring.

So the range is identical to a discone? 50-1300 MHz ? I don't really
understand the band calculations.

The 1:3 SWR bandwidth of the X-5000 is app. 80 to 1300Mhz.
The 23cm band is in the 1.2 Gigahertz range where the X-5000 works as a
5/8 antenna.

Used to be "into" Scanners/CBs several years back (7-8 years ago or so).

Had a sweet Pro-2004 with a few mods. It couldn't pick up my locals since they switched to 800Mhz "Trunked" , so I lost interest.

Just stuck my toe back into the hobby recently and WOW has Tech took off! (No surprise really).

What are some good websites to get a crash course on Trunking and Digital and all the up to date Tech on the Scanning hobby ??

How do I find out which type Trunking system my County is using ??

TIA!!

I don't know about the scanners you listed, but I see the BC246T will do
6.25 KHz spacing. Won't help you if you need digital, but it's a great
scanner for everything else.

It says it does pick up trunked Motorola and Erickson just like the 95.
Don't know about others as all I was interested in was Police. You can see
them at the link here, or just look at a search engine. Several places were
selling them. I got the impression they are a new item as several places
mention that they had just started shipping them. I'm sure the Uniden site
would give all the specs too.

Best place to get a working - if not latest model - scanner cheap is eBay.
Prices on older models that are just fine for many places are quite low.

Hi Folks,

I'm going to buy my brother a radio scanner for his christmas but am unsure
on which one to get.

I would like to get one with a wide input range (maybe up to 2000Mhz) and
with no gaps. It should also
have an output port to PC so that he can pick up APT images etc.

I have no idea what is good and what is not - there do appear to be a lot of
RadioShack 2006..... etc
models kicking around on ebay - are these any good? Someone suggested a
YAESU UR-5000 but from
what I have seen this looks very complicated and quite pricey!

Any input much appreciated.

John.

Yes, but it doesn't continuously display a received frequency... With the Signal stalker mode, it locks onto a frequency, and stays there until the signal is lost, even if it isn't exactly the correct frequency for the transmission. In the hacked Frequency counter mode, the frequency display will vary, so you can get a better idea of what the actual frequency is, as the "counter" in the scanner doesn't have perfect accuracy.

Not sure if you will completely follow my description, it's not the greatest... Try the hack, you'll understand...

It's not the same... Signal Stalker doesn't always lock onto the correct frequency a transmission is coming in on, nor does it continuous display incoming frequencies. I've had it pick up signals on frequencies that were up to +/- 10KHz off of the actual transmit frequency. In the mode I describe, the scanner shows a varying frequency readout. This is unlike the Signal Stalker mode which just grabs the signal on whatever frequency, correct or not, and stays there until the signal is lost. You can get a more accurate idea of the actual (correct) frequency in the "counter" mode.

And as I said over in A.B.R-S, I don't subscribe the stupid Yahoo! Group, so I didn't see any posting made by whoever it is that you reference below... If he found it before me, Good For Him! I posted here because I hadn't seen anybody else post anything in reference to any sort of Keyboard Hacks. Credit Is due to myself, as I spent the time (hours mind you) trying out every combination I could come up with, and cataloging them in my list. They weren't copied from anywhere or anyone, thank you.

Have a great day!

Adding any adaptor would seem to significantly move the radiating
portion of the antenna further away from the "ground plane" of the radio.
This should affect the operation of the antenna adversely. Comments?

Bob

Adding an adapter to a Transmission Line will have no effect, except to
add insertion loss of the adapter. Adding an adapter to the antenna
itself MAY cause the antenna charactoristics to change. Most SMA and BNC
connecters are used in Transmission Lines, and not antennas themselves.
The OP doesn't really explain where the adapter is to be used. Most
small handheld devices with external antenna connections have those
connection in the Transmission Line and not in the antenna itself.

Well, NOAA weather is just your basic weather stuff. Basically a "service
search" with weather alert. Doesn't have S.A.M.E. alert, so it's not really
anything special...

About the only selling point the scanner has is the Signal Stalker feature.
I do like the feature. Receives quite well, even from a good distance away.
Distance depends on the transmitted signal's strength of course. As a
example, I can detect the local PD repeater broadcasts with the S.S. at a
distance of well over 3 miles away from the tower. If I recall correctly,
they transmit at about 50-watts. On the other hand, Taco Bell drive through
(tested just for contrast purposes,) I had to be within 20- to 25-feet of
order box. Of course, they only transmit in the milliwatts, so that's
expected...

Oh, and if you are prone to overload by pagers, you will have to spend a few
minutes of your time locking them out as they pop up. Doesn't matter where
I am around here, the unit constantly picked up those damn pagers in the
S.S. mode! Once I got them locked out, however, the S.S. feature works

flawlessly...

My opinion. Well worth the $60 price tag, and not a bad buy at the $120 price tag.

> This should affect the operation of the antenna adversely. Comments?

What makes you think the effect should be adverse? When you consider all the different radios that a given antenna could be connected to, the change from radio to radio is going to be far greater than what a 3/8" adapter is going to do (consider its electrical length at 2m...). In fact, I would hope that most HT antennas weren't meant to be used with counterpoises, but now that I think about it, I don't really know whether or not that's the case. Anyone?

I mean... the radiation pattern of a wire cut 'to length' stuck into a BNC connector on the top of an HT is going to be very seriously distorted relative to the same wire above a near-infinite ground plane.

Cell phones often use sleeve dispole antennas to avoid the need for a counterpoise...

Mine picks up a family radio easily from across the room with the
stock antenna. Haven't tried it any further. Did that to figure
out how the sig stalker works.

I think you took me wrong. I wasnt trying to be smart with you at all. I
still dont understand why you like this better then a yahoo group that
has actual moderators that keep all the crap out. I just come here to
laugh at all the bitching and moaning that goes on and to sometimes get
in on it :)

What I like about the yahoo groups is that I can join the groups about
the radios I have and not have to go through a ton of crap here.

I would like to try an decode CTCSS tones with my scanner. Most software that is out there to do this, you must have a discriminator tap so it will grab the audio better.

I am using WinTone without a discriminator tap, just straight audio into the line input soundcard. This seems to work somewhat well, but I was wondering if there is any other program's out there that would be able to do the same job but without having to use a discriminator tap.

Also, the same goes for decoding trunking systems etc....especially Motorola systems. Is there any program's out there that will do this with the straight audio going into the sound card?

Thank you

>Anyone have any input on this radio?

There are several groups on Yahoogroups covering the BC246T.

I subscribed to the "BC246T" list on Yahoo, and have found the list very informative.

Two representatives from Uniden are involved with the group posts and questions about the Uniden software.

Gommert Buysen (Butel Software), who is releasing his own software for the 246T in January, has also posted on this list.

You can subscribe to this list by sending a blank e-mail to -

I do like that about it, however I don't like the way they are set up. The layout sucks, among other things. My biggest problem is those damn advertisements that pop up when your trying to read a posted message. Click on the message and BOOM, there's this ad staring you in the face. Ooooohhh, "click here to continue to your selected message," or whatever, crap... Just a pain to navigate... Every time I were to log onto a group, the messages were all goofy, so you have to click the sort by Thread button; EVERY TIME! Why isn't there an option to select that as the default viewing mode?

And I'm certainly not interested in their email based viewing and posting. Tried that once... Never again...

If it wasn't for the junk advertising, the clunky layout, and lousy navigation, it wouldn't be too bad of a place. I'll admit, I did give it a go for a while, but just got disgusted by the whole thing after a short time and gave up on it. Generally someone that reads over there will contribute pertinent information from a Yahoo Group, in a posting here.

Just a rant, don't mind me...

Source record: 16505

Hello,

I'm new to this group, and don't know if this question would be outside its scope in a way, so bear with me. If I wanted to put a discone antenna on my house to use with a scanner, how would I mount it? I've done a little reading on antennas and all, and the discone sounds interesting, but I wouldn't have a clue on how to put it up. Does anyone perhaps have a good Web link for that? Or maybe the name of a good book I could get from the library?

Thank you in advance,
Jeff

stick a pole up it's bum
strap that to the chimney or vertical somewhere
the coax comes out the bottom of the pole.
run it through a window frame eves or WHY
to your scanner.

might be an idea to put a little rubberweld tape around the connector
outside also.

Jeff,

Most discones [mine is the Diamond] come with 2 "U" bolts in the mounting kit that can be clamped around an outdoor television antenna mast. If you are planning on an outdoor/roof mount and do not have an antenna mast, here is my suggestion.

Look in your phone book for a company that sells chain-link fencing or just go to Home Depot, if there is one in your town. I joined two, 10'lengths of fence mast together and then got two electrical conduit clamps that fit the diameter of the pipe [from Home Depot] and fastened them to the patio overhang.

Since we get some 70+ MPH winds here, I've had to guy wire the masts to the patio roof so the antenna doesn't fly away! All you need now is to get some 9913 coax cable, run it to your scanner and you're in business.

If you are planning to mount the discone in your attic [because of an HOA problem] someone here will give more details on that type of install.

All The Best!

Alain...Palomar Mountain [where the 200" Hale telescope is]

I've been given a Radio Shack Pro-82 scanner. No jokes about Radio Shack, please. I think the one-touch bank numbers work OK, but I want to select a bank by bank number, so I can enter some frequencies. According to the instruction book (p.29), "To turn on a channel-storage bank (1-10) during scanning, press the bank's number key. A bar appears under the bank's number." When I press the numbers, nothing happens. It's scanning away happily in, say, the weather bank, but pressing numbers on the keypad does nothing. What am I missing?

Do you have anything programmed into the radio?
Do any of the buttons do anything?
Is there any "bars" under any of the numbers?
Are you in search mode instead of scan mode?

I'm sure the guy who wrote the intruction booklet thought it was all very clear. When you press the "one-touch" buttons, the scanner is scanning, but it's not in the scan mode you need to access the different banks. You have to press the "scan" button for that.

It's not the program. Most radios have a high-pass filter in the
audio so that you don't hear the CTCSS tone.

Alain,

Thank you very much for the advice. :) This was just what I was looking for, as I don't have a mast yet and have never mounted an outdoor antenna before. I probably won't be doing this for a while, I need to take care of business (school, etc.) and make sure I'm solidly back into the scanning hobby before I spend the money and do the work.

I bought a telescoping (center loaded) antenna today for my handheld, and it seems to help on some normally "wavery"/"iffy" freqs., although I'm not expecting miracles out of a handheld antenna. LOL I thought it really sucked at first, until I read the directions... and found out that it's best to extend it to different lengths/with different sections depending on the band you're listening to... guess like most things, it works better after reading the directions. ;)

Just wondering... are you a ham? I heard a ham on either 2-meter or 440Mhz that noted Palomar Mt. or whatever it is (via linked repeaters in the WIN system). I know it's unlikely, but I guess it's worth asking. ;)

Thank you,
Jeff

I should clarify. I have _built_ a computer into my car. It currently plays MP3s, does GPS navigation, movies, etc. In fact, it's hooked to the onboard engine management computer as well so I can view real time engine status and troubleshoot problems.

Regarding using a 4 antenna system as mentioned in an earlier message, would that really give me fine enough resolution to detect where a signal was coming from within say 20 degrees? Or would it be in 90 degree increments?

The near certainty that Radio Shack will in the not-too-distant future
repeat its half-price sale of the PRO-83 and sell it once again for
$59.99: priceless.

No, most radios have a three-inch speaker that can't reproduce the
CTCSS tone. If you plug a hi-fi speaker into most radios, you'll hear
the CTCSS just fine.

No, don't think so. The CTCSS tones are 'sub-audible', that is, they are below the range that humans can hear.

They no doubt will have a "Xmas" special, but I dont think
it will be half off like last time. 79.95-89.95 is my prediction.
I think if they DO actually have another 50% off sale, you better
get there early, because next time they will be gone in an hour or
2. The biggest reason I got mine is RS's ad didnt make to the
paper in time on Thanksgiving day, nobody knew about it. I should
have bought them out.

You are wrong. Not to say you are a lying.

This is a list of commonly used PL/CTCSS tones
(all in Hz):

67.0 69.3 71.9 74.4 77.0

79.7 82.5 85.4 88.5 91.5

94.8 97.4 100.0 103.5 107.2

110.9 114.8 118.8 123.0 127.3

131.8 136.5 141.3 146.2 151.4

156.7 162.2 167.9 173.8 179.9

186.2 192.8 203.5 206.5 210.7

218.1 225.7 229.1 233.6 241.8

250.3 254.1

You will see that they are very audible on a decent system. The only
reason they are not audible on systems using this tones -and some others
too- is, that they are using a high pass filter cutting all freqs below
300Hz or so.

That is correct. So... plugging the radio into a better speaker will therefore not help... unless the high pass filter is disabled.

Most VHF/UHF receivers are not having a highpass filter going so high
(300Hz) but only to about 55 Hz in Europe or 65 Hz in US because of the
mains freqs. It's only the transceivers wich are using these tones
having the freqs up to 300Hz blocked to the AF-stage.
It's simple enough to tap the discriminator output on the RX-section of
nearly any (T)RX.
I have a handheld scanner provinding the CTCSS-tones just out of the
headphone jack. The built-in speaker is too tiny to go below 150Hz.
BTW the higher tones above 150Hz are not used very often.

Not that it helps you but in RTFMing the manual on my handheld 2m/70cm
transciever it will decode the CTCSS tone. This has to be done on the
receive frequency though so I'd have to be in range of the
transmitting radio rather than the repeater.

It depends on the AF-stage in the radio and the filtering wich is done
there. Some radios do better some don't.
It's not a programmable feature on the decoding program!

The "bandwidth" is actually 3 band coverage - 144-148 MHz, 440-450 MHz
and 1.2 GHz. An antenna like that is pretty deaf at all other
frequencies - it's a very NARROW-band antenna.

BTW, a discone doesn't really have gain - it's just a very wide band
interface between the cable and space.

I have a nearby guy using that antenna. It has(!) sgnificant gain all
over a high quality discone from 80 to 1300Mhz.
This antenna WORKS very well on receiving VERY BROAD. On TX for sure it
is narrow for SWR 1:2 or better.

>
> BTW, a discone doesn't really have gain - it's just a very wide band
> interface between the cable and space.

You may tell us what _your_ definition of 'gain' is.
Every(!) piece of junk metal has a little bit of gain over an 'isotropic
radiator'.
A discone has about 1-2dBi and a 'narrowband' 1/2 wave dipole has
2,15dBi. Also gain allways increases when a antenna is mounted in the
right distance over real electrical ground.

No, just on most radios, the low end is cut off by
filters and the crappy speaker. The tone on the Ohio
Turnpike troopers on 155.790 and 155.685 is one af about
a half dozen that can be easily heard around the Toledo
area. It's the "whine" in the background...

If you can't hear from 50-200hz, you have serious
problems...;)

small problem with your assertion.
I had a room mate at the time. he used my account with a slightly different username in the news client......

thats pretty easy to do when one runs LINUX.
so, it may have been my account, but can you really be sure it was *I* who made the posts?

you will also NOTE that during the same approximate period of time, I am seen using my "real" identity (as here). so John mackey's assertion (and your allegation) cannot really be proven 100% in your favor (there is reasonable doubt).

besides, the point is now moot. this thread died an ugly death a long time ago and it shall remain dead. any further attempts by you to instigate, harass or otherwise incite problems will be forthwith ignored.

besides, someone else told you to shut up and thats what I suggest you do. The more you harp on irrelevant points such as "who did what and where", the more you discredit yourself (your kind always does).

lastly, be it known: I have a 12 machine LAN in house in use by 3 other room mates (one of whom isn't a ham) so any postings to these newsgroups from whatever IP I happen to be using may not necessarily originate from me (and it is quite easy to NAT upwards of 200+ machines if I really wanted to).

so, with that having been said, I wish you good riddance.

No problem here, my ears are quite good. My point was that with most radios, whether one uses a good speaker system or not, the tones won't be heard.

That being due to the high pass filter. If you are hearing them, then perhaps your system is not really up to par, or there are other issues with the transmitting system which you have no control over.

>
> Me

That is actually not quite true. On an HT, the transmission line ends
somewhere inside the radio. The SMA/BNC connector is part of the
antenna proper. If you add a sleeve (as the previous poster, "dixon",
says), you will be changing the antenna itself. ASCII schematic follows:

before:

```
|
| antenna
|
|
_ ground + bnc/sma
||
|| coax from PA strip
||
||
```

after

```
|
| antenna
```

```
|
|
||
|| shielded antenna (adapter)
||
_ ground (bnc
||
|| coax from PA strip
||
||
```

And as we remember, "maximum radiation at the current maximum" (that is, the base of a classic 1/4 wave antenna), you are shielding the point of maximum radiation.

From a practical standpoint, you will probably be using a gain-retarded rubber duckie, and the 1 or 2 dB loss from even the worst adapter will be swamped by the -10 dB gain of the duck (that is "minus 10 dB gain"). The rubber-duck will make a 5 watt transmitter sound like a 1/2 watt one. Having another 1 dB of loss will make that 5-watt radio sound like 0.4 instead of 0.5. No big deal.

If you can keep your radio from being broken by using a quality adapter, and with a negligible loss in performance, I say, "do it."

If you are talking about squeaking out every last bit of signal, such as EME, the answer is "no". But if you are talking about walking around a hamfest on 2m, then spend a few extra bucks to keep from fracturing your antenna connector connection, which these days, most hams can't, or don't know how to, fix. <flames invited>

Your mileage may vary.

According to a friend in the Kansas City RS district office, we may see it at $99.99 around Christmas, but it won't be $59.99 again for a long while... probably not until it's flagged for clearance. They also mentioned that corporate did a horrible job with the Thanksgiving promotions and sales were well below expected. The PRO 83 was actually one of their better sellers during the period despite lack of advertising.

No Jeff, I'm not a ham but I have several friends who are. I have found them to be the most helpful electronic guys I have ever met. I needed some help installing a Willco board in my ICOM R 71-A sw radio. I looked up several "callsigns" in my area who held the "advanced" license. I called this one guy up and he said, "Yeah, bring the rig over." Long story short, he installed the unit [back in 1992] and it's still working great.

If you bought that "center loaded" telescoping antenna at Radio Shack, it is the same one that I have on my Pro-95. It is a great antenna and it does dramatically increase the range of the scanner. I can hear all of the CHP freq's accept a few in LA. I can hear Bakersfield, but don't get Buttonwillow until summer and the propagation is better.

I found out last month that the FD dumped their 800Mhz radio here in Lansing Michigan. In favor of the older 460Mhz system. I guess digital isn't cracked up to whet it is hyped to. They scrapped the old 800Mhz equipment.

I just bought an Icom handheld VHF IC-F51 (IC-F50 in US). I am desperately in search for CS-F50 sofware and OPC966 cable for programming new frequencies to this unit. I found an American company not willing to sell to me because I didn't have an US registered credit card. That was RadioOutfitter.com. Stupid. I live in Norway, and Norway is not known for credit card frauds etc.

Anyway... Can someone help me with this matter? Downloadable software and schematic for cable will also help me.

Please also reply to emvsat@email.com if you can help.

Thanks in advance!

I'm curious too:

This wild accusation came straight out of nowhere and totally unrelated to any posting or action that I can think of. I must have pissed off someone with a very thin skin with some previous posting of some sort, or maybe they just hate anyone with a Canadian address?

You might note that I have always posted under my real name and address.

This is the third time I have been accused on usenet of being something I am not - the first two claimed I was an agent of a U.S. Government Intelligence/Security agency, they couldn't be sure if I was CIA, DIA, NSA or some other secret agency (I'm not sure if being a Canadian thief is better or worse than being a U.S. Government agent).

Just for the record, but I'm sure it won't change anyone's mind, I have NEVER sold anything to anyone in the U.S. The few pieces of equipment I have sold in Canada have all been locally transacted in face-to-face exchanges of merchandise and payment; and always with an offer to demonstrate and/or test the merchandise. Never had a complaint, but have had complements.

I sure would love to know just what caused this nonsense.

Dave Holford

I have been in the communications field for 35 years, and I have NEVER
seen a SMA/BNC antenna connector on a Handheld Radio that didn't
have a the RF Ground connected to the ground side of the connector.
there are some that use different antenna connectors than SMA/TNC?BNC
that are singleended but I have never seen one used that way.

If anything I would think that you would be the one to explain why you are posting. DeWayne's messages seem pretty self explanatory.

You missed my point, I think. The counterpoise is the (poor) metal of
the radio and of the user's hand. Any connector/adapter will be coaxial
and probably low loss, but the counterpoise stays put. The feedpoint
rises but the "ground" plane does not. For an SMA adapter, it might not
be enough to hear a difference, but the radiated signal will be worse
when using such an adapter.

I'd say "may be worse" rather than "will be worse". In some cases, it
may be better.

From what I've seen (and measured) the actual impedances,
"counterpoise" effectiveness, etc. of HT antenna setups vary all over
the map, and change constantly depending on a whole bunch of
factors... how you grip the HT, whether you happen to be wearing a
glove, how you angle the HT near your head (antenna-loading effects
from the head can make SWR change dramatically), and probably whether
you're sweating or not.

A typical HT case is almost certainly _not_ serving as a tuned
counterpoise at 2 meters, nor is your arm and body.

Adding a centimeter or three of SMA-to-BNC connector to the length of
the "counterpoise" may have some small effect in some cases, but I
believe that [1] it's as likely to work for you as against you, and
[2] it's probably less than the sorts of impedance variations which a
typical HT has to face every day as it's moved around the user's head
during transmission.

Not to mention the fact that the reason you're adding the adapter is most likely because you are putting a better antenna on the HT. I doubt what you *might* lose by moving the feedpoint away from the "counterpoise" is not as much as you gain by changing the antenna; otherwise, why bother? At higher frequencies this may not be the case, but probably not within the realm of a dual-band HT.

I've been using the Gulyas adapter for years now. I use it primarily for attaching a Smiley 270 telescopic whip to my VX-5, since that antenna works very well configured as a 5/8-wave on 70cm. The relative gain in performance over the stock antenna is quite noticeable, so in that case, the adapter causes no problems. The fit and appearance of the adapter on that rig is great, too!

Alain,

Yeah, the Radio Shack center-loaded telescoping was the one I got, and I'll have to agree with you that it's pretty good - and the price was one of the best points! LOL for $15USD, one has little to lose. There's only two things I don't like about it 1.) I've read in a lot of places that it's very hard on antenna jacks - and while I'm not too worried because the scanner I have is pretty solid, I do have to be careful, and 2.) An increased sensitivity to what you want to hear, is also an increased sensitivity to garbage... you gotta love having a TV channel drift in when no one's talking... My scanner's a cheap one thou (although it works fine, it's the Radio Shack Pro-89, it was a gift), if I can get together some money I'm going to get something like the Pro-95, with the trunktracking, PL, computer programming, etc... (don't need digital here in Vegas AFAIK).

Just wondering... if money were no object, would it be best (most optimal) to have a desktop scanner at home hooked up to that discone we were talking about, or would a good handheld jacked into it do the trick?

Hmm, I just got an idea... the Pro-95 costs about the same as that MP3 player I wanted for Christmas, and I already have an older MP3 player... maybe I could talk my folks into getting me the Pro-95 instead? *smug look on his face*

Tell me, specifically, in which cases that my info would not be true. I made some measurements before I posted. Did you?

I was just saying that extending the feedpoint / current node, as was suggested, will lower the radiated power. I measured field strength measurements and then posted my results.

I still feel that the more aluminum in the sky, the better. Even if there is some loss in adapters... mmmm.... bigger antennas, happier hams.

73,
Dave

3867. FS: 2 R7000, 780, 2006, 2052 etc, all rack mounted

Newsgroup: rec.radio.scanner
Date: 2004-12-07 02:09:58 UTC
From: "Rich Carlson, N9JIG" <no@no.no>
Message-ID: <no-F39DB1.20095906122004@netnews.comcast.net>
Source record: 16431

Please see http://www.n9jig.com/radio/FS.html for pictures

This is a Motorola CentraCom rack complete with radios, power and antenna connections.

Using the included renown 8 port Stridsberg multi-coupler this station only requires a single antenna for all of it's radios.

With the included 12 volt power supply and power strip only a single AC power cord is needed.

The R7000's, BC780 and Pro2006 all have Discriminator Taps, and have them brought to the side of the rack for easy access. Any of these radios may be connected to the CD-1 PL decoder simply, as well as used to decode trunked or other data signals.

The BC780 and Pro2052 have RS232 data ports, which are also cabled and brought to the side of the rack for easy connection to a computer.

The Plectron is set to decode the MABAS tones, so you can monitor large scale incidents.

The top R7000 has the Remote Control and Speech Module. This unit has a slightly flaky display, that goes on and off, can be repaired if you have the skill or want to send it to Icom for $125.

The bottom R7000 display works perfectly. Both units were recently professionally aligned by Icom. Both have Discriminator Taps for decoding of digital signals.

The CD-1's input cable is brought out to the side of the rack for easy access and may be connected to any of the receivers except the Pro2052.

Included Equipment:

2 rack-mounted Icom R7000 Wide band scanning receivers. (25-1000, 1025 to 2000 MHz., no gaps!) AM, FM, FMW, SSB. Includes 10.7 MHz. IF outputs, and more.

One Plectron VHF Alert Receiver, on 154.265 MHz., with the MABAS Alert Tones.

One Radio Shack PRO2052 Trunktracking scanner (Motorola, Edacs, 1000 Channels)

One Uniden BC-780 Trunktracking scanner (Motorola, Edcas, LTR, 500 channels)

One Radio Shack PRO2006 scanner (full coverage from 25 to 550 and 800 to 1300 MHz., No Gaps!)

One Connect System CD-1 PL/DPL/DTMF Decoder.

One 14 amp 12 VDC power supply.

One Stridsberg 8 port wide band amplified multicoupler.

$1750 for the complete station.

You must pick up in suburban Chicago IL, as it is too large and heavy to ship.

A few themes have shown up on this thread that seem to reinforce some misconceptions about antennas. They might not have been meant that way, but I think it's a good idea to clarify them in case a casual reader might drop by and be misled.

The first one is about where the "transmission line" ends and where the "antenna" starts. The antenna starts at the point where the two current carrying conductors move far enough apart for significant radiation to take place. By way of illustration, let's take the example of a simple vertical mounted on a perfect ground plane. We'll feed it at the bottom via a piece of coax. It doesn't matter where the coax is, above or below the ground plane. Inside the coax, there's current on the outside of the inner conductor, and an equal amount, flowing the opposite direction, on the inside of the outer conductor. The fields from these two currents cancel everywhere outside the coax, so it doesn't radiate.

At the point where the coax connects to the antenna, the current from the inner conductor flows up the antenna. The (equal) current from the inside of the shield flows over the ground plane, spreading out from the point where the shield connects to the ground plane. The currents are now physically separated, so their fields no longer cancel, and net radiation can result.

An important feature of this setup is the effect of the current flowing along the ground plane. For every bit of current flowing outward in one direction, there's an equal bit flowing outward in exactly the other direction. The fields from these two bits of current cancel at right angles to the directions of flow. When you look at all the bits of current, you find that the net field from the whole amount of current is zero. So the current on the ground plane doesn't result in any radiation. (By contrast, the current on the antenna wire doesn't have any cancelling current, so it radiates.) A conductor which carries current but doesn't radiate (significantly) is often called a "counterpoise". Misuse of this term is another problem with some of the postings, and I'll address it in a minute. The important thing to remember is that a "counterpoise" doesn't radiate significantly. If it does, it's not a "counterpoise" but a part of the antenna.

What happens if we put a piece of pipe around the bottom, say, 1/4 of the antenna, weld it to the ground plane, and connect the coax shield to its inside? Now the pipe is an extension of the transmission line. The portion of the antenna inside the pipe is the center conductor, and the pipe is the shield. So the portion of the antenna inside the pipe can't really be called an "antenna" any more, since it doesn't radiate.

The current on the inside of the pipe reaching the top of the pipe flows over the edge and down the outside to the ground plane. Here's a very important point: *This current radiates just like the current on the antenna wire*. What we have now is a lopsided dipole. The antenna wire protruding from the top of the pipe is one side of the dipole, and the outside of the pipe is the other. The "feedpoint" is where the wire sticks out of the pipe. Once the current along the outside of the pipe hits the ground plane, it spreads as before. The current on the outside of the pipe radiates, the current on the ground plane doesn't.

A statement was made about a situation sort of like this "shielding" the "high current" part of the antenna. This isn't what happens at all. What happens is that the portion of the original antenna wire inside the pipe is no longer an antenna at all, but part of a transmission line. The current on it isn't the same as before the pipe was put there. The radiating antenna is now the portion sticking out of the pipe, and the current at its bottom, all other things being equal, will now be greater than before the pipe was added. No signal or power is lost due to "shielding". All you've done is shortened the antenna a bit, just as though you'd cut a bit off the top.

Now let's remove the pipe and bend the ground plane downward into a cone, with the antenna sticking out of the cone's apex. Here we'll find that the current flowing on the ground plane does indeed radiate. There's no net radiation straight up, but it radiates horizontally and in all other directions. The ground plane is no longer a "counterpoise", but simply a conically-shaped dipole half. If the ground plane radius was about the same as the "antenna" length, and the ground plane is bent downward at a reasonably sharp angle, the radiation from the conical ground plane will be about the same as the radiation from the "antenna". Calling it a "counterpoise" doesn't give it magical properties so we can ignore it -- it's every bit as much a part of the antenna as the "antenna".

Finally, consider an HT. Here, one half of the antenna is the rubber ducky or other "antenna". If you put a sleeve over part of the outside of it, the real radiating top part of the antenna is the part sticking out of the sleeve. The other half of the antenna -- NOT a "counterpoise", but a real part of the antenna of at least equal importance to the intended part -- is the outside of the sleeve, and the outside of the HT, your hand, and your body. Whatever current flows up into your "antenna" also flows along the other half -- that is, along the HT and your body -- and radiates.

Roy Lewallen, W7EL

National Electronics did have them in stock. $209.90 without Shipping.
UPS ground to my location in Illinois was $10, so I only ended up
paying five more than I would have with usascan. Not bad.

Now I'm gonna be sitting here all anxious 'til this darn thing gets
here!

When I started checking around the price was pretty much the same at
everyone who had one. There was no more than $10 difference. Since they
apparently just hit the market and it's close to Christmas I am just going
to wait till January. I am going to buy myself one, but it will be easier to
get one after the "rush" is over. Not to mention by then hopefully a lot of
people will have had one for a while and will be able to give some good
pointers <G>

3882. Time to get digital scanner?

Newsgroup: rec.radio.scanner
Date: 2004-12-07 20:49:11 UTC
From: Charlie Durand <c.durand@comcast.net>
Message-ID: <bHotd.152723$V41.18094@attbi_s52>
Source record: 16447

Hey there,

I've been a faithful user of my BC200xlt for a very long time now. Every once in a while the battery needs replacing. I've had to have the antenna connector repaired once and one of the battery terminals replaced.

Otherwise, the radio works like a charm.

I've never needed a trunking capable radio.

One thing I have no experience with is digital scanning. Is there anything in the San Francisco Bay Area to make a compelling case to buy a new scanner?

Thanks!

Charlie

My folks talked me out of forgoing the MP3 player for the new scanner... after all, most of what I listen to is stuff like ham radio. They have a point - and who knows, I may not stick with scanning forever... lol

Just wondering... could an antenna be temporarily mounted outside a window on the glass (like a vehicular antenna, but on a house)? What would be the effect of that? It'd be a lot cheaper and less "committal" than mounting a big ol' discone right away...

I am considering the purchase of an Opto Scout. I do not have a receiver that is Reaction Tune capable. These models appear to be the best thing going in terms of portable frequency counters/recorders. I thought it would be interesting to use it to find active frequencies in different areas, public events, etc. I am looking for opinions--good or bad--regarding whether these units are worth the money and perform well, or even alternative units to consider. I noticed the PRO-83 has a similar feature, but without the ability to record the frequencies.

TIA,
Doug

The 83 wll not automatically record the frequencies, however that's
the difference between a $119 scanner / frequency counter and a $359
counter.

I've been very happy with the 83.

Well, I don't have a trunked scanner either per se, I have a trunked
two-way radio. Unfortunately, I haven't had it reprogrammed with
AlCo's new talkgroups, so I don't get Fremont Fire among others.

One of these days...

So without trunking, you're missing out on Alameda County, some of
Santa Clara County, most of San Francisco. And I can't recall what's
digital trunked, I believe some North - Marin, etc.

FCC Proposes Additional Fine for Former California Amateur Licensee

NEWINGTON, CT, Dec 3, 2004--Fast on the heels of a $10,000 Forfeiture Order (FO), the FCC has now proposed to fine Jack Gerritsen, ex-KG6IRO, of Bell, California, an additional $21,000 for interfering with Amateur Radio communications. The target of numerous complaints of insistent interference to numerous ham radio repeaters, Gerritsen already faces a $10,000 fine the FCC affirmed in October. The latest proposed fine stems from further specific alleged instances of interference between June and September of this year.

"Gerritsen's threats against other operators and his abusive use of amateur frequencies are the antithesis of good amateur practice and engineering," the FCC said in a Notice of Apparent Liability (NAL) released December 2. "Gerritsen announced to authorized amateur users that he intended to interfere with their transmissions and then proceeded to cause such interference." Based on the information before it, the FCC said it finds that Gerritsen willfully and repeatedly violated §333 of the Communications Act of 1934 by maliciously interfering with the communications of authorized Amateur Service users.

In 2001, the FCC's Wireless Telecommunications Bureau (WTB) swiftly rescinded its Amateur Radio license grant to Gerritsen after learning of his earlier state conviction for interfering with police communications. As a result of the conviction, which he's appealed, Gerritsen ultimately spent some time in jail. He has continued to maintain that the FCC can't take away his operating privileges without a hearing, and that he still has a ham ticket.

Gerritsen's now-pending Amateur Radio application is back in the hands of the WTB, which also will decide the fate of his General Mobile Radio Service (GMRS) license. The FCC set aside that grant last fall because of Gerritsen's alleged continued unlicensed operation and deliberate interference. A Hearing Designation Order for Gerritsen is said to be working its way through the FCC.

In its December 2 NAL, the Commission cited three specific instances of interference attributed to Gerritsen and mentioned several others in proposing the huge fine, which includes an "upward adjustment" from the base forfeiture amount of $7000. The NAL notes that in determining a fine, the Commission may consider the nature, circumstances, extent and gravity of the alleged violations as well as the suspected violator's history of prior offenses and degree of culpability. "Despite warnings and a prior NAL and Forfeiture Order, Gerritsen's unauthorized willful

and malicious interfering radio operations have been ongoing for several months," said the NAL, signed by FCC Los Angeles Office District Director Catherine Deaton.

In one instance in September, the FCC said, a complaint from an ARRL Official Observer alleged that Gerritsen "deliberately and maliciously interfered with the Young Hams Net" on a 2-meter repeater. "The complaint alleged that the prerecorded messages transmitted by Gerritsen were so intense and vile they were reported to have reduced one of the younger participants to tears," the NAL recounted. On other occasions, an individual identifying himself as Jack Gerritsen and/or using the KG6IRO call sign, has monopolized various LA-area repeaters for long periods, the FCC said, preventing other users from accessing the machines.

Several times, FCC agents have tracked interfering transmissions to Gerritsen's residence. Commission representatives have advised him that he does not have authority to transmit on amateur frequencies and warned him to keep off the ham bands.

Unconfirmed but generally reliable reports say Gerritsen has not been heard on LA-area repeaters for more than two weeks now, and there's some evidence that he may be staying south of the US border--at least for the time being. He has 30 days to pay or appeal the proposed fine.

Hello,

I'm curious - what would happen if I tried to take a good mobile type antenna, and stuck it on a second floor house window (outside)? Would that work decently? I ask because I don't know how much longer we're going to have this house, so mounting the discone I mentioned in another thread might not be such a hot idea...

If this would work OK, does anyone have a recommendation for a good antenna to use for that?

Thanks,
Jeff

You do know the FCC gave KV4FZ back his ham license within
a year after taking it away, dont you? Check qrz.com
After he jammed the public service nets for 35 years, they took his
license for less than a year and gave it back to him. A real enforcement
example?!

For receiving, or for transmitting? Since this is rec.radio.scanner, you are probably concerned with using the antenna for receiving. I feel the urge to comment anyway.

For receiving, you're probably OK, but for transmitting, I think you might have problems with this. The average mobile antenna is designed to operate while attached to the big, metal plane that is the roof of a car. A similar question often arises at the Usenet group rec.autos.makers.jeep+willys. Jeeps do not have a metal roof, or (generally) any roof at all, so antennas end up mounted on the rear bumper.

You might do well to pay a visit to that group and ask there, as Jeep owners have some experience with the concept. Search both that group and Google for the word "counterpoise."

Typically the numbers in an Armature Radio callsign designates the radio
district the station is located. A "6" is exclusively for California, an "8"
is for Michigan, Ohio, and West Virginia. However for some time the FCC has
allowed people to move to another radio district without requiring a new
callsign to be assigned.

Hello.

Try http://www.airnav.com/airports/ for airport frequencies.

Try http://www.freqofnature.com/aviation/aviation_centers.html and
http://www.milaircomms.com/artcc_frequencies.html for the Center
frequencies.

Hope this helps!

Try http://www.radioreference.com/modules.php?name=RR&stid=26 ... good site for scanner frequencies!

Hope this helps.

Apparently that link didn't work. Go to http://www.radioreference.com ,
and "RR Database" at the top. Then select the state and county.

Wednesday, 8 Dec 2004
Not a lot of traffic today, but probably more than I heard with my limited antenna array. Slowly getting my antennas back up, now that the Hurricane Season has passed.
Interesting propagation in the evening; ATC ground stations heard from afar on Mil UHF freqs. David will explain the relevant phenomena.

BOLT 22: KC-135R, MacDill AFB 6AMW
1:34am: Inbound MacDill.
[311.0]

OMAHA 55K: CE-550 (N1255K) #550-0505, BICE
2:04am: Comms with Hammer: "We are 10-8, RTB to Ramrod." This was when he was airborne after forcing down a target acft at Vero Beach. I heard his surveillance of the target from Ft Myers on Florida's west coast (beginning at 10:55pm Tues), and then across the state. By the time he forced the tgt to land he was in need of fueling himself. Pilot reconfirms freq as "Blue 1."
[282.425]

NASA 909: T-38N #65-10351, Johnson Space Ctr, Houston
8:45am: Departs NASA-KSC Shuttle Landing Facility.
12:30pm: Approaching SLF.
[128.55, 124.8, 134.0]
NOTE: The astronaut that often flies NASA 909 pronounces the callsign "Nine-Owe-Nine," which sounds like "Niner Nine." This accounts for why some monitors log the acft as NASA 99.

ROMAN 11: F/A-18, Oceana NAS VFA-106 "Gladiators"
9:20am: Area transition. Probably some of the horde of Gladiators that flew from Oceana to NAS Key West days ago, or maybe a straggler.

CG 6003: HH-60J, CGAS-Clearwater
9:49am: Arrives CG Sta Canaveral to work hoisting ops with boat; passes position 28-36 North, 80-34 West.
12:01pm: Lands Patrick.
2:18pm: Departs Patrick
[156.6, 157.15, 133.75]

CG VESSEL 47301: CG Sta Canaveral
10:05am: Wkg w CG 6003.
[157.15]

WINDRIDER 65 (Unk if Mil or commercial flight)
10:15am: Area transition.
[133.475]

CG 6523: HH-65, CGAS-Savannah.
10:22am: Position 28-28 North, 80-31 West; wl work with CG 6003, CG Ves 47301; informs CG Sta Ponce Inlet who held guard. I heard the pilot say "Man, it is great to be out of Savannah for a while." [Only kidding, Mac.]
[157.15]

NASA 921: T-38N #66-8387, Johnson Space Ctr, Houston
11:10am: Lands SLF.
[133.475, 124.8, 128.55]

BAT 01: T-337H Skymaster, Airscan-KTIX, NASA/USAF Security Acft
11:40am: Radio Check.
[264.8]

AIR TRANSPORT 400: DC-8, Air Transport Intl (USAF contractor)
12:05pm: Lands Patrick from downrange support flight (Ascension).
2:18pm: Departs to McGuire AFB.
[133.75, 132.65, 133.475]

CG AUX ACFT 42705: CE-182L #18259150, Dover DE
1:01pm: Commencing Port Canaveral security overflight.
[157.15]

STAVE 01: F-15C, Eglin AFB 46TW 40FLTS
5:15pm: "We are 42 miles to the east and RTB"; lands 5:20pm.
[393.0]

KING 55: HC-130P #64-14855, Patrick AFB AFSOC 920RQW 39RQS
5:47pm; Departs Patrick.
10:30pm: Lands Patrick.
[133.75, 132.65]

NASA 921: T-38N #66-8387, Johnson Space Ctr, Houston
5:57pm: Departs SLF to Ellington.
[128.55, 124.8, 133.475, 125.075]

DOS 671: UH-1, US State Dept Intl Narcotics Mission, Patrick AFB
6:10pm; Departs Patrick
[133.75]

JSTARS GROUND STA, Northrop Grumman JSTARS Integration Fac, Melbourne.
8:58pm: Testing comms.
[308.85]

BOLT 32: KC-135R, MacDill AFB 6AMW
9:10pm: 10 min out; maintenance status: Alpha 2.
[311.0]

KING 51: C-130, Moody AFB 71RQS
11:00pm: Working Avon Park Bombing Range with PJs and with JOLLYs 21 & 22; also comms with ground station Razor 06; PJ drops, helo AARs.
[292.2]

JOLLY 21, JOLLY 22: HH-60G, Moody AFB 41RQS
11:00pm: Working Avon Park Bombing Range with KING 51.

Amazing...only one year loss of license. I don't know why the FCC is so reluctant to take decisive action and so slow to react. Maybe the staff is gun shy from all the free marketeers that have run the commission. The FCC has seen its influence whittled back by changes in the market. People are choosing to communicate over the open and unregulated internet, by cell phone, etc., rather than stand in line for licenses at the FCC. The broadcast industry will be rapidly shifting away from FCC control as more shows are moved to satellite radio. And it is highly unlikely that congress will use the FCC to regulate those new methods of moving information and entertainment.

The FCC does not stand a chance pushing this case.
I have it on first hand experience that the FCC is staffed by
manic-depressive psychotics, and this will invalidate their
case.

FCC Proposes Additional Fine for Former California Amateur Licensee

NEWINGTON, CT, Dec 3, 2004--Fast on the heels of a $10,000 Forfeiture
Order (FO), the FCC has now proposed to fine Jack Gerritsen, ex-KG6IRO,
of Bell, California, an additional $21,000 for interfering with Amateur
Radio communications. The target of numerous complaints of insistent
interference to numerous ham radio repeaters, Gerritsen already faces a
$10,000 fine the FCC affirmed in October. The latest proposed fine
stems from further specific alleged instances of interference between
June and September of this year.

"Gerritsen's threats against other operators and his abusive use of
amateur frequencies are the antithesis of good amateur practice and
engineering," the FCC said in a Notice of Apparent Liability (NAL)
released December 2. "Gerritsen announced to authorized amateur users
that he intended to interfere with their transmissions and then
proceeded to cause such interference." Based on the information before
it, the FCC said it finds that Gerritsen willfully and repeatedly
violated ?333 of the Communications Act of 1934 by maliciously
interfering with the communications of authorized Amateur Service
users.

In 2001, the FCC's Wireless Telecommunications Bureau (WTB) swiftly
rescinded its Amateur Radio license grant to Gerritsen after learning
of his earlier state conviction for interfering with police
communications. As a result of the conviction, which he's appealed,
Gerritsen ultimately spent some time in jail. He has continued to
maintain that the FCC can't take away his operating privileges without
a hearing, and that he still has a ham ticket.

Gerritsen's now-pending Amateur Radio application is back in the hands
of the WTB, which also will decide the fate of his General Mobile Radio
Service (GMRS) license. The FCC set aside that grant last fall because
of Gerritsen's alleged continued unlicensed operation and deliberate
interference. A Hearing Designation Order for Gerritsen is said to be

working its way through the FCC.

In its December 2 NAL, the Commission cited three specific instances of interference attributed to Gerritsen and mentioned several others in proposing the huge fine, which includes an "upward adjustment" from the base forfeiture amount of $7000. The NAL notes that in determining a fine, the Commission may consider the nature, circumstances, extent and gravity of the alleged violations as well as the suspected violator's history of prior offenses and degree of culpability. "Despite warnings and a prior NAL and Forfeiture Order, Gerritsen's unauthorized willful and malicious interfering radio operations have been ongoing for several months," said the NAL, signed by FCC Los Angeles Office District Director Catherine Deaton.

In one instance in September, the FCC said, a complaint from an ARRL Official Observer alleged that Gerritsen "deliberately and maliciously interfered with the Young Hams Net" on a 2-meter repeater. "The complaint alleged that the prerecorded messages transmitted by Gerritsen were so intense and vile they were reported to have reduced one of the younger participants to tears," the NAL recounted. On other occasions, an individual identifying himself as Jack Gerritsen and/or using the KG6IRO call sign, has monopolized various LA-area repeaters for long periods, the FCC said, preventing other users from accessing the machines.

Several times, FCC agents have tracked interfering transmissions to Gerritsen's residence. Commission representatives have advised him that he does not have authority to transmit on amateur frequencies and warned him to keep off the ham bands.

Unconfirmed but generally reliable reports say Gerritsen has not been heard on LA-area repeaters for more than two weeks now, and there's some evidence that he may be staying south of the US border--at least for the time being. He has 30 days to pay or appeal the proposed fine.

I am wanting to get a radio for my bonus room upstairs to use as a "base station" Money is a concern. (Baby on the way.) COuld a handheld such as this be hooked to a tower antenna and maybe an external speaker and be useable?

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=40066&item=5736453111&rd=1

What about this one. How much would a Mike be? Is it too much of a gamble?

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=40067&item=5736064885&rd=1

I am relatively new to ham radio. I have an Icom 2 meter mobile in my truck.

ANy advice would be appreciated!

IIRC, wasn't KV4FZ the guy who was convicted of some
sort of telephone cheating scheme? And not for any
violations with ham radio? And kept his nose
clean for several years after the telephone
thing?

Do you mean the great * K6KPS * from "Beautiful southern Cal" ?
The guy who's caused RF mahyem on the ham bands from the
mid-60's thru the early 80's? (I thought that ole Jimmy went SK
a few years ago. Can anyone confirm this?)

Kenny

> Better the FCC is slow and late than never.

That's usually the case.

> Anyone remember the clown Herb on 14mhz????

Ah yes! The great KV4FZ from St Croix in the USVI.

Glub bless him! (xoxoxo)

Herb was a true JEDI MASTER at the fine artform of
stirring up the shit, getting others to do your dirty work
for you, and attracting every nutcase ham in the USA
to his 'home base' of 14.313 for his daily roundup of
mayhem and insanity. Herb would get the ball rolling
and quietly slip away when the mess was a much like
a self-perpetuating car wreck on the Interstate with
everyone driving 85 in a fog.

If you missed the GOOD OLE DAYS of the infamous
14.313/14.300/3.894.5 radio wars, you really missed
that most comical days ham radio has ever seen since!
It was the archetype "15 minutes of fame" opportunity for
anyone with a microphone. a true "ShowTime At The
Apollo" for ham radio if there ever was until Mr.
Hollingsworth came in and broke up the party, much like
Alan Greenspan does at the FED when he raises Interest
rates.... (...there hasn't been anything like it since - how sad)

> Or the bozo that drove the 7240 SWL net off the air.

There were FOUR Bozos (..that we suspected) to be exact.
One in NJ, one in WPa, One in Ohio and the last one
in W.Va. NJ and Pa got caught red-handed by the FCC.
(the guy from Pa is currently in the Pa State Mental Health
system somewhere in [blank] Pa incidentally, on charges
un-related to his ham activities...)

Ohio and W.Va. are still out there, but are rarely heard
on HF anymore.

All four of em used to go all over many places and
nets on the HF bands like stray feral dogs taking
their respective crap on people's lawns. (that's the

best way to put it....really)

> I'm at a loss as to what motivates guys to be such a royal PITA.

Mostly attention starved sorry individuals with
borderline mental health issues. They are most
often Advanced College Degreed individuals
who never matured socially, white collar at the
office but henpecked or un-marryable at home.
They turn on the ham radio and they become
"Captain RF America" behind their overpriced
Icom electret condenser microphones.......

Get it.....? :)

....AND IN OTHER NEWS:

http://www.guardian.co.uk/arts/news/story/0,11711,1364123,00.html

courtesy of http://www.harrylime.biz

A humble porcelain urinal - reclining on its side, and marked with a false signature - has been named the world's most influential piece of modern art, knocking Picasso and Matisse from their traditional positions of supremacy. Marcel Duchamp's Fountain, created in 1917, has been interpreted in innumerable different ways, including as a reference to the female sexual parts.

However, what is clear is the direct link between Duchamp's "readymade", as the artist called it, and the conceptual art that dominates today - Tracey Emin's Bed being a prime example.

According to art expert Simon Wilson, "the Duchampian notion that art can be made of anything has finally taken off. And not only about formal qualities, but about the 'edginess' of using a urinal and thus challenging bourgeois art."

The Duchamp came out top in a survey of 500 artists, curators, critics and dealers commissioned by the sponsor of the Turner prize, Gordon's. Different categories of respondents chose markedly different works, with artists in particular plumping overwhelmingly for Fountain.

"It feels like there is a new generation out there saying, 'Cut the crap - Duchamp opened up modern art'," said Mr. Wilson.

He said that it was "something of a shock" that Pablo Picasso was not top, particularly since, he argued, the artist's cubist constructions of 1912 to

1914 were Duchamp's "jumping-off point". However, Picasso has not been totally erased: Les Demoiselles d'Avignon and Guernica were second and fourth in the survey.

ID Tracker has been updated.

http://bellsouthpwp.net/k/d/kd5eis/IDTracker/IDTracker.htm

Changes since V3.4.0:

- Added "tool tips" to identify components on the main display and display
bank information.
- Moved scanner data transmit and receive indicators to the debug display.
- Added mute indicator.
- Added backlight control.
- Enhanced mute function and resolved some issues.
- Changed "Disable Muting" to "Enable Muting" in settings screen.
- Changed/added some scanner control function keys (see quick reference).
- Optimized audio playback routines.
- Reworked the bank indicator code to resolve some issues.
- Reduced main screen flicker when loading.
- Added code to remove temporary files on Windows 98 systems

I am thinking about buying a uniden BC 246. I am wondering though, they state there are about 10 or so maybe a few more, preprogramed county trounk systems, Is King County Washinton's trunk system one of the ones that is allready pre set into the scanner, Of course if not, it won't break my decision in wanting to buy one, The radio sounds like a very neat rig.

Thanks Zach

What KIND of mobile antenna? On-glass antennas do poorly - mobile or not -
and worse at lower frequency. If it's a mag mount, just stick it on a file
cabinet in a second-floor room - and it'll do fine.

Court: Mom's Eavesdropping Violated Law

SEATTLE (AP) - In a victory for rebellious teenagers, the state Supreme Court ruled Thursday that a mother violated Washington's privacy law by eavesdropping on her daughter's phone conversation.

Privacy advocates hailed the ruling, but the mother was unrepentant.

"It's ridiculous! Kids have more rights than parents these days," said mom Carmen Dixon, 47. "My daughter was out of control, and that was the only way I could get information and keep track of her. I did it all the time."

The Supreme Court ruled that Dixon's testimony against a friend of her daughter should not have been admitted in court because it was based on the intercepted conversation. The justices unanimously ordered a new trial for Oliver Christensen, who had been convicted of second-degree robbery in part due to the mother's testimony.

"The Washington statute ... tips the balance in favor of individual privacy at the expense of law enforcement's ability to gather evidence without a warrant," Justice Tom Chambers wrote.

That right to individual privacy holds fast even when the individuals are teenagers, the court ruled.

"I don't think the state should be in the position of encouraging parents to act surreptitiously and eavesdrop on their children," agreed attorney Douglas Klunder, who filed a brief supporting Christensen on behalf of the American Civil Liberties Union.

Lacey Dixon, now 18, graduated from high school and is attending a massage therapy school, her mother proudly reported. Christensen's whereabouts are unknown.

Dixon has a 15-year-old son still at home, whose phone conversations she sometimes secretly monitors. She said she'll stop that now.

"If it's illegal, I won't do it," she sighed.

It's legal if one side of the conversation is aware. In this case, if the son was talking to a friend, and mom was monitoring, or recording, then it would not be legal.

Problem now is, her son may have won the battle, but mom will win the war.

Which of the above is accurate depends on what state you are in.
In some states, the recording is OK if one of the parties is doing
the recording (and therefore knows about it). In others, it's not.
ALL parties have to know.

In no state (and I believe this is also a federal law) is it legal
for the husband to monitor the conversation between his wife and
her lover (or, in the case referred to, for a mother to monitor the
conversation between her child and his friends).

>California.

Local state regulations apply unless the parties ARE (not "could be")
in different states. Chances are if Mom is listening on her child
talking to his friends, they (all three) are in the same state.

>Who's law would apply ?
>
>>In some states, the recording is OK if one of the parties is doing
>>the recording (and therefore knows about it). In others, it's not.
>>ALL parties have to know.
>
>I'm not clear on what you are trying to say. It sounds like you state one
>thing and then contradict yourself.

Different states have different rules. Some require ONE party to know,
others require that ALL parties know. Read the front section of your
phone book; chances are your state's rules are mentioned there.

>But, again, recording/wire-tap laws are determined at the federal level. Any
>state laws are superseded by federal law anyway.

This isn't the case if the federal law defers to the state. It's
my understanding that federal law requires that AT LEAST one party
knows about the recording, and that some states have stricter rules.

>Just like California has a state law allowing medical pot use. The federal
>government doesn't recognize this law and will prosecute anyone using
>"medical" pot. It's a hot topic. Federal always has and always will take
>precedence over state law.

Only if the laws conflict. For example, the Federal Do Not Call List
didn't abolish all the Do Not Call Lists in states that had them.
A law can explicitly say that the states are free to impose higher

penalties. Federal regulations capping speed limits on highways (for energy-conservation purposes) don't prevent states from putting a lower speed limit on a section of highway (for safety, noise, revenue enhancement, or other reasons).

Thought for the day...When your child who is under 18 commits a crime and that crime cost somebody $$$'s, does the kid pay? Or does the parent pay? Is the state willing to pay the legal fees? If a parent can't eaves drop on a minor child, when they believe their child is doing something illegal or unnacceptable, in their home that they are paying for and the phone that they are paying for, then the state shouldn't hold the parent financially accountable. THAT'S my ever so humble GOOD parent opinion. Carmen, right or wrong...I would have done the same thing...

As I wrote elsewhere . . .

Good! Young children shouldn't be using the phone. If they are old enough to responsibly use the phone for personal conversations, then the parents should mind their own business. This ruling is right and just. It is also surprising, as courts rarely rule on the side of common sense. -Dave

Because the employer makes you sign all your rights away as a condition of
employment. For the same thing to happen in a mother/child relationship,
the legal documents would have to be signed by an embryo. -Dave

No, it's not ridiculous at all. The mother can ALLOW the child to use the phone. If she does, then the child has an expectation of privacy while using it. If the mother can't live with those terms, then the child shouldn't be on the phone at all. Put another way . . . if you don't trust your child to use the phone without illegally spying on him/her, then your child shouldn't be using the phone, period. -Dave

Two teenagers. I take it you endorse illegally spying on my kids if they happen to call your kids? If you don't trust your kids to use the phone responsibly, then keep them off the phone. You don't have to let them use the phone at all. But if you do, the law dictates that you not spy on them. So you need to decide whether you trust them or not BEFORE they use the phone. -Dave

This is ridiculous. Wonder how this ever got to court in the first
place?

If she isn't going to wiretap anymore, the answer is easy, no phones
for the kids.

Please cite the statute that you are referring to with respect to consent to monitor or record calls -- I'm quite interested, as it is relevant to my profession. Otherwise, please see, eg, http://expertpages.com/news/taping_conversations.htm

The *legalities* in the case of listening in to your child's conversations, BTW, really refer to the use of the information gathered in court. (In this case, it appears that mom was going to testify against the teenager with whom her child was speaking; I'd guess that the teenager confessed to a crime. Just to keep this in perspective.) I strongly doubt that any court is otherwise going to opine on the appropriateness of a parent listening in on his or her kids' conversations. So, the real questions regarding eavesdropping become those relating to familial relations and trust.

Barbara

Two problems with that, rocket scientist. First, In the referenced case in the OP, the mother didn't suspect anything illegal UNTIL SHE BROKE THE LAW HERSELF. Also, how are you going to protect your kids if you end up in prison for illegal wire-tapping for spying on someone else's kids?

If you don't trust your kids to use the phone, then they shouldn't be using the phone. It's not rocket science. -Dave

Actually, a minor child does have some rights. It is illegal to eavesdrop on phone conversations, and there is no exception for age of the people talking on the phone. Minor children do NOT have the right to talk on the phone, however. So as I've stated several times, if you don't want to OBEY THE LAW and let your child's phone conversations be private, then forbid your children from using the phone. -Dave

Ummm . . . eavesdropping on a telephone conversation is illegal. There is no exception for employers. If you didn't sign your rights away, then you have the expectation of privacy when using the phone . . . ANY phone. BTW, where do YOU work where the employer is stupid enough to not insist that you sign your rights away?

If the child doesn't want to be monitored, she can expect her parents to OBEY THE LAW, if her parents allow her to use the phone at all. -Dave

Well, they do have a good mother, as I chose her very carefully. On a side note, there was a civil lawsuit in the news recently where a jury awarded tons of money to a mail-order bride who married a wife-beater. The judgement was against the dating service that introduced the couple. Most people seem to think this is OK, as the dating service should have known that the never-previously-married man was a wife beater. Me, I think if you are stupid enough to marry someone whom you DON'T KNOW very well, then that's your own damned fault if it turns out to have been the wrong decision. Choosing someone to marry (or even whether to marry at all) is the single biggest decision you will ever make in your life. Choose sely. -Dave

>

When my son was a teenager I listened in on his conversations, whether on the phone or behind his closed door when he was with his friends. Had I not done this, I don't know what kind of troubles my son would have gotten into at that time. Sure he bitched, moaned and complained about his privacy but I didn't care. As long as I was responsible for him, I did what I thought was right. Now he's in his 40's with 3 boys of his own and he admits that he would have gotten into trouble had I not monitored his actions. If ever the State thinks they can do a better job than I can as a parent, they are welcome to take care of my kids, stay up with them all night when they are sick, walk them to school, take them on vacations and pay for their care and worry about them as much as I do but as long as all those duties are mine, I'll do it my way.

I have to laugh, I think Dave C. is a lawyer. The minute I remove the phones from my house because I can't trust my kids, then when there is an emergency and something happens to my minor child, I will be considered an irresponsible parent because they can't call 911 and I'll be sued by my kid and the child welfare department. Where is the common sense here. Parents are responsible for their minor childs actions.....PERIOD. Parents, do what you must to keep your kids safe!

Something that no one has mentioned is that this was the Washington State
Supreme Court. Washington State's Constitution has a higher right of
privacy
than the US Constitution, so several things that are legal in other States
aren't
legal in Washington State.
```

> This is ridiculous. Wonder how this ever got to court in the first
> place?

This went to court because it was a trial for the boyfriend who was accused of snatching purses. The mother, herself, was never on trial. I don't even think it says that parents can get into trouble for monitoring their kids phonecalls. Just that any information heard can't be entered as evidence if their kid or someone they are talking to admits over the phone to doing a crime.

When one of my children was clearly getting out of control, I handled it
differently: I TOLD her that her behavior had cost her her privacy
rights, and that I would search her room or listen in on her phone calls
at my discretion.

I did not want to prevent her from ever using the phone -- she did have
some friends who were good for her -- but continuing to eavesdrop from
time to time kept me aware of what she was doing.

(She's more or less fine now, and I no longer feel the need to invade
her privacy.)

This conversation has gotten weird.

I read the article again, and it does NOT say that a parent
eavesdropping on their child is illegal. The mother in question has not
been charged with any crime.

What the court ruled was that information gathered this way was not
admissable in a court of law in a case involving a third party.

The admissability of evidence often has nothing to do with whether the
activity itself was illegal. In the most blatent example I can think
of, it is perfectly legal for a person's spouse to tell them they've
committed a crime; however, information gathered that way can NOT be
used as evidence in a criminal trial.

Nor was there any indication that the mother recorded the call, or had a
wire tap -- she listened in on it. Her testemony about what she HEARD
was declared inadmissable.

So, if it seems necessary, I say continue to listen in on conversations
being held on your phone in your house.

I thought this as well, but I went to news.google.com and
searched for "Dixon Christensen" to get more info about the
case, and apparently in fact the court did rule that it was
against the law for the mother to eavesdrop on her child's
conversations.

Sorry, but the law disagrees. It's not a queston of who owns the
phone, it's a question of who has a reasonable expectation of privacy.
By YOUR logic, the owner of a pay phone could record all your calls
and broadcast them on the store's loudspeaker.

Because the employers are required to notify both the employee and the
customer that the calls are being monitored.

Because the courts (judges, really) don't bring criminal charges against anyone unless said criminal activity happens in the court. (such as "contempt of court" and similar). If the DA were to bring wiretapping charges against the mom in question, I doubt the "court" would dismiss the charges. The court ruled on whether the testimony of the mother was admissible. The judge made the right ruling. Illegally obtained evidence is not admissible. -Dave

That is true only in those issues where the federal government has been
granted the power to make laws by the "several states" and the citizens
thereof. In issues for which the power has NOT be granted to the federal
government, the state law supercedes, though the federal government would
like you to believe otherwise.

4000. Ex Hammie Jack Jammer Gerritsen Fined Another $21000 And He Runs Away

Newsgroup: rec.radio.scanner
Date: 2004-12-10 19:15:27 UTC
From: netmanager2@yahoo.com
Message-ID: <1102706127.363111.295450@z14g2000cwz.googlegroups.com>
Source record: 16314
Cross-posted to: rec.radio.amateur.policy, rec.radio.amateur.misc, rec.radio.shortwave, rec.radio.scanner, rec.radio.cb

This is from todays News Line report.

ENFORCEMENT: ANOTHER $21,000 FINE PROPOSED FOR EX-KG6IRO

>From the "we told you so department" comes word that the FCC has proposed an additional twenty-one-thousand dollar fine against Jack Gerritsen, the former KG6IRO. This on the heels of a ten thousand dollar fine that the agency affirmed against the former California ham in October. Amateur Radio Newsline's Bruce Tennant, K6PZW, has been following the Gerritsen saga and has the rest of the story:

--

The FCC wants to hand Jack Gerritsen, the ex KG6IRO a proposed fine in the amount of $21,000. But it has to find him first. And for the past three weeks or so, Jack Gerritsen is no place to be found. At least the unlicensed male operator using the null and void call sign KG6IRO has not been heard on any of the Los Angeles area repeaters for that amount of time.

Word of the latest Notice of Apparent Liability to Monetary Forfeiture to Gerritsen has spread like wildfire across the Internet and packet radio networks after the ARRL posted a news item on it to its website. In a nutshell, it said that the FCC was hitting Gerritsen with the $21,000 N-A-L because of interference he caused to hams operating numerous Southern California repeaters. This, in a time frame from June through September of this year.

This latest notice comes on the heels of a $10,000 fine for earlier violations. One affirmed by the FCC only a few weeks ago and not associated with other allegations of jamming Coast Guard Emergency Communications that we reported three weeks ago. That matter is reportedly still under investigation by military authorities.

Gerritsen, or at least the voice on the air claiming to be Jack Gerritsen has never denied making the transmissions. Quite the opposite. On numerous occasions he has come up in the middle of an ongoing Q-S-O and announced that his intentions to take over the channel. He has then proceeded to cause interference, usually by playing a tape of his anti government political rhetoric and his opposition to the U.S. military action in the Middle East.

--

Sample of Gerritsen anti-war audio recorded off-air: "...those high explosives are now in the hands of patriots defending their country from our invasion killing hundreds of the coalition forces and more than a thousand Americans who are still looking for weapons of mass destruction. Do we need four more years of this? Kilowatt Ge 6 (undescernable....) Oscar.)

--

One way that hams in the area have handled these attacks on their repeater systems has been to simply shut them down. Others, with multiple sites tend to turn off receivers that the Gerritsen voice can access to while keeping communications going through other receive sites he cannot reach. Some of these countermeasures have at times seemingly angered the voice claiming to be Gerritsen.

--

Sample of voice claiming to be "KG6IRO voice" admonishing repeater owners: "Your attention please. To all repeater owners and operators. For those of you who demand or request that I not (undescernable) their repeater with my radio signal, I have the same demand and request that you stay out of the receiver of my radio equipment. Kilo Golf 6 India Romeo Oscar."

--

On several occasions he has threatened legal action against those taking him off the air based on his First Amendment Constitutional guarantee to freedom of expression. So far those threats have proven groundless. Now, the real Jack Gerritsen is no place to be found. There are a number of rumors that he has left the United States for Central or South America, but at airtime none have been substantiated.

All that's definite is that former radio amateur Jack Gerritsen owes the government at least $10,000 and has the new proposed $21,000 fine waiting in the wings. And there's still that Coast Guard issue that could bring with it a much harsher penalty. We will all have to wait and see.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Back in 2001, the FCC's Wireless Telecommunications Bureau rescinded its Amateur Radio license grant to Gerritsen. This, after learning of his earlier state conviction for interfering with Los Angeles area police radio communications. (ARNewsline(tm) from numerous sources includinh K6PZW, ARRL, and numerous others)

What other person's civil rights? Her daughter's? The article leads me to believe no such thing. It did not say that her minor daughter had any expectation of privacy in the parents' home. This dealt strictly with testimony in a criminal matter, and how the information from that testimony was obtained. I doubt it cleared the way for the daughter to sue her mother. They said the police can't use it.

I don't understand why the issue had to come up. I would infer from the article that the mother testified that she overheard this other kid admit to a crime. So she testifies to what she heard someone else say, and what was said was taken as fact? I thought that was hearsay - inadmissable regardless of how it was obtained.

What kind of batteries do these use? I have not seen this on any of the
sites that list them. Do they use regular AA batteries?

Well, I think you hit on it. The AP article (and the original poster of the
thread) made a distinct point of misquoting the court case in order to
create a sensational headline, solely for the purpose of riling everybody.

You don't necessarily have to give you kid advance notice. The problem with the phone monitoring, in many states, is that the third party has a legal expectation of privacy. If you could bug your kid's room and be able to listen to just her side of the conversation, you would probably have no legal worries.

The way I read the article originally posted, the issue privacy issue was applied to the other party in the conversation, not the daughter.

Your daughter's expected level of privacy is controlled at your discretion. But you can't control the rights of people she talks to on the phone. So you have use even more discretion when eavesdropping on

both sides of a phone call.

Presumeably the daughter was talking to someone else on the phone.
She had no parental rights to intrude on the expectation of that
person's right to privacy.

My own position is that my kids started out with a high expectation of
privacy from me and their dad (and each other). When that changed, I
felt morally obligated (not legally) to tell them, and to tell them why.

>
> The way I read the article originally posted, the issue privacy issue

I understand that -- but, since I was only "using" the information with
my daughter, and would not have used the information in any other way, I
decided to do it anyway. (The only exception was towards a young man
who had been ordered to have no contact with her -- but I never listened
long enough to hear what he was saying, only to tell him to get off the
phone immediately. He's in prison now, so I don't worry about him any
more....)

That's not true everywhere. I am operations manager for a major communications provider and I serve one major corporate customer. That customer recently asked me to connect an employee's phone line to the call monitoring system normally used for "quality assurance" recording in the call centers. The confidential request they made noted their intention to monitor the employee's phone calls without his knowledge. I had to advise them that what they were doing was illegal - I contacted *their* legal and security group who concurred with my advice. In California, any phone call going over the public network cannot be monitored or recorded without consent of BOTH parties.

The company can record/monitor internal calls. They are on a private network. So anyone that believes they have a right to privacy on ANY phone, should think again. E-mails are different matter - that is written corespondance that can be considered company record when it's on their system.

The restrictions extend to the call center operations here too. Customers hear "your call may be monitored or recorded..." The montoring system records all calls on the customer service reps phone, as well as what they are doing on their computer during the call. In addition to the line for call queues, there is also a line for the CSR to use for direct incoming calls or to make outgoing calls. The monitoring system records all calls on the CSR's phone regardless of what line is used.

When recordings are reviewed by management, they are always reviewed by two people. The privacy policy requires that as soon as they identify anything they hear as personal or otherwise not related to customer service, they stop listening and move on. The direct line on the CSR phone does not have a monitoring notice so the privacy has to be extended to third party.

My kids are now all 18 and older, and I have not stopped caring.

I'm glad to no longer be "on the hook", but I still care passionately.
If I thought invading their privacy at this point would serve any useful
purpose, I'd do it.

Though I will point out, in the "for what it's worth" category, that
many times the parents are NOT fined or held responsible. When my
daughter got busted in 10th grade with brandy at school (and drunk), and
when she got busted for having cigarettes in her possession, she had to
go to court, and fines were levied. I didn't pay them. Neither did she
-- until she found out she couldn't get her driver's license until she
DID pay them. The silly girl thought I'd pay the fines, or lend her the
money to pay them. (Not sure what universe she thought we were in . .
.) She finally got a job, and paid the fines -- and got her license
last week, just a few weeks before her 19th birthday.

In other cases, the parents CAN still be held responsible no matter how
old the "kid" is -- for example, if my car or house are found to have
illegal drugs in them, I could still be fined or have my property
confiscated, even if I didn't know they were there. There've been cases
where people have been thrown out of their rental units because one of
their kids (or grandkids) had illegal drugs on the premises.

I'm one of those "bleeding heart liberals" (though I much prefer to
think of myself as progressive). The only thing I find offensive about
your statement is that you stopped caring. I don't think I'll EVER stop
caring!

this whole issue is that the girl's mother testified at the boyfriends trial on what she herd when her daughter was talking to the boyfriend. This case reflects what evedence can be brought to court. As a parent you still have a right to listen and be concerned on what your children do. this story was not reported correctly and was a teaser, but it did make headlines right?

4012. Q about Bay Area mobile TV Production

Newsgroup: rec.radio.scanner
Date: 2004-12-10 22:38:44 UTC
From: Lars Janqqvist <SpamMeDaddy@ix.netcom.com>
Message-ID: <439kr0dftddg0cdv05vqhait77nb3b1hrk@4ax.com>
Source record: 16326

I used to listen to a couple of frequencies that the mobile news vans used to talk to the TV production staff. Mostly the one for KTVU at 450.3375. Now I'm looking for them again and all the 450 and 455 channels I knew are dead now. Google pulled up a couple of references to the freqs I already new, but nothing about how that may be communicating now.

Has the technology changed in the last 3 years?

Thanks.

Caring? Never. My mom still cares about what *I'm* doing, and I'm 52.

Two of my adult children DO still live with me, because I can't afford
to send them to 4 year colleges. They live at home, and attend a local
community college -- and I support them, as do many parents of college
age kids.

You SAID you stopped caring about what they were doing once their behavior would no longer put you on the hook legally. Now you're saying that, if they gave you cause to be suspicious, you'd still care enough to eavesdrop. Can't have it both ways -- and I'm saying that, if I thought listening in on their phone calls now would be helpful in any way, I'd still do it.

> conversation.

Wow. That's rather across the board.

One special case comes to mind. What if the teenager is emotionally handicapped?

I know of a fetal alcohol syndrom girl. Her adopted mother occassionally listened to her phone conversations.

The girl had no mainstream friends. She did have a number of friends she met at special functions (Special Olympics, a special bowling league). These friends were spread throughout the city or region and weren't "in the flesh" except during the events. So the phone was critical to this girl's social life. That's how she stayed in touch with friends.

By picking up the phone one day, the mom found out a 30'ish man was calling her daughter regularly. The man was asking her daughter about condoms, where they were going to meet, etc.

So I guess that conversation couldn't be used to convict a guy of statutory rape or child molestation.

That's ... not believable. There must be some clause that's not being mentioned.

I own it's brother the VR-500

They do not follow trunked radio systems.
Their scan rates are slower than most Uniden and RS scanners.

The VR-500 is a decent "conventional" scanner.
The strength of the 120D and the 500 is the wide coverage.

I listen to Marine, Taxis, drive through windows, Shortwave, medium wave
etc...
I do not listen to police or public service (I have a pro-95 for that)

I might add that the 120D little brother has one desirable advantage over
the
500 in that it has a built in ferrite bar antenna for medium wave. I wish
I had that.

I wish somebody sold a medium wave, ferrite bar antenna that would
plug into a bnc connector.

Oh?

Well, I posted this and here are the AP headers and 1st paragraph:

Court: Mom's Eavesdropping Violated Law

SEATTLE (AP) - In a victory for rebellious teenagers, the
state Supreme Court ruled Thursday that a mother violated
Washington's privacy law by eavesdropping on her daughter's phone
conversation.

> > the parent's death. ;)

Why, in your mind, does "caring" equal "micromanging" -- or, for that
matter, ANY managing?

I can detach with love -- that means I keep caring, but acknowledge that
they are in charge of their own lives. I CAN control MY decisions, and
that might mean, for example, no longer paying for college if they don't
take it seriously enough to finish classes. But that isn't an attempt
to control what THEY do -- just making clear boundaries: as long as
they are in school, and taking school seriously, I will cover books,
tuition and fees, keep them in transportation, and provide free room and
board. If they STOP going to school, they can provide their own
transportation and, if they want to live here, pay room and board.

Recently, I've had to make clear that if they choose to NOT live at
home, I will NOT give them money for ongoing living expenses. I can
afford to cover that if they are living here, but we don't have extra
money to cover their rent, utilities, etc. living somewhere else.

> Not me. Some things people just have to learn for themselves. ;)

Where on earth did I say THAT?

When I say "if I thought it would help", I'm talking about finding out they are into things like illegal drugs (using and/or selling), stealing, unsafe sex -- basically, things that are illegal or could kill them -- and I believed that violating their privacy would provide me with the kind of information I needed to intervene.

I DID intervene when a 21 yo "bad boy" started hanging around my younger daughter when she was 14, but I smelled a predator (accurately, as it turned out) and he is now in prison on a variety of charges related to his activities with minors. I was desperately trying to keep her safe from this jerk.

However, other than that, I have NEVER tried to control who my kids are friends with, even when I think their friends are bad for them. And they HAVE made some astoundingly bad choices in friends! The most I've done is tried to make sure they spend lots of time in places healthy for them, so they'd have an opportunity to make good friends, too -- places like the theater program they all enjoyed, and church, which they ALSO enjoyed.

Heck, for a while, one of my kids dated a young man who lived under a bridge. He had lots of problems. I invited him for dinner as often as he wanted to eat with us, and, when he was VERY ill, allowed him to sleep in our house (on the sofa!) for a couple of weeks. (I had, at one point, allowed him to stay for a few weeks while he was waiting to get into transitional housing; however, when a room became available, he decided he didn't want the amount of structure required to live there, so I threw him out.) I did not "approve" of their relationship, but I also knew that if she wanted to see him, she would -- I figured if I kept them close, it would be better all around. Unfortunately, his going away present to her was a case of Hepatitis B.

State rights vs federal subsumption is more complex than merely the
word: "contradicts". The State cannot forbid that which is subsumed
under the federal assurance of human rights or any and all high court
interpretations of that effect, and of the commercial effects of

over-reaching federal law, but things not so directly banned by
federal aegis are game for state control.

So what you did was to simply ensure that you would never REALLY know
what was happening in his life, and you still don't. He undoubtedly
used the knowledge of your spying as a means to disinform you.

Charming what people think are the results of their actions.

That's because you're an idiot and don't grasp the secondary effect
she had, to never actually be able to know what was really going on,
to teach her son how to lie better and keep secrets, and how to
disinform when he believed she was listening in. But much worse, to
make her son realize that she was on her OWN side, and not on his,
and that he couldn't really count on her for anything.

Our kids could count on us not dishonoring them or trying to control
them by dishonor, and thus they told us everything.

> Sorry if that offends you bleeding heart liberals in the audience. ;)

The problem with your kind of ignorance is that the EFFECT that you
THINK that it has, it doesn't.

As soon as you try to be controlling your child will remove their
trust from you and you will know MUCH less than you THINK you know
from then on, you will NEVER be able to trust them, because they
will never trust you or even LIKE you, everything they do after
that is merely PLAY-ACTING!! If you don't understand that this
is true, then either your kids are actually even more congenitally
simple-minded than YOU are, or you've made yourself blind, deaf,
and dumb! There is NO effective way to control anyone with their
own mind and control of their own body, you simply can't control
them every second and have a life of your own! They know this.

In addition to that you destroy any actual use they might have had
for you by making yourself obnoxious, and you have taught them that
they can't count on anyone like you.

> actions.....PERIOD. Parents, do what you must to keep your kids safe!

You simply don't grasp this deeply enough.

Here's what parental responsibility ACTUALLY means! Actually: The
parent deserves everything their child decides to inflict upon them!!
And why?

Because the treatment of the child is wholly responsible for how
the child treats the parent and in fact wholly JUSTIFIES that same
treatment!! YOU GET WHAT YOU DESERVE FROM YOUR KIDS! If you can't
trust them, YOU did it! If they hate you, YOU MADE THEM! If you
were unable to justify their love for you, then you deserve their
hate!! If you don't give them what you were supposed to, AND in a
mode and manner so that they WANTED TO RECEIVE AND ACCEPT IT, then
you DESERVE ALL the results!!

Anyone who pretends they deserve to GET differently than they GAVE,
is LYING! If you can't incur the love of your children so that they
want you PROTECTED, then you don't DESERVE IT!!

Yeah. The "you're merely ignorant" clause.

Without a warrant, contents of phone calls are protected even from
heresay about them as being "fruit of the poisoned tree" because
they have the "reasonable expectation of privacy".

There is less expectation of privacy in the workplace.
And the employer pays for the setting.
You would STILL need a warrant to make a conversation court-admissible.

Actually a majority of states punish ANY attempt to deprive a child
of the right to call police or emergency services, and if you try
you can be imprisoned!

People who dishonor their children that way GET dishonored BY their
children. A friend of mine who hated her father used to plant things
in her father's sock drawer for her mother to find, receipts carefully
altered, porno, etc. Those who fuck with their kids are destined to be
fucked BY their kids.

They provide the equipment solely for you to perform their business,
not yours.

> It's a basic right the
> employer has - I don't need to sign anything for it to be in effect.

True. But the relationship is inherent, like using their printer.

> >If the mother can't live with those terms, then the child
> >shouldn't be on the phone at all.
>
> If the child doesn't want to be monitored, she can buy her own phone

> required.

When you let anyone use your telephone, you surrender your control
of it and have no right to invade their privacy. When you provide a
phone ONLY for THEM to perform YOUR business purposes, the burden is
quite different.

When you try to bar your child from using a phone in their residence
for their own private purposes, you're asking for them to do hateful
things to you which you will fully deserve.

> >Put another way . . . if you don't trust

4043. Tuning FM 110-130 MHz: Which Scanner?

Newsgroup: rec.radio.scanner

greetings all

I was wondering if there is any type of simple receiver or scanner I can find/purchase that would be capable of tuning above the FM band, like from say 100 to 130 MHz. In this range I would still want to be able to receive and demodulate FM signals. WFM or NFM.

I've been looking all over the web but haven't found any simple receiver like this. Does such an animal exist, or would I have to retune a standard FM band radio for this job? Any advice/feedback/comments much appreciated. Thanks.

MJ

Ignorance?

I have raised children to adulthood. I agree with most all this man had to say. I merely used 'Amen' to state that.

If you've raised children and had the misfortune to have your child misdirected by the child of parent(s) that do not raise them properly, you would agree as well.

I gave trust first and when proven wrong, I reacted to the situation and did what had to be done. As long as they are in MY house...Screw my childrens rights! I have the right to raise children that don't cause me any more problem than life has to offer. Raise your children correctly now or visit them in prison later.

Bottom line...I raise my children so that you don't need the police to protect you and if everyone did, this world would be a much better place to live!

You imagine the exact opposite to what is true.
YOU and the shit in your head causes child criminality.

Your attitude is what causes children to become mass-murderers.
You just don't grasp that because of your ignorant pride.

The Child Protective Services are highly corrupt. They don't know a thing about raising kids properly. Most of the case workers don't even have kids and are most likely to lie on you in a heartbeat! Tread carefully. Case workers should not have absolute immunity, and neither should judges and prosecutors!

Spoken by a true non-parent. You are so full of shit you must
have brown eyes. Parents can and some do "everything" right and still
have a problem child,,, obviously you have NO experience at this or
your kids are in the less than 10 age which is when some really start to
rebel. All of your stupid all caps remarks and all the stupid exclamation
marks tells me you have an agenda,, or are you a 16 year old.
What a dumb ass. Read a book dumbfuck.

I dont care. He obviously is one of the holier than thow types
and doesnt have a realistic grasp of human nature. I know I am most
likely quite senior to him and have seen many, many cases of good-
bad parenting and the results defies his so called pie in the sky attitude
of parent-child relationships. Human nature or parent child relationships
are not mathematical equations where 2 +2 = 4 like he desperately
wants everyone to believe, by his rantings. Quite honestly he comes
accross as a cross posting lunatic.

I checked out the BC246T based on your suggestion. It looks like a nice little unit, however I don't really need another receiver. I can see the advantage of having a unit that will tune to the found frequencies right away, though, especially when you consider the price difference between the 246 and the Scout. What I'm wondering about is the difference in performance between the units strictly as frequency counters/recorders.

This is from todays News Line report. If the quotes are true then this Gerritsen sounds like hes a traitor. What kind of a nutcase praises al Kida for killing Americans?

>ENFORCEMENT: ANOTHER $21,000 FINE PROPOSED FOR EX-KG6IRO

>From the "we told you so department" comes word that the FCC has proposed an additional twenty-one-thousand dollar fine against Jack Gerritsen, the former KG6IRO. This on the heels of a ten thousand dollar fine that the agency affirmed against the former California ham in October. Amateur Radio Newsline's Bruce Tennant, K6PZW, has been following the Gerritsen saga and has the rest of the story:

--

The FCC wants to hand Jack Gerritsen, the ex KG6IRO a proposed fine in the amount of $21,000. But it has to find him first. And for the past three weeks or so, Jack Gerritsen is no place to be found. At least the unlicensed male operator using the null and void call sign KG6IRO has not been heard on any of the Los Angeles area repeaters for that amount of time.

Word of the latest Notice of Apparent Liability to Monetary Forfeiture to Gerritsen has spread like wildfire across the Internet and packet radio networks after the ARRL posted a news item on it to its website. In a nutshell, it said that the FCC was hitting Gerritsen with the $21,000 N-A-L because of interference he caused to hams operating numerous Southern California repeaters. This, in a time frame from June through September of this year.

This latest notice comes on the heels of a $10,000 fine for earlier violations. One affirmed by the FCC only a few weeks ago and not associated with other allegations of jamming Coast Guard Emergency Communications that we reported three weeks ago. That matter is reportedly still under investigation by military authorities.

Gerritsen, or at least the voice on the air claiming to be Jack Gerritsen has never denied making the transmissions. Quite the opposite. On numerous occasions he has come up in the middle of an ongoing Q-S-O and announced that his intentions to take over the channel. He has then proceeded to cause interference, usually by playing a tape of his anti government political rhetoric and his opposition to the U.S. military action in the Middle East.

--

Sample of Gerritsen anti-war audio recorded off-air: "...those high explosives are now in the hands of patriots defending their country from our invasion killing hundreds of the coalition forces and more than a thousand Americans who are still looking for weapons of mass destruction. Do we need four more years of this? Kilowatt Ge 6 (undescernable....) Oscar.)

--

One way that hams in the area have handled these attacks on their repeater systems has been to simply shut them down. Others, with multiple sites tend to turn off receivers that the Gerritsen voice can access to while keeping communications going through other receive sites he cannot reach. Some of these countermeasures have at times seemingly angered the voice claiming to be Gerritsen.

--

Sample of voice claiming to be "KG6IRO voice" admonishing repeater owners: "Your attention please. To all repeater owners and operators. For those of you who demand or request that I not (undescernable) their repeater with my radio signal, I have the same demand and request that you stay out of the receiver of my radio equipment. Kilo Golf 6 India Romeo Oscar."

--

On several occasions he has threatened legal action against those taking him off the air based on his First Amendment Constitutional guarantee to freedom of expression. So far those threats have proven groundless. Now, the real Jack Gerritsen is no place to be found. There are a number of rumors that he has left the United States for Central or South America, but at airtime none have been substantiated.

All that's definite is that former radio amateur Jack Gerritsen owes the government at least $10,000 and has the new proposed $21,000 fine waiting in the wings. And there's still that Coast Guard issue that could bring with it a much harsher penalty. We will all have to wait and see.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Back in 2001, the FCC's Wireless Telecommunications Bureau rescinded its Amateur Radio license grant to Gerritsen. This, after learning of his earlier state conviction for interfering with Los Angeles area police radio communications. (ARNewsline(tm) from numerous sources includinh K6PZW, ARRL, and numerous others)<

> have a problem child,,,

Nope, nonsense, never ever seen it.

In fact, what you think doing "everything right" then
MUST BE WRONG, Shithead!!

You have some psychologically DEFECTIVE pet notions that
YOU just don't want to see go down in FLAMES, but they do!
They really do!:

You see, control freaks like you fuck up everything
you touch, your marriages, your children, your lives.

> obviously you have NO experience at this

WWRRRRONNGGGGOOO!!!!

> or
> your kids are in the less than 10 age

WWRRROONNGGOO AGAIN!!!!

> which is when some really start to rebel.

Hint!: Hey, King BigShit.
Your "colonists" don't rebel unless you TREAT THEM LIKE SHIT!

Mine didn't at ALL, because they NEVER HAD TO!
It isn't a necessity, you know!
Well no, you don't know, do you?

Rebellion is a symptom of ABUSE in a chronically child-abusive
culture like THIS one!

> All of your stupid all caps remarks and all the stupid exclamation
> marks tells me you have an agenda,

Damn straight, the RIGHT ONE!
I want to see the people like you who fuck up children STOPPED!

> or are you a 16 year old.

Nope, born in 1950. I'm 54.

> What a dumb ass. Read a book dumbfuck.

You mean I'm someone you SHOULD have learned respect for and just
admitted that I'm someone who had learned more than you and from
whom you should learn. But you're such an ill-raised little egotist
that it would damage you emotionally to permit that awareness.

Like most emotionally immature Americans you fancy that anyone who
disagrees with your grunting inability to express yourself at depth,
or anyone who thinks deeply on an issue, is "unrealistic", which
actually means that you're alienated from the truth about your
sick sick culture.

> I know I am most
> likely quite senior to him

Are you over 54? And are you actually mature? I doubt it.

> and have seen many, many cases of good-
> bad parenting and the results defies his so called pie in the sky attitude
> of parent-child relationships.

The pie isn't in the sky if you get to eat it, moron.
The pie is quite tasty for me and MY family, yours is sour grapes!

Don't tell us it can't be done merely because YOU don't
want to do it the right way!

> Human nature or parent child relationships
> are not mathematical equations where 2 +2 = 4 like he desperately
> wants everyone to believe, by his rantings.

If I'm not mistaken, that is the aero band, and most traffic in there is
AM.

Nevertheless, many scanners let you select the desired modulation (AM,
FM, NFM, etc.) for any particular frequency. (Some of the less expensive
ones do not let you select, but instead are hardwired for a certain type
of modulation within each band.)

So, the answer would be "yes". Have a look at the current lineup of
scanners, and pick one that lets you set the modulation.

Just becuase you have never seen it doesnt mean it never
happens. It most certainly does happen,, more than "you" may
think, in that tiny little pompous ass brain of yours. Go spend some
time at a counselling facility for kids and just see how kids can
choose the wrong path in life all by themselves. They're not abused
or mistreated kids, many come from very normal loving homes,
Christian homes where the parents really do practice what they
preach. FYI I work in hospital enviroment and have for more

than 20 years now, and I see this kind of stuff quite often.

You post all this "crap" in the manner that you post it with
all your "all caps" and stupid exclamation points and you expect
"anybody" to believe you. And you call ME a control freak??
Again what an absolute pompous ass. I would suggest you
are the acting control freak here.

> > which is when some really start to rebel.
> ----------
> Hint!: Hey, King BigShit.
> Your "colonists" don't rebel unless you TREAT THEM LIKE SHIT!

Absolutely untrue,, rebelling is actually quite normal for preteens
and teens, its part of growing up and establishing their own
independence. Its what a parent does about it that counts.
Like I said get a real education on the subject.

>
> Mine didn't at ALL, because they NEVER HAD TO!
> It isn't a necessity, you know!
> Well no, you don't know, do you?
>
> Rebellion is a symptom of ABUSE in a chronically child-abusive
> culture like THIS one!

What total BS this is,, all rebellion is from abuse huh. Now you
have just blown any tiny little shred of credibility you "may" have had,
blown,,, gone . Like I said before read a book, get a life

>
> > All of your stupid all caps remarks and all the stupid exclamation
> > marks tells me you have an agenda,
> ----------

> Damn straight, the RIGHT ONE!
> I want to see the people like you who fuck up children STOPPED!

My kids are all grown and gone,, all of them are decent
law abiding, tax paying, successful citizens. They arent screwed
up freaks like you are soooo desperately trying to imply. Man
you must come from the twilight zone or somewhere. The mere
fact that you are trying to imply my kids are mental defectives
because of my parenting skills without knowing a thing about
me or my familiy really speaks volumes about YOU.

> And if YOU had you'd know that they agree with ME,
> you child-abusive dipshit.

Jesus you are quite taken with yourself arent you?? Once again
you call me a control freak????? You call me a child abuser?? Do you
know my distant past??? have you spoken with my children??? NO .
You are full of nothing more than conjecture and inuendo, nothing
more. There is only one thing worse than a pompous ass, and that is
a self righteous, indignant pompous ass,, kinda like you stevie
Oh and welcome to my killfile, you truly arent worth my time. I dont
debate with unrealistic, narcissistic, asses like you

Message-ID: <CMZud.117479$7i4.74854@bgtnsc05-news.ops.worldnet.att.net>
Source record: 16293

The Federal Aviation Administration and Boeing, the nation's largest builder of airliners, both support the F.C.C.'s ban, arguing that cellphones can interfere with navigation systems.

In fact, European newspapers widely reported that use of a cellphone contributed to the crash of a Crossair commuter plane in 2000. LX Flight 498, carrying 10 passengers and crew members, was bound for Dresden when it crashed outside Zurich minutes after it took off, killing all on board. Officially, the reason for the crash remains unknown. But news reports at the time said a passenger apparently took a cellphone call at the same time that the pilot engaged the autopilot controls. The plane subsequently went into a dive.

Despite such questions, airlines have begun their own tests of whether cellphone use can be made feasible. A test last July by American Airlines, the nation's biggest, allowed the use of conventional cellphones to place and receive calls by way of a picocell - a miniature cell tower the size of a pizza box. The system was installed by the wireless equipment maker Qualcomm inside the jet.

The picocell linked to several antennas inside a cable that gathered signals from passengers' cellphones and sent them all to a small satellite dish, no bigger than a laptop computer, on top of the plane. From there, the calls were beamed to an orbiting satellite, which sent the calls back to special cell stations linked to phone networks on earth.

"It's only a matter of time before we have cellphones on planes," said Scott Becker, senior vice president of Qualcomm's Wireless Systems division.

> Any suggestions of what the best analog VHF tuner would be? Preferably a
> unit capable
> of receiving NFM, WFM and AM. Thanks.

Define analog? Do you mean it must have a dial to turn? Or must it really be a VFO based tuning system with no synthesized steps, no matter how small?

I understand the desire to actually have a dial to turn, I like tuning in this method myself. But, a synthesized rig with adequately small tuning steps should not be a problem for any application I can think of. Depending on the exact application you can select the tuning steps you require. For FM, either wide or narrow, I can not think of any real reason to use smaller than 1 kHz or maybe 0.5 kHz steps. The capture and AFC would take care of the less than 500 Hz tuning error that would be the result with 1 kHz steps, and 0.5 kHz steps would result in a step error of less than 250 hZ. These size tuning steps often are fine for AM as well, although 0.1 Hz is better. Naturally, for SSB reception I can see the need for smaller steps, often 0.01 kHz (10 Hz) or smaller.

If you are talking about a new unit I doubt you will find a VFO base radio available. Almost everything these days covering that band is synthesized to some extent. Anything that is not synth probably is fairly low end and will not allow you to select anything but AM in that band. However, if you really only mean you want table-top unit with a tuning dial then there are a few new units out there. Most of them are fairly high end, and thus expensive.

Icom R-8500 (I use this myself, and like it a lot)

Yaesu VR-5000

AOR AR-One

AOR AR8600

AOR AR5000

AOR AR7000

JRC NRD-525 with VHF option

JRC NRD-545 with Wide Band converter

Alternately you could select any of a wide list of SW based receivers with external converters to get you into the right range. The only shortcoming

here is that most of these RXs do not have WFM, but they normally do have every other mode. JRC, Drake, Kenwood, Yaesu, Icom all make applicable units.

On the used market, but still modern with digital readouts and synth based, the choices get very wide.

Icom R7000 (another one I use, and one of my favorites)

Icom R7100

Icom R100

Icom R9000 E & L

Yaesu FRG-965

YAesu FRG-9600

Yaesu FRG-8800 with VHF option

Yaesu FRG-7700 with VHF converter (another combo I use and like)

Kenwood R-2000 with VHF option

Kenwood R-5000 with VHF option

Drake has a unit with a VHF option also, but I forget the designator right now.

And there are many more that I have jumped over here.

Also, if you really mean analogue, and a VFO type scheme, you will have to look at the older used stuff. This may even take you back to tube systems. Not that there is anything wrong with that, I still regularly use a lot of Hallicrafters, Hammarlund, and Collins gear myself.

On the other hand, if you tell us what you want to get from this unit, I bet the group can make a more informed suggestion.

C!

Steve, I started out honoring her: I had to change my ways when she started DIShonoring me (and herself) and doing things that were dangerous. I did what I felt I had to do to keep her alive -- and that is NOT an exageration. It turned out she was severely depressed, but adolescent depression manifests in odd ways, which I did not recognize: in her case, it was mostly phenominal anger along with acting out.

And I think violating their privacy OPENLY does honor them -- you tell them what you are doing, and why, and don't hide it. Sneaking is dishonorable, but I never did that.

FWIW, it worked: I managed to keep her out of several really dangerous situations, and eventually, the depression was diagnosed and appropriately treated. She's almost 19 now, not anxious to move out, going to college, and just came in, told me I looked wonderful, gave me a kiss on the cheek, agreed to drop me off later today (so DH and I wouldn't be somewhere with two cars; as a side benefit, it means she gets to use MY car for the rest of the day), and stayed for a short chat with me (and her boyfriend) before the two of them went back to her room.

I think our relationship is good.

I know you think your kids never got into serious trouble because you are such a wonderful parent. It's a lovely theory. But at some point, other things influence your kids as well -- and when things start to go badly, you sometimes need different tools.

I remember one conversation with this particular daughter, where I said that, in spite of everything, I thought I'd been a pretty good parent. She said, "In spite of WHAT?" I didn't want to be insulting -- I mean, what could I say? After a moment, I said, "In spite of the fact that my kid's lives are not exactly what I'd dreamed they'd be." She put her hands on her hips and said, "Well! YOUR job isn't to dream for us. YOUR job is to just keep us alive until we grow up enough to have our OWN dreams."

I figure as long as a teenager can put me in my appropriate place like that, I've done a pretty good job of parenting. Not perfect, Lord knows, but pretty good.

>Nope, nonsense, never ever seen it.

I had a neighbor with 3 daughters and a son. The son and one of the daughters were twins. The parents and the daughters were nice people; polite, friendly, religious. Excellent neighbors in every way. The son? At his 14th birthday he informed his parents that he was now an "adult" and would no longer listen to or obey his parents. He was into drugs & alcohol, running with a "bad crowd". In short, a thug. At the age of 16, the son attacked my wife and beat her almost to death. His reason? he was "mad at the world" and took it out on the first person he saw, my wife. He was recently paroled after serving 8 years for the assault. Did these parents do "everything" right with the daughters, and "everything" wrong with the son?

FS: Icom R7000 with rack mounts etc.

2 Icom R-7000's with EEB rack mounts, in a CentraCom cabinet.

Also, several different scanners that may be included with this package,
including a BC-780, Pro2006, Pro2052, and a MABAS Plectron as well as a
12 Power supply and Stridsberg multicoupler and CD-1 tone decoder.

The other equipment will only be sold with the R7000's and rack, Pricing
for spearated items is shown on the web page below, as well as photos.

See below link for details and photos.

Chicago area pick-up only please!

As some in Michigan know, Oakland county is going to Opensky.

I know there is no scanner available to monitor, but...

The question I have is? Some officers I know in Oakland are being told, their WORK radios will not be able to scan other jurisdictions.

They are being told they will only be able to directly access the other cities, but not scan. The reasoning given is that the system, just can't handle the strain????? And they don't know if it can ever be done?????

Of course I question that, because it is still basically a trunked system with talk groups and such.. I;m leaning more towards they are throwing a line of shit for some reason...Why we don't know.

What would be an advantage to not allowing the department radios to scan????

Thanks

>OK for a mother to monitor her minor child?

The legal term is "a reasonable expectation of privacy". No I am not
a lawyer but here's my somewhat educated layman's take on how it
works: In a workplace environment, you are using your employer's
resources to perform work for hire. In order to protect the employer
from legal problems such as sexual harassment and simply to ensure
that people are doing the work they contracted for (taking a job is a
contract, you agree to work for pay), the employer has some fairly
broad rights regarding monitoring and searching of desks and so on.
The employer owns the equipment,t he office space and pays for the
services.

In a private environment such as a home or even a hotel room, you have
a much stronger expectation of privacy regarding your affairs. A
hotel could not legally listen in on your phone calls as one example.

Note too, the court merely said (absent reading the opinion) that the
evidence obtained could not be used against the defendant. This is
not quite the same as saying listening in was illegal on the face of
it. I suspect it might have gone differently if the defendant was the
minor child rather than her boyfriend, but I'd not like to wager on
that as I just do not know enough law.

Children are not property, they have some rights separate from their
parents. This is why, despiter bibilical permission, a parent cannot
beat her child to death for disobedience as one example. I suspect
the principle used here had more to do with reasonable expectation of
privacy than the fact that it was her daughter she was snooping and
would have applied to anyone's conversation she was listening in on.

Would you be happy knowing your neighbor listened in when you norrowed her phone?

Jim P.

MA/COM OpenSky is a big competitor to Motorola. Both systems are digital, but very different from each other.

Why Oakland County chose to do different than the entire state of Michigan is beyond my imagination. One of the most important discoveries during 9/11 was the inability of many agencies to communicate with each other, due to VHF, UHF, Trunked, Digital, etc. Part of the Home Land Security efforts has been to eliminate these differences, and get everyone on a compatible system. I know the Michigan State Police, Motorola system, has not been without problems. But I'm not sure MA/COM is any better...just different.

I guess Oakland County will have to issue Uniden, or GRE (Radio Shack), digital scanners to the guys, so they can keep tabs on the outside world, the same way we do!

I see MA/COM equipment showing up on eBay, on a frequent basis. So it may not be as hard to monitor, as Oakland County has been led to believe.

Me having never seen it in no way indicates it happens.

> It most certainly does happen,, more than "you" may
> think, in that tiny little pompous ass brain of yours.

My brain is larger and more powerful than yours, you're jealous
and your insults sound immature and juvenile.

Nope. Nonsense.
Things are caused, and the closer you look the more you see
this is true. Kids have no reason to mistreat someone who
treats them properly. Now if you treat them shitty and CALL
it "proper" and don't care what they think, well I can see
how you could delude yourself about that.

> Go spend some
> time at a counselling facility for kids and just see how kids can
> choose the wrong path in life all by themselves.

Doesn't happen, ever. They are harmed, and everyone *I* have known
in 54 years who has worked with kids has said this!

> They're not abused
> or mistreated kids, many come from very normal loving homes,
> Christian homes where the parents really do practice what they
> preach.

So-called Xtian homes are abusive homes, that's what I mean above
about you deluding yourself.

> FYI I work in hospital enviroment and have for more
> than 20 years now, and I see this kind of stuff quite often.

Lemme guess. You're the janitor. You write like an ignorant
religiously deluded janitor.

> > In fact, what you think doing "everything right" then

> Absolutely untrue, rebelling is actually quite normal for preteens
> and teens, its part of growing up and establishing their own
> independence.

Doesn't happen at all in other cultures where kids are respected
and are not coerced. But having not studied Anthropology, of course,
you'd never have learned that "adolescent rebellion" is strictly
a phenomenon of child-abusive societies.

> Its what a parent does about it that counts.

No, rather parents CAUSE it, or else they KNOW BETTER!

> Like I said get a real education on the subject.

A paltry little janitor like you is the one in need of education.

> > Mine didn't at ALL, because they NEVER HAD TO!

So YOU say, Most Americans have dire problems with maturity and
self-esteem and fractured creativity because of the shitty way
they were raised, and with your ignorance apparent they should be
precisely of that constellation of problems, if you had enough
courage to admit this.

What you call "normal" is DAMAGED!

> Man you must come from the twilight zone or somewhere. The mere
> fact that you are trying to imply my kids are mental defectives
> because of my parenting skills without knowing a thing about
> me or my familiy really speaks volumes about YOU.

You wish, unfortunately it *IS* about you and your sort and the
mess your kind always make of your relationships with your kids.

> > And if YOU had you'd know that they agree with ME,
> > you child-abusive dipshit.
> >
> Jesus you are quite taken with yourself arent you??

My name isn't Jesus.

> Once again
> you call me a control freak????? You call me a child abuser?? Do you
> know my distant past??? have you spoken with my children??? NO .

I don't need to.
I've seen your kind on every street corner in this country.
I've seen your damaged product everywhere.
Steve

>
> Steve, I started out honoring her: I had to change my ways when she
> started DIShonoring me (and herself)

Nope, she was doing what was her RIGHT, and YOU simply didn't LIKE it!

She can't possibly "dishonor herself", that's YOU talking and making
judgements you don't even have a RIGHT to make.

> and doing things that were dangerous.

Her RIGHT, NOT YOURS!

I've seen what many pricks like you SAY is "dangerous", it being
anything that YOU don't happen to favor, nothing more! If you hadn't
been abusing her rights she'd have had no desire to do anything truly
dangerous. It is your dishonoring abuse of her equality that made her
want to take risks merely to contradict your overbearing attempts at
control!

> I did what I felt I had to do to keep her alive -- and that
> is NOT an exageration.

You drove her to it and then justified it, like chasing a child

toward a cliff.

> It turned out she was severely depressed, but
> adolescent depression manifests in odd ways, which I did not recognize:
> in her case, it was mostly phenominal anger along with acting out.

You don't even grasp WHY she was depressed and angry.
And "acing out" is a misused term by parents like you, more excuse
for what YOU want.

You're incapable because her MIND and THOUGHTS violate your stupid
fucking little religion.

> And I think violating their privacy OPENLY does honor them

Nonsense, you're deluding yourself to avoid taking the blame that
is rightfully YOURS for dishonoring her!

-- you tell
> them what you are doing, and why, and don't hide it. Sneaking is
> dishonorable, but I never did that.

Sneaking or overt abuse is irrelevant, abuse is abuse.
If they shouldn't do it to you, then you shouldn't do it to them,
or you will certainly incur their hate, wrath, and their urge to
harm you by self-destruction.

> FWIW, it worked: I managed to keep her out of several really dangerous

Play-acting. She hates your guts.

> I think our relationship is good.

You think what she wants you to. Child becomes the parent.

> I know you think your kids never got into serious trouble because you
> are such a wonderful parent. It's a lovely theory. But at some point,
> other things influence your kids as well -- and when things start to go
> badly, you sometimes need different tools.

Kids "get into trouble" with illegitimate authority. Everybody does.
Parents who don't try to assume unrightful authority never become
illegitimate, and kids never find cause to rebel against one who is
not trying to interfere with them.

> I remember one conversation with this particular daughter, where I said
> that, in spite of everything, I thought I'd been a pretty good parent.
> She said, "In spite of WHAT?" I didn't want to be insulting -- I mean,

> knows, but pretty good.

Now, if you only understood ALL that she meant by that, but she has
given up on that with you, now you're to be coddled and otherwise
ignored. She caught herself and stopped short, having long ago decided
that you're not worth it, and that she shouldn't bother.

>What would be an advantage to not allowing the department radios to
scan????

There is no advatage what so ever.

Where I live and area around me there is 4 different radio systems.

The county I live in
The local government went to an analog wide EDACS trunksystem.
The county went to an P25 VHF system.
The highway patrol went to an P25 VHF system.

The next city which is 20 miles from my location.
The local government went to an analog MOT trunksystem.
The county went to an VHF and Nextel.

The rest of the surrounding counties and cities are on a VHF system.

In my area VHF rules the land.

The legal way to do it, would be shielding. Any type of jamming, over an
area that large, I think would be illegal, under FCC rules, and regulations.
That being said, fire up one of those old Golden Eagle CB's from the South,
with a 2KW linier...that should do it! LOL!!!

Yeah it's nice that they went this route. Especially nice because I've
got several gadgets now that all use NiMH AAs...can always swap out
when one needs charging!

So far the only thing I don't like about the radio is that the keys
aren't backlit. Not a huge issue, but it'd be nice.

I went ahead and registered the programming software from Uniden. It's
pretty crappy (hopefully Butel's will be better!) But even with it
being sucky, it's pretty much necessary. Programming this thing by
hand would be unbearable.

Well, since her activities landed her in the hospital, and came close to
killing her, I'm sure I'm not imagining that they were dangerous. Nor
am I imagining that she'd rather be alive.

Even you admit that intervention to pull a child from in front of a
speeding car is appropriate. I believe that what I was doing fit that
category -- it beat the heck out of letting her die due to some
misplaced values that put her presumed rights over her life. All I did
was keep her alive.

> for what YOU want.

Since it turns out that virtually ALL the women in my family struggle with depression, I suspect it's because she's inhereted lousy brain chemistry. Contrary to your apparent beliefs, much depression is NOT situational. And given her immediate and dramatic response to psychotropic drugs, it seems clear that the primary cause was bio-chemical. She took the drugs for about 3 years, and no longer needs them.

>
> You're incapable because her MIND and THOUGHTS violate your stupid
> fucking little religion.

And which religion would that be? The one that thinks alive is better than dead?

I'm not a member of any mainstream religion, and am not a theist. Or even a dieist. Or at least I don't believe in any of the things most people in our current culture mean when they say "God" (Don't consider myself an atheist, either.)

> not trying to interfere with them.

You are delusional. Your ivory tower must be a great place to live: "kids only have serious problems due to bad parents. If the parenting is good, the kids will always be just fine."

Get over it: kids are independent beings with their own thoughts, desires, and wills. Their parents are NOT in control of those things, nor, unless they keep them completely away from the rest of the world, are they the only influence on their kids. Life happens, and other things influence them as well.

It must be nice to be so omniscient that you know everything without ever meeting me OR my daughter. She's a great kid. Fortunately, your "announcement" that she hates my guts won't change how she really feels about me.

You induced those behaviors in her in the first place.

Some is not, but that some does NOT lead to "acting out".
Also, a supposedly familial predilection to depression can be
related to the persistent familial religion or political bullying.

> And given her immediate and dramatic response to
> psychotropic drugs, it seems clear that the primary cause was

Uh-huh. Pretending that mind and body are not related doesn't work:

In schizophrenics that needed niacin, the chemical need for niacin
decreased to normal after successful psychotherapy.

That doesn't matter, what the parent imagines to be sinful or
disreputable is religious in nature, even if they don't THINK
they are "religious". And the effort to control another implies
a religious hierarchy of dominance and dishonoring.

Nope. You are.

> Your ivory tower must be a great place to live:
> "kids only have serious problems due to bad parents. If the parenting is
> good, the kids will always be just fine."

They won't always be "just fine", but the parents' role won't have
played a part.

> Get over it: kids are independent beings with their own thoughts,
> desires, and wills. Their parents are NOT in control of those things,
> nor, unless they keep them completely away from the rest of the world,
> are they the only influence on their kids. Life happens, and other
> things influence them as well.

The actions of parents steer them toward rebellion toward problems
or coerce them toward non-genuine lives in which they are depressed.
The parents' actions and attitudes are the first and most influential
on children's development.

> I don't have to be ominiscient to know alot more than you do.
> Steve

Ya know, you sit there and type shit about people you don't even fucking know. Derogatory things. I hope to hell you are sued out your ass for the libelous - defamatory things you've said. The responses you have been giving - derate any sort of professionalism you claim. YOU are acting on the same scale you're putting those debating you - on. It sure must suck to be you, because you're so full of it you must stink so bad no one can stand to be around you. Some day - some one will knock you off your high horse. I didn't say throne, because the only throne you own is the white porcelain one you park your ass on - trying to expel some of the stuff you're so full of - but obviously constipated - by your head stuck up there.
HOW DARE you act like some GOD and put people down you've never met or know nothing about - as to how their children came up in life.

In case you've not heard the news reports in past few years, there have been quite a few teens - who've had the best of homes, end up dead or in jail - why? BECAUSE - they went their own way - contrary to the goodness their parents tried to instill in them. You obviously never heard of the drug epidemic that kids get caught up in, the drinking and so on. PEER PRESSURE, NOT JUST BAD PARENTING can do it. For you not to acknowledge those facts, you are the one who is clueless. There are countless tales on TV and radio of teens who've gone astray or died - due to their decisions. Decisions to get involved in things their parents had no clue of. WHY? BECAUSE - those "loving parents" as you say - trusted their children. They could do no wrong. Kids who had the best of homes. A GOOD HOME - does NOT guarantee a GOOD KID. Get your head out of your ass for a change. Expel some of the crap you're so full of. Open your eyes once wiped clean of the crappy film - blow your nose of the fecal matter you inhaled, clean your throat - then take a nice long look at and deep breath of "REALITY".

Contrary to your "perfect" bringing up of kids, I've personally seen kids in loving homes - trusted - end up in trouble. I've also seen many kids who's asses were beat for doing wrong - like stealing or disrespecting their elders/authority figures and grew up to be fine outstanding people - like many of the older population can attest too. Ask some of them how many times they were taken out behind the barn and had their asses tanned. They'll tell you how much better off they are for it. Those who don't believe in correcting a child, are the pussies in this society who are now reaping what they sow - disobedient children. The same children who will tell their parents, teachers, ministers, police officers and so on - to go fuck themselves. They have NO respect for authority. The candy asses of this

country have placed them above any form of correction. This isn't the "Leave it to Beaver" or "Ozzie and Harriet" - age. I'm not saying kids need to be, should be or deserve to be "abused", but they do NOT grow up trouble free - without proper guidance and correction as needed. You're suggesting that if you treat your children right, they won't even need corrected. MAN, THAT IS SOME CROCK.... IF you are the professional you say, obviously, you've missed a few classes along the lines and shut your life off to the rest of the world - to see what is REALLY going on. Used to be, kids in my school days duked it out, got over it. Today, they take bombs, guns and so on - to blow half their class mates away. I know "Preacher's" kids who were raised in a loving home - end up in jail. Strict Christian/Catholic kids going to school - needing corrected for getting into trouble. THERE IS A SERIOUS PROBLEM HERE! IT ISN'T ALL "JUST" THE PARENTS. It is sex, drugs, etc. THIS - THE COMPUTER - is a large part of the problem, what with cook books for bombs available online and so on. Information which they'd never had before. Sexual exploitation also. Parenting is a key, but it isn't the only key. There is more to this than meets the eye.

You seriously need to open your eyes and mind up a lot more to see the "reality" of this world. You're living in a clouded world. You claim to have written chunks of books on the subject. CHUNKS? So you're not even a true author in the sense of a complete book works? Your works are buried in with someone else's? Tell us, was it points you've made being dispelled by those truly in the know? Using your uh hem - examples of life according to you as an example of what not to believe? Tell us, which books did you "help" produce, so we may check the books to see if the credits list your name. They DO list your name, right? IF SO, let us see. IF you're the professional you claim to be and did do the writing, you should be proud to have us know about it. So, lets have it... Give us some book titles we can check out. Show us your credentials. You're not ashamed of them are you? You shouldn't be. Instead of cutting down on those you know nothing of, try defending your own words for a change. DO as the saying goes. PUT UP OR SHUT UP. YOU are the one claiming to have written on the subject and know it all. SO SHOW US. PROVE IT. You CAN do it, right? Instead of condemning others here of being abusive parents - people you know nothing about, show us what gives you your right to claim your superiority. The way you talk, you are probably the founder of the "KIDS, REPORT YOUR PARENTS FOR CHILD ABUSE - IF THEY DON'T GIVE YOU YOUR WAY" routine.

It is time for the parents to reclaim the home and the rule IN that home. As long as that parent is paying the bills to keep that child clothed, fed, medically cared for, that PARENT should be the one in charge. THEY should have the final say - NOT THE KID. A child is too young to make informed decisions.

And just how do we fight Big Brother without committing suicide? They all have nearly absolute immunity, for the most part. It's near impossible to sue them successfully. Judges, prosecutors, social workers, police... They're hell bent on raising our kids for us or preventing us from raising them. And after all, they have plenty of OUR money to use against us. And if they don't fight us the ACLU will.

DeWayne

Oh yeah, we're over in Iraq 'fighting for freedom'. Well what about here in
the USA? This Country is infested with little dictators and Gestapo. Can't
you just see the US fighting for freedom without a country?

Message-ID: <cu4rr0d4q4g8t1dkkft206iakgkc7e32sl@4ax.com>
Source record: 16228

I bought a few of these tiny 9V wall warts -- mainly to use as 9V
battery substitutes:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=162&item=5147432427&rd=1&ssPageName
=WDVW

Coincidentally, it turns out the plug fits my Pro-95 and the PS seems
pretty quiet where I listen. I believe it is a regulated switching
supply.

I have no relation to the seller.

Agreed. I've been searching the net for a handheld scanner capable of tuning in small increments. Unfortunately it seems that almost all scanners (or at least the ones I've seen) have a minimum tuning increment of 5khz steps. I would like to be able to tune as finely as possible.

If I get a scanner that is digitally tuned, then something like 1khz or 0.5khz tuning steps would probably work fine. Question: which handheld scanners will allow tuning in these small increments? Make? Models? Thanks

While I stand by my statement above, you're right! Therein lies the problem. They are only enforcing the laws as laid down before them. If you don't think the cops and courts are getting worn down from all the cases involving children, guess again. It is a very sad situation. It is the candy asses who got that crap started in the first place which need to be dealt with. I don't deny it will be an uphill battle, but this situation isn't as Mr. Know it all suggests, that a Good Home - will reap a child with no problems. That simply isn't entirely possible in this society. You're correct, you can't correct a child if your hands are tied. The ACLU would likely abolish churches too to satisfy the Atheists, if they thought it would make a difference. In my opinion, that organization is more of a hindrance than a help to our society. Again, I say - I don't expect nor desire to see kids abused in any way, but there are measures with which to correct them - parents and legal system need to be allowed to use them.

I was visiting a home one day of a mom and 2 young girls. One of the young girls 10 - went to a store with her younger sister. The 10 year old stole some candy. The younger sister told on her when they returned home. The mother started to scold the 10 year old to explain to her what could happen if she got caught and why she shouldn't do that. The girls reply - shut up or I'll turn you in for child abuse. Man, the mother turned so red, I thought she was going to have a stroke.
The mother by no means put the child up to this. Had the younger sister not said anything, who knows what that could have lead to. Fortunately, the young girl did take heed to some words I had spoken. But I think most would

agree - that mothers response was typical. She didn't appreciate her daughter stealing, she certainly didn't approve of it, and she feared for her daughter's upbringing turning into a troubled life rather than the one she was "trying" to give her - of a loving home.
So, if you're not allowed to scold a child, or some of the other things which are considered abuse now days, just what would one suggest to stop their child from stealing. SURELY you have to be able to redirect them somehow. To do nothing, is also abuse... allowing them to go on in their troubled ways - to not give them guidance, to "protect" them from the problems they "could" be getting into.

Some of our fearless leaders need to take a good look at what some of those laws have done to increase the juvenile delinquency rate and redirect some of them. If they don't, some day our jails will be filled to capacity with people more so under the age of 18 than above. NO, A good home does NOT guarantee a problem free child..... There is no one ever going to convince me of that. There are too many examples to prove otherwise if one cares to open their eyes and ears to acknowledge.

DeWayne,

This is a Washington State Supreme Court Ruling that applies 'only' to
the 'state of washington' [.]

What the good people of the State of Washington should do (need-to-do)
is Impeach each-and-everyone of these HIGH and MIGHTY State Supreme
Court Judges.
[Send a Message to Their Elected and 'Appointed' Public Officials:
"We The People Are In-Charge."]

We did this {Impeached} in the State of California with "Her Majesty"
Rose Bird and put these 'little pontifs' On-Notice.
.
so say i - my opinions stated as facts ~ RHF
.
.

dxAce - perhaps you have been isolated a bit from what some of us have experienced. DeWayne's statement has some truth to it. Where I live, there are lots of little dictators at many levels of government who find ways to inflect their desires upon the public, often wthout them knowing it. Through subtle changes to laws at the State and local levels, and through various methods of enforcement, they turn simple common acts into mini-crimes, take traditions that folks have tolerated for years and turn them into reasons for neighbors to rat on each other. They take things like zoning ordinances, originally designed to help people maintain the integrity of their neighborhoods, and turn them into collections of oppressive nonsense. The ability to pursue some modest level of individuality, and variety, and in turn personal satisfaction and happiness, is squelched...and they enable your neighbors to turn the squelch control up higher, even as they lose their own freedom.

Working as a planner for the the local government here, I see it literally every day, from both sides of the aisles. After awhile, it can drive you a bit nuts, seeing how politics and the personal desires of a leader to leave his/her mark can result in fewer liberties and more regulation. If you think this is untrue, come and follow me around for a few days - it'd open your eyes.

The Alinco DJ-X2000 will also tune am, fm, wfm, usb, lsb and if it's the
E version will have no gaps and will tune voice inversion scrambling.
Among many other things not mentioned!

OK, so we are defining your requirements, and that is a good starting point.

You now are looking for a hand held radio, capable of 1 kHz or smaller tuning steps, and covering the 110-140 MHz range with AM/WFM/NFM. This is a lot better description than your original "VHF analog tuner". Even better would be to actually define what you intend to listen to with this radio. But, working with what we have now you will find there are several options.

I have not used any of the following, I am going on web data only. Confirm everything before you get serious about getting one.

ICOM IC R-10 (0.1 kHz steps)
ICOM IC R-20 (0.01 kHz steps)

Yaesu VR-100 (0.1 kHz Steps)

Alinco DJ-X10T (0.05 kHz steps)
Alinco DJ-X2000 (0.05 kHz steps)

AOR AR8200 Mk III (0.05 kHz steps)

And I am sure there are others as well, this is just the first six I ran into. All of the above are receivers only. There are also several amateur handhelds that do the same kind of thing, but include a transmit function on specific bands/frequencies. These are current models only, including the used market would even lead to a larger list.

C!

Wow... Fantastic unit! As a general wide band scanning receiver, seems as though there are very few things this unit WON'T do :) The freq counter is also of special interest to me, as I was planning on purchasing a counter with an integrated RF/S meter as well.. This unit seems to have it all built in! In a word, for my purposes: perfect.

Well then, two questions: has anyone here had any experience with this unit, and, who in town is selling the unit for the best price? Thanks

We also don't allow sobriety roadblocks and a number of other things,
because our privacy laws are more strict than the Federal laws.

As one also involved in such things currently, I can say AMEN to what you said.... those things sneak up on you then WHAM - you're in a corner with no way out - awaiting the wall to come crumbling down on top of you. The very laws designed to make life better, safer - are in many ways making our lives a living hell. It was so much easier way back when - when the laws were fewer. Times were tough, but you didn't hear of half the bull shit that you do now.

A good home will not guarantee a problem-free child - but a bad home will almost certainly guarantee a problematic child. I've seen to many examples to not have this opinion. Given the odds, I'll pick door number one.

Oh, and by the way - there is NOTHING to suggest that the woman who scolded her child and was subsequently threatened made any attempts earlier to properly raise her child with due respect for her elders and the law. You cannot just pick an isolated incident and say, "There, see?" without some context.

On the other matter, regarding people who have abused our laws to make it impossible for people to act responsible in traditional ways without ear of retribution - you have my wholehearted agreement. I do not use or condone corporal punishment, but a parent must have an arsenal of reasonable disciplinary tactics that she can use use to adjust her child's behavior.

Oh ya I love the NiMH batteries, I use them in everything now days.
I would imagine someone will come up with some better software shortly as
long as the radios sell which they should. I only care about the local
police here so I have never bothered with getting software for my 95, I just
liked the way this one looked to be so much smaller. Will make it easier to
carry.

Nope. It works out because of the way the law is written. The
recording connection to the phone is authorized, and they don't listen
to personal communications.

This, of course, assumes that children are fully functional, rational,
thinking people. We, of course, know better than to assume something
as ridiculous as this. Hell, there are many adults who don't fall
into this category.

The difference is, the adults that don't fall into this category are
(usually) held responsible for their actions, where as the parent of
the child who falls into this category can be held responsible. So
since the parent can be held responsible, the parent should have enough
authority over the child to prevent such behavior.

That case did not say that "eavesdropping" on your child is illegal. Go ahead and eavesdrop. What the case said is that evidence that does not meet the legal standards for trustworthiness and Constitutionality cannot be used to convict you of a crime.

Your paranoid bitching is particularly ironic because the Fourth Amendment should be the absolute favorite of those who fear government intrusion into our daily lives. This case strengthens the Fourth Amendment. If anything, you ought to be screaming about any case that weakens the Fourth Amendment, because the Fourth Amendment is what prevents unreasonable searches and seizures. You guys in favor of government wiretaps? Do you want the government to be able to invade places in which you have a reasonable expectation of privacy?

Go ahead and eavesdrop, do whatever you think is necessary to raise your kids the way you want to, but just remember that a conversation taking place in a place where there is a "reasonable expectation of privacy", taken by the police without a warrant, can't be used to convict you.

Are you saying you do not want RF to enter this zone? Or are you saying you do not want anyone to pick up a usable signal in this zone? Or are you saying that anything broadcast in this zone should not make it out of the zone? A bit more description of what you want would help a great deal.

If your goal is the first or the last you are essentially not going to get it done short of complete enclosure and RF shielding. The second is very doable, but probably illegal. To get the bandwidth you would want might require something like a spark gap, as another poster has mentioned, or similar ultra wide band emission sources.

What, pray tell, is satellite jamming? Remote jamming stations spread around the area maybe? Because satellites in orbit make very bad jamming platforms if this is what you are thinking.

How 'bout you read the court's opinion and understand it first before you go off half-cocked? Do you believe supreme court judges should be allowed to ignore the law? Do you want the government to be able to expand its abilities to probe into your private life? I don't think you understand at all what you're complaining about.

I'm still a little confused about this. First, just to clarify, they do record the direct line without notice to or consent of the person on the other end, right? So are you saying that the two-party-consent requirement applies only to personal communications and that it is ok to record everything as long as you don't listen to the personal parts? Who exactly is authorized to make the personal/non-personal distinction? In California, am I as an individual allowed to record all of my phone conversations without notice to the other party as long as I review only the non-personal parts?

But the man claiming to be an expert is claiming that a "GOOD" home will
reap a good child - every time!
HE IS WRONG.... That is all we're saying.

> Oh, and by the way - there is NOTHING to suggest that the woman who
> scolded her child and was subsequently threatened made any attempts
> earlier to properly raise her child with due respect for her elders and
> the law. You cannot just pick an isolated incident and say, "There,
> see?" without some context.
>

There are many incidents like this around the country daily, I can assure
you. I used that example only to show the mother was threatened when she
was only trying to tell her daughter right from wrong, so she wouldn't end
up in trouble. What kind of mother would she have been to condone it????
And yes, I did forget one point, the items stolen were taken back with the
girl in tow to apologize. The store owner was very understanding. It wasn't
the mothers fault the child stole. She trusted her daughter to go to the
store for her. The younger sister knew it was wrong to steal! She knew to
tell her mother about it. The mother raised her children right. She was a
damned good mother to those girls. I know what she did for those kids. She
did everything she could for them. You can't fault the parents
automatically, that just isn't fair. You're starting to sound like the other
guy - it's "always" the parents fault. NO it is not. My parents did their
best with me. IF I grew up to be a criminal, that is on me, not them. I KNOW
the job they did. The few things I DID do as a child - learning by my
mistakes, I hurt my parents feelings - I let them down and they didn't
deserve it. I was no angel as a child. In one case, as is so prevalent
today, I got in with the wrong crowd. PEER PRESSURE. But I learned quick -
they weren't good company. I had some understanding adults show me right
from wrong.

> On the other matter, regarding people who have abused our laws to make

You're not nobility, quit trying to speak for anyone but yourself.

> Hell, there are many adults who don't fall into this category.

Then we should definitely keep those people from abusing the rights
of their children.

> The difference is, the adults that don't fall into this category are
> (usually) held responsible for their actions,

There's nothing whatsoever wrong with punishing crime, but a child
deciding other than YOU would prefer them decide does NOT amount to
an adult crime!!

> where as the parent of
> the child who falls into this category can be held responsible.

If they assault or coerce a child they should be punished, just as
a child who assaults a parent who does not oppress them should be
punished. But when a child opposes their parents' oppression, that
is NOT crime, but VIRTUE!!

> So since the parent can be held responsible, the parent should
> have enough authority over the child to prevent such behavior.

The parent is virtually never held to any responsibility for the
crimes of children. No one can be held responsible for any assault
on another than their own, and only if it is not justified violence
against oppression.
Steve

More immature blah-blah.

> HOW DARE you act like some GOD and put people down you've never met or know
> nothing about - as to how their children came up in life.

Simple, after studying people for over 50 years I know them by the
shit they spew.

> In case you've not heard the news reports in past few years, there have been
> quite a few teens - who've had the best of homes, end up dead or in jail -
> why?

Because the idiot writing the story asked their PARENTS, instead of
their child's friends and neighbors, OR THE KID. When it comes to
honest reportage as to the state of homelife, PARENTS PATHOLOGICALLY
LIE, LIE, LIE!!!

More than a century of recorded psychiatric interviews in the science
of penology has demonstrated that EVERY SINGLE PARENT OF A MASS
MURDERER THINKS THEY DIDN'T DO ANYTHING WRONG, and you can be deluded
into believing them if you stopped there and didn't ask anyone ELSE
who knew them, but once you DO IT BECOMES BLOODY FUCKING OBVIOUS WHY
AND HOW THEY WARPED THE FUCK OUT OF THEIR KID!!!

> BECAUSE - they went their own way - contrary to the goodness their
> parents tried to instill in them.

Classic LIES to excuse abuse. All abusive authoritarians or wannabe
abusers say this kind of moronic shit, when every single systematic
and scientific approach to the psychology of parents and children
produces results that refute it. This is the kind of sick Xtian
mind-control crap they try to brainwash people with in sunday school,
to keep the collections coming in that pay their priests to anally
abuse more acolytes.

> You obviously never heard of the drug
> epidemic that kids get caught up in, the drinking and so on.

Shit lady, we fucking STARTED it! Except we were more interested
in the drugs that reveal the mind's deeper nature, like pot and acid.

> PEER PRESSURE, NOT JUST BAD PARENTING can do it.

That's every bit as moronic as each parent believing that THEIR child
was corrupted by "those creeps he hangs around with", when ACTUALLY
HE'S THEIR DEALER!!

Abusive parents are what interests kids in altering their minds toward
unconsciousness, it's self-medication of the poor self-esteem that
this parental abuse CAUSES!!

>For you not to acknowledge those facts,

You HAVE NO "facts". You merely blather!

> you are the one who is clueless. There are countless tales on TV and radio
> of teens who've gone astray or died - due to their decisions.

Which "decisions" they make because they are abused by their parents.

> Decisions to get involved in things their parents had no clue of. WHY?

Because their parents don't need to have a clue about drugs n order
to instigate drug abuse.

> BECAUSE - those
> "loving parents" as you say - trusted their children.

They abused them and hoped for the best, you mean!!
They THOUGHT/WERE TOLD they were doing the best for their child by
abusing the shit out of them, but somehow it JUST DIDN'T WORK OUT!!

Why? Because kids are NOT like cattle, which can be steered left
and right with a cattle prod or a stick. When dishonored by being
coerced, threatened, belittled, controlled, kids turn and fight
back against the insult, even if they have to take their hands off
the "steering wheel" of their Life to do it!! The certain way to
cause a child to hate you and intentionally do the reverse of what
you want is to behave JUST LIKE YOU DO!

> They could do no
> wrong. Kids who had the best of homes. A GOOD HOME - does NOT guarantee a
> GOOD KID.

Ain't a "good home" then, that was just a LIE!

> Get your head out of your ass for a change. Expel some of the crap
> you're so full of. Open your eyes once wiped clean of the crappy film - blow
> your nose of the fecal matter you inhaled, clean your throat - then take a
> nice long look at and deep breath of "REALITY".

More immature blah-blah bullshit.

> Contrary to your "perfect" bringing up of kids, I've personally seen kids in
> loving homes - trusted - end up in trouble.

Then they weren't perfect, now were they!

The proof IS that they didn't do what WE did!

> I've also seen many kids who's
> asses were beat for doing wrong - like stealing or disrespecting their
> elders/authority figures and grew up to be fine outstanding people - like
> many of the older population can attest too. Ask some of them how many times
> they were taken out behind the barn and had their asses tanned. They'll tell
> you how much better off they are for it.

These aren't achievers, they are psychological cripples who secretly
hate the shit out of their lives and have no creativity or capacity
to love. Beating someone till they tell you what you want to hear
merely makes an ingrown secretive deceptive personality who play-acts

at everything their whole life and has no ethics. This is why many
more Rightist Xtians get caught in corruption and criminal scandals
than Leftists who were raised with acceptance. This is why the "red"
states have all the divorce and corruption, and the lowest divorce
rate is in MASSACHUSETTS!

> Those who don't believe in
> correcting a child, are the pussies in this society who are now reaping what
> they sow - disobedient children.

No, that's just a myth used to try to justify child-abuse.
Actually exactly the reverse is true, a child whose decisions
are accepted and who is loved for his independence loves you
back, and would never hurt you, while children you beat on will
kill you in your sleep and burn your house down, and good
riddance to you!

You Rightist clowns always claim crime is caused by "permissiveness",
but all the actual socialogical data proves that you're merely LYING!
Now why would you LIE about something like that? Here's why!: When
someone is beaten they will never feel adult and recover their inner
humilation until they get to beat on someone smaller than them so
as to attain the position their parents held, that of abuser, rather
than abusee!! This is the familiarpsychological phenomenon of cognitive
dissonance, ala the Stockholm Syndrome, where weak people who are
abused come to worship their abusers and seek to be just like them.

The whole criminal bully psychology comes FROM child abuse, it isn't
PREVENTED by it!

> The same children who will tell their
> parents, teachers, ministers, police officers and so on - to go fuck
> themselves.

Only people who hate you tell you to fuck your self.
Now just ask yourself WHY they hate you.
You abused them, that's why, there is NO other possible reason to
wish to abuse others back, if they have been nice to you!

> They have NO respect for authority.

There is no "authority", your kind are too stupid to deserve it,
and nobody with a brain who's not damaged even wants it.

> The candy asses of this
> country have placed them above any form of correction.

If they've managed it they ain't so candy, now are they, you
little corn-hole.

All Free people do that, it's called rebellion against illicit
authority. Remember King George IV?

> This isn't the "Leave
> it to Beaver" or "Ozzie and Harriet" - age. I'm not saying kids need to be,
> should be or deserve to be "abused", but they do NOT grow up trouble free -
> without proper guidance and correction as needed.

Ain't any "proper" or "correction", and no such "guidance" is needed.
The Majority of other cultures on earth totally do without anything
like that with respect to children.

> You're suggesting that if
> you treat your children right, they won't even need corrected. MAN, THAT IS
> SOME CROCK....

So lessee, because you're crippled from your childhood abuse, now
you don't even believe that you have the brains to treat someone
nice who treats YOU nice? I'll believe that because you're damaged,
but can you see why only a damaged person like you could ever believe
such crap??

Every child I've seen loved people who loved and respected him and
his wants as an equal. In fact that's all that children and other
people actually want, if they haven't been damaged by shitheads like
you, and that's to be nice to people who are nice to them!!!

> IF you are the professional you say, obviously, you've missed
> a few classes along the lines and shut your life off to the rest of the
> world - to see what is REALLY going on. Used to be, kids in my school days
> duked it out, got over it.
> Today, they take bombs, guns and so on - to blow
> half their class mates away.

You just couldn't afford the guns and bombs, or you'd be the same.

>I know "Preacher's" kids who were raised in a
> loving home - end up in jail.

That's because Xtianity preaches your kind of abusive crap, and it
abuses children. There are NO "loving" preacher's homes.

> Strict Christian/Catholic kids going to
> school - needing corrected for getting into trouble.

The viciousness that Xtianity pumps into kids is abusive and
dishonoring. You pump that shit into anyone and they'kll be
damaged by it too!

> THERE IS A SERIOUS
> PROBLEM HERE! IT ISN'T ALL "JUST" THE PARENTS.

No, YOU just have a delusion that religion makes for a "good home",
when it does THE OPPOSITE!!!

>It is sex,

There's nothing wrong with sex, kids should be having sex with their
friends at home in their rooms with their parents' blessings. MY kids
did!

> drugs,

SOME drugs are GOOD for you!

> etc. THIS -
> THE COMPUTER - is a large part of the problem, what with cook books for
> bombs available online and so on.

Nobody bombs anybody if they don't deserve it.
Abusing kids means deserving it.

The Computer is information that destroys the superstitions of stupid
Xtian Antisex and Capitalist Feudalistic enslavement.

> Information which they'd never had before.
> Sexual exploitation also.

Nonsense, people need lots MORE sex, not less.
There is no "exploitation" of kids who are sexually informed.

> Parenting is a key, but it isn't the only key.
> There is more to this than meets the eye.

Yours.

> You seriously need to open your eyes and mind up a lot more to see the
> "reality" of this world. You're living in a clouded world. You claim to have
> written chunks of books on the subject. CHUNKS? So you're not even a true
> author in the sense of a complete book works?

today are written by solitary authors.

> Your works are buried in with
> someone else's? Tell us, was it points you've made being dispelled by those
> truly in the know? Using your uh hem - examples of life according to you as
> an example of what not to believe? Tell us, which books did you "help"
> produce, so we may check the books to see if the credits list your name.
> They DO list your name, right?

My nom de plume. ;->

I do that to keep my private and public lives totally separate,
and so that shitheads like you can't interfere.

> IF SO, let us see. IF you're the professional
> you claim to be and did do the writing, you should be proud to have us know
> about it. So, lets have it... Give us some book titles we can check out.

> Show us your credentials. You're not ashamed of them are you? You shouldn't
> be. Instead of cutting down on those you know nothing of, try defending your
> own words for a change. DO as the saying goes. PUT UP OR SHUT UP. YOU are
> the one claiming to have written on the subject and know it all. SO SHOW US.
> PROVE IT. You CAN do it, right? Instead of condemning others here of being
> abusive parents - people you know nothing about, show us what gives you your
> right to claim your superiority.

Writing books doesn't prove anything. Nor will I bother. I enjoy
having social effect without any responsibility.

> The way you talk, you are probably the
> founder of the "KIDS, REPORT YOUR PARENTS FOR CHILD ABUSE - IF THEY DON'T
> GIVE YOU YOUR WAY" routine.

Gee, if I were, you'd have never heard of it yet.
Instead, it's the major social question of the age.

> It is time for the parents to reclaim the home and the rule IN that home.

That was lost half a century ago, join the future.

> As
> long as that parent is paying the bills to keep that child clothed, fed,
> medically cared for, that PARENT should be the one in charge.

You owe your child that.
You don't get to push around those you OWE a debt!
If you don't like that, then don't have kids!

> THEY should
> have the final say - NOT THE KID. A child is too young to make informed
> decisions.
> DM

Nonsense, they make most of them from the very beginning.
They learn by doing. Dishonor them and you cripple them.

You're an immature whiner who never learned to live with equals.

And if you try to prevent their autonomy, you'll just have
them knocking your ass out on the floor. Or you'll never see
your grandchildren or receive their help when you're old.

They'll be adults in your life a LOT longer than they'll be
kids, and they remember every slight!

Don't fuck up your family!
Steve

These "simple common acts" are crimes, these guys are criminals
trying to use the Net to try to normalize their favorite crimes
of child abuse, and pretend they were just being "good parents".

Beware of the shit you read on the Net.

Gee, it was waaay easier back when you could just beat up and
humiliate and abuse your children in peace. Bullies love less law.

BR,

How about you read what I have written...
Before you 'Go Off' - Fully Loaded !

I 'believe' the any Judge of any Court should NOT "Invent" the Law [.]
{Good Laws are 'founded' on Common Sense (Natural Law) - NOT Judicial
Fiat.}

Something-To-Think-About: This is NOT about the 'government' expanding
it's abilities to probe into the "Private Lives" of Citizens. This is
ABOUT Parents {Citizens} being able to Dutifully Raise, Protect and
Act Responsibilety for their 'minor' Children. The 'state' has a minor
role in the Home and the Primary Obligation and Authority Rest with the
Parents [.]

.
so say i - my opinions stated as facts ~ RHF

Actually, Steve, I don't have a problem with DUI checkpoints. Why should privacy laws apply, you aren't in private, you are driving in public on a publicly-funded street or highway. Gonna get drunk, stay at home. If you get drunk, leave home, and get caught, you go to jail. And yes, I've been arrested for drunk driving, back in 1984. I got a deferred sentence, mandatory driver improvement course, alcohol and substance counseling, community service, monetary fines, and my DL was suspended for a year. I broke the law and I had it coming. Like the TV show said "If you can't do the time, don't do the crime." (Barretta, I think. Funny, huh!)

Easiest - and best - is to just go on eBay and buy one already made. Look for one about 19" tall, magnetic mount. It will work fine on your car roof or trunk mobile - or stuck on your refrigerator's top in the kitchen. Inexpensive, too.

At least we can read out here, you jerkoff.

Listening is not recording.

If someone calls you and threatens your life, you can report
what they said to the police.

If you record what they said and take it to the police as
"proof", you have a legal problem.

If, on the other hand, they choose to leave a recording on
what is obviously a recording machine, they have a legal problem. By
speaking to the machine, they have implicitly consented to the
recording and you can use that.

The problem comes in recording _without_ the other party's
consent.

Oh give it a freaking break... At least back then, being beat up - you lived another day. Today, you stand a better chance of being blown away - no return. Admitted, there are some bad examples of parents out there. But your idea as stated simply doesn't fit. You are such an ass. I'd like to know what freaking tower with moat around it, you grew up in? I bet you were in a few scruffs yourself as a kid. I'm hard pressed to imagine that you lead such a pristine life style. Maybe that is what you needed, a few ass whippings. Apparently you never got any. OR got too many and are pissed off at the world because of it. I'm willing to bet you were a problem child, had your ass beat every day and swore to avenge Child correction - with every whipping you got. You're becoming as see through as thin air with your replies. As professional as you're claiming to be, none of your replies are adding up. And I'm still waiting to see some book titles to see your "published chunks of work".
WELL?????????? Come on, share it with us. Surely you're not ashamed of it are you? YOU are the one boasting. BACK IT UP.

DM

Oh boy, I got your number now - numb nuts. Drugs are ok? Bombs are ok? AND NO IDIOT - THE BOMBS WEREN'T MEANT FOR THE PARENTS, I'M TALKING FELLOW SCHOOL STUDENTS. EVER HEAR OF COLUMBINE - ASS HOLE? MAN YOU ARE ONE SICK MAN. NO BOOK TITLES to back up your claims. YOU just lost every ounce of credibility.

Oh and as for proper English, you made a few slips yourself, so go fuck off.....

You are hereby PLONKED. You're not worth my time. I don't know what kind of drugs you may be on, but that is one hell of a trip..... I hope you have a safe landing.

> I 'believe' the any Judge of any Court should NOT "Invent" the Law [.]
> {Good Laws are 'founded' on Common Sense (Natural Law) - NOT Judicial
> Fiat.}

Then you'll agree with me -- in this case, the court had to find that there was a violation of Washington telecommunications laws and the Fourth Amendment. It had no choice. We don't want courts that can ignore the law whenever they feel like it. Change the law, if you don't like it.

> Something-To-Think-About: This is NOT about the 'government' expanding
> it's abilities to probe into the "Private Lives" of Citizens. This is
> ABOUT Parents {Citizens} being able to Dutifully Raise, Protect and
> Act Responsibilety for their 'minor' Children. The 'state' has a minor
> role in the Home and the Primary Obligation and Authority Rest with the
> Parents [.]

You're wrong. This was a case in which evidence was excluded on the grounds that it was illegally obtained in violation of the Fourth Amendment. The government cannot convict you with illegal evidence. It's an "unreasonable search or seizure" to invade the privacy of someone's home or to eavesdrop in a place where a citizen has a reasonable expectation of privacy. If you think the court was wrong in this case, then that means you are in favor of the government being able to tap your phone and collect evidence against you. You didn't even read the synopsis of the case, did you?

The internet has a powerful influence over some minds. If someone misinterprets something, or twists it to suit their agenda-of-the-day, and then posts it on the internet, millions will take it as truth, and get all excited about it, point to it as more evidence of the decline of civilization, without even thinking about it for as much as a second.

Are you in favor of the government tapping your phone? Answer that simple question.

Sorry, if some duplication of previous post is included here.

There is a conflict of laws.
Mother listening to her child on the phone.
She overhead the friend or her was going to commit a crime.
By law (unless it your spouse) she has to report it or she would be
commenting a crime.

Other the mater of the State Law. Maybe she did violated here privacy
rights.

However, the State forgot to go by Federal Wiretapping Laws.
As long as one person is aware you are allowed to tape the
conversation. Just tell your kids. That you conversations will be
taped or listen too.

Federal Laws always overrides State Laws.

For your parents who donï¿½t allow kids the use the phone. Tell them
they canï¿½t use the phone unless it is an emergency.

Well, I guess I wasn't talking about corporal punishment of children, which I do not support anyway, and certainly not intentional child abuse or porn - in context, I was discussing things like playing your radio while you rake leaves, fixing your car on a Saturday afternoon, even stringing up a shortwave antenna, and so forth. Simple common acts of normal humans.

Fair enough, and I agree - I know some similar situations, with good caring parents who have always stressed reasonable discipline and behavior - and the kids go sideways, at least temporarily. The key is, the parents tried, and kept trying.

I simply believe that the parents are the first and most critical line of defense against potential transgressions by the child - and if they are not there, doing their job, there is much greater likelihood that the child will not get the guidance he/she needs. With a solid underpinning from the parents, there is a good chance that the children, even if wayward briefly, will cycle back to the straight course. Parents may not always be at fault, but their input is critical, and *if* they don't do their job - teaching, reading, interacting, participating and disciplining - they are irresponsible and, yes, at some fault if their child goes wrong.

I would doubt very much if they jam any presidential or secret service communications; or any public safety communications system since they would also be extensively involved in presidential security. Then there are the multitude of frequencies used by the various media involved in covering the event.

So there has to be large holes in the jamming spectrum - I would suspect the jamming is quite selective and devoted to those frequencies determined to pose a threat, just as military jamming is designed to deny useage of specific frequencies or bands while permitting use of their own equipment. It is a quite complex, and possibly dynamic, problem.

> "Phoenix Radio Man", etc.
former "handle I used when on 11 meters. don't hear me down there do ya? fact is, I haven't been on "11" for a better part of 10 years. ancient history that has no bearing.

>
> Mr. Pot, meet Mr. Kettle.
yeah, he's calling you by the way.

I don't think its obvious to you yet, so I'll make it plain and simple: your attempts to harass will only cause me to dig in deeper (and this you don't want, because I might actually find something on you that can be really damaging). The best advice is for you to leave it alone. don't pursue it any further. you have lost the war (and are too stupid to realize it).

lastly, you are being dropped into the ignore filters, so unless someone else quotes you (or you change screen names AGAIN), you will not hear from me. Any further attempts on your part will be dealt with appropriately.

This guy is "seriously" whacked in the head. Its obvious he has a major anger problem, along with the delusions of grandeur. He also seems(is) one of those who believe quite simply whatever they "think" to be true,, is true. They call that delusional, or even psychotic. Its scary that this idiot may have actually raised kids...... I also find it interesting he has not answered your requests for "confirmed" contributions to any serious publication and/or book..... Batman maybe, Pschology Today, I dont think so,,,,, Dr. Spock he aint. (its a 50's - 60's) thing.

I found this posted today, Thought I would share it with the group.

-JM

I WONT BE IGNORED

I may be a 70 year old man with nothing else going on in my life but I won't be ignored by a bunch of 435er's who I know is spending the day around their radios listening to everything said. I know you think I'm being obserd with my demands for "air-time" on your repeater but I want you all to be my puppets. Watch how I pull the strings here on 435.

My new "Rules Of The Road" for the 147.435 repeater:

I play my tapes when ever I want. You don't complain, You just listen - no turning off your radio - no talking over my taped message - no walking away to take a leak - NOTHING. I don't want my tapes interrupted for any reason whenever I choose to play them you will all need to stand by. If any parts of my taped announcements are interrupted I will punish the repeater with several hours of nonstop feedback. Even if my tape player fails for what ever reason I will punish the repeater for several hours with feedback. If you interrupt the feedback I will add one hour to my feedback schedule for each interruption. If the repeater times-out during my feedback schedule I will start the feed-back schedule timer over again. I will play my tapes over-and-over until I get tiered of hearing them. If when I un-key I hear any complaining I will play them again. When I stop playing my tapes and un-key you are free to start a QSO but keep in mind that as soon as you do so I get to jam over the top of you whenever I want with rude comments about your family background or telling you to "get the fuck outta here retard". You will not go to another repeater or any simplex frequency to continue the QSO that I interrupted, If you do I will call you jammers and proceed to play my tapes over-and-over again. If you don't start any QSO's on 435 so that I can jam them I will start kerchunking the repeater until someone complains about it and then I will call you jammers and retards. If the repeater is turned off while I am playing my tapes or interrupting your QSO's I will go to the output and complain that the repeater owner is a coward and afraid of my words and then make a chicken noise like this BOK BOK while calling him a chicken and a Riley supporter. No QSO will be permitted on 435 without including me in the round-table. If no one is talking and you want to start a QSO you first talk to me asking me how I am doing and if there is anything you can do for me.

As you can tell here my 435 rules of the road pretty much favor me over you in all points of conflict. I have all of the say-so about this

hobby and you have none. I don't care about how much time or money you may have invested in radio and repeater equipment, I mean business here. I may look and sound like a 70 year old senile man but I am a man on the edge. I have absolutely nothing to lose here and everything to gain. I will die sooner rather then later and I'll bet that my death will come long before the FCC and their slow bureaucracy can do anything about me. I have protected my property from possible vandals. I have protected my assets from potential legal confiscation. I signed over power of attorney to undisclosed family members to future protect me.

I am counting on you the 435 users to be my "squeaky wheel". I expect that you will get pissed off enough to daily contact authorities that will find that there is nothing more that they can do other refer to the same FCC and their slow bureaucracy.

What does this have to do with "police" frequencies being hacked? 147.435 is well within the amateur/ham 2-meter band. No police agencies work that frequency. Talking in, on an amateur/ham radio repeater is not "hacking" anything. It's just inappropriate use of the repeater, and frequency.

4184. Re: Broad spectrum jammer

Newsgroup: rec.radio.scanner
Date: 2004-12-15 01:36:57 UTC
From: Colic <no_spam@no.spam.com>
Message-ID: <ZyMvd.194311$V41.51690@attbi_s52>
Source record: 16192

I rather doubt this is the case. Simple issue of government agencies wanting communications themselves around a protected individual. So those chunks of spectrum would need to be clear. And those clear chunks could then be use.

Alternately, if a jammer was used that was ONLY in the immediate area of the protected target, say plus or minus 100 feet, and covering all of the spectrum except a few very specific frequencies, then that could be used as a detonation initiator itself. Just build a device that looks for a "safe" signal, and when the safe signal goes away, do your thing.

This all points to a real problem with jamming for the purpose of not allowing explosive devices to detonate. It just makes no real since.

C!

ANY - person who writes things for books, reference or otherwise OR authors a complete book, would/should be glad to reference their works - unless of course A) they're ashamed of it B) it doesn't exist in reality C) Their works have been proven to be wrong. By not providing the proof to back his claims, proves beyond a shadow of a doubt he is not anything of what he claims. He can't back his own words. So, he is already deleted in my server. I refuse to debate with an apparent - self centered - delusional psychotic. His very words of drugs are ok, as are bombs, proves he is a whacko. NO PROFESSIONAL of his supposed stature - would ever suggest such ludicrous things.

I KNEW he couldn't rise to the challenge... What a dick.....

Nothing like a nice, reasoned, intelligent response! Your logic is flawed. What I posted is a quote from the transcript of the TV news broadcast. It specifically says "record". Now, if you want to question their broadcast, I provided a link to where I obtained the quote. Contact them and explain to them (using your wonderful grasp of grammar and proper English) that they are wrong and see what their response is. You obviously aren't a lawyer, and neither am I. However, I do have a somewhat more knowledgeable source for my post, whereas yours seems to be a personal opinion. And we all know about opinions.

But that's all I have to say to you on this subject. Like they say: "Arguing on the Internet is like competing in the Special Olympics. Even if you win, you're still retarded."

Bye - Bye!

Then those are NOT "good and caring parents"!!!

That's the POINT, that a LOT of what parents deem to be good, in fact what much of America imagines is good, IS ACTUALLY BAD, EVIL, CRUEL, ABUSIVE, and the KINDS of things that, IF THEY WERE DONE TO YOU NOW AS AN ADULT, WOULD RESULT IN YOU SEEKING TO KILL THE PERPETRATOR!! SO WHY IN THE FUCKING WORLD DO YOU IMAGINE YOUR KIDS ARE GOING TO LOVE YOU FOR THAT SORT OF ABUSE, THEY ARE NOT *AT ALL* DIFFERENT THAN *YOU* ARE!!!

> - and the kids go sideways, at least temporarily. The key is,
> the parents tried, and kept trying.

EXCEPT WHAT THEY TRIED WAS *EVIL*!!!

EVIL BEGETS EVIL! KNOW A TREE BY ITS FRUITS, AS JESUS SAID!

Why would you believe something so stupid, contradictory and counter-intuitive, as to imagine and that anything that pisses off your kids is going to have a good result somehow! It's LUNACY!

> I simply believe that the parents are the first and most critical
> line of defense against potential transgressions by the child
---
Antique Rightist Reactionary Fundie Xtian GARBAGE!
NO such "line of defense" IS NEEDED AT ALL!

Kids do NOT come into the world interested in seeing how well they can disappoint their parents if not stopped! That's superstitious antique nonsense! It's a raving paranoia that the world somehow always works wrong, and that if humans hadn't been invented that it would just fall to pieces or something. This is the kind of nonsense found only in religions which GO AGAINST NATURE, SCIENCE, AND PHYSICS and AT EVERY TURN AND TRY TO TELL YOU THAT NATURE IS IMMORAL AND WRONG AND THAT ONLY *THEY* KNOW "What Gawd Wants"!!

But you know, you CAN get kids to WANT disappoint you INTENSELY by denying their NATURAL HUMAN NEEDS for honor, respect, and autonomy! So these superstitious deluded bastards ASSUMED that their children

were just naturally THE DEVIL, JUST BECAUSE *THEY* HAD tried to get an UNNATURAL EVIL, and NON-HUMAN RESULT out of them by COERCION AND RELIGIOUS SELF-HATRED by BRAINWASHING! And founded in NATRUE, no human can for long be distorted that way without naturally reacting against it.

This Natural Desire for Self-Trust, Mutual Honoring, Autonomy and Sexual Openness and Freedom is what our immediate asshole Rightist Religious Ancestors called "Our Sinful Nature", when it isn't sinful or evil at ALL, and when ONLY THEIR ABUSE of people about it REALLY what causes ALL EVIL RESULTS AMONG HUMANS!

Why the British who tried to conquer the American Colonies and also tried to recapture it in the War of 1812, actually believed they were "doing God's work" and bringing a "sinful" nation back to "the fold" of vicious insipid abusive colonial Xtianity!

They called us "Yankee Doodles" which was their slang for masturbators, the worst personal sin among Brits, but instead the Americans wrote a song to ACCEPT that name for us and OWN it!

> - and if they
> are not there, doing their job, there is much greater likelihood that
> the child will not get the guidance he/she needs.

Total garbage, raised with appreciation and given their autonomy, kids virtually raise thremselves, this is noted among famous geniuses when they and their parents recount their childhood, and anthropologosts have also noted it about kids in human groups that leave their children go play together in the forest all day. They do quite well without such vicious-obnoxious overweening regulation.

> With a solid
> underpinning from the parents, there is a good chance that the

THEY WERE NEVER OFF IT!! THAT IS ONLY YOUR MENTAL PROBLEM!!

> Parents may not always be at fault, but their input is
> critical, and *if* they don't do their job - teaching, reading,
> interacting, participating and disciplining - they are irresponsible
> and, yes, at some fault if their child goes wrong.
>
> Bruce Jensen

Reading is something kids want to do, if NOT coerced they will come and ask to be taught! But if coerced they will hate your guts and avoid doing what you demand simply to get revenge on you.

Sorry your life was so bad that you have no capacity to believe any
other kind could exist. However, you ARE deluded.

> Maybe that is what you needed, a few ass whippings.

HERE is the mental origin of your vicious reflex child-abuse, the
desire to coerce others to your irrational abusive and unnatural
belief system when they WON'T be convinced of it logically,
PRECISELY BECAUSE YOUR BELIEFS ARE ILLOGICAL!

> Apparently you never got any. OR got too many and are pissed off
> at the world because of it.

Gee, which is it now, make up your mind, you're getting desperate.

Next you'll either try to claim I must be a "nancy-boy" who wouldn't
kick your fuckin' ass for you. And you're quite wrong, I'd love to!

Or else you'll claim that I must have been severely abused to hate
abuse so much, failing totally to explain WHY YOU DON'T SINCE YOU
WERE!

So you see, you're irrational and illogical.

> I'm willing to bet you were a problem child,
> had your ass beat every day and swore to avenge Child correction - with
> every whipping you got.

Actually my parents never coerced or harmed me.

> You're becoming as see through as thin air with your replies.

You're posturing and using poor English. You're getting shook.

> As professional as you're claiming to be, none of your replies are
> adding up.

Not to your damaged mind. That's what damage is, the fracture of
your ability to known Truth when you see it.

> And I'm still waiting to see some book titles to see your
> "published chunks of work".
> WELL?????????? Come on, share it with us. Surely you're not ashamed of it
> are you? YOU are the one boasting. BACK IT UP.

Nope. I keep my fun and my professional work totally separate.

YOUR problem is that you'll be persauded by someone like me
in what you read, and you won't even realize who we are!
Steve

The ARRL wants Jack Gerritsen ex-KG6IRO thrown in jail!

ARRL Urges Action in Gerritsen Case

NEWINGTON, CT, Dec 14, 2004--In a strongly worded letter to FCC Enforcement Chief David Solomon, the ARRL has called on the FCC to intervene with the US Attorney's office in the case of former amateur licensee Jack Gerritsen, ex-KG6IRO, of Bell, California. The FCC already has affirmed a $10,000 fine against Gerritsen for interfering with Amateur Radio communications and recently proposed imposing another $21,000 fine for additional, similar violations. Gerritsen, who erroneously claims he's still licensed, allegedly has been bombarding numerous Los Angeles-area repeaters with verbal tirades for many months, often identifying with his now-deleted amateur call sign.

"It is urgent that the United States Attorney's office be brought into this matter without delay, and that procedures other than monetary forfeitures be brought to bear," ARRL General Counsel Chris Imlay, W3KD, wrote on the League's behalf in a December 13 letter to Solomon. Imlay asked Solomon to intervene "in this one instance, so that this matter is resolved without further delay." He suggested the time for gathering additional evidence was past, since the malicious interference continues.

Things were comparatively quiet on LA-area repeaters while Gerritsen was said to have been out of the US for about three weeks. When he returned to California on or about December 9, the transmissions resumed "with a vengeance," Imlay said. Repeater owners shut down their machines "to avoid the constant barrage of malicious interference," Imlay said.

In his letter, which also was e-mailed to Solomon's office, Imlay recounted some of the history of the Gerritsen case. In 2001, the FCC's Wireless Telecommunications Bureau (WTB) rescinded Gerritsen's Amateur Radio license grant after it learned of his earlier state conviction for interfering with police communications. As a result of the conviction, which he's appealed, Gerritsen ultimately spent some time in jail. He continues to maintain that the FCC can't take away his operating privileges without a hearing.

Gerritsen's now-pending Amateur Radio application remains in the hands of the WTB, which also will decide the fate of his General Mobile Radio Service (GMRS) license. The FCC set aside that grant last fall because of the allegations of continued unlicensed operation and deliberate interference. A Hearing Designation Order for Gerritsen is said to be

working its way through the FCC. But, Imlay noted, the slow pace of the case has angered and frustrated the Amateur Radio community, which has begun to view the FCC as powerless to halt the interference.

"Deterrence is critical to this effort," Imlay said, adding that the Commission's perceived inability to stop violations of Sections 301 and 333 of the Communications Act of 1934 and numerous Part 97 regulations "stands to quickly evaporate the years-long effort that has been so successful." Suggesting that the FCC will have a tough time collecting the fines it's imposed or proposed to levy on Gerritsen, Imlay said further delay will totally erode the Commission's excellent track record--in particular the work of FCC Special Counsel for Enforcement Riley Hollingsworth.

"Time is very much of the essence in preserving the sense of deterrence that exists generally in the Amateur Service," Imlay concluded.

The FCC's Los Angeles District Office, under District Director Catherine Deaton--not Hollingsworth--has primary enforcement responsibility over the Gerritsen case. Agents from that office already have tracked interfering transmissions to Gerritsen's residence and issued oral warnings that by all evidence have been ignored. The FCC has said that Gerritsen refused to let Commission agents inspect his radio transmitting equipment.

Deaton's office issued the FCC's recent Notice of Apparent Liability, proposing the $21,000 fine for Gerritsen's "unauthorized willful and malicious interfering radio operations." Imlay said the interference extends beyond California, since the repeaters are linked throughout the US Southwest, and the interference has disrupted "not only regular ongoing Amateur Radio communications but emergency communications as well."

Imlay said several hundred ARRL members have "repeatedly and with ample justification" complained to the League about Gerritsen's alleged activities. He called on Solomon and the FCC to "arrange for appropriate proceedings to be initiated to cause the incessant and damaging malicious interference to cease."

FCC Enforcement Bureau Assistant Chief George R. Dillon acknowledged the ARRL's letter December 14. "We are treating the allegations contained in your letter and the complaints we have received regarding his actions very seriously," Dillon said.

Anybody who gives a dime to the ARRL is stupid.

Same for anybody who believes the ARRL has ham radio's
best interests in mind.

Look for a major investigation into corruption, fraud, waste,
abuse, greed, & criminality at the FCC in 2005.

ARRL & FCC are both enemies of ham radio.

Dr Ham

R. Steve Walz: You wrote:

>>Antique Rightist Reactionary Fundie Xtian GARBAGE!
NO such "line of defense" IS NEEDED AT ALL!

Kids do NOT come into the world interested in seeing how well they can disappoint their parents if not stopped! That's superstitious antique nonsense! It's a raving paranoia that the world somehow always works wrong, and that if humans hadn't been invented that it would just fall to pieces or something. This is the kind of nonsense found only in religions which GO AGAINST NATURE, SCIENCE, AND PHYSICS and AT EVERY TURN AND TRY TO TELL YOU THAT NATURE IS IMMORAL AND WRONG AND THAT ONLY *THEY* KNOW "What Gawd Wants"!!

But you know, you CAN get kids to WANT disappoint you INTENSELY by denying their NATURAL HUMAN NEEDS for honor, respect, and autonomy! So these superstitious deluded bastards ASSUMED that their children were just naturally THE DEVIL, JUST BECAUSE *THEY* HAD tried to get an UNNATURAL EVIL, and NON-HUMAN RESULT out of them by COERCION AND RELIGIOUS SELF-HATRED by BRAINWASHING! And founded in NATRUE, no human can for long be distorted that way without naturally reacting against it.

This Natural Desire for Self-Trust, Mutual Honoring, Autonomy and Sexual Openness and Freedom is what our immediate asshole Rightist Religious Ancestors called "Our Sinful Nature", when it isn't sinful or evil at ALL, and when ONLY THEIR ABUSE of people about it REALLY what causes ALL EVIL RESULTS AMONG HUMANS!<<<

You're cracked. Possibly a total idiot. First of all, you have me utterly mistaken for something I am not. Get real.

Second, and far more importantly, you have totally misinterpreted every single thing I said and twisted it into some kind of anti-utopia that you have conjured within your mind. If you do this often, you absolutely must seek professional help before it is too late.

Getting to the substance of the issue, non-physical discipline (which is what I always intend in my discussion) is not child abuse, but letting them run wild without supervision and guidance is liable to get them killed before they are adults. You seem to think I'm advocating punishing a child in mental and physical ways - if so, you are sadly (and idiotically) mistaken. What I suggest is simply getting the child to be responsible for himself. If a child needs to have some responsibility for picking up his room, or doing his homework, or

helping with simple household chores (which every child should do for dozens of good reasons), he is NOT going to do it on his own - guaranteed. Requiring a child to do it or temporarily withholding privileges while explaining the importance of personal responsibility, is not abuse, it is not evil, it is not cruel, and it is effective. There is nothing wrong - NOTHING - with this approach. My parents used it mostly, and I am glad they did, and I would never hold it against them. If you are against this, then I feel really sorry for your kids when they grow up and selfishly expect society to take care of them.

My Dad spanked me a few times too - that was utterly unnecessary, and totally worthless. All that taught me was that it was a crappy idea. Contrary to what your narrow mind tells you, I do not hold it against him - he came from a different time and philosophy, and I easily forgive that. I just won't repeat the mistake made by very human and otherwise lovable Mom and Dad.

I've never seen a kid behave the way you describe. Never. I didn't behave that way. My sister didn't behave that way. My cousins didn't behave that way. My friends didn't behave that way, or the other kids in school either. Kids do not eagerly accept responsibility on their own. Too many kids without responsibility or parental guidance and support in my town got into drugs, cracked up their cars, had children by the age of 15 with no way to support them, or some other stupid thing that prevented them from achieving thier dreams. By the way, in the town I came from, a dream was getting out of town and making more than $2.75 an hour. Many people who live there, including folks I knew, still suffer from minimum wage blues.

The ones that had parents who cared for and nurtured them, gave them enough slack to be creative but not enough to be reckless, taught them right from wrong and monitored their behavior, *generally* got though the difficult teen years to successful adulthood.

You may say otherwise until you turn blue - but my own experience, and witnessing the experience of others, has taught me enough to go on. I am raising a son who gets gentle but firm discipline in the form of reasonable expectations and guidance. He is bright, loving, eager to read (because we read to him and *showed* him the joy of books, unlike many of his contemporaries who watch TV and videgames all day or walk around bored), eager to create with pencil and paper and art materials, eager to learn about science and geography and history, eager to create models and unique constructions, play musical instruments, and also horse around with his pals. Best of all (for me anyway), he loves to spend time with his Mom and me, because he can tell *all the time* that we love him, care about his well-being and future, and do fascinating and wonderful things with him. He is sure and proud of his own self-worth, and keenly interested in the world around him. He has his moments of stubbornness and boredom and anger - who doesn't? - but he gets over it fast and moves on to something else that brings him satisfaction.

SO, WHAT HAVE I DONE WRONG, BUCKO? Is my generally happy, joyful, curious 10-year-old a pressure cooker waiting to explode in my face? Is he going to blame us for teaching him right from wrong, giving him a solid foundation in civility and responsibility by our words and deeds, and showing him how he can be self-reliant and loving toward others at the same time?

Feel free to take your pathetic touchy feely garbage and apply it to your kids if you like. I am not going to take a chance that my son is going to miss some critical aspect of having to survive in this world by using your GOOFBALL hands-off approach.

I am done. You may feel free to warp this in any way you wish, but I have said my piece. Sorry all - Back to shortwave radio.

Bruce Jensen

WOW... this idiot proves my point more - every time he speaks..... Maybe all should delete his ass - I have! I'm only seeing his stupid crap via other's messages. He seriously appears to be showing signs of needing some help. Ya got to love it. To summarize - He chastised - no - make that defamed, libeled - others who he didn't know - publicly calling them Child Abusers - claiming them to be bad parents. Suggested "most" parents are bad. Then he says "bombs" are ok? Especially when it was said in the context of kids having them in his initial inference - uprising against the parents! He thinks allowing teens to be screwing in the next room is ok - it is a controlled atmosphere so to speak! He thinks children are proper in uprising against their parents! Man... He really showed his "professionalism" there. NOT! Yes, I'd say he has dug his grave with showing his sincere lack of professionalism and more so - moral character. As to being a writer or contributor to books regarding parenting, moral values or whatever the hell the specialty was to have been - I'd have to suggest it sounds like all talk - er uh make that Bull Shit. For all we know, it may have been nothing more than a few recipes for a fund raiser cook book. "Maybe" he is brilliant - I'll give him that inkling of benefit of doubt. It wouldn't be the first time a "brilliant" person has gone goofy.... Case histories are many. Then too, there is nothing to suggest that "brilliant" people are the "best" parents - either. There are many issues in our society to which there are no quick or easy answers. This man - claiming to be professional - speaking out in his own - so called beliefs and experiences - sure is not presenting any "realistic" answers to the problems. He instead casts blame to anyone he sees fit - even those he knows absolutely nothing about - accusing them of a serious crime which "he" can't prove has happened. Then, condoning the use of drugs, bombs, teen sex - all the things which are a large part of the problem of our society. Signs of a truly confused person. Yessiree, he has been deleted..... Not only in my computer but it would

appear in his own moral values as well.

Amen Bruce..... I'll say - my parents spanked me if needed, not enough to leave marks or such - but not for naught either. They more often than not - scolded me, banned some activities and such. The ONLY time I was beat for naught, was when I entered JR. High. A shop teacher lined us all up and paddled us all the first day of school and said let that remind you of what you'll get if you misbehave. While if being bad and I got paddled, I didn't mind. I knew I earned it. What that teacher had done was going over and above. Today, he and the school district may have faced a class action law suit. As I said, many older folks had their assed tanned and most will say it made them better for it. I do not believe and have not ever said a child "should" be "abused". I agree with you in your teaching a child responsibility. Respect is earned, I agree with that - but they need to also learn "implied" respect where it is appropriate. Respect the laws that are in place for us all. Respect other people's property, and so on. There is nothing wrong with that. Anyone who thinks otherwise is not fit for "this" society. Probably no others - either. None that I'm aware of - except perhaps - Heathen. Actually, when I was a youngster, my parents didn't have much money - but they did the best they could for us. I wanted things, so I went out and did many things to earn money. Sold news papers, flower seeds, made deliveries for a couple elderly ladies for pocket change - caught and sold fishing worms, cut grass, shoveled snow - and much more. I was pretty busy doing things to earn money to be "real" bad. But again, as per previous admission - I was no angel. I had my moments. Some came with being with the

wrong crowd until set straight. Many times I learned for myself. Kids do have to learn from their mistakes, but some mistakes aren't always learned from - unless guidance is given as to why/how it was a mistake. Most parents are - I believe - good parents - as are most kids good. Yes, there are the bad apples, but to condemn all as has been done by the one you replied to above - is pure ludicrous. I'd love to see him in a debate on TV with many other Psychological experts, especially those relating to Child rearing. I'm sure he would lose - hands down. Most likely, laughed/booed off the stage - if he were to give some of the same replies as he has in this thread. They were some real zingers, that's for sure..... It's almost to the point of being a troll to see how we'll reply.

That may be but the value of a 398 and an 1103 is not.

BR,

Two Young Mothers with Children (both boys) who were both instructed
to start correcting their children at an early age to:
- Simply getting down at the Child's Level Face-to-Face.
- Zig the Child on the Wrist with One Finger
("Snapping" the Index Finger 'off' the Thumb).
- Next Holding the Index Finger Up to the Child's Face
(So that the Child Will "SEE" the Finger and FOCUS Their Eys On It.)
- Then Saying The Child's Name and the Word "NO" in a Firm Voice.
(So that the Child Will "HEAR" the Parents VOICE and FOCUS Their Ears
On It.)
The-Bottm-Line: FEEL (NOT PAIN & INJURY) + SEE + HEAR = REMEMBERING

One Young Mother followed the Advise and now that the Child is Three
Years Old
the Child often looks toward the Mother when it is about to do
something that
HE Knows is 'wrong' and the Mother simply Holds Up Her Finger and Says
"NO".
The Child "Accepts" the Parenting (Parental Control) of the Mother.

The other Young Mother did NOT followed the advise and now that the
Child
is Three Years Old the Child 'often' is SPANKED by the Mother.
This Child has NOT Learned to 'accept' the Parenting (Parental Control)
of the Mother.

Good Parenting Starts Early
- With Love for the Child, Their Safety and Well Being !
teach your children well ~ RHF

Pro 83's retailed for 59 bucks plus tax on november 26th.
Owning one of each of these radios, while they arent the same type of
receivers, the 398 is hands down the better radio.
I think I paid 99 for mine, when they were brand new.

I have a like-new Realistic PRO-2004 for sale with manual and antenna.
I bought it new and it has had very little use. It has been opened up
to receive all frequencies and works and looks like new. The display is
bright and clear. $200 plus $10 shipping to lower 48.

Thanks for the info. Just curious ... are the export versions generally more expensive than the US versions? Seen a US version for around $475 and was just wondering.

Mike, one suggestion is to go to a small local airport find a FBO and buy an Airport Facility Directory and IFR Charts for your area. This will give you all frequencies in your area for less than $20.00.

Amazing, isn't it? It's like the old chain message trick, when a verbal
message is passed from one person to another the 10th person will
inevitably hear a very different message than the 1st person. The
internet seems to work in the same way. Also, the internet seems to
bypass most people's bullshit detector, people who think long and hard
about the infotainment spewed by TV News will automatically believe
something posted anonymously to a newsgroup on the internet without a
second thought.
>
> Are you in favor of the government tapping your phone? Answer that simple

The FCC doesn't give a rat's ass about hams, or about shortwave in general. Why? It's not profitable, it doesn't have massive lobbies spending obscene amounts of money to bring it to their attention, so it gets shafted. Hams interfere with each other all the time, and SW broadcast stations operate out of band (WHO gave WWCR approval to operate on 3210 when everybody knows that the US is not allocated any freqs there, that's tropical band for a REASON?) with impunity and the FCC does nothing because SW is the runt of the litter where broadcasting is concerned. The FCC spends big buck$$$ to hunt down every last FM pirate because the NAB screams about it, while SW pirates operate in the open for YEARS.

ICOM R-5 receiver / scanner, like new condition in box with manual, etc.
This item was purchased from JAVIATION in the UK and again, is a NO GAP,
Euro version. Also includes optional soft leather case.

$200.00 shipped via UPS ground, insured.

I accept PAYPAL, US Postal money order. I will take a personal check,
but shipping will be dleayed until I am 150% convinced it has cleared
without a problem.

eBay feedback under OFFDAN.

E-Mail only, if interested.

Dan

Apologies...

Header is incorrect, (force of habit recetly I guess), the item is going
up here FOR SALE first, before I Consider it for eBay.

Sorry ...

Quit posturing and say something of content so I can rip it to pieces.

> Getting to the substance of the issue, non-physical discipline (which
> is what I always intend in my discussion) is not child abuse, but
> letting them run wild without supervision and guidance is liable to get
> them killed before they are adults.

That's just more nonsense excuses for abuses. You authoritarian shit
always claim you have to harm children to save them from something
horrible, when YOU'RE actually the WORST that can happen to them!

> You seem to think I'm advocating
> punishing a child in mental and physical ways - if so, you are sadly
> (and idiotically) mistaken.

If you advocate ANY, AND I REPEAT *ANY* force or coercion upon a child
for ANY purpose which is OTHER, than to save them from imminent real
danger (and EVEN THEN it must be without judgmentalism or condemnation
or attempt to demean), then you are talking about ABUSE!

> What I suggest is simply getting the child
> to be responsible for himself. If a child needs to have some
> responsibility for picking up his room, or doing his homework, or
> helping with simple household chores (which every child should do for
> dozens of good reasons), he is NOT going to do it on his own -
> guaranteed.

Wrongo. When they are big enough to want it themselves, they begin
to do it spontaneously as their own idea, and they never stop doing
it! Both of our kids did that, and all the others I know who were
raised as EQUALS to their parents did so as well!

Prior to that you can and must either clean up after them, or ask
them to help you, altogether without recriminations if they do not
choose to do so. You will be shocked at how soon a child will respond
to help you if they are never coerced. Children WANT to grow up, they
simply are not developed enough to do everything for awhile.

> Requiring a child to do it or temporarily withholding
> privileges while explaining the importance of personal responsibility,
> is not abuse, it is not evil, it is not cruel,

Yes, it is!

> and it is effective.

No. It's not.
When is it they will learn to learn without you?
You see, that way, they WON'T EVER!

Withholding anything that is rightfully the child's is illicit, it is
immoral, it is ABUSE! However, withholding what is YOURS, your property
or your help, those are legitimate, if not done with obvious intent to
shame or be vengeful. You do not want a child to help you because they
feel shamed or fearful of you, you want that they want to help you

because you are their FRIEND! So BE THEIR FRIEND! Any parent who
claims that parents are not supposed to be their child's friend are
vicious and abusive and have failed totally to learn parenthood.

> There is nothing wrong - NOTHING - with this approach.

And I just told you what was wrong with it.

> My parents used it mostly,

Obviously. You're damaged!

> and I am glad they did, and I would never hold it against them.

That's the kind of damage I was talking about. You are aware that
you have cause to hold it against them, but you have been shamed.

> If you are against this, then I feel really sorry for your kids
> when they grow up and selfishly expect society to take care of them.

"When" they grow up? I'm 54 years old!
Mine are 31 and 28!! Both computer professionals!
As you can see, you're VERY WRONG about MUCH MORE than just my age!

> My Dad spanked me a few times too - that was utterly unnecessary, and
> totally worthless. All that taught me was that it was a crappy idea.
> Contrary to what your narrow mind tells you, I do not hold it against
> him - he came from a different time and philosophy, and I easily
> forgive that. I just won't repeat the mistake made by very human and
> otherwise lovable Mom and Dad.

So you didn't like it, and wouldn't do it, but you somehow think that
"it was fine for them" or something. Totally schizophrenic.

> I've never seen a kid behave the way you describe. Never. I didn't
> behave that way. My sister didn't behave that way. My cousins didn't
> behave that way. My friends didn't behave that way, or the other kids
> in school either.

And in America what is truly sad is that this is not surprising!!

> Kids do not eagerly accept responsibility on their own.

No, actually, naturally they do elsewhere, and where they are
treated properly here. Naturally they want to grow up so fast
that they are chronically frustrated.

> Too many kids without responsibility or parental guidance and
> support in my town got into drugs, cracked up their cars, had children
> by the age of 15 with no way to support them, or some other stupid
> thing that prevented them from achieving thier dreams.

This didn't occur because of just some lack of something, like a

LACK of being beaten or pushed around by parents and authoritarians.
What that comes from *IS* being dishonored in that very manner!!

> By the way, in
> the town I came from, a dream was getting out of town and making more
> than $2.75 an hour. Many people who live there, including folks I
> knew, still suffer from minimum wage blues.

That's another and a different level of dishonoring. If they were
healthy they would organize and hire people to train them, and start
some schools on property they took by imminent domain and then some
factories to make products based on their new skills. But people who
were raised by being dishonored don't believe they deserve any such
thing, they don't think they can learn on their own.

> The ones that had parents who cared for and nurtured them, gave them
> enough slack to be creative but not enough to be reckless, taught them
> right from wrong and monitored their behavior, *generally* got though
> the difficult teen years to successful adulthood.

Many kids still manage to grow up sort of okay in spite of that
trash, you mean. Care and nurture, slack and encouragement of
creativity are fine, but controls and insulting monitoring act
at cross purposes to those and do vast harm.

> You may say otherwise until you turn blue - but my own experience, and
> witnessing the experience of others, has taught me enough to go on. I
> am raising a son who gets gentle but firm discipline in the form of
> reasonable expectations and guidance.

When he grows up he will then do what HE wants to do, and feel vague
persistent hatred for you, you'll find he avoids you and hasn't any
time for you, and that he imitates your manipulative manner.

> He is bright, loving, eager to
> read (because we read to him and *showed* him the joy of books, unlike

> satisfaction.

Overmanagement makes a child unprepared for the real world.
Most of what kids need is to be left the fuck alone as much

as they want to be. That's the danger of home-schooling and
overly pushy parents.

> SO, WHAT HAVE I DONE WRONG, BUCKO? Is my generally happy, joyful,
> curious 10-year-old a pressure cooker waiting to explode in my face?

You're pathologically over-involved with your child's life and in
running it for him. Get a better hobby or you'll be lucky to ever
see him again after he leaves home, and that will be a bit early.
You're trying to re-live your life and lost opportunities THROUGH
him, you're trying to live his life FOR him, and in doing so you're
hurting him.

> Is he going to blame us for teaching him right from wrong, giving him a
> solid foundation in civility and responsibility by our words and deeds,
> and showing him how he can be self-reliant and loving toward others at
> the same time?

You need to understand the concept of overmanagement. You need to
learn to cede authority back to your child and then back the fuck off.

> Feel free to take your pathetic touchy feely garbage and apply it to
> your kids if you like. I am not going to take a chance that my son is
> going to miss some critical aspect of having to survive in this world
> by using your GOOFBALL hands-off approach.
> Bruce Jensen

Then you'll suffer the consequences when your little playfriend
reveals that he sees you as the bully of his childhood.
Steve

> suit.

That none of you had the balls to turn and smack the shit out of him
is testimony to how nutless abuse made you. I told a teacher in 9th
grade that if he touched me he wouldn't survive. He decided not to.

> As I said, many older folks had their assed tanned and most will say
> it made them better for it.

Did you imagine they were going to admit they were beaten and resented

it but didn't do anything about it? That would make them cowards.

> I do not believe and have not ever said a child
> "should" be "abused". I agree with you in your teaching a child
> responsibility. Respect is earned, I agree with that - but they need to also
> learn "implied" respect where it is appropriate.

Nonesense. "Implied respect": You're mealy-mouthing.
Obedience to a larger bully isn't "respectful", it's just cowardice!

> Respect the laws that are
> in place for us all. Respect other people's property, and so on. There is
> nothing wrong with that. Anyone who thinks otherwise is not fit for "this"
> society. Probably no others - either.

Respect laws ONLY WHEN THEY'RE RIGHT LAWS! Respect property only when
it isn't STOLEN. Etc. You see, it's more complicated than that. And
to top it all,the assholes who want you to respect their property and
obey the laws are the assholes who stole it from your family!

> None that I'm aware of - except
> perhaps - Heathen.

He means the people who believe that the world belongs to everyone,
you know, the Commies!!

> Actually, when I was a youngster, my parents didn't have

Garbage. Kids go with the wrong crowd to aggravate abusive parents,
and for no other reason. Those kids ARE the wrong crowd for yet other
kids and THEIR parents!

> Most parents
> are - I believe - good parents - as are most kids good. Yes, there are the

Depends what side of the Bay you're on. San Francisco and Oakland use
trunking, but you probably knew that. San Mateo County S/O is using
digital trunking now and is trying to get the rest of the county's
agencies to buy in.

Hello,

I was doing a search with my VR-500 and caught this frequency while I was sitting at home. I hear room sounds, and conversations etc. My first thought was a cordless phone left off the hook, but this is day 4 now. At one point I heard a door-chime and a door open, and then a lady said "thanks, have a good day". I'm thinking it's coming from one of the small shops in my neighborhood though I hear conversations and TV or radio 24/7. The signal is pretty strong according to the signal strength meter.

Any ideas as to what devices might use this frequency? I did do a search on Google and came up dry.

No, you're not. No 54-year-old parent, at least one that's not
institutionalized, would use the language that you do. You're a 19-year-old
failing college student.

Dewayne,

Dude, do what you want, but I think you're just wasting your time. Delusional people ALWAYS think they're right and the world is wrong. Delete the ass hole and move on in your life. I quit "wasting" my time talking to this nut. His assumption that bombs are ok, other than in "war" - which I've never seen him include in his examples, shows he is truly in dire need of help. ESPECIALLY when he recommends/infers them in the hands of children. NO Psychologist, Psychiatrist or any other person alive who deals with mental issues or child rearing principles will EVER back him. Actually, they'd all most likely recommend any licenses be pulled and he be submitted to some testing and then be placed in an institution. Save your time... delete him. IF he is using his rightful name, and IF he did publish any works - which I doubt - he has thrown a huge cloud of controversy over anything he may have written or stood for. Again, I highly doubt he's written anything - except as in my earlier example of recipes for a fund raiser cook book. Given his shining examples of proper parenting, IF any examples "were" used in any well known books of the subject matter, I'd have to think his points were used to show how NOT to raise one's child - the experts showing how flawed his thinking really is..

Hmmmm..... given what I've seen, NO WHERE does it suggest he has any
formal expertise in child rearing/parenting.
I'd suggest this dude has been sniffing the solder fumes a bit too much.
Steve ole boy - get yourself an exhaust fan. The lead is starting to get to
you.

While he doesn't proclaim expertise on Parenting on that website, he does
seem to lay claims to his own brand of experience in sexual acts. Since he
said he would allow his teens to have sex in the next room, I have to wonder
if he joined in with his in teaching them? If not to teach or join, to watch
and/or film? Some sick thoughts indeed, but hey, that is the avenue he led
us down. He has created more questions than he answered. Given what we've
seen this far, I have to wonder if he can even do the sexual acts right!
Actually, I think he's a pud pounder. Too much time on his hands and LOTS of
wishful thinking.

I was "expecting" to see a website regarding Child rearing or something to
which he has claimed vast knowledge and professionalism of. I didn't see
that. Therefore I must come away with the thoughts that he is a phony. Any
PROFESSIONAL - worth a grain of salt would have a website up or some link to
his works. NOT divulging his works - shows a shadow of a doubt. HE is the
one who made all the claims to be a writer of the topics which were being
discussed, therefore it is HE who should back his statements. We are

waiting, and we shall keep on waiting - because it can not and will not ever happen. You know, when the state goes to prosecute someone they've accused of a crime, they must present the evidence. THIS man has made accusations of people he doesn't even know - of them being child abusers, etc. THIS man claims to be someone of stature and professionalism. Since HE is the one making all the "accusations" and claims, it is HE who needs to put forth the proof - not us. It is HIS move - to PROVE without a doubt that those he calls child abusers - are child abusers. I say PUT UP OR SHUT UP. With the way he accuses wildly and lays false claims, someday - he'll be in court for slander/libel and/or defamation of character - or perhaps even a nut house. Stating kids should have bombs, the last choice seems to fit the best. The sooner the better.

Where do you figure that? I know plenty of people with more then 2 kids that use language exactly like that.. now 1/2 of them I know would smack a kid upside the head for using that same language and wonder where they picked it up but Steve does not seem like one of them.. While I don't agree with everything he says I don't take him for a liar..

I'll try this one more time with a reduced price before it's off to eBay..........

ICOM R-5 receiver / scanner, like new condition in box with manual, etc. This item was purchased from JAVIATION in the UK and again, is a NO GAP, Euro version. Also includes optional soft leather case.

$180.00 shipped via USPS Priority Mail, insured.

I accept PAYPAL, US Postal money order. I will take a personal check, but shipping will be delayed until I am 150% convinced it has cleared without a problem.

eBay feedback under OFFDAN.

E-Mail only, if interested.

Dan

Classic.
Count on your kind of fool to exaggerate and miscomprehend completely
anything of value ever told to you.

One: Kids who are loved WANT to go to school.
Two: Rescue is permitted IF you apologize for it.
Three: Actual freedom is never misinformed. The nature of freedom
is that of informing.

You're trying to extract neurotic delinquents raised by idiots like
you and insert them into my recommendations.

That would be about as stupid as expecting you to grasp anything you
haven't thought of yet.

Still, as A.S. Neill showed by his life's work, such neurotic children
as you produce can be reversed simply by the method of honoring what
are their, at first, warped and non-productive motivations. It simply
takes a while for them to realize they are no longer being abused.

Disingenuous.
No one is institutionalized merely because you don't like their
language.

> You're a 19-year-old failing college student.

Nope, sorry. I was born 14 March 1950 at 1:33PM in Quincy, Adams
County, Illinois. Check with the Clerk of the Country Recorder's
Office.

> happen.

You can be sure of that, and you can persist in your pop-delusions
about what actual professional writers do.

> You know, when the state goes to prosecute someone they've accused
> of a crime, they must present the evidence.

That's the State, in court.

> THIS man has made accusations of
> people he doesn't even know - of them being child abusers, etc.

Yes, but of abusing children according to what *I* define as abuse.

> THIS man
> claims to be someone of stature and professionalism.

Nonsense, just knowledge and experience. You continue to re-delude
yourself as to what I've said.

> Since HE is the one
> making all the "accusations" and claims, it is HE who needs to put forth the
> proof - not us.

I tell you what I believe abuse is, and then I note who says they do
that and call them an abuser. No proof is needed, THEY ADMIT IT!

> It is HIS move - to PROVE without a doubt that those he
> calls child abusers - are child abusers. I say PUT UP OR SHUT UP. With the

No, Eric. The problem is you.

I had no communication with you for several months. Recently, I began a thread about the late Bill Cheek. This posting did not mention you or reference you in any manner. It had nothing to do with you, Eric. Yet, you felt the need to stick your nose in where it didn't belong and get involved. When myself and others took issue with your involvement, you then complained that we won't leave you alone.

This is the same pattern that you have been engaging in for nearly 10 years on the radio newsgroups: You involve yourself in a controversial manner with that which has nothing to do with you. Then, when you're called out for your actions, you whine and complain about how you're the "victim", how you're being singled out and picked on.

I would be happy to repost several previous examples of this if you wish me to do so.

Why must you always search for trouble on the Internet, Eric? From what I've been able to gather about you and your life, you already have plenty of issues to deal with. Do yourself a favor and stay out of that which does not involve you.

How did a discussion on parenting get crossposted from "misc.kids" and "alt.parenting.solutions" to "rec.radio.shortwave"? Parents, if you haven't seen some of these poster handles in your NG before, that's because this discussion was crossposted to two rec.radio.* NGs, shortwave and scanner. How it relates, I don't know. Please remove these NGs (I'm sure "misc.consumers" would appreciate it too) from your rants about parenting. Thanks.

STRIDSBERG MCA204 VHF/UHF Multicoupler.

Includes AC power supply, AND four (4) BNC leads not supplied.

Run your antenna line into this unit and now you have four outputs for
your scanners / receivers.

$125.00 plus $5.00 to cover USPS Priority Mail insured shipping.

I accept PAYPAL or US Postal money order. I will take a check, but will
wait until I am 150% sure it has cleared before shipping.

eBay feedback under OFFDAN.

E-Mail ONLY if you have a question or are interested in purchasing.

Seems overpriced. Not the best location either...depending on where you live. Lots of opportunity for corrosion. Not to mention, having all that steel along side the antenna element.

Call the shops in your area and let the phone ring once, then hang up (do *67 first). When you hear the phone ringing in the background, you'll know where it is. Then it's a simple matter of going in and spying the place out.

>>>One: Kids who are loved WANT to go to school.
Two: Rescue is permitted IF you apologize for it.
Three: Actual freedom is never misinformed. The nature of freedom
is that of informing.<<<

There is not the tiniest shred of logic in these first two statements
(although my child is quite happy at school). It simply is untrue.
You are either deluded or a liar yourself.

I don't lie to my child. Ever. About anything.

You are the most abusive and arrogant "enlightened" person I have ever
read. You are the kind of person that gives good liberals a bad
name...regardless of whether you are a liberal or not. Further, you do
not have experience of a broad enough nature to make believe that you
are the last word on child-rearing, nor is any other wacko
psychological / psychiatric type (in my experience, which includes some
numbers of these people, they need their own help more than anyone
else, and are generally out-to-lunch). You know nothing and feign
wisdom - and it doesn't work.

Get help. Soon.

Bruce Jensen

Bill,
I would have thought you'd have known better...living in the motor city after all...there's no steel in that location...it's all plastic!

Joking aside, I agree with Bill actually. My concern would be ground plane. This setup doesn't look conducive to transmitting.

just aquired Drake R4B--sensitivity very low all ranges--preselector peaks (noise level increases significantly) at about 4 mhz when dial tuned to 7 mhz

does this sound like weak tubes--if so--where is best place to buy tubes?

if not tubes--need suggestions!!

Receive only, I'm not transmitting. And its on a hatch back so the antenna
will rise with the door.

Will this work for receiving?

Well, he combines shipping and uses Priority Mail. That alone costs
him $4.30 minimum. Should he ship it at a loss?

Have you recently seen what prevails on eBay? Almost everyone else is
into rip-ship. The item is 25 cents but s&h is $25.

I followed some of the advice here and came up with this.....

The signal pegs out the S-meter even inside my house so I removed the antenna and walked up and down the street in front of the shops until I got a little bit of signal in front of one. So I took down the number and went home and called it, sure enough. I did hear the phone ring over the scanner, so I now know where it is coming from. I went back to the shop and went inside to poke around (minus the conspicuous radio) and I didn't see any type of device that is out in the open. Things are spread out all over the place without and sort of organization, so it was easy to look anywhere without looking suspicious. It's a place that used to sell herbal remedies but has since become a sundries type place selling fairy figurines, books on meditation and Zen, new-age type of stuff etc.

It is still a mystery as to why...there is an apartment upstairs so maybe the owner lives there and monitors the store? I hear conversations, television (after hours, there's no TV in the store) etc..all hours, equally clear even when the store is closed. I hope I didn't run across some surveillance operation. The store is run by an older woman in her early to mid 50's, so that seems unlikely.

Anyhow, I think I'll just keep my nose out of it and just keep wondering.

Thank you all for your tips and advice, this was the most intriguing thing I've done with a scanner/radio in a long time.

Will this work for receiving? The answer is probably yes, but then so will a coathanger taped to the window on the inside. The question is how well will it work.

By putting the less than 3 foot long antenna that low and that far down (in relationship to a lot of the bodywork) you will be getting some interaction between the antenna and the coachwork. This means that the antenna will not work as well in any direction as if it were mounted over a flat plate, such as the roof. Additionally, you will get serious shading from the coachwork. This means if the antenna is to be mounted as it is on those pictures that it would work better when the source was behind the vehicle, in some cases (application dependant) significantly better. In effect the antenna will act as a low (or less than unity) gain antenna, with the sweat spot behind the car. This is annoying in a mobile application.

Essentially you want as little of the car above the base of the antenna as possible. And you want the antenna as central as possible to keep an omni pattern. It is not practical (in many applications) to put the antenna in the middle of the roof. But that is about the best possible place on the average sedan.

For most installations (scanner stuff, anyway) I use a mag mount antenna in the center of the roof if I can. As I drive a couple of convertibles, in addition to hardtops, this is not possible. On those vehicles the antenna is a mag mount on the trunk lid.

You could do a mag mount on your hatch back (I think you said it was a hatch). Put the antenna in the center of the roof, and bring the coax in around the hatch. Weather sealing will have to be watched closely. This gives you the option of removing the antenna and throwing it in the back any time you want also.

Thanks very much for the advice. I've got a 4' Firestik. So at least 24-30 inches of antenna would be above the body of the car. But I could easily do a mag mount on the roof as I have a sunroof that I could run the wire through. The question is, what kind of mag mount is solid enough to handle the wind load of a 4' antenna? And how does one shield the car's paint from the magnet? A rubber pad?

Thanks again.

Don't look for any investigations into corruption in the government until at least 2009 - when George Bush is out of office. BTW, with accusations flying about news media being either "left" or "right" oriented, I've bookmarked some news organizations in Australia and England. Interesting stuff. Of course, we may well find our ISPs start blocking these sites for some "unknown" reason too LOL

Did you get a load of the prizes he gave out to some folks who screwed up royally with this Iraqi mess?

Best regards from Rochester, NY
Jim

Now that you have ascertained the source, why not just call them up and ask them? They would probably appreciate knowing that the neighborhood can hear them, they are probably not aware. And, if it turns out to be a surveillance operation, you may have an opportunity to own your own bugging device. It would bring good money on E-Bay. Finders keepers. Companies that vend those devices to law-enforcement such as Westinghouse/AID in Ft. Lauderdale Florida usually start around $1,000.00.

Hi Steve,

Do you have the actual operating freqs for the 900 Mhz baby monitors?
I can only find the freqs for the ones that operate at 49 Mhz.

Source record: 15956

If you have a Firestick scanner antenna that is 4' long you must have the MSM-4B.

The fact that 24" of the antenna would still be beside the coachwork will hurt you almost as much as if the whole thing was alongside the body. But it is still better than no external antenna at all.

Most better mag mounts come with a rubber (often) or felt (seldom) pad on the bottom of the magnet, to protect the cars paint. Some only have a sheet of soft aluminum. In general they will not harm the paint via contact, but the big problem is when applying and removing the magnets people have a tendancy to twist the mount off, this can cause scratches. Or when applying the magnet people sometimes let one side pull down first, again hurting the paint. Once the magnet is actually adhered to the vehicle it will not move around, and so does not cause scratching, as long as the area you apply the magnet to is clean.

Worse than possible scratching is paint fade...and the fact that it will not fade under a mag mount that spends a lot of time on the car. My 1989 had five antennas on it much of the time, three at all times, during the 9 years I drove it. The antennas, all with mag mounts, were often removed if I was parking in what I felt was a high threat area. So they came off and on the car a lot. During that time the paint did get a couple of scratches, but nothing that could not be easily buffed out. However, I habitually put the same antennas on the same points of the car for all that time. After a couple of years there were patches of less faded paint in each of those locations. And there was really just nothing I could do about that. If the car is less than a couple of years old this will be an issue. I believe car paint does most of its color fading in the first three years.

A 48" antenna is not very tall, it should be easy to find a mag mount for it. I would be willing to bet that Firestick sells one for them, although I could not find one on their site at http://www.firestik.com/, and I know I just saw one in the local Radio Shack that would do it. A quick search of www.aesham.com shows they sell several different models (Cushcraft, Pro-Am, Antenex, etc), from single magnet 3 and 3/4 inch models to triple 5" magnet models. I would suspect that a single 5" would be overkill. I use a single 5" to hold an M-Squared 2M Sqloop, and the wind loading for that should be a couple times a single 4' Firestick. The only time I have ever had an issue was a single 3 and 3/4" mag with a 52 inch antenna on it, anything over about 85 mph and that thing would come off. Once I put it on a 5" mag it never came off again. However, don't get bit by the "bigger is better" thing with these mounts, a triple 5" can be a real pain to get off the car without damaging the paint.

Hackers target MSP radios

As published in the Flint Journal, December 18, 2004

The Associated Press

Lansing, MI - An Oceana County fire chief and three other men were charged Friday (December 18, 2004) with scheming to illegally tap into the state police radio system.

The radio system is supposed to be used by law enforcement or other public service agencies that have been authorized to access it.

Attorney General Mike Cox said it's crucial that first responders be able to communicate on the system without others eavesdropping.

Andrew John Felde, 41, of Grand Rapids is accused of obtaining stolen or illegally manufactured Motorola radios. James Benjamin Brunk, 44, of Cadillac and James Edward Werner, 38, of Rockford, who were state police civilian employees, allegedly helped Felde program the radios to access the 800-megahertz system. They gave him computer software and templates for the radios so they would work on the system, Cox said.

Walkerville Fire Chief Jerry Lee Frick, 63, then bought three of the radios at half price, Cox said, in part with grant money by submitting a fraudulent invoice to a local 911 system.

The men face various felony charges. Frick faces up to 14 years in prison if convicted, and the other men face up to 5 to 10 years.

Maybe I'm missing something, but WHY? What on earth would someone want to be able to use the system for? There are scanners capable of listening to the system. I assume the guy would want to transmit. But WHY? If this was a kid, I could see the "just for kicks" motive. This guy is 41. Hmmmmmm.

While you're at it, make a note of the frequencies of Radio Australia
and the BBC. I can easily receive Radio Australia here in California,
but I don't know how well it comes in back east. You might try their
morning freqs of 5995 and 7240 (the latter having some US ham QRM).
>
> Did you get a load of the prizes he gave out to some folks who screwed up

The BBC had an interesting take on that. They interviewed some woman
from an antiwar group in the US who noted that those three guys should
be being tried for war crimes, not given awards. You might also try
Radio Havana for a different slant on Iraq. It seems to me that lately
they've toned down the "evil imperialist capitalist" rhetoric.

I got mine yesterday for that price. total with ups gndtrak shipping
was 208. never tracked trunks b4. I think I should have got the
software also, but I bet it would be better if I waited for a month or
so, so that versions are at least 1.0 and not in beta test.

There has to be more to this story, than what is mentioned here. Attorney General Mike Cox has been seriously misled, and needs to get out more, if he really believes civilians, outside the MSP system are unable to monitor (eavesdrop), on MSP communications!

As most all of us in this newsgroup know, off the shelf police scanners manufactured by Uniden, and GRE (Radio Shack), are available to anyone who wants to purchase them. These are fully capable of monitoring MSP, as well as many other digital communications systems. For that matter, you can legally purchase Motorola digital radios, even on eBay!

Now, granted, if they were in fact, able to program them to actually access, and transmit, via the MSP system, (not just monitor it), that is a different story...but I doubt they did. Monitoring could be viewed as illegal, if they were able to decipher, encrypted modes. If Motorola's digital system is that insecure, that it can not monitor, and detect, unauthorized radios connecting to their network, from outsiders, then maybe MSP should be talking to Motorola ASAP!

Maybe this is a conspiracy to get Michigan to switch to M/A-Com OpenSky, like Oakland County wants to use. They probably just wanted them for deer hunting! Too bad, because from what I hear, cheap, FRS (Family Radio System) walkie-talkies, from Wal-Mart work better than Motorola's digital system! What a quagmire!

After reading the actual article, it sounds like the only crime committed
was how they obtained the radios, and how they intended to pay for them.

We have the legal right, to monitor the MPSCS / MSP. Can anyone prove me
wrong here?

greets all,

Was recently reading through the Alinco DJ-X2000 manual. In the beginning of the manual under 'features', it says the X2000 has a 160 minute recording time. Later in the manual it makes reference to the recording time being only 160 seconds. Anyone know, is it minutes or seconds? Thanks.

MJ

4306. Re: Question about DJ-X2000: Recording Time

160 seconds is more like it. Universal-Radio states that it is 2.5 minutes,
which would be 150 seconds.

You're wasting your time. RHF only speaks tinfoil-hat english. Many
people have told him how unreadable it is, only to have him insist
that "his is better," or is that "His is Better." Whatever. I find
his posts utterly unreadable.

Thanks Bill. You'd think in a day where we can buy $49 digital pocket records that can record for 2 or 3 hours (or more), that the X2000 would be at least 160 minutes. Something of a disappointment ... but very nice unit nevertheless.

I think that feature was intended to be more like instant reply, if you missed a sentence, or small bit of information. You're right though, a nice, long-play, digital recorder would be a great feature in a scanner/receiver.

I think we could be on to something here Bill. Don't be surprised if we start seeing new scanners come out in the near future which have the capability to record several hours of digital audio. It really WOULD be a tremendously helpful feature. When I want to record transmissions, I end up connecting the ear jack to my pocket digital recorder anyway :)

For non-digital but with alpha tags, it's the Uniden BC870XLT. No longer sold in the US though. The de-bugged Uniden BC898T looks good in the non-digital, non-alpha tagged category. Best digital so far appears to be the Uniden BC796D.

Uniden BC 785D Digital capable scanner with BCi 25D digital card. This one is in like new condition, in the box with all accessories, manual, etc. I repeat, this 785D HAS the digital card installed.

$350.00 shipped via UPS ground, insured.

I accept PAYPAL or a US Postal money. I will reluctantly accept a personal check, but be advised I will wait until I am 150% sure it has cleared before shipping.

You can check my eBay feedback under OFFDAN, and I will provide references if requested.

E-Mail ONLY here please if you have a question or are interested in purchasing.

Thank you, Dan

> I'm still a little confused about this. First, just to clarify, they
do
> record the direct line without notice to or consent of the person on
the
> other end, right?

Yes. It's a physical wiretap. Though multiple lines appear on the
phone, there is only one pair of wires going to it. The system
phyically taps those wires and records everything.

The primary purpose of the tap is to record incoming call center calls
to the customer service rep. The other calls are recorded are, I guess
you could say, a by-product of the legitimate wire tap.

No, unless the agent advises whoever he is taking to on the "direct"
line that the call may be recorded, the second party does not know.

> So are you saying that the two-party-consent requirement
> applies only to personal communications and that it is ok to record
everything
> as long as you don't listen to the personal parts?

No, I said no such thing. The calls coming into the the customer
service agent on the call center lines have an announcement that the
call may be recorded.

The elements of the California wiretap law say that it's a crime to
make an unauthorized tap, or, in an unauthorized manner and without
consent of all parties, attempt to learn the contents of a confidential
communication. First, the wiretap is authorized and the employees
knows his phone is tapped. Second, no attempt is made to learn the
contents of any confidential (personal) calls. If they come up during
a review, as soon as it is known they are no-notice calls, the playback
is stopped and the review moves to the next call.

> Who exactly is authorized
> to make the personal/non-personal distinction?

The persons that are authorized to review calls. They don't work for me, nor do I operate the call monitoring system. I cannot say what position these people hold.

> In California, am I as an
> individual allowed to record all of my phone conversations without notice to
> the other party as long as I review only the non-personal parts?

If you want to record your phone calls without giving notice, you should consult an attorney about the legalities of it. As non-attorney I would say no. I suppose you could record all of your calls without notice, but then you couldn't allow anyone else to listen to those recordings.

Go back to what I originally described. The only recordings here that are reviewed are those that come in on the CSR's call center line. Those calls have notice to all parties that they may be recorded.

|
| > I'm still a little confused about this. First, just to clarify, they
| do
| > record the direct line without notice to or consent of the person on
| the
| > other end, right?
|
| Yes. It's a physical wiretap. Though multiple lines appear on the
| phone, there is only one pair of wires going to it. The system
| phyically taps those wires and records everything.
|
| The primary purpose of the tap is to record incoming call center calls
| to the customer service rep. The other calls are recorded are, I guess
| you could say, a by-product of the legitimate wire tap.

Is the fact that the other recordings are made as a by-product of the
legitimate tap dispositive of their legality? That is, if you made
the exact same recordings by deliberate choice would the situation
change?

| No, unless the agent advises whoever he is taking to on the "direct"
| line that the call may be recorded, the second party does not know.

If this is acceptable, it appears to contradict your prior statement that:

``In California, any phone call going over the public network
cannot be monitored or recorded without consent of BOTH
parties.''

since there is an ''or'' between ''monitored'' and ''recorded''.
(assuming the calls are going out over the public network)

At least I think that was your statement if I'm not confusing the
attributions.

| > So are you saying that the two-party-consent requirement
| > applies only to personal communications and that it is ok to record
| everything
| > as long as you don't listen to the personal parts?
|
| No, I said no such thing.

I didn't mean to imply that you said it; I was merely proposing the only
possible way I could see reconcile your seemingly contradictory statements.
I apologize for using the ``So are you saying'' structure.

| The calls coming into the the customer
| service agent on the call center lines have an announcement that the
| call may be recorded.

Yes, I understand. I am not talking about those calls. I am talking about
the calls on the direct line that have no announcement and are recorded without
the consent of the party on the other end.

| The elements of the California wiretap law say that it's a crime to
| make an unauthorized tap, or, in an unauthorized manner and without
| consent of all parties, attempt to learn the contents of a confidential
| communication. First, the wiretap is authorized and the employees
| knows his phone is tapped.

Does the fact that one party knows his phone is tapped have any bearing
on the requirement that the other party consent?

| Second, no attempt is made to learn the
| contents of any confidential (personal) calls.

I don't believe that it is plausible to equate personal and confidential in
this way. Clearly it is possible to have confidential business calls. Of
course, without the definition of ``confidential'' it is impossible to know
what the law as you state it means. On the other hand, any definition of
``confidential'' that allows one party to the call (or even a third party)
to make the determination that something is not ``confidential'' would pretty
much defeat the all-party requirement.

| If they come up during
| a review, as soon as it is known they are no-notice calls, the playback
| is stopped and the review moves to the next call.

This seems a bit different from what you said before, but I'm still not
completely clear on the procedure. Do they stop playing *all* calls
that were made on the no-notice line or only no-notice calls where
something personal/confidential came up?

| > Who exactly is authorized
| > to make the personal/non-personal distinction?
|
| The persons that are authorized to review calls. They don't work for

| me, nor do I operate the call monitoring system. I cannot say what
| position these people hold.

I didn't mean the specific people at your company. I meant who in general
is authorized by the law to make such determinations?

| > In California, am I as an
| > individual allowed to record all of my phone conversations without
| notice to
| > the other party as long as I review only the non-personal parts?
|
| If you want to record your phone calls without giving notice, you
| should consult an attorney about the legalities of it.

I don't want to record my calls and I don't live in California. It
was a hypothetical question intended to explore any possible distinction
in the law that might give more latitude to businesses than to individuals.

| As non-attorney
| I would say no. I suppose you could record all of your calls without
| notice, but then you couldn't allow anyone else to listen to those
| recordings.

Interesting. I don't think this is the case in some other all-party-consent
states.

| Go back to what I originally described.

I have, several times. But I'm still unable to reconcile all of your
statements.

| The only recordings here that
| are reviewed are those that come in on the CSR's call center line.
| Those calls have notice to all parties that they may be recorded.

Ok, I think that answers the question I raised above about whether they
stop listening to all no-notice calls or only to no-notice calls where
something personal/confidential comes up. However, I still believe that
making the recording of the no-notice call in the first place is inconsistent
with the statement:

``In California, any phone call going over the public network
cannot be monitored or recorded without consent of BOTH
parties.''

That law is against Federal Wiretapping Laws.
Person may be recorded if one party is aware.

Federal Laws always override state laws.

The California law is invaild. The prosecutor could appeal that
decision and claim the Federal law overwrite state law.

What about the other law?
You are support to report a crime if you overhear it or see it?
There is a conflict of laws here

Hi all,

I'm shopping for a scanner for Christmas to give to my brother. He's in the local volunteer fire department, and though he carries a smaller hand-held scanner provided by the department I'd love to get him something larger and something with more features.

I checked http://www.cityfreq.com/ and it shows my brother's VFD frequency is 154.22 so I need something that'll hit that plus hopefully the other area departments plus city, county, and state police departments if possible. I know next to nothing about scanners, so I'm not even sure if this is possible now'days. I'm looking at the Radio Shack PRO-2018 scanner, and according to the specs it will do my brothers' VFD's frequency. Any pros or cons to this one or any suggestions on another model? Here's a link via tinyurl - http://tinyurl.com/3kste

Thanks for comments or suggestions.

Ringo

a TV antenna makes a good directional scanner antenna. You will need to change the polarization from horizontal to vertical. 440 MHz is UHF and it'll cover great! The slight mismatch from 50 ohms to 75 ohms is trivial.

Hi Evan,

Just a follow-up. I went to Radio Shack today during lunch and bought
the PRO-2018 scanner. I did lots of research on newsgroups and other
sites, and all had positive feedback on this little scanner. It
doens't do digital, but my brother can take this back and exchange it
for a digital model if he wants that feature. They started at around
$160 or so.

I can always take it back if someone else has other ideas, but with Christmas being a week away I didn't want to wait too long.
Thanks for any feedback or comments.

Ringo

You have to loosen the antenna bolts that hold it to the mast and turn
the elements vertical. If this is not possible because of the design, it
is possible to get a small piece of mast and bend it to a right angle.
This might be hard to do without kinking the pipe.

Bending small thickness mast without kinking is easy if you first fill it
with sand.

greets all,

I've been reading all the reviews I can find on the Alinco DJ-X2000 in an attempt to find out what this radio's all about before either spending good or bad money.

Thus far, the two best reviews I've found (and maybe the only reviews) are here:

http://www.strongsignals.net/access/reviews/reviews.cgi?type=display&rtype=rev&class=recv&num=039

and

http://www.ukmidlandscanner.co.uk/djx2krev.htm

First things first:

The place I plan on ordering my unit from is www.Radio-Export.com, with a price tag of $610.00 This is the "export" version ("E" model) with no blocked bands.

From The Reviews:

Perhaps most importantly, it seems as though the "early" models of the X2000 had an unnecessary and annoying amount of audio noise (described as a light hissing sound), but I'm gathering that this is a problem that has been fixed (or at least diminished to a degree)
in later models. Good quality of received audio is a must for me, as so much of transmitting equipment
has enough noise in it already, as most of us know. In this case, it's even doubly important
that the audio be as clear as possible. Perhaps someone who owns an X2000 could give me some
more info regarding this?

Another somewhat daunting prospect was the way the effectiveness of the "Flash Tune" was described. A quote from the second review regarding the flash tune feature:

"Although this feature does not appear to work that well, hats off to Alinco for incorporating it,
other manufacturers (Or Alinco themselves) should maybe concentrate on perfecting this feature
in later models. NOTE: I have spoken to another user of the DJX-2000 and he swears by it, he
admits that he does sometimes get the false readings but that for him the flash tune works almost
every time."

Hmmm.

Granted, nothing's perfect, and you can certainly expect false signals from time to time, but does it work, or doesn't it? For anyone who reads the entirety of the review, and the way the flash tune performance is described, it's hard to believe that Alinco would release a
radio which had a feature which is that lacking and ineffective. This guy said he was standing
practically right next to a security guard keying up his walkie talkie, and The X2000, in flash tune
mode, failed to pick it up (and gives several other accounts of the X2000 completely failing to
pick up "strong" signals). He says the problem may be that he lives in an RF saturated area which, in his opinion, may "confuse" the X2000. But realistically, how many of us don't live in
a somewhat RF saturated area? i.e. if you live in a near a city, as many of us do, you're in an
RF saturated environment.

The scan speed seems to be painfully slow. However, that is something that can't much be helped,
and in my case, isn't high on the list of priorities. The search speed however, is significantly faster,
which is important.

I would be extremely grateful to hear from someone who owns and has used an Alinco DJ-X2000.

Although I don't want it to become the central issue, it might be noteworthy to know that I am
a bit biased in my attempted assessment of this scanner, as I am contrasting it a bit to the
AOR AR8200 MkIII, A scanner which I have considered for some time. The AR8200, fine a radio as it might be, lacks some of the features that the X2000 has which are important to me.
Namely the Flash Tune feature, the frequency counter, and the record feature.

Does anyone have this radio? Has anyone used this radio? If so, I would be most appreciative of your feedback. Also, it may be nice to hear from someone who may have bought a scanner from www.Radio-Export.com before. Reputable company?

Thank you

MJ

Hi Dan,

I still want the input of this group because I can take this unit back. It's just getting close to Christmas so I wanted to get something now, even if it's returned after Christmas.

Do you have feedback on this model or another that's around $80 with more features? I opened it last night to program it for my brother, and it worked quite well! I put in many of the local frequencies from cityfreq.com, and setup the weather alert. Thus far it's working great! I left it on last night scanning the local VFD frequencies for a while then the HAM frequencies, and it picked-up quite a bit of chatter. I even brought it to work today, and it picks-up all our handheld radios perfectly.

Like I said, if I find something else which can be bought locally with more features and at the same price I'll definately return this, but thus far it looks like it'll work great. I am no expert however, so please enighten me if I'm wrong or missing something. The only feature this doesn't have that I'd like to get is 800Mhz, but I've yet to find one of these for less then $150 -- which is way out of my pricerange. Have an awesome holiday season, and take care,

Ringo

I reviewed the DJ-X2000T (USA version) in June 2001 Monitoring Times.

I had fun with the limited range Flash Tune feature, but found
some drawbacks in the scanner I tested:

An annoying audio hiss was present even on the strongest of signals.
The 110 millisecond squelch tail noise at the end of each transmission
was too long and grew tough to listen to.

I measured the practical memory scan rate at a very slow 3 channels/second.

The DJ-X2000T is noew a few years old. Have you considered the newer
ICOM IC-R20? I reviewed one in November 2004 Monitoring Times.
The IC-R20 I tested required a better antenna for SW reception
below 30 MHz than the DJ-X2000T, but the IC-R20's scans memory at
16 channels/second and its feature set beats
the older DJ-X2000 in several areas.

Check out the Icom R-20 ...it can record 4 hours of audio. Looks like a
nice radio, long battery life and packed with features. Check out this
review..... http://www.ukmidlandscanner.co.uk/r20rev.htm

First, I very much appreciate your feedback on this.
How did the flash tune feature work for you? What is its limited range, and how sensitive did it seem to be?

>
>An annoying audio hiss was present even on the strongest of signals.

I understand that the "early" model X2000s had this hissing problem. I'm not sure, but I think I may have read somewhere that this hissing problem had been corrected to a degree on newer models. Have you heard any such tell?

>The 110 millisecond squelch tail noise at the end of each transmission
>was too long and grew tough to listen to.

I remember reading that as well. Primarily I am going to use this scanner for listening on known, more continuous frequencies ... as opposed to doing a lot of scanning for active frequencies. So in this instance, I could find it somewhat acceptable to deal with a slow scan rate and longer squelch tails.

Probably my main concern would be whether or not the hissing problem has been corrected, and just how well the flash tune feature works.

From my DJ-X2000T review in MT:

"...The "Flash Tune" feature is amazing.
Set the mode (e.g., AM, NFM, WFM), initiate the Flash Tune,
and the DJ-X2000T sits quietly until it detects a
strong signal (approx. -30 dBm, approx. 7100 uV)
within the 50 - 1300 MHz range.
At that point, the display changes shows the approximate
signal frequency and lets you hear the action.
You must set the mode (e.g., AM, NFM) ahead of time.
We used it to find and monitor 470 MHz transmissions
from someone using a walkie-talkie 25 feet away,
though it didn't detect a low power 170 MHz
wireless microphone at 5 feet."

"Our DJ-X2000T's Flash Tune also finds portable
cellular phone transmissions, but it displays 823 MHz
because the USA version is cellular disabled...."

> I understand that the "early" model X2000s had this hissing problem. I'm not sure,
> but I think I may have read somewhere that this hissing problem had been corrected to

http://baltimore.indymedia.org/newswire/display/9099/index.php

/ / Mr. Sattler, if you don't want US to arrest those
responsible for 9/11, don't you think we Americans
should kill you? \ \

/ / They got this plan, in it's final stages, just prior
to 9/11, to invade Afghanistan. They couldn't invade
Afghanistan, without some sort of attack occurring that
would instigate an actual war. they got this plan, and
it's all about accusing bin Laden for terrorist
activities, and they've spent a year or more working on
it, or more. And through all the time they put it
together, they never thought to include, one single
shred of evidence. Knowing already as Taliban
fundamentalists, through an experience that Mr. Clinton
had, it is their fundamental religion not to persecute
the innocent. \ \

Johnny Wizard

--

INTERVIEWER: Are you aware that this tank is
contaminated with radiation?

BUSHITE DUMFUK SOLDIER: No, it isn't radioactive.

INTERVIEWER: But we have measured it.

BUSHITE DUMFUK SOLDIER: No, it isn't radioactive, not
this tank.

--

/ / It said the TF 6-26, the designation for a special
operations task force in Iraq, did not make a record of the
medical treatment given the prisoner and ordered the DIA
debriefers out of the room. \ \

As Leader of the Free World, I will insure a multi-million
dollar payout, for each, still livng-now dead TF 6-26 member.

/ / "I'm not sure what this means. However, if this refers to
intell gathering, as I suspect, it suggests he [MILLER] has
continued to support interrogation strategies we not only

advised against, but questioned in terms of effectiveness,"
the email said. \ \

--

/ / Despite these concerns, the Bush Administration
continues to reject the recommendations of its auditors
that 15% of Halliburton's LOGCAP reimbursements be
withheld until the company can provide better
substantiation for its charges. \ \

/ / His mind was changed, however, when the true
intentions of Feeney became clear: the computer program
was going to be used to suppress the Democratic vote in
counties with large Democratic registrations. \ \

/ / San Juan, Puerto Rico -- Prisoners at the U.S.
detention centre in Guantanamo Bay, Cuba, have been
beaten while blindfolded and handcuffed, terrorized by
attack dogs and forced to take drugs, an Australian
detainee said in an affidavit released Thursday. \ \

/ / He stormed back over to the army psychiatrist, and
according to the witness I have, literally forced her,
browbeat her and intimidated the psychiatrist to change
her evaluation to read 'mentally unstable,' and ordered
her to ship Sergeant Ford medically out of the country
to receive a psychological evaluation in Germany. \ \

[KILL ENEMY] Captain Artiga

/ / One officer characterized conditions for the
[BUSHITE] wounded by saying, "They're being treated like
dogs." \ \

/ / This discrepancy is 3.5-times (350%) between the
number of wounded in combat listed by the military and
the number of service personnel medically evacuated from
Iraq for treatment in Germany! \ \

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to

fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff Sergeant Jimmy Massey, who is expected to testify that he and other soldiers shot more than 30 unarmed Iraqis, including women and a six-year-old child, at a U.S. military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in Falluja, as most fled the city before the U.S.-led operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't even bother to seek for an update on their "about 100", that had not ever been given. Red Cresent, the day previous to Dec. 6, no... actually reported on, Dec 3rd!, stated, (from their limited circle of reference) they had witnessed a minimum of many corpses, of completely innocent pro-Iraqi women, children, youths, and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri estimates that some 6,000 people have been killed, many of them civilians. \ \

(That is discounting murdered armed defenders of Freedom in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite enemies, thay'l' "bushite lie" to the bushite nation about the "holy" benefits of, sacrificing America's young life., all done for the glorious betterment of the traitor demon anti-Christ liar, the war criminal, Our Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral

attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop them from 35,000 feet, the whole pack of scum out of that jail."

Remember, these are the same prisoners that the Red Cross estimates 70 to 90% of them were innocent and later released. \ \

--

/ / It gets worse. We already knew about the Franklin County, Ohio, precinct that tallied 4,258 votes for Bush when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of Americans on 9/11, yet, will advocate fascism, to censor America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the conflict he began, was because Saddam wouldn't let the inspectors in. While, corporate nazi whores, refused to correct ourselves on our sacrifices, for they enjoy remaining impartial, when it comes to the crimes they inflict upon our humanity. Enemies to all humanity CBC and CNN are by refusing OUR facts to speak for themselves. No betterment could be garnered, by the demon anti-Christ's war crimes against civilization, WITHOUT DOUBT. And, it's only the enemies of our dumfukked and dimmer soldiers, in corporate mind control, who refuse to allow anyone to state THAT FACT, for, the enemy bushite would be exposed, and America would be hunting them down with the Law as the traitors to freedom they clearly are.

--

http://www.thealliancefordemocracy.org/html/eng/2180-AA.shtml

/ / "We cannot be the home of the thief and the land of the slave." \ \

--

> "Soldier you fuck, you tough guy, tough guy. You dumb ass. You know, why
> must you sacrifice your life? You know Bush and his fancy friends

have
> stolen all this money, and the newspapers don't tell you about it,
why do
> you think that is soldier grunt, nazi whore, dying slave?"

> http://la.indymedia.org/uploads/somebody.mp3

/ / Mr. bush is sending them into these military
conflicts, to create more hostility for them to die
over. So bush can rob ever more, from the undefended
American People left back home there, still, victimized
without repremand to those who ripped them off for their
pensions as example. \ \

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that
some in Canada, didn't agree with. Like for example
removing Saddam Hussein, and enforcing the demands of
the UN security council."

Saddam was not found in violation of 1441, so the war
criminal anti-Christ's demands were not our world's, nor
that of the UN Security Council. How does thieving our
assets, destroying our infrastructure, and
indiscriminately murdering more than a hundred thousand
innocent people, (in turn to sacrifice more worthless
bushite nazi teens) bring about their closer fraudster
bushite "Freedom"? Again, CNN, and CBC let the demon
liar spew his hatred of our liberties, without factually
challenging his lies with our un-debatable established
truths. CNN and CBC would "sell" seeing our dimmer
youths sacrificed as bushmob thieves through blatant
bushite lies, to truly, steal our freedoms and liberty
with further murders by proxy.

/ / .. or when [bush] just told you for no reason
possible, why American soldiers are DYING, "Saddam
wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels
of mercy, and hunt with Law to kill George W. Bush,
Rumsfeld, and Condoleeza Rice for the crimes committed
on 9/11. Just because the corporate T.V. doesn't
mention the facts to draw our own conclusions, doesn't

make it not so out of our realms of expertise
as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's
not too much to ask for our vote to count." \ \

security force guy who's honest, reliable and
dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I

cannot understand at all, why the US Army soldiers speak broken English!! \ \

/ / During the five days, while the count was yet conducted, more than three thousand wounded passed through our hospital. These were the people who lived nearby. The people who could be delivered to us. Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it was an Iraqi town with its regular for centuries Arabic life. Boling bazaars, noisy streets. And here I am going through the empty dead city, between the ugly "pyramids" of destroyed buildings, broken streets, whole quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar Nafaa, estimates that between 150 and 175 families are left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar Nafaa, "coordinator", should surely know, that it is 175 families that had requested for the help of Red Crescent totaled several days previous, (without phones, nor abilities to leave their homes (150?)), NOT, "left in the city". [THINK: how could they possibly know? (nazi bushite whores were ordered to murder innocents indiscriminately as enemies to God)] Also, is "Jotiar Nafaa", the same woman hater, who LIED in REUTER"S anonymous hand previously, as the Red Cross, that the women held illegally as hostages by the thieving evil nazi bushite forces, didn't really exist? (and who the "sovereign" Justice system of Iraq, along with World opinion, God, and JOHNNY had demanded to be let go for lack of any real criminal charges? (despite CNN and CBC WILLFULLY refusing to report on the issue as important. (You know, INNOCENT women held hostage by bushite goons who acquiesce COWARDLY for rapists and torturers? (Just like Jew killer Ariel Sharon never gets a fair mention by "America", nor Zarqawi, as he was in the second Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175 families stayed in Falluja after the start of the US-led offensive on 8 November \ \

The organization does not estimate the incorrect fantasy conclusion held by this pro-irrational Bush article from Aljazeera.NET. By god Johnny, where tell us could such lies begin at? Well, let's go investigate... If as it is, a misrepresentation of Red Crescent's actual findings, wouldn't you think "they" would put out a press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only

allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of

the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

--

http://news.independent.co.uk/low_res/story.jsp?story=586062&host=3&dir=506&dir=506&host=3

/ / The [Anti-terrorism] source added that the fact that the story of the 11 September-style plan came from lobby correspondents, rather than security or crime specialists, "gives you a good clue to where they got

their information".

[...] Barry Hugill, a spokesman for Liberty, the civil liberties organisation, said: "The timing and contents of this story look very, very suspicious indeed." \ \

Yah! Way to go! We're'a gonna hunt US down some enemy bushite in Britain with the Law of the land on this issue... If you guys need me from over there across the pond, just give me holler!

/ / He added: "Ten days ago Mr Blunkett announced that the intelligence services had thwarted a major al-Qa'ida plot, then added that that they might not be able to convict the people involved. \ \

It is Mr. Blunkett that shall be arrested for terrorist activities involving the said major al-Qa'ida plot, tried, then.. well, we'll let you Brits decide that end on your own part. Call me. Cheerio!

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people

are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

--

http://www.topplebush.com/article54_recpres.shtml

/ / Musil said the [rumsfeld's] Pentagon's effort to draw a distinction between the weapons was outrageous.

"It's Orwellian. They do not want the public to know. It's a lie," he said. \ \

--

/ / Hammad said he had seen elderly women carrying white flags shot by U.S. soldiers. ''Even the wounded people were killed. The Americans made announcements for people to come to one mosque if they wanted to leave Fallujah, and even the people who went there carrying white flags were killed.'' \ \

--

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that the media's adamant refusal to address the very real irregularities of the 2004 vote is a deliberate act of psychological warfare. [...]

"if the USA's honor can go along with these tactics . . . then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid' (fighter for the faith) derives, has always been, because of an anti-Islamic prejudice that dates from the Crusades, taken in the Christian West in a limited and restrictive sense. It is taken as a symbol of religious aggressiveness. This interpretation is rendered absurd by the very fact that Islam is tolerant, and the respect of religions, in particular Judaism and Christianity, is one of its fundamental precepts, something which, in fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task Americans can perform to restore progressive priorities and our respect in the world. We have passed the point for graceful exit strategies. Our policy is to go on mechanically killing people unless they vote in January

for us to keep on killing people. \ \

/ / Ohio Secretary of State Ken Blackwell, a Republican,
issued a directive to election officials to turn away
such voters if they arrived at the polls to cast regular
ballots. \ \

TREASON.

--

/ / UN officials, at U.S. request, placed a curtain
over a tapestry of Picasso's Guernica, located at the
entrance to the Security Council chambers. As a TV
backdrop, the anti-war mural would contradict the
Secretary of State's case for war in Iraq. \ \

/ / In August, US National Guardsmen discovered and
sought to stop the torture of detainees in a Baghdad
prison by Allawi's new interior ministry police, but
were ordered by US commanders to leave the victims in
the hands of their tormentors. \ \

--

/ / The leak about the money and the rigged election
apparently came from technicians who were promised to be
paid a certain amount for their work but the Bush
campaign interlocutors reneged and some of the
technicians are revealing the nature of the vote rigging
program. \ \

Yawn. Yet another act of high treason by the enemy
bushite, that should warrant prosecution under American
law, but look!, CNN and CBC couldn't care less about the
legitimacy of US elections, or our freedoms and the
irrational sacrifices of life made by cowardly and
soulless teen-age disciples of the true enemy evil
anti-Christ. Why bother to arrest those who committed
MASSIVE fraud during the election, the crime is over,
and corporate amerikkka have already declared themselves

our enemies of freedom, as committed, to kill, or have killed, America for stolen gains without virtue. Besides, what is such a charge in amerka know-a-daze?, "fifth degree felony"? Why even bother. Reading is for the stupid people, and math is even quackier, har har.

--

/ / I retired in 1999 as a lieutenant colonel with 30 years total service. I am now also a 60% disabled vet due to combat wounds which have worsened over the years.

At the same time my day job was as a police officer. I served 26 years with the Tulsa PD, working uniform, plain clothes, SWAT, bomb squad and finally as a police helicopter pilot for 3600 hours of flight time. I received the department's Medal of Valor, two Chief's Medals, and the Department Commendation Medal. Not exactly the profile of a terrorist suspect, eh?

My sin, evidently, was using the First Amendment. \ \

/ / Mr. bush is sending them into these military conflicts, to create more hostility for them to die over. So bush can rob ever more, from the undefended American People left back home there, still, victimized without repremand to those who ripped them off for their pensions as example. \ \

Dream job. The future now looks like something worth fighting for. Please, pass this recording to our news agencies. I do not have the ability to do this job of ours all by myself, I need Your help. Please do US this small favor, and I'm sure this Universe will thank you for it. Word on high is, "Dream-Job", is the doorway to miracles. Wow! The beginning has begun!

Love and kisses,

Johnny Wizard

--

/ / It wasn't enough to force a surrender and have The
Ba'athists cooperate with the Coalition. Israel demanded
that everyone in power who ever thought anti-Israel thoughts
must be removed, even though the resulting chaos has cost
untold lives and billions of dollars. \ \

--

God is Great

A person accused in our name(s) of a criminal offence,
needs to be established somehow to be as such, and the
only way to do that, is to present evidence that formed
your/our conclusion. Without evidence our accused is
ourselves as the innocent, being falsely imprisoned,
tortured, or murdered. Murdered, as the Allawi and the
bushite nazi forces did to our friends and family in
Falluja, to please the demon liar, lawless George Bush
Jr. as their central thief system of dishonor and
betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without
evidence needed to form a conclusion, or when he just
told you for no reason possible, why American soldiers
are DYING, "Saddam wouldn't let inspectors in", the
bushmob thieves plundered in our "lost" confusion. All
the while bush always seeking to close America's
on-going criminal investigations, by causing even more
have nots among US. So, as a free person, to side for
the, bush wars America, God, and Johnny issue, you would
seek out to find for Yourself beholding likewise as We
all are: bush is actually super fuking evil, like
personified or incarnate even, and Johnny's almost like
a stranger Messianic figure who just wants to be known
as a semi-normal average GUY/god fellow. (Sheesh.. We
gotta bring ourselves everywhere we go) I "hate" bush
for being so not himself stupid to think there was no
actual walking, talking, godly Persons from the
outer-reaches coming in to get him for the crimes he has
committed ourselves to. Corporate news dictate without
a human presence, doesn't rule this world of
communication, we do. (Jesus wasn't buying Satan's
misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE

RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we want to live in a freedom bound for glory, not a hell hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with 9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not

where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will, guaranteed, freak you out. REMEMBER: Mr. bush Jr. should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in

Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America who blindly targets our residential communities to enrich the UN-AMERICAN demon anti-Christ bushite thieves further? That, as bushite nazi grunt, they die for? Paleeze.

America is dying to prosper their false-deity war criminal demon anti-Christ, Our Mr. bush Jr, the same responsible for the nine eleven travesty, who attempts escape only through fascist americans who willfully betray America by condoning the furthering of bushite censorship for tyranny. Is America the cesspool of

corruption and greed, without a People person present willing to make a stand for God and Country? BUSH IS EVIL. Let's arrest'em, or kill'em for committing high treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this universe over, I am proclaiming, a war against the liar George Bush Jr., the vilest contempt for mankind this World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because Saddam wouldn't let inspectors in; the media has treated this as not really a lie because it's so obviously untrue. \ \

America is a coming to kill the truly evil George Bush Jr.,

Johnny Wizard

--

The King Commands

/ / Rumsfeld replied to a direct question yesterday as to whether he knew Zarqawi was in Fallujah with the answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's sons and daughters, Johnny's brothers and sisters. "No idea" rumsfeld states while his private partners cash in the blood checks for everything but the funeral services. I ask sacrificing soldiers to help grant me space to debate bush and rumsfeld on international radio. We gotta take away Art Bell's turn off button to thank him for all the enlightenment he has been a part of in America, but that these life death top priority issues of ours, he hasn't the right to censor communication on. This is your World that I wish to play servant of. As my subject; I promise a fight to return Justice through freedom for all. How? By believing in you to do as you should, demanding the immediate arrest or execution of bush, rumsfeld, and condi for the crimes of 9/11. Demanding the return of all stolen Iraqi assets, made by those who personally profited off the criminal transactions. Demand the arrest or execution of Allawi for the bombing campaign of Samara, along with bushite military commanders who organized the satanic attack. Why would America do this? To free the dying lives of their bushite nazi whored, dying grunt savage slave population. .or perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas: ``We're ready to go. I'm just ready to get this done. I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is

that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't

want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of

Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three

or more, before December 25th, there will be an extra
something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll
ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while
sacrificing weak and stupid American teens in the
process,)

See? Evil bushite kill "other" bushite to steal our
freedoms and money, and US true freedom fighters would
kill'em too to defend our innocent families. Like I
said, un-principled nazi facist savages is the
un-American enemy bushite without contention but for
lifeless corporate censorship on our core values.
Demand our voices be heard, or die not trying to do any
greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some
enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme
measures to protect the Iraqi people from these killers
and to liberate residents of Fallujah so they can return
to their homes." \ \

American Patriot Warriors, kill Allawi as our number
one, Iraqi People killer. Thanks in advance my friend.

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth
degree felony things?

--

/ / Despite this, the Bush administration denies any
responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to rob the pro-Iraqi central bank. It's just more American deaths as dumfuk sacrifices for the evil anti-Christ, like bush and rumsfeld committed as stolen from America on 9/11. Who cares about America Limbaugh would quietly trumpet, he's making a killing like Art Bell and O'Reilly do, keeping US masses PORTRAYED uninformed and ignorant beyond belief. Did you hear? Mr. bush is the most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out

irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr. bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over

billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the first time to the Al-Qaqaa story, President Bush said that John Kerry, in using the story as he has, was ``denigrating the actions of our troops and commanders in the field.'' \ \

It was the actions of rummy and franks, not the mindlessly obeying war crime instigators as iliterately

truly stupidly dying bushite dumfuk nazi grunt teen
soldiers.

--

/ / How many more thousands will have to die before God
will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons of (now missing) explosives "was not high on U.S. commanders' list of sites to guard." What was high on that list? Spokesman Scott McClellan said we had to "make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and kids and our young American forces are being shot at from weapons stolen from the ammo dumps that this president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction funds distributed by the U.S.-managed Development Fund for Iraq cannot be accounted for, according to an audit commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the tanks rolled, for imposing a new regime of low taxes on big business, and quick sales of Iraq's banks and bridges-in fact, "ALL state enterprises"-to foreign operators. \ \

Big deal. To the war mongering mass murdering thieves go the stolen spoils., as the bushite's devolving american new century would say.

/ / The American public is told that this butchery is part of keeping up pressure in the war on terror. All these terrorist brides and grooms and terrorist kids rushing round in party clothes ; all the terrorist musicians and the terrorist wedding guests, by God, they have to pay for 9/11 because (as millions of Americans still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the vast majority of those believe Saddam Hussein was behind the Sept. 11 terrorist attacks, and that freedom by justice through understanding is too complicated and wordy, ...yeah. and so corproate news control is lying to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and

practically defenseless as betrayers to God, freedom
and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes,
but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts.
Leaderless degenerates that any real human would destroy
to protect their innocent families. Innocent families
the bushite bombers commanding from Florida murder for
no good reason but get more soulless bushite teens
rightly killed, all done so to put more stolen money in
the pockets of their ungodly satanic cult. Solution:
hunt to kill those left un-arrested who willfully,
criminally, ordered the needless bombing of Samara to
get killed the bushite grunts for the further thievings
of the bush backer traitors who bask in your stolen
expenses.

Support calls for open dialog.

-

> More of the same garbage! Your comments don't even make coherent
sense!
>

Read up on the "ORHA", from the leading newspapers of our time,
then make up your own mind, on who is paying instead for franks'
"unsolved" crime(s).

100 Facts and 1 Opinion
The Non-Arguable Case Against the Bush Administration
<<http://www.thenation.com/doc.mhtml%3Fi=20041108&s=facts>>

/ / 67. The Bush Administration blocked a proposal
to ban the use of arsenic-treated lumber in playground
equipment, even though it conceded it posed a danger to
children. \ \

-

An open letter to the news media of America by the webmaster of
WhatReallyHappened

http://www.whatreallyhappened.com/let2ed.html

/ / And that is why I don't believe the headline that
voters are split evenly between Bush and Kerry.
It is just too fantastic. \ \

-

The End of Evil?

Hey! Art Bell! I recorded our conversation yesterday!!! Now, many people may not know, but Art Bell purposefully with malicious intent, lies to America when he states, he doesn't censor America's voices for Freedom. The first of THREE calls I made to Art Bell yesterday within his first break, was on the topic of polls. He asked myself between the first break, - off air -, what was it that I wished to talk about? I told him, I recently discovered that the opinion polls done in America by CNN are tabulated by firstly insuring half polled are known bush supporters, and half are known Kerry supporters. But by doing so in such fashion, 99.9 percent of America could be unapproving of Kerry's politics, but Americans who trust the media's intelligence would never know of it. He abruptly hung up on me. I called back. Recorded. (My fricken modem program didn't start immediately so I had to stall.) I said something like "Yeah, it's me again Art, I don't know weather you hanged up on me, but I just spoke to five seconds ago about that poll idea, what do you think?

R E C O R D E D
http://la.indymedia.org/news/2004/10/118109.php

Art Bell "You'll have to find another phone line"

[He didn't explain why the West of the Rockies line was not in service [of which he ended using twice publicly in the following call-in segment]]

Johnny "Okay.. what did you think of the poll idea though?, did you think it'll work?"

Art Bell " YEAH, YEAH, COOL".

snpd

a dream come true, depending on your views,

Pleased for thanks and listening,
over and out willco,

Johnny Wizard

-

Treason this is.

/ / The 46-page report argued that Pentagon assertions of a link between al Qaeda and Iraq's President Saddam Hussein were not supported by intelligence reports on which they were purportedly based. \ \

Treason this is.

-

/ / As for who in Iraq warrants comparison with the
political leadership of Nazi Germany and its policies of
reprisal and collective punishment in occupied Europe,
it is the American ruling elite, not the resistance
fighters of Fallujah. \ \

/ / In the ultimate Orwellian twist, they were turned
into "unpersons"; even their names were withheld from
the media. Any president who endorses such atrocities,
as Bush has repeatedly done in speeches, is against
everything that America purports to stands for. \ \

/ / If this is the way the majority feels, then
suppressing the realities of Iraq serves only to deprive
the American public of the real facts enabling our
government to ignore the will of the people. This is
not conducive to a truly safe, secure and free society. \ \

> 109 Italian Soldiers Dead So Far From DU In Iraq
> <<http://rense.com/general58/frff.htm>>
>
> / / denying the significance of such data is purely
> acting out of ill faith, and the truth is that our
> soldiers are dying out there due to a lack of adequate
> protection against depleted uranium". \ \

The Last Straw - Carl Worden Makes His Vote Official
<<http://www.sierratimes.com/04/10/20/carlworden.htm>>

/ / What I do know is that any party that would find
the words, "Protect Our Civil Liberties" offensive or
even threatening, is a party I won't belong to anymore. \ \

-

For What Other Hope?

/ / The military insisted it hit targets linked to
Al-Qaeda operative Abu Mussab al-Zarqawi, Iraq's most
wanted man, who has claimed responsibility for a series
of car-bombings and hostage-takings in the country. \ \

All true American soldiers must stand against this "the
military" person, and kill it. Allawi, has already put
forward that he doesn't have, nor has he seen one shred
of information linking Zarqawi to his false, untrue,
wrong accusations regarding an entire city he leaves us
unconvinced for blame by bombing. It seems I will now
be taking command of the entire American Military for
this one time defensive operation. Insist evidence be
made forthright, and kill these anonymous un-arrested

"the military" person(s) along with anti-Iraqi Allawi. Then, we hunt down and arrest or kill those responsible for ordering the needless bombing of the Samara citizenry. See?, the ungodly and tyrannical bombing of the good people of Samara, brought about now approaching more than one worth acknowledging DESERVED deaths of the ungodly bushite teens, the bushite teens who didn't need to die thoughtlessly for the bushmob. Think: Any real man would kill an enemy bushite to save the lives of the innocent they admittingly target for plunder to please the neo-con God haters. The bushite soldiers that are now commanded to die sacrificed in Samara, will die directly from the instigated criminal bombing assault against our good friends, the Iraqis, bombed irrationally by the ungodly, unwise, and seriously un-American evil anti-Christ disiples, John Batiste, and the self confessed Iraqi People killer, Allawi. Allawi blames a city, Johnny blames Allawi. Kill un-arrested Allawi, and we'll save some GI's lives in the process of winning this battle against the dark evil forces of blind and stupid tyranny.

I, a man of many masks, beg again asking you to help me gain our talk radio access. America truly needs you, and so do I. Art Bell forbids America to hear our calls for Justice. The bushite fraudsters fear of me is that I actually understand regressive tax policy, and the judicial principles enshrined indivisibly within the holy American Constitution.

snpd

Believe in yourself, for what other hope do I have?

Johnny Wizard

-

<<http://www.wsws.org/articles/2004/oct2004/iraq-o20.shtml>>

/ / a meagre $2 million has gone to healthcare, $19 million to water projects and sanitation and $300 million to rebuilding of the electrical system. \ \

-

Do We See A Pattern Here?
<<http://rense.com/general58/pattern.htm>>

-

<<http://911review.org/Wiki/StanleyHiltonLawsuit.shtml>>

-

These following bushite terrorists kidnapping Americans, look the most so far like the likely secret Zarqawi gang, no? Maybe, someone should ask bremer if he has ever had words with the bushite group, "Custer Battles"?

/ / When Isakson objected to the scams, two unnamed "top company officials" burst into his office with machine guns, \ \

-

Who is Hamad Hamoud?

/ / It turns out that the ``major victory'' over the Iraqi resistance consisted of American forces blasting away indiscriminately in Samarra's city center, killing innocent men, women and children, damaging property and buildings-including a mosque and a kindergarten-and further enraging the local population.

The Samarra incident in its various aspects-the battle itself, the military's claims, the media's role-is a microcosm of the US occupation of Iraq. \ \

Exactly. Prior to this most recent war crime against Samarra, there had been dialog to allow bushite thieving troops in without dropping bombs indiscriminately to murder our friends, (and then to get killed the evil bushite in rightly retaliation). Those who ordered the NEEDLESS bombing campaign (who I advocate the open public execution of) didn't like that prospect of saving GI lives to lose money for the bush junta though, and, Zarqawi, my god, going on about how he wasn't interested in freeing the Iraqi people from tyranny didn't help the bushite anti-Christ cause much neither, especially with Bigley still hanging on alive. (Oh yeah, killing Bigley sure suited the women haters bush and blair just there eh?) Killing un-arrested bushite, (who fight for rapists and torturers who thieve from America, while attempting to censor our voices calling for real Justice,) is the best anyone can do fighting for true freedom. Kill an irrational censoring fascist bushite, and you've saved the potential lives of millions of innocent American people. Innocent people the bushite nazi soldier freely confesses to targeting to profit the corporate bushmob back home who continues to rob from the nation because of it.

Witness this pro-bushite Knight Ridder article, of which, if I were "officially" recognized, would demand swift and immediate public accountability.

/ / Some noted that while tribal leaders in Samarra sought government assistance to rid the city of

insurgents, leaders in places such as Fallujah have been more supportive of the guerrillas. \ \

Some noted? Who? The head of Sammara's political affiliations, comprised of more the 100 separate poltical groups, in Samarra, asked that no killing of innocent women and children was needed, for, the "pro-Iraqi forces" would be allowed to come in if they obeyed themselves. (Like as if any Samarrian would ask for help by attacking residential communities blindly as the evil bushite almost always without exception do.) But no, they go in recklessly bombing, raping and pillaging, shooting innocent women, men and children, then tell 1200 or so soldiers to sit in the middle, and stay put, indefinitely, and Knight Ridder tells US all how john batiste, a Frenchman, made such a successful go at it. Is john batiste going to sit with the loyal troops in the carnage he ordered, and bite the bullets for the team? Hell no, he's probably commanding from Florida, basking in the sun with his personal cut of that two billion with buford blount's two timing nazi whore of a wife.

Hmmm funny..

snpd [forgivness only comes if one truly understands enough to ask.]

/ / The U.S. troops made only limited use of aerial bombardment and artillery, Batiste said. That limited civilian casualties and damage to city buildings. \ \

An admission that the thieving bushite dumfuks target for murder us innocent people, and have so far figured, that by not committing as many "precision strikes" with guess work or anonymous tips, they wont anger so many?.. I think they may be a little late for that considering when they arrived, (like they did every time), they needlessly still murdered unarmed, innocent, defenseless whomevers for whatever. Remember: there was no need to bomb or shoot any innocent people, for the terms negotiated with Allawi were to enter AS THIEVES without any bombing needed. Will john batiste tell us the lawless rapists, torturers, and apartide death squad goons he fights our Humanity with, bombed less Iraqis in hopes to anger less Iraqis?, and if so, why not give up on the bombing innocent pro-Iraqi part all together?, then also the raping, torturing, and pillaging part by tracking down the actual criminals while we're at it? John? No, can't do that, for those who ordered the needless bombing runs over Samarra would be tried publicly, then shot dead by surviving Patriot American

Warriors, and that demon traitor, Our Mr. bush Jr. with rummy, would meet the same fate for the crimes of 9/11 back in New York City. And of course, the Iraqis would get back everything that was stolen from them with massive interest paid for by those personally responsible.

The bushite bombing commanders figure, lie to the entire first division about the true threat levels, their weak minded dumfuks anyway, they can't stand up proudly for their commitment to real freedom and democracy, instead they'll fall rightly dead and nobody'll hear to care anyway. Mr. bremer's double crosser "Zarqari" will get'em if need be, again. Could be. I watched "Who wants to be a Millionaire", a TV program in America, and the contestant was a Mr. Sheriff (who had just given up religion and joined the Israeli faith to continually thief), he was in the first Gulf War, and now, his own flesh and blood brother was serving for the bushite neo-cons to rob even more from America through Iraq in this second blast. The entire audience questioned uncomfortably his answer that he had no idea who cheney is. I kid you not. You can be sure that episode won't be running in syndication. As a dumfuk bushite nazi grunt, dying of radio-active contamination, does he have any real care for his likely now dying too or already dead as forsaken brother? I doubt it. Godless nazi bushite are as stupid as they are evil disciples of the demon anti-Christ: the most hated and reprehensible illiterate savages as so well documented in the lights of Man. Ten cents for every bushite bagged and tagged, ten cents. Twenty billion if you can magically teach them real quickly, to understand honor, virtue, heroism, and the meanings of the American Constitution.

/ / If their political goal is to have all the major cities full of people that really, really hate the Americans, then is this really a victory?" Cole said. \ \

Well of course! As parasites led by the wims of a, behind the scene bombing campainer, the bushites die cowardly for the billioniare bushmob to profit robbing from the folks back home left un-defended.

/ / Some Samarra residents and a major organization of Sunni clerics have condemned the attack, and even the province's governor, who appeared with Batiste at a news conference Wednesday, said he was shocked and surprised by the operation. \ \

See how the writer(s) of this news wire claim that those who didn't support such lawlessness are only some?

You'd figure, since the news piece repeatedly refers to the wanting of such barbaric attacks, it would at least site one legitimate quote.. instead it pulled this...

/ / "We didn't have any intention to take war actions. We were always hoping for peace," said Hamad Hamoud, governor of Salahuddin province. The insurgents, he said, ultimately left the Iraqi government no alternative. \ \

Governor of Salahuddin province, who hasn't been quoted for anything in the world, except for this that he wasn't. And besides, from what I understand, Salahuddin are provinces, not a province. Or perhaps Knight Ridder is referring to the governor of Salahuddin, a teensy tiny ghost town in Kurdistan? Regardless, this Hamad Hamoud must be a huge nobody then, and the best the bushites could get to float their patently false story line that leads to the untimely death for Americans. Sacrificed for the anti-Christ. But, I digress.

Listen: Is a man who would kill an un-arrested bushite rapist, or kill an apartheid death squad racist who murders only black people because their darker skinned, or who joyously kills a bushite sniper, (a sniper that freely confesses to shooting innocent women, men, and children,) classified as an "insurgent" by the uniformed enemy anti-Iraqi forces I ask? Art Bell, the nazi censor, and his propagandizing bushmob ilk, is America's true enemy. Free speech must be spoken for, for the bushites of Talk Radio america, don't want dying America to think as a free America to speak on the top priorities of Your true survival. Use it, or lose it.

Johnny Wizard

-

/ / He described meeting an old man who was forced to watch his sons being tortured until he signed a confession admitting links to Osama bin Laden. "Tears were streaming down his face. I have no doubt they had as much connection with bin Laden as I do." \ \

-

/ / Yet when Sen. John Edwards led CNN's debate poll Tuesday night, the Time Warner network abruptly yanked it from their front, only to replace it 13 hours later with a blank poll. Edwards had been leading in the first poll 78-18.

Some 200,000 previous responses to the poll were deleted when the new poll was posted. \ \

The corporate news polls are a crock. Look at the literate world of Internet content. 99.9% hate the evil bushite lies that sacrifice American lives to profit the criminal bushmob fraudsters. As I've told many, CNN and CBC execs know bush and rummy committed 9/11. Why? Becasue I've told them so, if they would seek to ask for only the facts to decide for ourselves.

General Ahmad funded Atta.

-

/ / "I don't want to die. I don't deserve it. And neither do the women deserve to be in prison in Iraq. Release the female prisoners that are held in Iraqi prisons. Please help them. \ \

/ / Iraq's justice minister announced Tuesday night that Rihab Taha, the female scientist known as "Dr. Germ," would be released from prison. \ \

/ / But then the U.S. Embassy said Taha and Huda Ammash, known as Mrs. Anthrax, would remain in U.S. custody for the foreseeable future. \ \

/ / Straw added: "At no stage did they abandon their demands relating to the release of women prisoners, even though they were fully aware there are no women prisoners in our custody in Iraq." \ \

/ / ..one air strike had killed eight people at the home of Hamad Hdaib Mohammedi, who was known for his opposition to the militants. \ \

-

BE AMERICAN

/ / Early reports said a U.S. convoy was passing by the celebration when the attack occurred. The U.S. military said later that American soldiers were taking part in the celebration but that no convoy was passing through the area. \ \

Yeah?.. but what about the comments made by the bushite child killer phil smith? Maybe he'll tell us again why innocent children were targeted for murder to get rightly killed loyal enemy bushite nazi brethren? Since phil smith isn't cogent as the godless, what can he know of his true meaning? What is phil smith's America where innocent children are murdered for his contempt of the America we remember? Is it honorable service where the

leadership of the US military feels it is right to lie to fellow troops about what they are dying for as "THIEVES for bush"? Is it the conduct of a honorable creed to steal from US honest hard workers?, to indiscriminately bomb civilians with guess work and secret paid informants while calling themselves dis-honorably in Your name pro-Iraqi? They are not men, for they can not stand proud on their false convictions, instead, they lie as cowardly traitors to the American cause. Is it the conduct of a brave crew of patriot freedom fighting warriors serving a just cause to bomb a city to teach our God something? Or is it my friends, the conduct of fascist enemy bushite nazi vermin led to die for not so secret criminal transgressions? A war mismanaged purposefully to benefit off the sacrifices of American soldier's lives, dying or being maimed to give in to lying criminal fraudsters that OPENLY rob from all American families like tommy franks did?, robbing the principles of Justice once thought respected, and only expected in the true land of the brave and free? If you were face to face with a mass murdering bushite cluster dud land mine dropper who attacked residential school districts, would You not, kill it for the begged mercy of God and children everywhere? What we ideally need to do is, find who has been responsible for ordering the indiscriminate bombing campaigns, and kill them openly, rightly, publicly, for all our World to see. Killing the NOT HIDDEN enemy bushite is the best any human can do for the survival of our species. When you see the bushite, spewing their hatred for humanity while censoring the voices of reason and freedom, justice and liberty, do US all a great big favor and kill the nazi fuck for the love of yourself, God and country, please.

/ / It added: "Unimpeded access throughout the city for Iraqi security forces and multi-national forces is non-negotiable." \ \

IT ADDED? Er, sorry enemy of humanity bushite dumfuks. US men out here, hunt to kill un-arrested bushite rapists, torturers and thieves that hide behind the stolen American uniform as ungodly enemy savages. Third Infantry for example: No American present. For if there were, Saudi Wahabbi child killer buford blount would be dead at the hands of US pro-Iraqis for TREASON. The slave bushite die as godless fascist cowards who target US as the innocent to die themselves for benefitting the further thieving of America, The People, back home they leave left unguarded. General Ahmad funded the mastermind 9/11 ring leader Atta. I HATE bushite. Killing un-arrested bushite is what all real

men of America should get started on, like with firstly, George W. Bush Jr., condi and rumsfeld for 9/11. Then we need to make some demands of the corporatist censors who deny our Humanity free access to the substantiated impartial facts that stand irrespective of ideology or spin doctoring. Plutonium in depleting uranium is scientifically bad for your health without question, for we do understand the measured effects of radio-active contamination. How can "our" corporate news media continue to ignore Our growing concerns on the subjects of Your dying freedom and liberty my friend? "They" can't. America's multi-millionaire corporate news producers need to be made accountable, when it comes to the refusal to allow public reporting that INNOCENT women and children are being held hostage in our names, and in some cases photographed raped or murdered by the still, un-arrested ungodly enemy bushite nazi evil forces. ENEMY!

/ / London - The International Committee of the Red Cross insisted on Friday that Britain does not hold any women prisoners in Iraq, and said it was ready to act as a mediator to help free British hostage Kenneth Bigley. \ \

The Red Cross said what? No mention of the two innocent "Sisters" held hostage? Who does the Red Cross serve on the issue of our human rights? Can they not be aware of statements reported widely on the specific issue of Bigley's commentary? Surely they do us a disservice when portraying ourselves otherwise by claiming Britain isn't involved in the criminal plunder of Iraq at all our vital expenses? Have they not seen, nor heard the big news about innocent Iraqi women held hostage by the terrorists? Should they not be demanding blair speak up for the human rights of innocent People being victimized by Humanity's mutual enemy, war criminal George W. Bush Jr.. and his mindless minions of dying godless barbaric savages?

/ / He repeated the kidnappers' demands that the US release all women from Iraqi jails. "Have some compassion for the [INNOCENT] female prisoners," \ \

/ / Blair pledges 'If kidnappers get in touch, we'll respond' \ \

As for the innocent women held against their will by the bushite terrorists, no negotiations for US by this "politician" of a "Democracy". He'll just pretend that he hadn't heard of the request, for the corporate media hasn't reported, therefor, he'll plead, implausible deniability. (Again, who's conning who here?)

The two innocent women were planned for release prior to the Zarqawi hostage taking according to Justice officials in the Iraqi government. Things that make you go hmmmm...

/ / Britain's foreign secretary, Jack Straw, said today that Britain will not meet any political demands to secure Bigley's release. \ \

Now they figure releasing the innocent women would be giving into still the just demands of the sovereign Iraq? Or, will they argue, persecuting the innocent is what the enemy bushite do to steal our human values of virtue and the American ideal? Stealing our Freedoms and Democracy? Again, bushite is the enemy of America, kill it.

/ / Iraq's [bushite] National Security Minister Kasim Daoud told a news conference in Baghdad that the offensive was launched in response to a call for help from Samarra's residents to tackle the insurgents in their midst. \ \

/ / "We were in talks with Prime Minister Iyad Allawi about the situation in Samarra, including reaching an agreement to allow Iraqi forces to enter the city. We were surprised by this military offensive," said Khaled Naji al-Samarrai. \ \

Khaled is leader of Samarra's political association.

/ / ...said [bushite] Daoud. "Even if they didn't ask us, we would have still gone into the city." \ \

Surprised? Hardly. The closer we get to saving American GI lives, and saving the lives of our children, the more likely the bushite's false deity G.W. will be arrested for mass murder on nine-eleven, and bush bitch Saudi wahabbi buford for all the needless subsequent murder rampages against our forsaken civilization. Do me and humanity a favor, kill the bushite traitors who steal our lives from Justice for enslavement of our human species through blatantly evil corporatist fascist tyranny. What kind of ungodly reality is bush taking US for where evidence is no longer a requirement to convince US who is evil? A criminal? The evil bushite bombers use "guess work" and paid informants to decide what neighborhood to indiscriminately bomb as targeted killings, while the rich corporate TV news celebs state how they're all so proud of what American soldiers are blindly dying for as. I say nah, bad idea, instead, we hunt to kill the self confessed rapists and torturers for the beginners.. Now, who's with me as a true Christ

like Patriot God Warrior?..

Join me, I seek bushite then I destroy it for the love
of God has no challenger.

Why Samara?

* Battle Of Samara - 7 Helicopters Downed, 147 Troops Killed
*
<<http://iraqwar.mirror-world.ru/tiki-read_article.php?articleId=25148>>

"Zarqawi" killed Berg in a building identical to Abu
Graib, now he's been reported to have made a slight
correction about mistakenly asking for the falsely
imprisoned to be set free. No no... he didn't mean
those women who are held against their wills without
evidence regarding any alleged criminal impropriety, who
are being held by child rapists and torturers. Zarqawi
actually meant, those women who nobody knows of, except
perhaps rummy who stated the Red Cross shouldn't be
co-operated with when we're talking Our human rights and
the falsely imprisoned. [LIKELY REASON WHY Samara was
NEEDLESSLY attacked. Who commanded the NOT NEEDED
attack in attempt to take US off the true criminal's
path? For, that would likely be the "surprise" American
GI terrorist killer in the flesh holding America's
children hostage.] Then, Zarqawi went on about leverage
with "Jews" and the "Crusaders", but, Arabs ain't so
dumb, nor is Arab TV actually. There was a large Arab
Jewish and Christian community who despised areil sharon
as an enemy of G-D in secularist Iraq from the start
before the fundamentalist bushite war crimes began
there, and the Islamic faith holds the eternal Son of
Man, Johnny Wizard in Holy god respect. Remember I
represent the freedom and wisdom granted by Allah to
Humanity through Jesus as Savior Hillel taught US all
about oh so many moons ago: namely, to worship and love
all things that God made. But alas, the illiterate nazi
bushite are dumfuk slaves as enemies to freedom, and as
consequence, don't think for themselves, or much about
my true significance in this World of US gods suffering
under their evil as criminal misconduct inflicting
suffering misfortunes against our God's good graces.
Being the goodie two shoe Creator has it's
misconceptions let me all tell you. I have to deal with
contending with the primed to die satanic bushite who
tinks I as a Christ wanna be stick figure or something
similar, am going to hang lifeless on a cross somewhere
and just take their abuse forever crying for a God who
never wrote the book on Sacrifice. Shhh... [The commi
bushites are as fukin stoopid, as they are truly evil as

enemies of life and this Universe.. So evil are the bushite, that they give even the Devil a bad name.]

/ / Witnesses said the American troops were offering candy to the children and were preparing to leave when the bombers attacked. \ \

So, the soldiers were there for the festivities, handing out cheap candies, taking credit for the plant rummy likely bombed then left these "soldiers" to have credited to re-built back up by themselves. [Don't want to be over paying Iraqis with their own stolen money right?] If true, it would be something to write home about, but have you heard of all the work GIs have done in attempting to repair all the damage they've criminally instigated against our innocent families? No you haven't because, for then we would be demanding a return of all stolen assets, and the arrest or public execution of the bushite torturers and rapists. Also, who handled the military contract? Imagine this: Halliburton is paid billions in overhead to hire the American government to take back over. Sounds somewhat familiar where military fuel shipments are bought then escorted by the professional military fuel transport units, but no ones asks, why should Halliburton off shore tax exempt billionaires, all of a sudden, now, out a nowhere, be allowed middle ground to almost take all the cash expenses?, from America's America?, especially since America is still doing all the paying for all the work being done regardless like they use to before Halliburton magically appeared in between? [The only thing Halliburton execs want is to be left alone in a mansion far away from conflict with the American tax payer paper work to do that they confess publicly to not having the resources to accomplish fairly!!! [TIGER TEAM]] Do the soldiers transporting the fuel now even wear COMMI Halliburton caps instead of helmets? Likely.. because they're so fuking weak and stupid as fascist nazi bushite grunts who die as enemies to God and Creation by forsaking the America I know of as once respected as universally truly admired. The bushite trash the Bill of Rights by saying it's no longer needed when fighting against US People. Then they demand that no evidence be used in reaching their guilty verdicts by Your american firing squads. Again, get your gun soldier and instead, kill un-arrested traitor, George W. Bush Jr. for America as a true Patriot only would. Or, why don't You bag US a proud enemy bushite for the Gipper?!? For what pleasure could be greater, than doing our Humanity and God such a great favor? I mean come on, they as our enemies, war the defenseless and

innocent fighting with rapists and torturers without shame or apology, while demanding by threat of murder to US innocent, we all must slave as loyal bushite soldiers do, like they have no mind to believe in freedom. Liberty or Death? More like hunt to kill mindless bushite nazi vermin and save the precious lives of countless innocent others that they murder by dropping bombs from our sky. We know who the boastful and proud bushite is, who is granted full talk radio media access in corporate america to trumpet the sacrifice of American teens to please their deity, George W. Bush Jr. and his war mongering thieves, who profit off mass murders and over billing like they did at 9/11 in New York City. The bushite slave is the enemy of themselves to life, love, and God.

Back to the story: Like if "anti-Iraqis" planted a bomb, or we're driving cars, wouldn't they use it to kill enemy bushite nazi dumfuks before innocent children? It is the bushite nazi forces who target the same locations repeatedly to kill only good honest hard working innocent pro-Iraqis trying to save the lives of their loved ones... or who have demanded a free press and democratic elections. But look, the corporatist press takes the credit in condemning the murder of children, but they don't call for the head of buford, mattis, russell or vacant minded phil smith? Nor, speak for ourselves when American paid for anti-Semitic invading Israeli nazi soldiers from tanks, shoot innocent Christian children as all of our life's enemies? A happy, waving goodbye child was shot dead from behind in front of UN workers by bigoted racist truly evil demonic Israeli nazi forces, and Annan never spoke a reported word for our Humanity, or against the condoned crimes of Jew killer areil sharon as reminiscent of Hitler's reign of terror. Where is corporate news america regarding their humanity then in reporting the care for the lives of our innocent children? All left there for US to witness the betrayal to America's freedom, and on all we stand together, justice for all, especially for You left corporately forsaken, but not so easily dismissed. For what does it profit our corporate News for your benefit my dying brothers and sisters? Or for our Dads or Mothers "lost" pensions if you make no effort to speak up for your rights denied, your values stolen, or for our freedoms and liberty you know not of as the portrayed enslaved by fascist corporate news tyranny? A corporate news agenda that denies US a place for human rights to life and liberty, is not an agenda we can continue to freely live

with. And, I, as John, can not rule this complicated media world of immense toil and troubles, God needs Your help for your own salvation. I can only do so much as a wonder mostly to myself. I wonder if "Americans" can actually ever read this far into life's desperate pleas I've now put out for years and years going barely anywhere?.. Paradise on Earth where we get a little credit could happen if we just keep dreaming along for a better future, a future where we are respected by the establishment for our goodly works of self determination. A cure for our sufferings? No the corporate professionals are not interested, nor taking calls from any of US with grievances. It costs them too much in stolen revenues to allow freedom reign.

Back to this Zarqawi thing.

If Zarqawi had planned the targeting of a convoy, why would they decide instead to hit the desperately needed treatment plant surrounded by mostly children, with no bushite convoy in sight ever, but a location troops had been REPORTED at for at least days to have built ALL BY THEMSELVES as so alleged? AND done after with bull horns edged children from the surrounding community to come witness their good deeds by getting cheap free candy? Does that sound like the prime time to plan striking at the ungodly evil war criminal bushite when it's widely known they're in a planning stage to bring around as many children as they can, convinced with bribes, there giving something back? A photo op? Where are the photos then??? Remember, bushite rapists and torturers have yet to be hunted down by US true Patriot forces, and evil bushite phil smith freely confesses to targeting children in America's name. Also, firstly, it was reported not one soldier was known killed. Yet, they must be all over the area for later to be reported ten wounded. How did they miss being so far away from such a lethal blow designed to kill evil lying enemy bushite nazi grunts to attempt true Justice for our World I ask? The details still remain at large on why a bull horn was used to attract MAINLY children to the scene of such carnage, however, the last report of bushite forces using a bull horn, was when looting and chaos was being encouraged all so tommy franks could get killed BUSHITE DUMFUKS to rob the central bank with several large trucks that came and went unimpeded by infiltrated enemy military forces. Same bull horn perhaps?

snpd

I don't know about you, but I hate bushite rapists and
torturers celebrated by corporate American Talk Radio
news censors. As enemies of God and all that is great
with this world, the bushite bombers should be called
out for a man to man fight for their core beliefs, or be
rightly killed as better dead than allowed to continue
in our names. No True Patriot can be proud of all the
warring bushite america is doing in Iraq to free George
W. Bush Jr. and "sexy" rummy from arrest for 9/11, for
that would be in support of the enemies to God hiding
inside our glorious American freedom fighter uniform.
We must weed out the war criminalling rapists and
torturers through evidence if we want to truly get
started on this warring terrorism idea, then we have to
hunt down all the stolen money bush foolishly stole with
13303, and give it back to Iraqis once a legitimate
representing government of the People there is in
control as the situation. Firstly to begin on that path
for Iraq however, Allawi must be arrested or executed
for the first degree murders he has confessed to already
being completely responsible for.

How to Avoid Becoming an Anti-American
<<http://www.dissidentvoice.org/Sept04/Alam0925.htm>>

-

Notice the corporatist bushite nazi whore reporters,
make no mention in their "reporting" that innocent
women are being held hostage by those confessed
by themselves as enemies of Freedom and Humanity.
(Suadi Wahabbi buford blount kills innocent women men
and children without apology, and there ain't nobody
there in the bushite third infantry American enough
to gun him down as the traitor he is rightly.)

See bushite, kill bushite.

We, as Humanity, are tortured or raped by un-arrested
sadistic satanic bushite vermins, hiding in the easily
spottable, cowardly American bushite soldier grunts

uniform.

See bushite, kill bushite.

/ / "Please could you on my behalf, on behalf of my brother somehow ask Mr Blair to pick up the bloody phone and call President Bush and ask him to take off the blockade on these [INNOCENT] women prisoners?" \ \

/ / The appeal, he said, urged the kidnappers to free Mr Bigley for the sake of his family and as "a clear message to the British people to see their government's weakness and crime in not freeing [INNOCENT] prisoners held by [bushite enemy] coalition forces to spare their sons". \ \

/ / Working people in Britain should themselves be steadfast-in rejecting all appeals by pro-business politicians and newspapers to accept the need for any sacrifice in order to preserve the [CRIMINAL] occupation of Iraq. \ \

-

Enemies of US all Humans being

Nazi enemy the bushite truly is, when they try to take America away from the crime scene of 9/11 to protect their evil false deity, demon bush Jr., as enemies of US all Humans being.

"When we say serious consequences, for the sake of peace there must be serious consequences."

It is he, the demon anti-Christ, Our Mr. bush Jr. as true evil personified, who broke with the WORLD'S 1441, when LYING Saddam wouldn't let the inspectors in, and that was his as "America's" justification for ignoring these serious consequences by sending thousands of American kids out stupidly to die for all the wrong reasons as the bad guys.

/ / Therefore, the U.S.-led invasion did not ``enforce the just demands of the world'' since the demands were already being enforced without the use of military force. \ \

snpd

Take this recent diliberate criminal position to leave women, men, and children incarated without charging them for any criminal offenses, while spewing that means their "pro-Iraqi" freedom fighters, even if they also decide on their own to maybe torture some for sadistic

wanton lawlessness. Obviously, the UNJUSTLY imprisoned are hostages held by the enemy bushite terrorists. Right?

/ / According to the Justice Ministry, an Iraqi judge had ruled there was no evidence of criminality to justify her continued detention. \ \

/ / "What are the accusations?" ex-U.N. inspector Blix asked in an interview Friday, referring to one leading Iraqi prisoner, Amer al-Saadi. \ \

/ / Iraq's justice ministry insisted yesterday it still wanted to release the women, although it said this had nothing to do with the kidnapping of Mr Bigley.. \ \

/ / "Under international law, no one can be held indefinitely without charge." \ \

/ / ``We have not been negotiating and we will not negotiate with terrorists on the release of hostages. No release takes place unless I authorise it.'' \ \

Obviously, the UNJUSTLY imprisoned are hostages held by the enemy bushite terrorists. Right? Who would disagree? Only liars, cheats, and murderers who target US as the innocent to please their satanic deity George W. bush who will rob from their very own families left back home undefended. Then, as soon as they're dead or maimed, they're of no further use to their fellow "loyal" bushite savages, who leave them to go alone without support to die in the gutter like so many others have from Gulf War I. Dumfuk the bushite is as our lying, cheating, ungodly enemies, who lay their lives down in cowardly servitude for bush and his billioniare banker company as their sourced intelligence providers.

The dumbuk bushite as TRAITORS soullessly war our Humanity to STEAL our treasures of love and compassion, justice and freedom, money and job prospects, forcing our Humanity to aim our loaded guns towards killing George W. bush Jr., the parasitic "leader" of their debauchery as self inflicting debasement. We, as Humanity, kill un-arrested evil bushite to bring mercy to our dying species. The bushite is too cowardly to hunt down and kill the rapists and toturers of the innocent, or the war profiteering war mongers because it's one of their own they DIE for. Killing bushite, is like killing the ungodly protection of self confessed un-arrested rapists of women, men, and children, who openly have confessed to murdering thousands of innocent people for no military objective like Saudi wahabbi

buford blount has stated bluntly, when regarding the
commitment of first degree murder against thousands of
pro-Iraqis:

<<http://www.wsws.org/articles/2003/apr2003/bagd-a07.shtml>>

/ / [Saudi wahhabi] Major General Buford C. Blount, the
field commander of the Third Infantry Division, told
journalists: ``We just wanted to let them know that
we're here.'' \ \

all done for to sacrifice more of themselves for nothing
but being tyranically enslaved as the weak and truly
evil disciples of the enemy anti-Christ, enemies of GOD
and all our Creation. Saudi Wahabbi commander of the
third infantry buford blount freely confesses to
murdering innocent people to enrage US pro-Iraqis to
hunt down and kill easily spottable bushite soldiers
freely in retaliation; bushites, who hide inside the
cowardly American uniform. Okay for the newly wealthed
Saudi buford and his chatty wife cause they gets that
share of two billion American to get killed GI teens,
who are too stupid as iliterate dumfuks to think about
the values they lie about holding true. While dying.
The bushite hide in my America? Never. US true Patriot
Warriors will kill all un-arrested enemy bushite nazi
brethren who think they're going to get away from
torturing and raping our families as the innocent just
because they can say they're lawlessly "pro-American",
while robbing all our families of common decency and our
life savings to serve dying for tyranical lawlessness as
enemies to Johnny and GOD. Ten cents is what I pay out
for every bushite tagged and bagged. Ten cents.

snpd

<<http://www.newsgateway.ca/Fallujah_video_massacre.htm>>

/ / the mission guidance is to shoot anyone who is in the street. \ \

-

/ / Bush, indeed, has an audacious personal quality that
has somehow served him well so far: full frontal
repudiation of facts known to all. \ \

/ / This assumes that the armed resistance in Iraq is not
because a Western power invaded and occupied their
country, failed to provide basic services and security,
sold off key sectors of their economy to foreigners, and
installed a puppet regime, but simply because they don't
want democracy. \ \

/ / Bush explained that, for him, intelligence is not to
inform decision-making, but to be used or rejected to
advance an ideological and political agenda. His
dismissal is an affirmation of the politicisation and
corruption of intelligence that rationalised the war. \ \

/ / "I don't want to die. I don't deserve it. And
neither do the women deserve to be in prison in Iraq.
Release the female prisoners that are held in Iraqi
prisons. Please help them. \ \

-

/ / "We know that dictators are quick to choose
aggression, while free nations strive to resolve
differences in peace, [...] And across the world, the
enemies of human rights are responding with violence. "
"Instead of harboring terrorists," he said of the
Iraqis, "they're fighting terrorist groups." \ \

Best reason I've heard for killing the demon bush at
the hands of US freedom fighters.

New Recruit

Destroying enemy bushite is a gift to Humanity, it is
saying you care for the lives of the innocent a bush
bitch nazi grunt freely confesses to targeting for

murder. Liars are the bushite, who steal Iraqi resources, allow racists and rapists to commit their demon crimes in America's name un-challenged, and who absent mindedly bomb the innocent without just reason given. All the while, labeling themselves, "pro-Iraqi". The mindlessly evil attack against the Turks recently with an ordered bombing campaign that actually murdered people, sighted yet another, example of the bushite's idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr.,

their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

Johnny Wizard

How can those who want accountability be termed anti-Iraqi? only through cowardly liars, is an American told America's not going to hunt down those who stole in their names for dying.

/ / "Few have though, as the town is still without electricity or water and full of unexploded bombs, our sources there tell us." \ \

snpd

Look, as this world's top cop, rare can a person understand my writing as such, but this, I'll make plain:

I'm here to arrest or kill bush and rumsfeld for 9/11.

If you can't as a man or woman of America help get those with the law who have stolen America's good name in other districts, so be it, to hell with you all. We, the America I dream about all alone, want bush and rumsfeld for 9/11, and we ain't going nowhere until our freedom to say as much is granted on higher ground.

However.

Billions upon billions of dollars have been stolen from soon to have once been, millions of American pensioners. Now, corporate news TV tells US, that money is lost to political indifference of the status quo getting to the bottom of rising back up with the stolen cash at hand, as if like, pulling a bunny rabbit out of your hat they might say.. Stolen Enron money for example: It's sitting in the Cayman Islands. Not hidden. In the Cayman Islands. The hypnotizing, sometimes devilishly clever billionaire bushite bankers will say, if you dare quest for further inquiry, "America will learn better for next time", then they pause, and look right back at you blindly.... waiting... and by golly, as if by magic, You just need to tell them: "there is always a first time for miracles". Solved. Our problems seem mostly related to the struggle, that solving many most

critical of our issues, requires so little in effort by understanding, that many in the corporate world think the nature of truth just can't be so. Well... Simple. Demon bush doesn't want, [or seem at all interested] to having arrested General Ahmad, who according to the FBI, was the principle terrorist funder to the mastermind ring leader Mohammed Atta of the notorious 9/11 blame game fame. That should be all you need to know. The failure to con US into thinking otherwise is a ruse. The bushite corporatists mislead America away from the freedom principles of following a criminal case to attempt bringing about a resolution. Getting those who done did do America wrong on 9/11 is where true Patriots stand, and forever will. General Ahmad and his bushmob cohorts need to be nabbed for public trial when we're talking about truly fighting back those that struck at the heart of America when they thought we weren't looking in all directions. The bushite soldiers are being led instead furthering as war criminals, for we're told, they have no interest as the well being of family and friends who love them back home getting the wrong impressions. Don't let the bushite stand to get away stealing for Uncle Sam. Because, Uncle Sam wouldn't do that to our boys. Even to men who never lost the dreams of a boy trying to be a good man, a honorable and brave man, and a man that could be loved, is no stranger to another believing in that same vision.

Of Our Own

snpd

/ / "The helicopter fired on the Bradley to destroy it after it had been hit earlier and it was on fire," said Major Phil Smith of the 1st Cavalry Division. "It was for the safety of the people around it." \ \

Oops.. er.. the bushite mean

/ / Helicopters that flew in to protect the Bradley were then fired on from the ground and fired back, the military said in a statement. \ \

But the firing didn't come from the Bradley vicinity.. so, who cares how many Americans are lead to die then right? Traitors to Freedom, Justice, and Liberty are the enemy bushite liars who war God to steal from our

Humanity with their blatant cowardice and betrayals.

snpd

Allawi "We intend to confront them and bring them to
justice." Allawi is surely one wicked criminal enemy of
Allah. Allawi seems to figure as the incredibly stupid,
that by saying he supports the fight for Justice, he
can't therefor be arrested or executed for the murders
in Iraq that he has completely confessed to ordering.
Nor, apparently, under Allawi's brand of tyranny, can
the enemy bushite be arrested for criminally destroying
vitally needed Public utilities. or who has openly
stolen Iraqi assets in the billions for "tax exempt"
bush backers basking in the sun away from it all. All
the while, working to convince God or Humanity that
evidence is no longer required to convince ourselves on
who is the guilty party.

/ / cheney: "[...] in fact these terrorist attacks are
just criminal acts and that we're not really at war." \ \

Does America still hold a death sentence for the paltry
criminal act of mass murder as so committed in New York
City on 9/11 by bush and rumsfeld?, someone should ask
private citizen cheney. You know?, cheney, who worked
diligently to close the outstanding criminal
investigations on said crime scene for whatever reason.

See bushite, kill bushite.

Further example:

Justice for God

<<<http://www.wsws.org/articles/2004/sep2004/iraq-s07_prn.shtml>>>

/ / Chiarelli said. ``We are going to go in and first
make Sadr City safe for residents.'' \ \

To whom are words needed in refuting the demon lies of
Chiarelli as the enemy?

snpd

/ / The rabbi, Dov Lior, said a "thousand non-Jewish
lives are not worth a Jew's fingernail". \ \

snpd

God bless America by killing un-arrested George W. Bush
Yourself.

-

<<<http://users3.cgiforme.com/bweddington/messages/267.html>>>

/ / All for our ability to communicate freely \ \

-

"Most casualties were old men and women and children",

/ / "We estimate we've killed 300 anti-Iraqi forces in
the past two days of fighting," Capt Carrie Batson, of
the US Marines, said. \ \

You tell me, isn't Carrie the enemy? Bald face Lying to
dying American soldiers that way? Or, is kimmitt and
bremer, along with bush and rumsfeld included in the
total? How can un-arrested child rapists, and self
confessed murdering thieves be the "good guys" to the
traitor bushite?

-

Killing Jews

<<<http://www.wsws.org/articles/2004/sep2004/fran-s01.shtml>>>

/ / Although it is not clear who committed the arson
attack, the Israeli government intervened immediately
and tried to depict it as part of a wave of growing
anti-Semitism in France. \ \

I would suspect, only suspect mind you, that the
anti-Semitic crime was committed against the Jewish
community by the Likudniks. Why?

snpd

Listen: Jesus...
rise up and defend this world we share together won't
You help living some? Or, would you rather die a
tormented slave by evil bushite tyranny who will just as
soon, rob your granny? You decide, or, decide not, you
will still have made a choice in this matter by refusing
to act so accordingly.

I ain't foolin', can't you tell?

King of the Jews,

Johnny Wizard

-

/ / Police actions like these are but a symptom of a society that is sadly misinformed and misled by a government/media controlled by powerful corporate interests. We NEED the law enforcement people on the side of the people, so please do not diss all cops becuase of the actions of a few hot-headed red-necked gestapo wannabes! \ \

SNPD

What Secret Mystery?

/ / Undated-AP - President Bush says a Senate report critical of his administration's reasoning for going to war in Iraq is "useful." \ \

Let's get something understood about the evil enemies of God, the hated degenerate soulless disciples of the demon anti-Christ, Our Mr. George bush Jr.. Both stated goals: ridding Iraq of weapons of mass destruction, and Liberating the people of tyranny, were sabotaged by indiscriminately assaulting the country, that had prior, under Saddam's leadership, granted full unrestricted access to do whatever bush pleased. [Did bush complain about prisoners not granted due process?, or demanding evidence as being an evident pre-requisite for real Justice to work for our Liberation?, or perhaps demanding right NOW where all the charitable oil-for-food funds went missing in his name?] There was nowhere in Iraq closed to immediate inspection, to illustrate as Kamel had proven with all relevant documents, [that he brought with him in several boxes],

http://globalresearch.ca/articles/RAN302B.html

that yes, in deed, the WMDs, some like anthrax, was
burned beyond recognition back in 1992. But!!!, even if
there were WMD uncertainly hidden secretly from everyone
in Iraq, [along with Kamel claimed as highly reliable by
almost everyone in bush's secret inner circle,] BUSH
STILL, lowered his and his ilk's ability over the threat
as so alleged, then excitedly sacrificed no less than
three times 800, easy. making both claimed tasks far
more difficult by paying his buddies for "whatever" over
at commi, we're too dumb to know where American values
went regarding Your freedom sucker, while leaving more
Americans to die sacrificed to benefit the bushite
billionaire over billing backers. Left unaccountable by
corporate american news standards of public
accountability. It's only your direct family taken for
by CNN and CBC's un-challenged selling of the bushite
war crime spree my American friends. I've called
literally hundreds at CNN in Atlanta, and as so, at CBC
in Toronto regarding General Ahmad funding Atta, and
bush's 9/11 plan dated 9/9, but they say, sadistically,
it's not the story they've been presently still selling
You about murdering now more than two hundred thousand
innocent people as arguably, an acceptable alternative
to not allow the support of Freedom and Justice in your
real World dying.

Tommy Franks sabotaged the ORHA plan of gaining control
over the nuclear facilities, [and preventing anarchy,]
just so he and bush, [along with the clear collusion of
the World Bank and IMF,] could "get away" robbing the
Public central bank in Iraq of billions. Couldn't have
been done as planned, without letting in those they
begged by gun point to loot the Iraq Museum, so to
collude with the bushmob's secret intent with furthering
war crimes in America's name left forsaken. Bushdum
Amerka.

http://globalresearch.ca/articles/ROT304A.html

/ / Do you mean to say that it was the US troops that
initiated the looting? \ \

look in the manual or on the side of the scanner.
select a voltage the same as what the batpack gives and any mA rating for
the PSU must be greater than that on the side of the scanner

Patrick AFB Area Log - Tues, 21 Dec 2004

Another very quiet day. Unid acft was AARing in AR-617. Launch of the
new Delta 4 rocket did not produce the quantity of comms we usually hear
during launches. NASA-KSC/CCAFS trunk had limited hits. Beautiful launch tho.

CG 2134: HU-25A, ATC-Mobile
11:10am: Area transition; descent.
[132.4]

JOLLY 21: HH-60G Pave Hawk Helo, Moody AFB 41RQS
2:03pm: Lands Patrick.
[133.75]

SPAR 29: C-37A #01-0029, MacDill AFB 6AMW
2:45pm: Area transition.

BAT 01, BAT 02; Cessna Skymasters, Cape Security; Airscan
4:30pm: Check-in for Delta 4 launch activities; comms with
homebase BatCave.
4:55pm: Lands Space Coast RAP (KTIX)
[133.8, 123.475, 118.9]

DELTA 4: Developmental Flight Launch
4:50pm: Liftoff.

DOS 671: UH-1H, US State Dept, Intl Narcotics Mssn, Patrick AFB.
5:15pm: Local training.
[133.75]

KING 76: HC-130P #65-0976, Patrick AFB AFSOC 920RQW 39RQS
7:45pm: Takeoff.
[133.75]

SPAR 42: VIP flight
10:47pm: Area transition, northward, climbing to FL410.
[127.2, 119.825]

http://progressivetrail.org/articles/041216Whitney.shtml

Where arbitrary imprisonment begins, the rule of law ends. American
citizens are no longer protected by "inalienable rights"; their safety
depends on the discretion of the President.

--

http://www.sptimesrussia.com/archive/times/1029/opinion/o_14419.htm

For example, witnesses told of hooded American agents grabbing
captives in Sweden, stripping them, jamming drugs up their
rectums, putting them in diapers and chains, and bundling
them off to Egypt's hellhole prisons -- whose tortures have
already produced generations of violent extremists.

--

Bushite Kills Bushite for a Stolen Nickel

/ / They are enemies of themselves. Bushite will kill
bushite for a stolen nickel. The only reason this
conflict is happening, is so Halliburton can steal this
money from the American tax payer left un-defended by
CNN. \ \

http://istanbul.indymedia.org/uploads/bushite-kills-bushite.mp3

2nd mirror
http://argentina.indymedia.org/uploads/bushite-kills-bushite.mp3

3rd mirror http://imctj.espora.org/uploads/bushite-kills-bushite.mp3

4th and 5th for good measure

http://sandiego.indymedia.org/media/2004/12/107037.mp3

http://rochester.indymedia.org/newswire/display/3275/index.php

http://www.chapelhill.indymedia.org/uploads/bushite-kills-bushite.mp3

/ / What happens when the "Democracy" says, we are
outlawing torture?\ \

/ / Depraved as America is in some respects, [they] can't find fifty cents to help some homeless vet on the ground. \ \

--

/ / Yet the American establishment has not seen fit to allow anyone who opposes the Iraq war to make his or her case in front of the media. \ \

/ / We often killed the helpless, the wounded and many civilians. My own squad did. I did. And I will do whatever I am ordered to do, but it doesn't stop me from not liking it. \ \

This BUSHITE, who COWARDLY refused to kill it's commander, I would happily hunt down and execute for Freedom. It states it's unaccountable to committing first degree murders while robbing and pillaging Iraqis for the evil nazi neo-cons - because, he's only taking orders by the tyrannical enemies of God and Humanity. I'd kill this attacker from Louisiana, and all those who served the same as enemies of America, how about You my likewise LOYAL Patriot Brother? Killing bushite THIEVES left lawlessly "un-accountable" by the bushmob, bushite thieves that target the innocent, including women and children, all REAL men, would take easy pleasure in killing for the Love of Christians, Jews, Budists, and the Atheists included too.

/ / A lot of people are too afraid to come out. But after we would warn them, we would go in. You know how? We would riddle the building and every window with high-caliber, armor piercing machine gun fire, then often we would throw in a grenade for good measure. If any civilians were in there they ended up either dead or wounded. \ \

Only possibly done through the "help" of "unbiased" CBC and CNN national news "people". Corporatist "celebs" who purposefully propagandize our airwaves with their LIES by censorship to un-supportingly, steal further from our robbed and dying communities.

Example: General Ahmad funded Atta, and corporate news finds no interest in informing the bushite grunt, that yes indeed depleted uranium is radioactive and toxic as a microscopic heavy metal, and will kill you easily for the ignorance "they" sell impartially as the "unbiased". See?, enemy bushite kills enemy bushite for a stolen nickel., that they likely stole from an American grand parent. I HATE bushite.

--

http://207.44.245.159/article7466.htm

/ / Baghdad was full of booming businesses, restaurants
were full, and families walked freely along well-lit
parks. Compare and contrast that image with the reality
of Baghdad today, and the ultimate corruption that was
the oil-for-food programme becomes self-evident. \ \

--

/ / Honorary firefighter Mike Bellone claims he was
approached by unknown bureau agents a short time after
he and his partner, Nicholas DeMasi, a retired New York
firefighter, found three of the four "black boxes" among
the WTC rubble before January 2002. \ \

--

/ / The families of those risking their lives in Iraq
ought not be reassured but enraged. This was a war of
opportunity, not necessity, so there is no excuse for,
as Rumsfeld put it, "going to war with the army you
have, not the army you might want or wish to have." \ \

--
http://web.takebackthemedia.com/geeklog/public_html/article.php?story=200412151547261

/ / No papers! Well, that meant the suspect was going
to be hauled downtown to police headquarters for a good
beating or worse. Well, thanks to the cowardly members
of the U.S. Congress, in 2005, and at the explicit
direction of the Bush()-Cheney Gang, the above scenario
could become part of our national nightmare. \ \

--
http://www.washingtonpost.com/wp-dyn/articles/A45373-2004Dec7.html

/ / that a clandestine military task force in Iraq was
beating detainees, ordering Defense Intelligence Agency
debriefers out of the room during questioning,
confiscating evidence of the abuse and intimidating the
debriefers when they complained." \ \

--

/ / Combat veterans wounded in Iraq were left waiting
weeks and even months for proper medical attention at
military bases. According to an officer, their living
conditions were so unacceptable for injured soldiers he
said they "were being treated like dogs." Then the
Pentagon underreported the number wounded. \ \

--

http://www.truthout.org/docs_04/printer_121004W.shtml

/ / A sacked CIA official is reportedly suing the agency for allegedly retaliating against him for refusing to falsify his reports on Iraq's weapons of mass destruction to support the White House's pre-war position. \ \

--

/ / Ford describes incidents of asphyxiation, mock executions, arms being pulled out of sockets, and lit cigarettes forced into detainee's ears while they were blindfolded and bound."

Ultimately, Ford was strapped down to a gurney and literally shipped out of Iraq illegally on the basis of non-existent mental problems - all because he had the courage to speak out against abuses he personally witnessed. \ \

--

/ / ``I was faced with being deployed to Iraq to do what the infantry does, kill people, and I had no justification for doing so,'' he testified. ``This was a criminal war. Any act of violence in an unjustified conflict is an atrocity.'' \ \

/ / He cited the case of five members in the Mississippi National Guard who had been wounded in a booby-trap bomb explosion. Incredibly, their injuries were listed by the military as "non combat." \ \

/ / Williams's squad stopped a dump truck, and an Iraqi climbed out. "Light him up!" the sergeant ordered, according to testimony, and the squad opened fire, killing the unarmed man. Williams and a squadmate reportedly got into an argument over which of them had scored Company C's first kill. \ \

--

http://www.counterpunch.com/alam12132004.html

/ / What becomes of those military veterans who undergo amputation? \ \

--

/ / What about the damning report of Charles Duelfer and his Iraqi Survey Group, which announced last month that Saddam Hussein destroyed all of his weapons of mass destruction and their programmes in 1991? \ \

--

/ / ...and we were yelling, 'Train to kill, kill we will,' over and over again. I kind of snuck a peek around me and saw all my colleagues getting the red in the face and hoarse yelling - and at that point a light went off in my head and said, 'You know, I made the wrong career decision.'" \ \

/ / Throughout the 12-year Vietnam War, for example, fewer than 100 Guard troops were killed, compared with the 145 who have died in less than two years in Iraq. \ \

/ / Greene County Director of Elections Carole Garman claimed that she had withdrawn access to the voting records at the direction of Secretary Blackwell. \ \

/ / Blackwell not only did not have the authority to take this action, he is actually in violation of the law. \ \

/ / Williams ordered that the Iraqi man, who had been handcuffed and was being held on his knees in front of the house, be brought inside...

William cut off the plastic handcuffs, laid the rifle near the Iraqi and said aloud to other soldiers in the room, 'I feel my life has been threatened.'

Williams then shot the man twice..." \ \

/ / That America has spent billions upon billions of dollars on the war and the occupation and hasn't even managed to provide sufficient armor to protect its own soldiers is a metaphor for the failure of the whole operation. \ \

/ / It is now estimated that more soldiers have been injured in Iraq than during the Revolutionary War, the War of 1812, or the first five years of the Vietnam conflict. \ \

/ / Webb reported that U.S. law enforcement agents complained that the CIA had squelched drug probes of Blandon and his partner Norwin Meneses in the name of "national security." Blandon's drugs flowed into L.A. and elsewhere thanks to the legendary "Freeway" Ricky Donnell Ross, a supplier of crack to the Crips and Bloods gangs. \ \

/ / The Press Release, just issued, headlined "Conyers Alarmed at Efforts to Obstruct Ohio Recount Effort, Calls Witness to Monday Hearing to Detail Such Efforts", outlines the troubling reports, discussed here yesterday, of Ohio Sec. of State J. Kenneth Blackwell (also Co-Chair of the Ohio Bush/Cheney Re-Elect

Committee!) reportedly attempting to obstruct efforts by Green/Libertarian Recount Volunteers in Ohio over the last several days. \ \

--

/ / The "Texas Strike Force" members paid their way to Ohio, but their hotel accommodations were paid for by the Ohio Republican Party, whose headquarters is across the street. The hotel worker heard one caller threaten a likely voter with being reported to the FBI and returning to jail if he voted. \ \

/ / In a half-dozen precincts in Franklin County, people who were not inside polling places by 7:30 PM were told to leave - even if they had waited in line for hours. This is a violation of the Voting Rights Act. \ \

/ / In other words, the exit polls were made to conform to a political decision to declare Bush the victor. \ \

--

http://www.whatdoesitmean.com/index575.htm

/ / The massive US Intelligence Reform Bill weighed in at over 3,000 pages and though unread by individual Members of either the House or Senate nevertheless passed all of the legislative hurdles needed in order to become law. \ \

TREASON BIG TIME.

/ / The contract company blamed for the bad food is identified as a small, Qatar-based firm called American Service Center. \ \

/ / From snatch and grab operations to warantless searches, Patriot Act II is an Adolf Hitler wish list.

You can understand why President Bush, Dick Cheney and Dennis Hastert want to keep this legislation secret not just from Congress, but the American people as well. \ \

/ / MIT and the Pentagon have been involved in a fraud that has promoted a weapon system that will have little or no utility and could cost hundreds of billions of dollars. \ \

--
THE SON OF MAN

/ / Anybody who supports George W. Bush is my ENEMY. George W. Bush committed 9/11 with his buddy, General Ahmad who funded the mastermind ring leader. That's

according to the FBI. Any bushite who gets in my way,
who says that isn't the case,

I WILL KILL. \ \

http://la.indymedia.org/uploads/son-of-man.mp3

http://jerusalem.indymedia.org/uploads/son-of-man.mp3

http://baltimore.indymedia.org/newswire/display/9099/index.php

/ / Mr. Sattler, if you don't want US to arrest those
responsible for 9/11, don't you think we Americans
should kill you? \ \

/ / They got this plan, in it's final stages, just prior
to 9/11, to invade Afghanistan. They couldn't invade
Afghanistan, without some sort of attack occurring that
would instigate an actual war. they got this plan, and
it's all about accusing bin Laden for terrorist
activities, and they've spent a year or more working on
it, or more. And through all the time they put it
together, they never thought to include, one single
shred of evidence. Knowing already as Taliban
fundamentalists, through an experience that Mr. Clinton
had, it is their fundamental religion not to persecute
the innocent. \ \

INTERVIEWER: Are you aware that this tank is
contaminated with radiation?

BUSHITE DUMFUK SOLDIER: No, it isn't radioactive.

INTERVIEWER: But we have measured it.

BUSHITE DUMFUK SOLDIER: No, it isn't radioactive, not
this tank.

--

/ / It said the TF 6-26, the designation for a special
operations task force in Iraq, did not make a record of the
medical treatment given the prisoner and ordered the DIA
debriefers out of the room. \ \

As Leader of the Free World, I will insure a multi-million
dollar payout, for each, still livng-now dead TF 6-26 member.

/ / "I'm not sure what this means. However, if this refers to
intell gathering, as I suspect, it suggests he [MILLER] has
continued to support interrogation strategies we not only

advised against, but questioned in terms of effectiveness,"
the email said. \ \

--

/ / Despite these concerns, the Bush Administration
continues to reject the recommendations of its auditors
that 15% of Halliburton's LOGCAP reimbursements be
withheld until the company can provide better
substantiation for its charges. \ \

/ / His mind was changed, however, when the true
intentions of Feeney became clear: the computer program
was going to be used to suppress the Democratic vote in
counties with large Democratic registrations. \ \

/ / San Juan, Puerto Rico -- Prisoners at the U.S.
detention centre in Guantanamo Bay, Cuba, have been
beaten while blindfolded and handcuffed, terrorized by
attack dogs and forced to take drugs, an Australian
detainee said in an affidavit released Thursday. \ \

/ / He stormed back over to the army psychiatrist, and
according to the witness I have, literally forced her,
browbeat her and intimidated the psychiatrist to change
her evaluation to read 'mentally unstable,' and ordered
her to ship Sergeant Ford medically out of the country
to receive a psychological evaluation in Germany. \ \

[KILL ENEMY] Captain Artiga

/ / One officer characterized conditions for the
[BUSHITE] wounded by saying, "They're being treated like
dogs." \ \

/ / This discrepancy is 3.5-times (350%) between the
number of wounded in combat listed by the military and
the number of service personnel medically evacuated from
Iraq for treatment in Germany! \ \

U.S. deserter 'didn't want to have to kill babies'

/ / Mr. House will argue that American soldiers are
guilty of war crimes and that forcing Mr. Hinzman to
fight in Iraq would have made him a war criminal.

He will call as a witness former U.S. Marine Staff Sergeant Jimmy Massey, who is expected to testify that he and other soldiers shot more than 30 unarmed Iraqis, including women and a six-year-old child, at a U.S. military checkpoint. \ \

--

CNN.com - Aid group 'told to freeze' Falluja work - Dec 6, 2004

/ / Only about 100 families are thought to remain in Falluja, as most fled the city before the U.S.-led operation aimed at flushing out insurgents. \ \

Huh? Again, witness wealthy CNN "news" staffers, didn't even bother to seek for an update on their "about 100", that had not ever been given. Red Cresent, the day previous to Dec. 6, no... actually reported on, Dec 3rd!, stated, (from their limited circle of reference) they had witnessed a minimum of many corpses, of completely innocent pro-Iraqi women, children, youths, and men.

/ / Iraqi Red Crescent spokesman Muhammad al-Nuri estimates that some 6,000 people have been killed, many of them civilians. \ \

(That is discounting murdered armed defenders of Freedom in Iraq we can prusume.)

But, again, the true bushite enemies of loyal bushite enemies, thay'l' "bushite lie" to the bushite nation about the "holy" benefits of, sacrificing America's young life., all done for the glorious betterment of the traitor demon anti-Christ liar, the war criminal, Our Mr. bush Jr., along with his treasonous evil cabal of anti-semitic Palestinian Christ haters. A compassionate, "conservative", war mongering cabal whos warring of America is done to secretly steal further from the innocence of God in silence. Without a honest to Johnny, bushite killin' God-Man to speak on the nature of reality itself from living Creation's time-less prospective. Naturally leaving ourselves to save all of humanity with my "magic" - guitar, notebook, cybercafes, and super cool Akeido, leaves me in wonder of where life could lead as committed to freedom through justice for all?, as truly ourselves democractically represented?, Miraculous?. or will we choose as ENEMY bushite instead not to, ending to devolve ourselves from existence?

I know of some pretty, almost miraculous words in which can bring about positive change, and man, if you could see the world for America's Dream, where all People are judged not by the color of their skin, but the content

of their character, the entire bushmob would be behind bars awaiting trial for treason, and the Iraqi People would have American Forces demanding Allawi be arrested for failing to explain himself regarding the needless bombing of our Humanity in Samarra and Falluja.

--

SEE BUSHITE, KILL IT FOR GOD'S AMERICA

/ / Another humiliating proposal, which even triggered debate among Marine officers in control of the city, is to force all Fallujan men to work in military-style battalions, reported the Globe. \ \

This is the best the ENEMY bushite could dream up in all possible worlds?

/ / His company of tanks and Bradley Fighting Vehicles had roamed the eastern third of the city [Falluja] for 13 days, shooting holes in every building that might pose a threat, leaving behind a landscape of half-collapsed houses and factories singed with soot. \ \

--
http://www.wsws.org/articles/2004/dec2004/iraq-d06_prn.shtml

/ / Of course, none of the assembled media pointed to the absurdity of Bush's comments. \ \

--

http://billmon.org/archives/000172.html

/ / Bush administration official says: "Saddam never had WMDs, and we never said he did." \ \

--

/ / Goldsborough said the reason he was given after the fact is that the column, about why Jewish voters overwhelmingly cast their presidential ballots for John Kerry, was "offensive."

"The publisher said it might be offensive. To whom? \ \

--

/ / twenty-seven Israeli pilots indicated that they would no longer fly missions in the Occupied Territories (Boston Globe). The pilots said "We veteran and active duty pilots are against carrying out illegal and immoral attacks" and they "refuse to continue attacking innocent civilians." \ \

--

KILL ENEMY BUSHITE FOR OUR LIVING LOVING GOD MAN

/ / They should put dynamite in their behinds and drop
them from 35,000 feet, the whole pack of scum out of
that jail."

Remember, these are the same prisoners that the Red
Cross estimates 70 to 90% of them were innocent and
later released. \ \

--

/ / It gets worse. We already knew about the Franklin
County, Ohio, precinct that tallied 4,258 votes for Bush
when only 638 people had actually voted. \ \

--

See? The bushite knows that bush murdered thousands of
Americans on 9/11, yet, will advocate fascism, to censor
America, from finding the truth for ourselves.

That enemy of God, the demon anti-Christ told US the
conflict he began, was because Saddam wouldn't let the
inspectors in. While, corporate nazi whores, refused to
correct ourselves on our sacrifices, for they enjoy
remaining impartial, when it comes to the crimes they
inflict upon our humanity. Enemies to all humanity CBC
and CNN are by refusing OUR facts to speak for
themselves. No betterment could be garnered, by the
demon anti-Christ's war crimes against civilization,
WITHOUT DOUBT. And, it's only the enemies of our
dumfukked and dimmer soldiers, in corporate mind
control, who refuse to allow anyone to state THAT FACT,
for, the enemy bushite would be exposed, and America
would be hunting them down with the Law as the traitors
to freedom they clearly are.

> http://la.indymedia.org/uploads/somebody.mp3

/ / Mr. bush is sending them into these military conflicts, to create more hostility for them to die over. So bush can rob ever more, from the undefended American People left back home there, still, victimized without repremand to those who ripped them off for their pensions as example. \ \

--

Bush Lies to Canada

Demon bush spew "I made some decisions obviously that some in Canada, didn't agree with. Like for example removing Saddam Hussein, and enforcing the demands of the UN security council."

Saddam was not found in violation of 1441, so the war criminal anti-Christ's demands were not our world's, nor that of the UN Security Council. How does thieving our assets, destroying our infrastructure, and indiscriminately murdering more than a hundred thousand innocent people, (in turn to sacrifice more worthless bushite nazi teens) bring about their closer fraudster bushite "Freedom"? Again, CNN, and CBC let the demon liar spew his hatred of our liberties, without factually challenging his lies with our un-debatable established truths. CNN and CBC would "sell" seeing our dimmer youths sacrificed as bushmob thieves through blatant bushite lies, to truly, steal our freedoms and liberty with further murders by proxy.

/ / .. or when [bush] just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", \ \

This should be a time when the People rise up as angels of mercy, and hunt with Law to kill George W. Bush, Rumsfeld, and Condoleeza Rice for the crimes committed on 9/11. Just because the corporate T.V. doesn't mention the facts to draw our own conclusions, doesn't make it not so out of our realms of expertise as Freedom's true represention.

--
http://www.opednews.com/fitrakis_113004_GOP.htm

/ / "It's about a will to dignity. It's
not too much to ask for our vote to count." \ \

--

security force guy who's honest, reliable and
dependable, it's worth five Marines," \ \

--

This is Hockey

US general John Sattler declared: "We have liberated
the city of Fallujah."

Sattler openly lies to the lives of America with this
insult, and the bushite nazi dumfuk, is too stupid or
evil to frag him as enemy proudly for it. The People of
the world, look, see.. bushites are murderous liars,
cheats, and thieves as the enemies of America, who even
lie to THEMSELVES on how many have been sacrificed to
blood the coffers of the American pension thieving war
monger bushite 9/11 cancer. A liar nazi bushite
commander would sacrifice his nation, along with own
family, before saying a word in defence of our freedoms,
our humanity, or our God. COWARDS. American nazi
bushite commander gets killed american nazi bushite
grunts, in dreams they too, can financially profit off
the talentless continuing THEFTS for enslavement to
sacrifice themselves as fascist tyrannies. Hmmm. but
the nature of American freedom, is to be one as everyone
being equal scores. "Gee, maybe some day even you could
be Presidential."

Weak intellectually, prone to cuss, the bushite nazi
dumfuk, is a worthless piece of crap.

http://bellaciao.org/en/article.php3?id_article=4591

/ / I have the impression that there are no other words
except "fuck" and "shit". Each communication, each
order is accompanied by a flow of 'fucks', 'shits' and
'bullshits'. I look at Americans with a pity.

Among the "colored-skin" GIs "Latinos" are largest
group, then Africans and semi-Africans. The officers
are mostly whites but there are also blacks... But I
cannot understand at all, why the US Army soldiers speak
broken English!! \ \

/ / During the five days, while the count was yet
conducted, more than three thousand wounded passed
through our hospital. These were the people who lived
nearby. The people who could be delivered to us.

Nobody knows how many people in the city are dead. \ \

/ / I cannot recognize the city. Only ten days ago it
was an Iraqi town with its regular for centuries Arabic
life. Boling bazaars, noisy streets. And here I am
going through the empty dead city, between the ugly
"pyramids" of destroyed buildings, broken streets, whole
quarters wiped from the face of earth. \ \

--

old nazi tricks

/ / The Red Crescent's Falluja coordinator, Jotiar
Nafaa, estimates that between 150 and 175 families are
left in the city that once had a population of 300,000. \ \

REUTERS up to their old nazi tricks again. Jotiar
Nafaa, "coordinator", should surely know, that it is 175
families that had requested for the help of Red Crescent
totaled several days previous, (without phones, nor
abilities to leave their homes (150?)), NOT, "left in
the city". [THINK: how could they possibly know?
(nazi bushite whores were ordered to murder innocents
indiscriminately as enemies to God)] Also, is "Jotiar
Nafaa", the same woman hater, who LIED in REUTER"S
anonymous hand previously, as the Red Cross, that the
women held illegally as hostages by the thieving evil
nazi bushite forces, didn't really exist? (and who the
"sovereign" Justice system of Iraq, along with World
opinion, God, and JOHNNY had demanded to be let go for
lack of any real criminal charges? (despite CNN and CBC
WILLFULLY refusing to report on the issue as important.
(You know, INNOCENT women held hostage by bushite goons
who acquiesce COWARDLY for rapists and torturers? (Just
like Jew killer Ariel Sharon never gets a fair mention
by "America", nor Zarqawi, as he was in the second
Bigley flick, right before Samara.)))

LOOK AT THIS - LOOK AT THIS - LOOK AT THIS

Aljazeera.Net - Aid trickling in to desperate Fallujans

/ / The organisation estimates that only 150 to 175
families stayed in Falluja after the start of the US-led
offensive on 8 November \ \

The organization does not estimate the incorrect fantasy
conclusion held by this pro-irrational Bush article from
Aljazeera.NET. By god Johnny, where tell us could such
lies begin at? Well, let's go investigate... If as it
is, a misrepresentation of Red Crescent's actual
findings, wouldn't you think "they" would put out a

press release to correct this falsehood of public claim?, to suggest 150 remain in a city the size of 300,000+?, but no greater than 175? without access for numbering by anyone, but for the only near 15,000 HUMAN BEINGS known escaped as refugees??? Or, are the "reporters" just conveying the "facts", by putting no investment in our validity? Leaving us for further victimhood, by hiding ourselves from the war crimes the anti-Christ bushite nazi savage commanders have committed in my name, America's name, God's name? as our enemies?

Our cause as Humanity is for freedom's reign, not to sacrifice Humanity as misled bushite nazi facist teens further, so bush, condi and rummy can fi-nah-lly escape "The True Patriot's Wrath", for the crimes they committed against Freedom America on "bush win", 9/11. So... Why so do I think Justice is going to get GW, making no mistakens? Because the Patriot's Patriot is you too my sworn believer, and now that's this: America's craftier than that George Bush Jr. makes living out for, in "our"-OWN news broadcasts. As the "censored" contributors who learned our gathering skills some time ago already, I say, Freedom is paramount. Mr. bush's unbiased corporate news agenda doesn't hold America to an account before the Lord, nor to God as being, an honest spoken word, or deed of good measure. Of friendship, of kindness, of compassion and caring for our fellow human beings. I have rights too you know. As cowards, the bushite refuses to defend the innocent they rob and murder from to serve as enemies of Life, done in to die pleasing their false idol, corporate america's glorious leader, the un-elected dictator, Our Mr. bush Jr..

It should be further noted, as reported, that all aid agencies contributing have accounted for only near 15,000 families stationed in refugee camps that escaped the indiscriminate anti-Christ demon bombing campaigns. So, total deaths tolls could exceed 200,000 just for Falluja alone., what with the napalm, land mines, 1000 lb bombs, snipers, tanks, mortars, essential services, police protections, denials of foods or water, thefts, vandalism, and so on. All along with the refusal to allow the People to escape before hand, or even enter now. I've only heard that the nazi grunts will only allow the "staff" of "Red Crescent", to quickly as can be, come into the demolished city, and dispose of our corpses with bulldozers likely. You know?, any males between 15 to 50?, like their "Hero", the bush family's Hitler regime did. You tell me, would you enjoy as a

True Patriot Warrior, killing a LYING enemy bushite nazi bomber, on behalf of saving yourself and family, God and Humanity? God?, that the demon anti-Christ disciples murder to steal from US as the innocent? To kill an evil and mindless devaluating corporate bushite facist slave, is to save the untold lives of thousands of US innocent they target indiscriminately for criminal plunder. Dying as cowards too weak to defend their own country from the neo-con conspirators, they die. Die.. Get this measage out to the American forces, and stand back, cause America's gonna win this fight for freedom, or die as slaves remaining unworthy to a blind comitment of tyranny by furthering enslavement against our Human species.

Continue doubting in silence fledgling Patriot, and bushite america's war will continue refusing to speak on it's needless sacrificing through bushite criminal decree. We know, wealthy con man Art Bell, Limbaugh, and O'Really will try and refuse such truths discussed in Your America, care for the lives of sacrificing American teen soldiers are of no concern to their profit margins., so far. You, my friend, just need to try starting a demand for justice as Freedom commands. (And, if you wish, you can thank us with a small cash donation to help me escape this nearing starvation.)

I'd, as the Son of Man, (but you can call me Dad.) proudly teach, or kill godless thieving bushite to save the lives of any child, and so would the rest of Humanity likewise. There is no known fate worst, than a Mother Nature scorned, or near 7 billion People really very angry with you.

"if the USA's honor can go along with these [bushite] tactics . . then the USA is a country without honor."

And, boy, real America wouldn't take kindly to George W. Bush Jr. as understanding, the elected President has leadered the murder, of thousands of decieved Americans as the innocent, all to only steal from, as the left "officially" undefended. Hell, as the true Leader of this Free World, and holy roller god child, George W. Bush Jr. pisses me off to no end, how about you?

/ / Washington says the Falluja campaign was necessary to bring the Sunni Muslim city back under the control of the central Baghdad government ahead of planned Iraqi elections in January. \ \

Reuters up to their old nazi tricks again. It was only mindless nazi savages who indiscriminately murder good

honorable people, who advocate thieving and torture, rape and murder, and the willful destruction of America, that were banned from entering the Holy city.

No evidence, so then, for what? What but to get more cowardly american marines dead, to serve soullessly further - as the stolen riches of the evil enemy demon anti-Christ, evil personified, Our Mr. bush Jr.. (the same from 9/11 fame)

http://www.truthout.org/docs_04/112604I.shtml

/ / By targeting civilians, he said, an army could advance more rapidly. ``Air-delivered terror'' effectively removes civilian obstacles. \ \

Pure, unadulterated fascist nazi evil. "Never again"? Killing un-arrested bushite (Saudi wahabbi) commanders, is like killing the enemies of America, Humanity, and Jesus' God. Do ourselves and Johnny a great big favor, when you see a loyal bushite nazi grunt, thief and murderer, imagine, "yah, that's right, that's what being a kind neighbor is all about, for Christ said so in John's Revelations." Bushite! your false Idol religion is too stupid to remain for dying spark under the anti-Christ's evil criminal dictatorship of, wannabe dumfuks. I'm Your God see, and Your coming and going. As for Royal King Johnny, he's just standing in for this time being,..' hey you!, pay no attention to anyone behind what curtain! Boo!

America is wonderful to truly believe of it as in the making. So, let's get the work done that needs doing, so God can get back to trying to enjoy some time at home. I'm here for a good time, not a long time, and the sun don't shine every day. So get off your asses, and demand some real Justice for Christ's sake. Johnny has awoken, and he's cranky they say.

--

http://news.independent.co.uk/low_res/story.jsp?story=586062&host=3&dir=506&dir=506&host=3

/ / The [Anti-terrorism] source added that the fact that the story of the 11 September-style plan came from lobby correspondents, rather than security or crime specialists, "gives you a good clue to where they got their information".

[...] Barry Hugill, a spokesman for Liberty, the civil liberties organisation, said: "The timing and contents of this story look very, very suspicious indeed." \ \

Yah! Way to go! We're'a gonna hunt US down some enemy bushite in Britain with the Law of the land on this issue... If you guys need me from over there across the pond, just give me holler!

/ / He added: "Ten days ago Mr Blunkett announced that the intelligence services had thwarted a major al-Qa'ida plot, then added that that they might not be able to convict the people involved. \ \

It is Mr. Blunkett that shall be arrested for terrorist activities involving the said major al-Qa'ida plot, tried, then.. well, we'll let you Brits decide that end on your own part. Call me. Cheerio!

http://middleeastinfo.org/forum4970

Israeli Soldiers Going In For The Kill: A 13 year old Palestinian JEWISH school girl is about to die

/ / "It's a little girl. She's running defensively eastwards, a girl of about 10. She's behind the embankment, scared to death."

"Anyone who's mobile, moving in the zone, even if it's a three-year-old, needs to be killed.

..soldiers in the company, [...] Givati Brigade, complained that they had been "besmirched"

The soldiers said that the commander had fired two shots at the girl from close range as she lay on the ground.. \ \

Will all Jews join me in calling for the public World trial of crimes against God's Humanity, done by these truly godless fascist nazi enemies of the Holy Jewish faith? Or, will the anti-Jewish Ariel Sharon crowd again, march more Jews silently to their graves, refusing to speak for the Bible's Word that all people are created in God's loving image?

Victimizing the innocent to steal from, is not acts becoming of a religious person or a truly "democratic" government.

--

http://www.topplebush.com/article54_recpres.shtml

/ / Musil said the [rumsfeld's] Pentagon's effort to
draw a distinction between the weapons was outrageous.

"It's Orwellian. They do not want the public to know.
It's a lie," he said. \ \

--

/ / Hammad said he had seen elderly women carrying white
flags shot by U.S. soldiers. ''Even the wounded people
were killed. The Americans made announcements for
people to come to one mosque if they wanted to leave
Fallujah, and even the people who went there carrying
white flags were killed.'' \ \

--

http://www.globalresearch.ca/articles/BOH411A.html

/ / But we have to be very cognizant of the fact that
the media's adamant refusal to address the very real
irregularities of the 2004 vote is a deliberate act of
psychological warfare. [...]

"if the USA's honor can go along with these tactics . .
. then the USA is a country without honor." [...]

The word 'jihad' (holy war) from which 'el moudjahid'
(fighter for the faith) derives, has always been,
because of an anti-Islamic prejudice that dates from the
Crusades, taken in the Christian West in a limited and
restrictive sense. It is taken as a symbol of religious
aggressiveness. This interpretation is rendered absurd
by the very fact that Islam is tolerant, and the respect
of religions, in particular Judaism and Christianity, is
one of its fundamental precepts, something which, in
fact, has been in practice over the centuries. \ \

--

/ / Ending this bloodbath is the most honorable task
Americans can perform to restore progressive priorities
and our respect in the world. We have passed the point
for graceful exit strategies. Our policy is to go on
mechanically killing people unless they vote in January
for us to keep on killing people. \ \

--

http://journals.aol.com/bmiller224/OldHickorysWeblog/entries/2233

/ / Our priorities must change. \ \

--

/ / Brooks seems to think that the CIA is the President's personal advertising agency and that its employees owe their livelihoods to him. \ \

> http://la.indymedia.org/news/2004/11/119355.php

--

God is Great

A person accused in our name(s) of a criminal offence, needs to be established somehow to be as such, and the only way to do that, is to present evidence that formed your/our conclusion. Without evidence our accused is ourselves as the innocent, being falsely imprisoned, tortured, or murdered. Murdered, as the Allawi and the bushite nazi forces did to our friends and family in Falluja, to please the demon liar, lawless George Bush Jr. as their central thief system of dishonor and betrayal to the human cause, Your own.

Now, when bush stated that Laden was guilty, without evidence needed to form a conclusion, or when he just told you for no reason possible, why American soldiers are DYING, "Saddam wouldn't let inspectors in", the bushmob thieves plundered in our "lost" confusion. All the while bush always seeking to close America's on-going criminal investigations, by causing even more have nots among US. So, as a free person, to side for the, bush wars America, God, and Johnny issue, you would seek out to find for Yourself beholding likewise as We all are: bush is actually super fuking evil, like personified or incarnate even, and Johnny's almost like a stranger Messianic figure who just wants to be known as a semi-normal average GUY/god fellow. (Sheesh.. We gotta bring ourselves everywhere we go) I "hate" bush for being so not himself stupid to think there was no actual walking, talking, godly Persons from the outer-reaches coming in to get him for the crimes he has committed ourselves to. Corporate news dictate without a human presence, doesn't rule this world of communication, we do. (Jesus wasn't buying Satan's misconception.. SEE THE BIBLE AND THE KORAN CAN BOTH BE RIGHTiOUS!!..! Just ignore the misconceptions others have, and join the party!!! The Time is Now, and man, do I know how to make an entrance or what?)

A demand for Justice is our birthright as the human species struggling to survive.

We could be on good terms with the "unthinking", greatly special loving Earth as the no longer leaving ourselves to be silently victimized, and I think, we'd think, we

want to live in a freedom bound for glory, not a hell hole of, ignorance is bliss, look there! your dying needlessly victimized, oh.. too late who cares your dead nonexistence. Did you say something?

Trust me America, YOU WANNA correct this George Bush Jr. problem before it becomes the "law" of the "land". Don't fear though, for, God's here, there, everywhere!!! It's you over... there! and under here.. and then... we said hello to Johnny, the miracle worker. God People, I have so many good words to tell you, and wonders that would surely boggle some senses. Our hope for a better future doesn't have to die here on a cross for the war mongering bushmob thieves, but, it's going to require You personally taking some action, be it however slight, to bring a remedy to this current, "Look People, bush thinks he has almost escaped accountability for the commitment of crimes he perpetrated on 9/11 against US interests." Strange but.. REMEMBER: people like Americans, are currently needlessly still dying for the bushmob war monger thieves., dying by only our continuing censored voices on the seriousness of our commitment to defend the rights of every free person standing; ourselves as God being victimized with these unjustly expensive, neo-con bushite terrorist campaigns against Civilization's better judgement.

God is great I know it's true, just put a little faith in yourself, and demand America soldiers fight instead to protect DYING America from the tricky, evil bushmob cabal of THIEVES. Cheney looks bad there, as does Myers, and didn't Goss have some pre-9/11 meetin' with 9/11's General Ahmad that he has still yet to answer for, or.. is it we guess, to be "legally" done in by... the Secret Order. The American good cop is all we're expecting, and all we need when dealing with the likes of a self-depreciating bushite conspirator..

We don't get to be Magnificent without you likewise. This alien world we have victimized against our better interests, is a failing spirit of Life from our vantage point. Going back before the Age of Reason, is not where I believe America wants to be taken any further, thank you, but no thanks, besides, the King of Kings is here. Johnny Wizard looking to break into prime-time with his very own Special special.

I'd have ta be one crazy mixed up loon to follow this world over with the universal principles of justice as freedom, to set course for the dreams of my trying, and you might be right. Get You to talk TRULY will,

guaranteed, freak you out. REMEMBER: Mr. bush Jr. should have been arrested day one, with that fifty billion. That was before 9/11, Afghanistan, Haiti, Iraq, a few hundred thousand innocent lives, 300 billion plus a few hundred more stolen, and for what? I can only see, we needed myself as King here yesterday. I wasn't chosen for this freedom post per say, but, me and the stars had a dream one time, and it continues through out to this day, enough to say but, this is not what you read about in the manuals. Freedom to be yourself, is the freedom to dream something bigger that your wildest imaginations. I am the Son of Man, and do I have tales to tell. (I know, it sounds crazy, but it's just like a performance gimmick to increase my Q ratings. And, it seems to be somewhere working with me.. I've got a story down pat for anything if someone should ask what fear is.., now, open that curtain so we can start the show!)

I have a treat for you strange friends and friendly strangers out there. Some art work from me. Now, I used the drawing myself, for posters of different sizes, explaining in small writing some key 9/11 questions, while with maybe block letters, things like "bush is EVIL", 'did 9/11', can you hear me?, as what have you.. So, here I will offer you something I created, a Johnny Wizard pencil drawing in jpg format. Enjoy!

http://la.indymedia.org/news/2004/11/119755.php

Hmm, perhaps I'll give out other of my drawings as thankyous for fifty dollar donations? Or prints for $500! You know, they could be worth a substantial amount of money in a few years, hmm, a real investment for your future... A wise move for the prudent investor really when you think about it. But hey, no pressure, no pressure.

Being me out to destroy bushite just sucks. I'm really not naturally so angry about what bush has done to our world all the time. My voice is getting hoarser, and I'm occasionally grunting, bad sign. I want to live like it's 1999!

Arrest for immediate trial, bush, rumsfeld and condi for the crimes of 9/11 back in New York City, and all will be well with my World,

A friend of living on for a brighter day,

Johnny Wizard

--

Truth is Telling

/ / Major-General Richard Natonski prepared his troops for the battle ahead. 'We're goin' in to raise the Eye-raqi flag above Falluja - to give it back to the Fallujans,' \ \

So, was it Major-General Richard Natonski's decision to drop 2000 lb bombs then? Was it his charge to indiscriminately shoot at US innocent, on the street, in our cars, our homes?, cause somebody's gotta pay then with their lives for lying to die the dumfuk marines, who it turns out, weren't so dumb, or hard of hearing after all. Those responsible for the bombing campaign targeting hospitals and groups of innocent people, need to be hunted down with extreme prejudice, and publicly executed on behalf of our Humanity. So too, do those who ordered the NEEDLESS bombing campaign in Samara. And, for those who have worn the American flag while willfully committing the sadistic crimes of torture and rape, we shall all join together, and hunt down as our enemies without mercy. The bushite are enemies of all our humanity, demanding we sacrifice our honor, like they have done to family and friend, and sacrifice our courage, because they refuse to defend their own flag and the freedom of which it stands, one nation, indivisible.

I will not rest until every traitor of the America I remember, is summarily executed by death sentence for the convicted war crimes Humanity and God has suffered under their heinously satanic barbarity. I HATE the anti-Christ, and all the bushite has tolled against our better station. As I tell again, killing bushite is a godsend. They as a satanic force of evil, torturing and murdering, rob from America as they "willfully" allow the robbery of Iraqis, and they truly, rob from themselves when refusing to join US in the demands to have bush condi and rumsfeld downed for the crimes of 9/11. We also demand all stolen assets taken through the bushite mongering war privateers, returned to a legitimate Iraqi government. All done by firstly, arresting Allawi for the murderous war crimes in Samarra, and then in Falluja. Also, hunting down to kill those who forbad humanity from helping US in Falluja, or turned off the utilities, shall be tried and publicly executed for commiting war crimes against MY humanity.

Weak intellectually as fascist nazis, the slave whore bushite's commitment is to only die for as enemy. They FEAR to have to stand up for fellow thieving soldiers

and say, "damn, this war is evil to the 'n degree, Jesus would surely be angry, And from what I hear, the Son of Man is pretty upset about what we enemies of God have done too, and, well.. we do not have to thoughtlessly serve under anti-Christ war crime decree any longer, as the cowardly lying chicken shits, too afraid to defend our own nation., instead, let's go bag US some enemy bushite for America's America!" We do all together want to convict those who murdered thousands in New York City, and we're definitely not combating global terrorism, by fighting a needless war against the innocent, lying to ourselves that by doing so, brings about a fair just government of "The People"., to then in turn arrest whom? American soldiers need to say, to hell with bush, and corporate professionalism, my loyalty is with Christ as a truth telling demon slayer.

For those who still continue, to sacrifice our rights to life and liberty, for a no better good deal as the bad guys, are TRAITORS to America, who are attempting to help escape bush and rumsfeld from the murder scene of 9/11. Never gonna happen. So, why should yet another, promising young man, die as a dumfuk bushite, the most hated and reprehensible nazi savage America has ever gleamed of? The indiscriminate bombing of our communities rightly gets dead, another, good for nothing, nazi soulless bushite vermin, AND RIGHTLY SO. I'd kill thieving bushite bombers to save the innocent life of anyone.. like a,.. cluster dud dropper., wouldn't you?, in all honestly, if you had the power, kill such an evil nazi betrayer to Freedom and America who blindly targets our residential communities to enrich the UN-AMERICAN demon anti-Christ bushite thieves further? That, as bushite nazi grunt, they die for? Paleeze.

America is dying to prosper their false-deity war criminal demon anti-Christ, Our Mr. bush Jr, the same responsible for the nine eleven travesty, who attempts escape only through fascist americans who willfully betray America by condoning the furthering of bushite censorship for tyranny. Is America the cesspool of corruption and greed, without a People person present willing to make a stand for God and Country? BUSH IS EVIL. Let's arrest'em, or kill'em for committing high treason on 9/11 with condi and rumsfeld.

What do yah say?

Under the witness of every freedom loving person this universe over, I am proclaiming, a war against the liar

George Bush Jr., the vilest contempt for mankind this
World will not stand by to be destroyed because of.

/ / claiming that the United States went to war because
Saddam wouldn't let inspectors in; the media has treated
this as not really a lie because it's so obviously
untrue. \ \

America is a coming to kill the truly evil George
Bush Jr.,

The King Commands

/ / Rumsfeld replied to a direct question yesterday as to whether he knew Zarqawi was in Fallujah with the answer: ``I have no idea if he is there.'' \ \

So, America! there is your reason for dying America's sons and daughters, Johnny's brothers and sisters. "No idea" rumsfeld states while his private partners cash in the blood checks for everything but the funeral services. I ask sacrificing soldiers to help grant me space to debate bush and rumsfeld on international radio. We gotta take away Art Bell's turn off button to thank him for all the enlightenment he has been a part of in America, but that these life death top priority issues of ours, he hasn't the right to censor communication on. This is your World that I wish to play servant of. As my subject; I promise a fight to return Justice through freedom for all. How? By believing in you to do as you should, demanding the immediate arrest or execution of bush, rumsfeld, and condi for the crimes of 9/11. Demanding the return of all stolen Iraqi assets, made by those who personally profited off the criminal transactions. Demand the arrest or execution of Allawi for the bombing campaign of Samara, along with bushite military commanders who organized the satanic attack. Why would America do this? To free the dying lives of their bushite nazi whored, dying grunt savage slave population. .or perhaps not...

/ / Joseph Bowman, a 20-year-old marine from Texas: ``We're ready to go. I'm just ready to get this done. I want to go and kill people, so we can go home. Kill them, and go home, that's all we can do now.'' \ \

Where is home for the Joseph Bowmans? A devolving backward wasteland?, where brother kills brother for a stolen nickel? Who would want to share the same home?, street?, or community with such contempt for life and liberty? God and Johnny? Who's home does bushite Bowman SEE the joys of his humanity flourishing?, or being destroyed as the true enemy? Is that the place where the pursuit of freedom is done by sanctioning first degree murder for no reason in particular? And is that the bushite america we've all come to getting to know of these last few days through corporate news contempt for the loss of our life's love?, and God's voice? It is all up to us, You included. In battle against the evils of this world, we should start on getting back to those that did US wrong on 9/11: bush, rumsfeld, and condi., just for starters, while keeping a

careful watch on those that jump to their cause for furthering tyranny.

A terrorist to target: Major Todd Desgrosseilliers

/ / US forces unleashed more than 20 air strikes and some 60 artillery rounds on Monday, said Major Todd Desgrosseilliers. [...] An AFP reporter in the Jolan district said one building in every 10 had been flattened. As US-led troops closed in on the neighborhood overnight, at least four 900-kilogram bombs were dropped in the city's northwest. \ \

What is it that the major is warring Falluja's defenders for? Is it to thieve the assets of the war torn city through the sacrifice of American boys and girls?, or is it to set up a representative government that would firstly stand demanding immediate reparations? The return of all stolen assets? (referring to the satanic bushite documents: the lawless 13303 and the, "THIEVING bushite dying soldiers stole it, so" now, G.W. can sell it privately to his no-national robber baron "Economy Plan"sters.) Would not a free and liberated Iraq demand a return of the "missing" or "lost" billions through the humanitarian Iraqi Development Funds? The practice of human rights law? Criminal investigations? World wide Public arrests or executions of the rapists and torturers, along with the war crime commanders?, who mostly command from sunny Florida as pension thieves, and the lucrative Halliburton billionaire war pressure lobbyists?., For all together as represented, we instead (they claim) advocate the mistreatment of US innocents in Your name. Sacrificed? Why do you let them get away with that? How about instead my friends, for Christ's sake, we decide together to go after the criminals? Allawi must pay with his remaining life for the needless bombing of Samara that got many an American soldier KILLED for nothing. Nothing. Died for nothing, but to sacrifice more of America to the war crimer bushite, the lawless demon anti-Christ's followers of evil personified., the most popular Presidente' ever all-act-dud. .!!.

Yeah yeah, bush and rumsfeld did 9/11, but did you know the Pentagon has not so mysteriously misplaced near 3 trillion dollars?, that a couple few claim was forever lost? Shucks? And did you know, it is the Treasury Department that loaned the Federal Reserve American currency to begin with, not the other way around, when they in turn, lent it back to ourselves.., at private interest. Whoms? Hmm... a quest for answers to the

name on the bill We Trust?

At the same time while we're all parting, we got like, American soldiers indiscriminately murdering people. That isn't an accusation I make against the nazi bushite, they freely confess it. and for what purpose? They say, "we'll kill more than them that they'll kill of US"

Yeah but, why bomb ANYBODY? Why do you have to sacrifice American soldier's lives for no greater good? What benefit does it bring to the DYING bushite grunts who are ordered to stick around and try to placate hostilities with "good" intentions? as within the sites of Humanity - as enemies to US all? Will the commanders argue from sunny Florida, that yeah but, we killed more of them, than them of US. And.. they are who? ordering the commitment to indiscriminate murder? as the bad guys?. The bushites bombed, the willing to placate Samarra, to only get killed, more American Marines. And for what but the few bucks wasted on the ammo?.. to get killed more "uncounted" Marines naturally., for the bushites are waging to make a real killing on this American sacrifice. Look, we can sit down with each arrested bushite individually, talk to them about wether they are personally committed to thieving further from America, all to die benefitting the likes of an Enron, and those that thought they'd get away from the crime scene of 9/11; before deciding ultimately, wether the born again have any real hope left. The bushites are enemies to God, Amnerica, Johnny, and themselves truly dying US for. We can see how easy the manipulation of the American soldier's mind is, they have no ability to rationalize while speaking, and as a consequence, have no understanding of their bad-faith based satanic system. George W. Bush Jr. threatens the grunt soldier to always fear what they don't understand, like, the wisdom contained within the American Constitution, or the dreaded, free to speak any mind Internet. Terrified of growing up like real men do to make their own decisions in this big world, the bushite nurse instead on the teat of sadomasochism, as bushwhore nazi dumfuk slaves. Dying brain dead limp as noodles mushing. And why? All because Americans don't want to trouble American Talk radio with our freedoms. I again challenge Art Bell, Limbaugh and O'Really to a three hour debate entitled, "Wizard's War of Words: A Super Duper Special" all about their un-worthiness to censor our screams for Justice.

Joy to the world, or more misery and suffering under the demon anti-Christ, Our lawlessly evil Mr. bush Jr.? It is up to you really. Where do you want to go? Up, or down? You decide, but don't wait until forever never coming; these times demand for the victim, some real accountability. It is the power of our nature to being, that demands a call to arms against the war crime instigating, nine eleven perpetrators. Military commanders who don't support the arrest or execution of said individuals: bush, rumsfeld, and condi, are traitors guilty of mutiny.

/ / because having photographers or reporters present could have interfered with the count \ \

What we do now is accuse ES&S, along with Diebold of falsifying the election, then when they're pressed to prove "their" findings, they'll tell US, they can't, no ballot trail. Their convictions on our accuracy is misplaced. Pen and paper with ballots secured in locked boxes that never leave public scrutiny is the answer. Those who deny US that privilege, are enemies of freedom and democracy, wether they know it or not.

What for you say?, up for a challenge?

Your, coming to town, lovable loyal American King,

Johnny Wizard

--

http://www.awesomelibrary.org/Classroom/Social_Studies/Government/Fraud_in_Voting.html

/ / But not until Friday did they begin to spill into the more conventional news media. That's when the Cincinnati Enquirer reported that officials in Warren County, Ohio, had "elocked down" its administration building to prevent anybody from observing the vote count there.

Suspicious enough on the face of it, the decision got more dubious still when County Commissioners confirmed that they were acting on the advice of their Emergency Services Director, Frank Young. Mr. Young had explained that he had been advised by the federal government to implement the measures for the sake of Homeland Security. \ \

MSNBC Covers Voting Problems

/ / He said that there were 90,000 more votes cast in Ohio than registered voters

He said that all the irregularities in Florida and Ohio have happened in counties using non-paper-trail e-voting from the companies run by Bush's friends. \ \

--

/ / Meanwhile, the U.S. continued its targeting of medical facilities in the city. A makeshift clinic that is serving as the main first-aid facility was bombed this morning after U.S. and Iraqi forces took over Fallujah General Hospital early Monday. \ \

--

Praise Jesus! I killed ten lawless bushite disciples of the demon anti-Christ today, and I'm just getting started.. Praise Jesus!

/ / Here is a city, surrounded and cut off, whose male population between the ages of 15 and 50 faces being ``put to the sword'' by the US military, and no one in the media can stir himself to raise an objection. \ \

We all can only hope and pray all US Godly innocent people will wake up, and starta' hunting bushite to the ends of this Earth. There is no pleasure greater, than destroying fascist nazi bushite grunts, to save the lives of the innocent they target for pillage and murder. Enemies of America are the cowardly and soulless disciples of the demon tyrant anti-Christ, Our evil Mr. bush Jr.. Disciples of evil who war God as our enemies in attempt to escape bush, condi, and rumsfeld for the crimes of nine eleven. No dice, for Johnny's now, truly coming around like some kinda godly American Man of Virtues most can not even begin to understand. Don't be afraid my brothers and sisters, unless of course you're a bushite, for as a Christ Crusader I'll kill you myself, before allowing you to murder another innocent soul in My name. "Death to the bushite instead of our good friends and family", is our King's reply. Bushite commanders responsible for ordering the irrational bombing campaigns in Iraq, (to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,) such as in Samarra and Falluja, I am now offering a ten million dollar bounty on, per. If your organization bags three or more, before December 25th, there will be an extra something under the Christmas tree this year.

Do you Love me now as the Son of Man you'll ever know?

King Johnny Wizard

P.S.

(to steal profit for rumsfeld's partners, while sacrificing weak and stupid American teens in the process,)

See? Evil bushite kill "other" bushite to steal our freedoms and money, and US true freedom fighters would kill'em too to defend our innocent families. Like I said, un-principled nazi facist savages is the un-American enemy bushite without contention but for lifeless corporate censorship on our core values. Demand our voices be heard, or die not trying to do any greater. I'm serious this time.

God bless America - Now, let's arrest or kill US some enemy bushite, what do you say People?

--

/ / "I have no other choice but to resort to extreme measures to protect the Iraqi people from these killers and to liberate residents of Fallujah so they can return to their homes." \ \

American Patriot Warriors, kill Allawi as our number one, Iraqi People killer. Thanks in advance my friend.

The biggest most best Johnny Wizard international broadcast ever! Don't wait! Get your own copy today! While supplies last...

In Fallujah, U.S. Declares War on Hospitals, Ambulances
http://newstandardnews.net/content/index.cfm/items/1208

snpd

Or, is it another of those, why bother-who cares?-fifth degree felony things?

--

/ / Despite this, the Bush administration denies any responsibility for the missing explosives. \ \

Nor for sabotaging the ORHA for franks and rumsfeld to rob the pro-Iraqi central bank. It's just more American deaths as dumfuk sacrifices for the evil anti-Christ, like bush and rumsfeld committed as stolen from America on 9/11. Who cares about America Limbaugh would quietly trumpet, he's making a killing like Art Bell and O'Reilly do, keeping US masses PORTRAYED uninformed and ignorant beyond belief. Did you hear? Mr. bush is the

most popular President ever ellected!

--

/ / Not one "chicken hawk" or a clique of shirkers, but an entire platoon of seventeen soldiers decided to face arrest rather than die needlessly because THE MAN doesn't support our troops. \ \

/ / stupid people prefer President George W Bush over Senator John Kerry by a 4-to-1 margin \ \

--

Getting Started

<http://www.yubanet.com/artman/publish/article_14748.shtml>

/ / ..a call for immediate inquiry into evidence that suggests high-level government officials may have deliberately allowed the September 11th attacks to occur. \ \

I would suggest all living American medias to join the 911 Truth Statement, then, if we did that, America might settle her own affairs, and I could then just center on my upcoming "Wizard's World Wide Wonder Tour" plans currently in the finishing stages. This great World is yours, treat yourself well. A National radio program is just waiting for your call on what you know now about freedom.

/ / So, at the time of the invasion, the Iraqi government had already disclosed and disarmed, and was thereby in compliance with the major provisions of UN Security Council resolution 1441, to which Bush refers in this quote. Diplomacy had, in fact, worked. \ \

Demon bush spew "Saddam Hussein would still be in power, he would control all those weapons and explosives, and could share them with our terrorist enemies."

Yet, it was rummy and tommy franks who TREASONOUSLY threw out the State Department's semi-thought through ORHA plan of, securing the weapon sites and preventing anarchy, and, it was the IAEA that had tabs on the weapons before the bush demon kicked them out irrationally. Done so to instigate looting and the deaths of American soldiers, all so to allow traitor franks and company to rob the public bank of uncounted billions, along with the museum. See? bushite would truly get the dumfuk cowardly bushite killed for a stolen dollar, and US real men would kill bushite too, as so would this eternal Universe, done so to protect

our loving innocent families. Being a bushite disciple of the evil anti-Christ, is something all wish hardship and death for instead of the innocent they, un-apologetically, as enemies of God, openly target for rape, pillage, and murder. Johnny Wizard pays ten cents for every bushite tagged and bagged, ten cents. And, an even share of at least 3 billion to those who kill the bushite commanders responsible for the criminal bombing of Samara. Hint: You kill the individuals who ordered the bombing MURDER campaigns of Samara, then stand up proud to our media as a real American soldier should or would, and say yeah, I killed the nazi bushite traitors as a true Patriot Warrior to protect my fellow brothers and sisters. (Optional close: "All hail Johnny!) Do that, and I promise you'll get what coming to you: all the riches this world of God's can afford., But don't, as bushite nazi soldier grunt, and likely die sacrificed as a coward and a traitor to the Human cause of liberty and Justice for US all. WARRING military corporate commanders that don't support the arrest of those responsible for 9/11, or the return of all stolen assets taken through the neo-con's war crime actions, we should all just frag for America.., what do you say Patriot(s)?

/ / Marine Colonel Michael Schupp dismissed the sputtering dialogue as a sham. "The negotiations are a ruse. They are just stalling for time," he told reporters near Falluja. \ \

What negotiations? Allawi has repeatedly informed American soldiers he has no evidence whatsoever, establishing his therefor, FALSE allegations. Mr. bremer's Zarqawi moves freely throughout Iraq, including the green zone. Question: When all those children were targeted for murder, by what was reported at the scene with remote controls in one truck and under the street, why would Zarqari take credit for it even if he was truly responsible? And so on..? I think Michael Schupp is a fuk up dumfuk, who thieves from America for bush, and who clearly doesn't have the intellect to command anyone but himself to his own rightly death. Why would Zarqawi target children, when bushite nazi grunts are all so close by coming and going?, for days at least constructing stuff?, that rumsfeld broke?, then over billed to fix for even further takings? Remember several un-arrested bushite NAZI commanders openly confesses to AMERICA in having no public objections about murdering the innocent, without even having a military objective established in some cases, but only for to sacrifice another soulless bushite grunt/slave, all so to enrich the comfy neo-con war mongers left back

home in our luxuries., Luxuries from where America's very own grand parents are left un-treated as the still victimized.

What do You think People? Needlessly murder thousands upon thousands irrationally making no sense, or, return stolen Iraqi assets while arresting American enemy Iraqi People killer Allawi, along with maybe Michael Schupp while we're at it? For, who cares about what is right, just, or true is this dying world of Yours?, er.. I mean bush's. You remember, Saddam wouldn't let the inspectors in, and that was why bush took a serious look at this real world situation and decided unilaterally, what the hell, he'd start a war against our Humanity left "undefended" as an enemy to everyone. (Satan's wager, that if i Remember correctly, Christ/God refuses(d).) Evil is Our Mr. Bush Jr.. Thank Johnny we had the time to intervene finally, now eh? Spooky is not the word, but baby, we sure could be on the winning side of this evolution by revelations thing. We are it together, bound for freedom through the practice of Justice, or bound to tyranny through acts of ignorance, ignorance propped by fascist censorship regarding our news content., Censorship of our human cause for liberation.

It is up to You brothers and sisters to demand evidence a requirement to convince ourselves on who shall be deemed the free person, or be sentenced to jail without trial somewhere. Tyranny through criminal dictatorship, or democracy expressing the true will of us people? It is all up to you.

"the Trial and Conviction of Our Mr. bush Jr."

--

/ / Wednesday on the campaign trail, responding for the first time to the Al-Qaqaa story, President Bush said that John Kerry, in using the story as he has, was ``denigrating the actions of our troops and commanders in the field.'' \ \

It was the actions of rummy and franks, not the mindlessly obeying war crime instigators as iliterately truly stupidly dying bushite dumfuk nazi grunt teen soldiers.

--

/ / How many more thousands will have to die before God will tell Mr. Bush to get out of Iraq? \ \

--

/ / Eighty percent of Bush supporters believe Bush wants
to participate in the treaty banning landmines. \ \

--

No Retreat, No Surrender
by Bruce Springsteen

/ / That's why "united we stand" -- that's why "one
nation indivisible" -- aren't just slogans, but they
need to remain guiding principles of our public policy. \ \

--

/ / "It is also important to note that this was the main
high explosives storage facility in Iraq, and it was
well-known through IAEA reports to the Security
Council," Fleming said. \ \

--

/ / AMY GOODMAN: So again, this top news, as many as
58,000 absentee ballots have gone missing in Broward
County, \ \

/ / Broward county commissioners had purchased the
touch-screen machines from ES&S over the objection of
Elections Supervisor Miriam Oliphant; notably, one
commissioner's campaign treasurer was an ES&S lobbyist.
Governor Bush responded to the Broward fiasco by firing
Oliphant, an African-American, for "misfeasance." \ \

/ / Garner's 90-days-to-democracy pledge ran into a hard
object: The Economy Plan's 'Annex D.' \ \

-

Oh my God!!! - Johnny Wizard talks to America nationally broacasted!

<http://la.indymedia.org/news/2004/10/118305.php>

Oh my God!!!

Get your own copy! Wow!

-

/ / Pentagon officials said a facility housing 380 tons
of (now missing) explosives "was not high on U.S.
commanders' list of sites to guard." What was high on
that list? Spokesman Scott McClellan said we had to
"make sure that the oil fields were secure." \ \

/ / 'Those ammo dumps have been looted and raided, and
kids and our young American forces are being shot at

from weapons stolen from the ammo dumps that this president didn't think were important enough to guard,' \ \

Who cares?

/ / Roughly half of the $5 billion in reconstruction funds distributed by the U.S.-managed Development Fund for Iraq cannot be accounted for, according to an audit commissioned by the United Nations. \ \

Yawn.

/ / A highly detailed program, begun years before the tanks rolled, for imposing a new regime of low taxes on big business, and quick sales of Iraq's banks and bridges-in fact, "ALL state enterprises"-to foreign operators. \ \

Big deal. To the war mongering mass murdering thieves go the stolen spoils., as the bushite's devolving american new century would say.

/ / The American public is told that this butchery is part of keeping up pressure in the war on terror. All these terrorist brides and grooms and terrorist kids rushing round in party clothes ; all the terrorist musicians and the terrorist wedding guests, by God, they have to pay for 9/11 because (as millions of Americans still believe), the Iraqis were responsible for 9/11. \ \

50 percent of Americans polled support bush, and the vast majority of those believe Saddam Hussein was behind the Sept. 11 terrorist attacks, and that freedom by justice through understanding is too complicated and wordy, ...yeah. and so corproate news control is lying to US all, cheating everyone, including You, who cares?

Americans murdered on 9/11, and those responsible are let to go on their way. Yeah, and so what?, for Americans are absent any real Patriot warriors willing to protect their now officially perverted Amerkan flag. Look at the nazi grunt soldier's uniform, and you'll see. All bushite nazi grunts, who fight cowardly with rapists, torturers, and South African apartheid death squad goons, wear a flag reversed from the original design. The bushite attack the weak, innocent, and practically defenseless as betrayers to God, freedom and the human cause. Yeah, and so what?

/ / The administration not only doesn't admit mistakes, but also doesn't believe in accountability. \ \

But for the sacrifice of dumfuk bushite nazi grunts.
Leaderless degenerates that any real human would destroy
to protect their innocent families. Innocent families
the bushite bombers commanding from Florida murder for
no good reason but get more soulless bushite teens
rightly killed, all done so to put more stolen money in
the pockets of their ungodly satanic cult. Solution:
hunt to kill those left un-arrested who willfully,
criminally, ordered the needless bombing of Samara to
get killed the bushite grunts for the further thievings
of the bush backer traitors who bask in your stolen
expenses.

Support calls for open dialog.

-

> More of the same garbage! Your comments don't even make coherent
sense!
>

Read up on the "ORHA", from the leading newspapers of our time,
then make up your own mind, on who is paying instead for franks'
"unsolved" crime(s).

100 Facts and 1 Opinion
The Non-Arguable Case Against the Bush Administration
<<http://www.thenation.com/doc.mhtml%3Fi=20041108&s=facts>>

/ / 67. The Bush Administration blocked a proposal
to ban the use of arsenic-treated lumber in playground
equipment, even though it conceded it posed a danger to
children. \ \

-

An open letter to the news media of America by the webmaster of
WhatReallyHappened

http://www.whatreallyhappened.com/let2ed.html

/ / And that is why I don't believe the headline that
voters are split evenly between Bush and Kerry.
It is just too fantastic. \ \

-

The End of Evil?

Hey! Art Bell! I recorded our conversation
yesterday!!! Now, many people may not know, but Art
Bell purposefully with malicious intent, lies to America
when he states, he doesn't censor America's voices for
Freedom. The first of THREE calls I made to Art Bell

yesterday within his first break, was on the topic of polls. He asked myself between the first break, - off air -, what was it that I wished to talk about? I told him, I recently discovered that the opinion polls done in America by CNN are tabulated by firstly insuring half polled are known bush supporters, and half are known Kerry supporters. But by doing so in such fashion, 99.9 percent of America could be unapproving of Kerry's politics, but Americans who trust the media's intelligence would never know of it. He abruptly hung up on me. I called back. Recorded. (My fricken modem program didn't start immediately so I had to stall.) I said something like "Yeah, it's me again Art, I don't know weather you hanged up on me, but I just spoke to five seconds ago about that poll idea, what do you think?

R E C O R D E D
http://la.indymedia.org/news/2004/10/118109.php

Art Bell "You'll have to find another phone line"

[He didn't explain why the West of the Rockies line was not in service [of which he ended using twice publicly in the following call-in segment]]

Johnny "Okay.. what did you think of the poll idea though?, did you think it'll work?"

Art Bell " YEAH, YEAH, COOL".

snpd

a dream come true, depending on your views,

Pleased for thanks and listening,
over and out willco,

Johnny Wizard

-

Treason this is.

/ / The 46-page report argued that Pentagon assertions of a link between al Qaeda and Iraq's President Saddam Hussein were not supported by intelligence reports on which they were purportedly based. \ \

Treason this is.

-

/ / As for who in Iraq warrants comparison with the political leadership of Nazi Germany and its policies of

reprisal and collective punishment in occupied Europe,
it is the American ruling elite, not the resistance
fighters of Fallujah. \ \

/ / In the ultimate Orwellian twist, they were turned
into "unpersons"; even their names were withheld from
the media. Any president who endorses such atrocities,
as Bush has repeatedly done in speeches, is against
everything that America purports to stands for. \ \

/ / If this is the way the majority feels, then
suppressing the realities of Iraq serves only to deprive
the American public of the real facts enabling our
government to ignore the will of the people. This is
not conducive to a truly safe, secure and free society. \ \

> 109 Italian Soldiers Dead So Far From DU In Iraq
> <<http://rense.com/general58/frff.htm>>
>
> / / denying the significance of such data is purely
> acting out of ill faith, and the truth is that our
> soldiers are dying out there due to a lack of adequate
> protection against depleted uranium". \ \

The Last Straw - Carl Worden Makes His Vote Official
<<http://www.sierratimes.com/04/10/20/carlworden.htm>>

/ / What I do know is that any party that would find
the words, "Protect Our Civil Liberties" offensive or
even threatening, is a party I won't belong to anymore. \ \

-

For What Other Hope?

/ / The military insisted it hit targets linked to
Al-Qaeda operative Abu Mussab al-Zarqawi, Iraq's most
wanted man, who has claimed responsibility for a series
of car-bombings and hostage-takings in the country. \ \

All true American soldiers must stand against this "the
military" person, and kill it. Allawi, has already put
forward that he doesn't have, nor has he seen one shred
of information linking Zarqawi to his false, untrue,
wrong accusations regarding an entire city he leaves us
unconvinced for blame by bombing. It seems I will now
be taking command of the entire American Military for
this one time defensive operation. Insist evidence be
made forthright, and kill these anonymous un-arrested
"the military" person(s) along with anti-Iraqi Allawi.
Then, we hunt down and arrest or kill those responsible
for ordering the needless bombing of the Samara
citizenry. See?, the ungodly and tyrannical bombing of

the good people of Samara, brought about now approaching more than one worth acknowledging DESERVED deaths of the ungodly bushite teens, the bushite teens who didn't need to die thoughtlessly for the bushmob. Think: Any real man would kill an enemy bushite to save the lives of the innocent they admittingly target for plunder to please the neo-con God haters. The bushite soldiers that are now commanded to die sacrificed in Samara, will die directly from the instigated criminal bombing assault against our good friends, the Iraqis, bombed irrationally by the ungodly, unwise, and seriously un-American evil anti-Christ disiples, John Batiste, and the self confessed Iraqi People killer, Allawi. Allawi blames a city, Johnny blames Allawi. Kill un-arrested Allawi, and we'll save some GI's lives in the process of winning this battle against the dark evil forces of blind and stupid tyranny.

I, a man of many masks, beg again asking you to help me gain our talk radio access. America truly needs you, and so do I. Art Bell forbids America to hear our calls for Justice. The bushite fraudsters fear of me is that I actually understand regressive tax policy, and the judicial principles enshrined indivisibly within the holy American Constitution.

snpd

Believe in yourself, for what other hope do I have?

Johnny Wizard

-

<<http://www.wsws.org/articles/2004/oct2004/iraq-o20.shtml>>

/ / a meagre $2 million has gone to healthcare, $19 million to water projects and sanitation and $300 million to rebuilding of the electrical system. \ \

-

Do We See A Pattern Here?
<<http://rense.com/general58/pattern.htm>>

-

<<http://911review.org/Wiki/StanleyHiltonLawsuit.shtml>>

-

These following bushite terrorists kidnapping Americans, look the most so far like the likely secret Zarqawi gang, no? Maybe, someone should ask bremer if he has

ever had words with the bushite group, "Custer Battles"?

/ / When Isakson objected to the scams, two unnamed "top company officials" burst into his office with machine guns, \ \

-

Who is Hamad Hamoud?

/ / It turns out that the ``major victory'' over the Iraqi resistance consisted of American forces blasting away indiscriminately in Samarra's city center, killing innocent men, women and children, damaging property and buildings-including a mosque and a kindergarten-and further enraging the local population.

The Samarra incident in its various aspects-the battle itself, the military's claims, the media's role-is a microcosm of the US occupation of Iraq. \ \

Exactly. Prior to this most recent war crime against Samarra, there had been dialog to allow bushite thieving troops in without dropping bombs indiscriminately to murder our friends, (and then to get killed the evil bushite in rightly retaliation). Those who ordered the NEEDLESS bombing campaign (who I advocate the open public execution of) didn't like that prospect of saving GI lives to lose money for the bush junta though, and, Zarqawi, my god, going on about how he wasn't interested in freeing the Iraqi people from tyranny didn't help the bushite anti-Christ cause much neither, especially with Bigley still hanging on alive. (Oh yeah, killing Bigley sure suited the women haters bush and blair just there eh?) Killing un-arrested bushite, (who fight for rapists and torturers who thieve from America, while attempting to censor our voices calling for real Justice,) is the best anyone can do fighting for true freedom. Kill an irrational censoring fascist bushite, and you've saved the potential lives of millions of innocent American people. Innocent people the bushite nazi soldier freely confesses to targeting to profit the corporate bushmob back home who continues to rob from the nation because of it.

Witness this pro-bushite Knight Ridder article, of which, if I were "officially" recognized, would demand swift and immediate public accountability.

/ / Some noted that while tribal leaders in Samarra sought government assistance to rid the city of insurgents, leaders in places such as Fallujah have been more supportive of the guerrillas. \ \

Some noted? Who? The head of Sammara's political affiliations, comprised of more the 100 separate poltical groups, in Samarra, asked that no killing of innocent women and children was needed, for, the "pro-Iraqi forces" would be allowed to come in if they obeyed themselves. (Like as if any Samarrian would ask for help by attacking residential communities blindly as the evil bushite almost always without exception do.) But no, they go in recklessly bombing, raping and pillaging, shooting innocent women, men and children, then tell 1200 or so soldiers to sit in the middle, and stay put, indefinitely, and Knight Ridder tells US all how john batiste, a Frenchman, made such a successful go at it. Is john batiste going to sit with the loyal troops in the carnage he ordered, and bite the bullets for the team? Hell no, he's probably commanding from Florida, basking in the sun with his personal cut of that two billion with buford blount's two timing nazi whore of a wife.

Hmmm funny..

snpd [forgivness only comes if one truly understands enough to ask.]

/ / The U.S. troops made only limited use of aerial bombardment and artillery, Batiste said. That limited civilian casualties and damage to city buildings. \ \

An admission that the thieving bushite dumfuks target for murder us innocent people, and have so far figured, that by not committing as many "precision strikes" with guess work or anonymous tips, they wont anger so many?.. I think they may be a little late for that considering when they arrived, (like they did every time), they needlessly still murdered unarmed, innocent, defenseless whomevers for whatever. Remember: there was no need to bomb or shoot any innocent people, for the terms negotiated with Allawi were to enter AS THIEVES without any bombing needed. Will john batiste tell us the lawless rapists, torturers, and apartide death squad goons he fights our Humanity with, bombed less Iraqis in hopes to anger less Iraqis?, and if so, why not give up on the bombing innocent pro-Iraqi part all together?, then also the raping, torturing, and pillaging part by tracking down the actual criminals while we're at it? John? No, can't do that, for those who ordered the needless bombing runs over Samarra would be tried publicly, then shot dead by surviving Patriot American Warriors, and that demon traitor, Our Mr. bush Jr. with rummy, would meet the same fate for the crimes of 9/11 back in New York City. And of course, the Iraqis

would get back everything that was stolen from them with massive interest paid for by those personally responsible.

The bushite bombing commanders figure, lie to the entire first division about the true threat levels, their weak minded dumfuks anyway, they can't stand up proudly for their commitment to real freedom and democracy, instead they'll fall rightly dead and nobody'll hear to care anyway. Mr. bremer's double crosser "Zarqari" will get'em if need be, again. Could be. I watched "Who wants to be a Millionaire", a TV program in America, and the contestant was a Mr. Sheriff (who had just given up religion and joined the Israeli faith to continually thief), he was in the first Gulf War, and now, his own flesh and blood brother was serving for the bushite neo-cons to rob even more from America through Iraq in this second blast. The entire audience questioned uncomfortably his answer that he had no idea who cheney is. I kid you not. You can be sure that episode won't be running in syndication. As a dumfuk bushite nazi grunt, dying of radio-active contamination, does he have any real care for his likely now dying too or already dead as forsaken brother? I doubt it. Godless nazi bushite are as stupid as they are evil disciples of the demon anti-Christ: the most hated and reprehensible illiterate savages as so well documented in the lights of Man. Ten cents for every bushite bagged and tagged, ten cents. Twenty billion if you can magically teach them real quickly, to understand honor, virtue, heroism, and the meanings of the American Constitution.

/ / If their political goal is to have all the major cities full of people that really, really hate the Americans, then is this really a victory?" Cole said. \ \

Well of course! As parasites led by the wims of a, behind the scene bombing campainer, the bushites die cowardly for the billioniare bushmob to profit robbing from the folks back home left un-defended.

/ / Some Samarra residents and a major organization of Sunni clerics have condemned the attack, and even the province's governor, who appeared with Batiste at a news conference Wednesday, said he was shocked and surprised by the operation. \ \

See how the writer(s) of this news wire claim that those who didn't support such lawlessness are only some? You'd figure, since the news piece repeatedly refers to the wanting of such barbaric attacks, it would at least site one legitimate quote.. instead it pulled this...

/ / "We didn't have any intention to take war actions. We were always hoping for peace," said Hamad Hamoud, governor of Salahuddin province. The insurgents, he said, ultimately left the Iraqi government no alternative. \ \

Governor of Salahuddin province, who hasn't been quoted for anything in the world, except for this that he wasn't. And besides, from what I understand, Salahuddin are provinces, not a province. Or perhaps Knight Ridder is referring to the governor of Salahuddin, a teensy tiny ghost town in Kurdistan? Regardless, this Hamad Hamoud must be a huge nobody then, and the best the bushites could get to float their patently false story line that leads to the untimely death for Americans. Sacrificed for the anti-Christ. But, I digress.

Listen: Is a man who would kill an un-arrested bushite rapist, or kill an apartheid death squad racist who murders only black people because their darker skinned, or who joyously kills a bushite sniper, (a sniper that freely confesses to shooting innocent women, men, and children,) classified as an "insurgent" by the uniformed enemy anti-Iraqi forces I ask? Art Bell, the nazi censor, and his propagandizing bushmob ilk, is America's true enemy. Free speech must be spoken for, for the bushites of Talk Radio america, don't want dying America to think as a free America to speak on the top priorities of Your true survival. Use it, or lose it.

Johnny Wizard

-

/ / He described meeting an old man who was forced to watch his sons being tortured until he signed a confession admitting links to Osama bin Laden. "Tears were streaming down his face. I have no doubt they had as much connection with bin Laden as I do." \ \

-

/ / Yet when Sen. John Edwards led CNN's debate poll Tuesday night, the Time Warner network abruptly yanked it from their front, only to replace it 13 hours later with a blank poll. Edwards had been leading in the first poll 78-18.

Some 200,000 previous responses to the poll were deleted when the new poll was posted. \ \

The corporate news polls are a crock. Look at the literate world of Internet content. 99.9% hate the evil bushite lies that sacrifice American lives to profit

the criminal bushmob fraudsters. As I've told many, CNN and CBC execs know bush and rummy committed 9/11. Why? Becasue I've told them so, if they would seek to ask for only the facts to decide for ourselves.

General Ahmad funded Atta.

-

/ / "I don't want to die. I don't deserve it. And neither do the women deserve to be in prison in Iraq. Release the female prisoners that are held in Iraqi prisons. Please help them. \ \

/ / Iraq's justice minister announced Tuesday night that Rihab Taha, the female scientist known as "Dr. Germ," would be released from prison. \ \

/ / But then the U.S. Embassy said Taha and Huda Ammash, known as Mrs. Anthrax, would remain in U.S. custody for the foreseeable future. \ \

/ / Straw added: "At no stage did they abandon their demands relating to the release of women prisoners, even though they were fully aware there are no women prisoners in our custody in Iraq." \ \

/ / ..one air strike had killed eight people at the home of Hamad Hdaib Mohammedi, who was known for his opposition to the militants. \ \

-

BE AMERICAN

/ / Early reports said a U.S. convoy was passing by the celebration when the attack occurred. The U.S. military said later that American soldiers were taking part in the celebration but that no convoy was passing through the area. \ \

Yeah?.. but what about the comments made by the bushite child killer phil smith? Maybe he'll tell us again why innocent children were targeted for murder to get rightly killed loyal enemy bushite nazi brethren? Since phil smith isn't cogent as the godless, what can he know of his true meaning? What is phil smith's America where innocent children are murdered for his contempt of the America we remember? Is it honorable service where the leadership of the US military feels it is right to lie to fellow troops about what they are dying for as "THIEVES for bush"? Is it the conduct of a honorable creed to steal from US honest hard workers?, to indiscriminately bomb civilians with guess work and

secret paid informants while calling themselves dis-honorably in Your name pro-Iraqi? They are not men, for they can not stand proud on their false convictions, instead, they lie as cowardly traitors to the American cause. Is it the conduct of a brave crew of patriot freedom fighting warriors serving a just cause to bomb a city to teach our God something? Or is it my friends, the conduct of fascist enemy bushite nazi vermin led to die for not so secret criminal transgressions? A war mismanaged purposefully to benefit off the sacrifices of American soldier's lives, dying or being maimed to give in to lying criminal fraudsters that OPENLY rob from all American families like tommy franks did?, robbing the principles of Justice once thought respected, and only expected in the true land of the brave and free? If you were face to face with a mass murdering bushite cluster dud land mine dropper who attacked residential school districts, would You not, kill it for the begged mercy of God and children everywhere? What we ideally need to do is, find who has been responsible for ordering the indiscriminate bombing campaigns, and kill them openly, rightly, publicly, for all our World to see. Killing the NOT HIDDEN enemy bushite is the best any human can do for the survival of our species. When you see the bushite, spewing their hatred for humanity while censoring the voices of reason and freedom, justice and liberty, do US all a great big favor and kill the nazi fuck for the love of yourself, God and country, please.

/ / It added: "Unimpeded access throughout the city for Iraqi security forces and multi-national forces is non-negotiable." \ \

IT ADDED? Er, sorry enemy of humanity bushite dumfuks. US men out here, hunt to kill un-arrested bushite rapists, torturers and thieves that hide behind the stolen American uniform as ungodly enemy savages. Third Infantry for example: No American present. For if there were, Saudi Wahabbi child killer buford blount would be dead at the hands of US pro-Iraqis for TREASON. The slave bushite die as godless fascist cowards who target US as the innocent to die themselves for benefitting the further thieving of America, The People, back home they leave left unguarded. General Ahmad funded the mastermind 9/11 ring leader Atta. I HATE bushite. Killing un-arrested bushite is what all real men of America should get started on, like with firstly, George W. Bush Jr., condi and rumsfeld for 9/11. Then we need to make some demands of the corporatist censors who deny our Humanity free access to the substantiated impartial facts that stand irrespective of ideology or

spin doctoring. Plutonium in depleting uranium is scientifically bad for your health without question, for we do understand the measured effects of radio-active contamination. How can "our" corporate news media continue to ignore Our growing concerns on the subjects of Your dying freedom and liberty my friend? "They" can't. America's multi-millionaire corporate news producers need to be made accountable, when it comes to the refusal to allow public reporting that INNOCENT women and children are being held hostage in our names, and in some cases photographed raped or murdered by the still, un-arrested ungodly enemy bushite nazi evil forces. ENEMY!

/ / London - The International Committee of the Red Cross insisted on Friday that Britain does not hold any women prisoners in Iraq, and said it was ready to act as a mediator to help free British hostage Kenneth Bigley. \ \

The Red Cross said what? No mention of the two innocent "Sisters" held hostage? Who does the Red Cross serve on the issue of our human rights? Can they not be aware of statements reported widely on the specific issue of Bigley's commentary? Surely they do us a disservice when portraying ourselves otherwise by claiming Britain isn't involved in the criminal plunder of Iraq at all our vital expenses? Have they not seen, nor heard the big news about innocent Iraqi women held hostage by the terrorists? Should they not be demanding blair speak up for the human rights of innocent People being victimized by Humanity's mutual enemy, war criminal George W. Bush Jr.. and his mindless minions of dying godless barbaric savages?

/ / He repeated the kidnappers' demands that the US release all women from Iraqi jails. "Have some compassion for the [INNOCENT] female prisoners," \ \

/ / Blair pledges 'If kidnappers get in touch, we'll respond' \ \

As for the innocent women held against their will by the bushite terrorists, no negotiations for US by this "politician" of a "Democracy". He'll just pretend that he hadn't heard of the request, for the corporate media hasn't reported, therefor, he'll plead, implausible deniability. (Again, who's conning who here?)

The two innocent women were planned for release prior to the Zarqawi hostage taking according to Justice officials in the Iraqi government. Things that make you go hmmmm...

/ / Britain's foreign secretary, Jack Straw, said today that Britain will not meet any political demands to secure Bigley's release. \ \

Now they figure releasing the innocent women would be giving into still the just demands of the sovereign Iraq? Or, will they argue, persecuting the innocent is what the enemy bushite do to steal our human values of virtue and the American ideal? Stealing our Freedoms and Democracy? Again, bushite is the enemy of America, kill it.

/ / Iraq's [bushite] National Security Minister Kasim Daoud told a news conference in Baghdad that the offensive was launched in response to a call for help from Samarra's residents to tackle the insurgents in their midst. \ \

/ / "We were in talks with Prime Minister Iyad Allawi about the situation in Samarra, including reaching an agreement to allow Iraqi forces to enter the city. We were surprised by this military offensive," said Khaled Naji al-Samarrai. \ \

Khaled is leader of Samarra's political association.

/ / ...said [bushite] Daoud. "Even if they didn't ask us, we would have still gone into the city." \ \

Surprised? Hardly. The closer we get to saving American GI lives, and saving the lives of our children, the more likely the bushite's false deity G.W. will be arrested for mass murder on nine-eleven, and bush bitch Saudi wahabbi buford for all the needless subsequent murder rampages against our forsaken civilization. Do me and humanity a favor, kill the bushite traitors who steal our lives from Justice for enslavement of our human species through blatantly evil corporatist fascist tyranny. What kind of ungodly reality is bush taking US for where evidence is no longer a requirement to convince US who is evil? A criminal? The evil bushite bombers use "guess work" and paid informants to decide what neighborhood to indiscriminately bomb as targeted killings, while the rich corporate TV news celebs state how they're all so proud of what American soldiers are blindly dying for as. I say nah, bad idea, instead, we hunt to kill the self confessed rapists and torturers for the beginners.. Now, who's with me as a true Christ like Patriot God Warrior?..

Join me, I seek bushite then I destroy it for the love of God has no challenger.

Why Samara?

* Battle Of Samara - 7 Helicopters Downed, 147 Troops Killed
*
<<http://iraqwar.mirror-world.ru/tiki-read_article.php?articleId=25148>>

"Zarqawi" killed Berg in a building identical to Abu Graib, now he's been reported to have made a slight correction about mistakenly asking for the falsely imprisoned to be set free. No no... he didn't mean those women who are held against their wills without evidence regarding any alleged criminal impropriety, who are being held by child rapists and torturers. Zarqawi actually meant, those women who nobody knows of, except perhaps rummy who stated the Red Cross shouldn't be co-operated with when we're talking Our human rights and the falsely imprisoned. [LIKELY REASON WHY Samara was NEEDLESSLY attacked. Who commanded the NOT NEEDED attack in attempt to take US off the true criminal's path? For, that would likely be the "surprise" American GI terrorist killer in the flesh holding America's children hostage.] Then, Zarqawi went on about leverage with "Jews" and the "Crusaders", but, Arabs ain't so dumb, nor is Arab TV actually. There was a large Arab Jewish and Christian community who despised areil sharon as an enemy of G-D in secularist Iraq from the start before the fundamentalist bushite war crimes began there, and the Islamic faith holds the eternal Son of Man, Johnny Wizard in Holy god respect. Remember I represent the freedom and wisdom granted by Allah to Humanity through Jesus as Savior Hillel taught US all about oh so many moons ago: namely, to worship and love all things that God made. But alas, the illiterate nazi bushite are dumfuk slaves as enemies to freedom, and as consequence, don't think for themselves, or much about my true significance in this World of US gods suffering under their evil as criminal misconduct inflicting suffering misfortunes against our God's good graces. Being the goodie two shoe Creator has it's misconceptions let me all tell you. I have to deal with contending with the primed to die satanic bushite who tinks I as a Christ wanna be stick figure or something similar, am going to hang lifeless on a cross somewhere and just take their abuse forever crying for a God who never wrote the book on Sacrifice. Shhh... [The commi bushites are as fukin stoopid, as they are truly evil as enemies of life and this Universe.. So evil are the bushite, that they give even the Devil a bad name.]

/ / Witnesses said the American troops were offering candy to the children and were preparing to leave when the bombers attacked. \ \

So, the soldiers were there for the festivities, handing out cheap candies, taking credit for the plant rummy likely bombed then left these "soldiers" to have credited to re-built back up by themselves. [Don't want to be over paying Iraqis with their own stolen money right?] If true, it would be something to write home about, but have you heard of all the work GIs have done in attempting to repair all the damage they've criminally instigated against our innocent families? No you haven't because, for then we would be demanding a return of all stolen assets, and the arrest or public execution of the bushite torturers and rapists. Also, who handled the military contract? Imagine this: Halliburton is paid billions in overhead to hire the American government to take back over. Sounds somewhat familiar where military fuel shipments are bought then escorted by the professional military fuel transport units, but no ones asks, why should Halliburton off shore tax exempt billionaires, all of a sudden, now, out a nowhere, be allowed middle ground to almost take all the cash expenses?, from America's America?, especially since America is still doing all the paying for all the work being done regardless like they use to before Halliburton magically appeared in between? [The only thing Halliburton execs want is to be left alone in a mansion far away from conflict with the American tax payer paper work to do that they confess publicly to not having the resources to accomplish fairly!!! [TIGER TEAM]] Do the soldiers transporting the fuel now even wear COMMI Halliburton caps instead of helmets? Likely.. because they're so fuking weak and stupid as fascist nazi bushite grunts who die as enemies to God and Creation by forsaking the America I know of as once respected as universally truly admired. The bushite trash the Bill of Rights by saying it's no longer needed when fighting against US People. Then they demand that no evidence be used in reaching their guilty verdicts by Your american firing squads. Again, get your gun soldier and instead, kill un-arrested traitor, George W. Bush Jr. for America as a true Patriot only would. Or, why don't You bag US a proud enemy bushite for the Gipper?!? For what pleasure could be greater, than doing our Humanity and God such a great favor? I mean come on, they as our enemies, war the defenseless and innocent fighting with rapists and torturers without shame or apology, while demanding by threat of murder to US innocent, we all must slave as loyal bushite soldiers do, like they have no mind to believe in freedom. Liberty or Death? More like hunt to kill mindless bushite nazi vermin and save the precious lives of countless innocent others that they murder by dropping

bombs from our sky. We know who the boastful and proud bushite is, who is granted full talk radio media access in corporate america to trumpet the sacrifice of American teens to please their deity, George W. Bush Jr. and his war mongering thieves, who profit off mass murders and over billing like they did at 9/11 in New York City. The bushite slave is the enemy of themselves to life, love, and God.

Back to the story: Like if "anti-Iraqis" planted a bomb, or we're driving cars, wouldn't they use it to kill enemy bushite nazi dumfuks before innocent children? It is the bushite nazi forces who target the same locations repeatedly to kill only good honest hard working innocent pro-Iraqis trying to save the lives of their loved ones... or who have demanded a free press and democratic elections. But look, the corporatist press takes the credit in condemning the murder of children, but they don't call for the head of buford, mattis, russell or vacant minded phil smith? Nor, speak for ourselves when American paid for anti-Semitic invading Israeli nazi soldiers from tanks, shoot innocent Christian children as all of our life's enemies? A happy, waving goodbye child was shot dead from behind in front of UN workers by bigoted racist truly evil demonic Israeli nazi forces, and Annan never spoke a reported word for our Humanity, or against the condoned crimes of Jew killer areil sharon as reminiscent of Hitler's reign of terror. Where is corporate news america regarding their humanity then in reporting the care for the lives of our innocent children? All left there for US to witness the betrayal to America's freedom, and on all we stand together, justice for all, especially for You left corporately forsaken, but not so easily dismissed. For what does it profit our corporate News for your benefit my dying brothers and sisters? Or for our Dads or Mothers "lost" pensions if you make no effort to speak up for your rights denied, your values stolen, or for our freedoms and liberty you know not of as the portrayed enslaved by fascist corporate news tyranny? A corporate news agenda that denies US a place for human rights to life and liberty, is not an agenda we can continue to freely live with. And, I, as John, can not rule this complicated media world of immense toil and troubles, God needs Your help for your own salvation. I can only do so much as a wonder mostly to myself. I wonder if "Americans" can actually ever read this far into life's desperate pleas I've now put out for years and years going barely anywhere?.. Paradise on Earth where we get a little

credit could happen if we just keep dreaming along for a better future, a future where we are respected by the establishment for our goodly works of self determination. A cure for our sufferings? No the corporate professionals are not interested, nor taking calls from any of US with grievances. It costs them too much in stolen revenues to allow freedom reign.

Back to this Zarqawi thing.

If Zarqawi had planned the targeting of a convoy, why would they decide instead to hit the desperately needed treatment plant surrounded by mostly children, with no bushite convoy in sight ever, but a location troops had been REPORTED at for at least days to have built ALL BY THEMSELVES as so alleged? AND done after with bull horns edged children from the surrounding community to come witness their good deeds by getting cheap free candy? Does that sound like the prime time to plan striking at the ungodly evil war criminal bushite when it's widely known they're in a planning stage to bring around as many children as they can, convinced with bribes, there giving something back? A photo op? Where are the photos then??? Remember, bushite rapists and torturers have yet to be hunted down by US true Patriot forces, and evil bushite phil smith freely confesses to targeting children in America's name. Also, firstly, it was reported not one soldier was known killed. Yet, they must be all over the area for later to be reported ten wounded. How did they miss being so far away from such a lethal blow designed to kill evil lying enemy bushite nazi grunts to attempt true Justice for our World I ask? The details still remain at large on why a bull horn was used to attract MAINLY children to the scene of such carnage, however, the last report of bushite forces using a bull horn, was when looting and chaos was being encouraged all so tommy franks could get killed BUSHITE DUMFUKS to rob the central bank with several large trucks that came and went unimpeded by infiltrated enemy military forces. Same bull horn perhaps?

snpd

I don't know about you, but I hate bushite rapists and torturers celebrated by corporate American Talk Radio news censors. As enemies of God and all that is great with this world, the bushite bombers should be called out for a man to man fight for their core beliefs, or be rightly killed as better dead than allowed to continue in our names. No True Patriot can be proud of all the

warring bushite america is doing in Iraq to free George
W. Bush Jr. and "sexy" rummy from arrest for 9/11, for
that would be in support of the enemies to God hiding
inside our glorious American freedom fighter uniform.
We must weed out the war criminalling rapists and
torturers through evidence if we want to truly get
started on this warring terrorism idea, then we have to
hunt down all the stolen money bush foolishly stole with
13303, and give it back to Iraqis once a legitimate
representing government of the People there is in
control as the situation. Firstly to begin on that path
for Iraq however, Allawi must be arrested or executed
for the first degree murders he has confessed to already
being completely responsible for.

How to Avoid Becoming an Anti-American
<<http://www.dissidentvoice.org/Sept04/Alam0925.htm>>

-

Notice the corporatist bushite nazi whore reporters,
make no mention in their "reporting" that innocent
women are being held hostage by those confessed
by themselves as enemies of Freedom and Humanity.
(Suadi Wahabbi buford blount kills innocent women men
and children without apology, and there ain't nobody
there in the bushite third infantry American enough
to gun him down as the traitor he is rightly.)

See bushite, kill bushite.

We, as Humanity, are tortured or raped by un-arrested
sadistic satanic bushite vermins, hiding in the easily
spottable, cowardly American bushite soldier grunts
uniform.

See bushite, kill bushite.

/ / "Please could you on my behalf, on behalf of my
brother somehow ask Mr Blair to pick up the bloody phone
and call President Bush and ask him to take off the

blockade on these [INNOCENT] women prisoners?" \ \

/ / The appeal, he said, urged the kidnappers to free Mr Bigley for the sake of his family and as "a clear message to the British people to see their government's weakness and crime in not freeing [INNOCENT] prisoners held by [bushite enemy] coalition forces to spare their sons". \ \

/ / Working people in Britain should themselves be steadfast-in rejecting all appeals by pro-business politicians and newspapers to accept the need for any sacrifice in order to preserve the [CRIMINAL] occupation of Iraq. \ \

-

Enemies of US all Humans being

Nazi enemy the bushite truly is, when they try to take America away from the crime scene of 9/11 to protect their evil false deity, demon bush Jr., as enemies of US all Humans being.

"When we say serious consequences, for the sake of peace there must be serious consequences."

It is he, the demon anti-Christ, Our Mr. bush Jr. as true evil personified, who broke with the WORLD'S 1441, when LYING Saddam wouldn't let the inspectors in, and that was his as "America's" justification for ignoring these serious consequences by sending thousands of American kids out stupidly to die for all the wrong reasons as the bad guys.

/ / Therefore, the U.S.-led invasion did not ``enforce the just demands of the world'' since the demands were already being enforced without the use of military force. \ \

snpd

Take this recent diliberate criminal position to leave women, men, and children incarated without charging them for any criminal offenses, while spewing that means their "pro-Iraqi" freedom fighters, even if they also decide on their own to maybe torture some for sadistic wanton lawlessness. Obviously, the UNJUSTLY imprisoned are hostages held by the enemy bushite terrorists. Right?

/ / According to the Justice Ministry, an Iraqi judge had ruled there was no evidence of criminality to justify her continued detention. \ \

/ / "What are the accusations?" ex-U.N. inspector Blix asked in an interview Friday, referring to one leading Iraqi prisoner, Amer al-Saadi. \ \

/ / Iraq's justice ministry insisted yesterday it still wanted to release the women, although it said this had nothing to do with the kidnapping of Mr Bigley.. \ \

/ / "Under international law, no one can be held indefinitely without charge." \ \

/ / ``We have not been negotiating and we will not negotiate with terrorists on the release of hostages. No release takes place unless I authorise it.'' \ \

Obviously, the UNJUSTLY imprisoned are hostages held by the enemy bushite terrorists. Right? Who would disagree? Only liars, cheats, and murderers who target US as the innocent to please their satanic deity George W. bush who will rob from their very own families left back home undefended. Then, as soon as they're dead or maimed, they're of no further use to their fellow "loyal" bushite savages, who leave them to go alone without support to die in the gutter like so many others have from Gulf War I. Dumfuk the bushite is as our lying, cheating, ungodly enemies, who lay their lives down in cowardly servitude for bush and his billioniare banker company as their sourced intelligence providers.

The dumbuk bushite as TRAITORS soullessly war our Humanity to STEAL our treasures of love and compassion, justice and freedom, money and job prospects, forcing our Humanity to aim our loaded guns towards killing George W. bush Jr., the parasitic "leader" of their debauchery as self inflicting debasement. We, as Humanity, kill un-arrested evil bushite to bring mercy to our dying species. The bushite is too cowardly to hunt down and kill the rapists and toturers of the innocent, or the war profiteering war mongers because it's one of their own they DIE for. Killing bushite, is like killing the ungodly protection of self confessed un-arrested rapists of women, men, and children, who openly have confessed to murdering thousands of innocent people for no military objective like Saudi wahabbi buford blount has stated bluntly, when regarding the commitment of first degree murder against thousands of pro-Iraqis:

<<http://www.wsws.org/articles/2003/apr2003/bagd-a07.shtml>>

/ / [Saudi wahhabi] Major General Buford C. Blount, the field commander of the Third Infantry Division, told journalists: ``We just wanted to let them know that

we're here.'' \ \

all done for to sacrifice more of themselves for nothing
but being tyranically enslaved as the weak and truly
evil disciples of the enemy anti-Christ, enemies of GOD
and all our Creation. Saudi Wahabbi commander of the
third infantry buford blount freely confesses to
murdering innocent people to enrage US pro-Iraqis to
hunt down and kill easily spottable bushite soldiers
freely in retaliation; bushites, who hide inside the
cowardly American uniform. Okay for the newly wealthed
Saudi buford and his chatty wife cause they gets that
share of two billion American to get killed GI teens,
who are too stupid as iliterate dumfuks to think about
the values they lie about holding true. While dying.
The bushite hide in my America? Never. US true Patriot
Warriors will kill all un-arrested enemy bushite nazi
brethren who think they're going to get away from
torturing and raping our families as the innocent just
because they can say they're lawlessly "pro-American",
while robbing all our families of common decency and our
life savings to serve dying for tyranical lawlessness as
enemies to Johnny and GOD. Ten cents is what I pay out
for every bushite tagged and bagged. Ten cents.

snpd

<<http://www.newsgateway.ca/Fallujah_video_massacre.htm>>

/ / the mission guidance is to shoot anyone who is in the street. \ \

-

/ / Bush, indeed, has an audacious personal quality that
has somehow served him well so far: full frontal
repudiation of facts known to all. \ \

/ / This assumes that the armed resistance in Iraq is not
because a Western power invaded and occupied their
country, failed to provide basic services and security,
sold off key sectors of their economy to foreigners, and
installed a puppet regime, but simply because they don't
want democracy. \ \

/ / Bush explained that, for him, intelligence is not to
inform decision-making, but to be used or rejected to
advance an ideological and political agenda. His
dismissal is an affirmation of the politicisation and
corruption of intelligence that rationalised the war. \ \

/ / "I don't want to die. I don't deserve it. And
neither do the women deserve to be in prison in Iraq.
Release the female prisoners that are held in Iraqi

prisons. Please help them. \ \

-

/ / "We know that dictators are quick to choose
aggression, while free nations strive to resolve
differences in peace, [...] And across the world, the
enemies of human rights are responding with violence. "
"Instead of harboring terrorists," he said of the
Iraqis, "they're fighting terrorist groups." \ \

Best reason I've heard for killing the demon bush at
the hands of US freedom fighters.

Allawi: No release of female

http://english.aljazeera.net/NR/exeres/B2ED833A-25E0-4B52-9A8E-D25BE2C1DBBB.htm

/ / Paul Bigley told a British radio station that there
had been "a shadow of light in a big, long, dark, damp,
filthy, cold tunnel" when an Iraqi judge on Wednesday
approved the release of the woman scientist, as demanded
by his brother's abductors. \ \

-

/ / One would hardly guess from Bush's euphoric
descriptions of the new ``democratic'' Iraq that the
country's nominal prime minister is a murderous thug and
former CIA ``asset'' who is hated by the overwhelming
majority of the country's people. \ \

snpd
-

New Recruit

Destroying enemy bushite is a gift to Humanity, it is
saying you care for the lives of the innocent a bush
bitch nazi grunt freely confesses to targeting for
murder. Liars are the bushite, who steal Iraqi
resources, allow racists and rapists to commit their
demon crimes in America's name un-challenged, and who
absent mindedly bomb the innocent without just reason
given. All the while, labeling themselves, "pro-Iraqi".
The mindlessly evil attack against the Turks recently
with an ordered bombing campaign that actually murdered
people, sighted yet another, example of the bushite's

idiotic ungodly satanic barbarity against us the Humans as INNOCENT. After the carnage, the war criminalizing America into bushite commanders were advised, it would be better to pick other completely innocent families to indiscriminately murder while lying, for the demon bushite provisions come through that big ol' Turkey, and if the Middle Easterners eventually learned together of their fellow Turks who were murdered by ungodly enemy nazi forces for admittingly doing nothing worth noting, with the middle east's indirect help with essential supplies coming from somewhere in that surrounding billion man vicinity, you know, I know, we all know, "Americans" as NAZI war criminal enemy bushite, would massively die as the immediately recognizable to most everyone, and rightly too as leaderless cowardly, dumb, and real sadistic evil, dying at the hands of all US Family men. Being as bushite, the enemies to everyone, including themselves we've witnessed them already dying as nazi dumfuks who eat plutonium. Or, IED? They mean "sexy" rummy cluster dud land mine more like! (Just where is the Middle of East anyway?) History HAS learned these lessons already, while the corporatist bushite plays US just dumb enough through malicious censorship for plunder by parasitic bushite suicide, for a bushite has no soul worth defending. See?, the committed nazi automaton bushite enemy of America soldier has no mind to know freedom for the individual. Therefor my friend, kill the evil nazi George W. bush Jr. not just for me as Johnny, but for US all man who refuse to be subjected further as only counted by the corporate dictums to pronounce "pro-American": as those that go silently rooted backing "un-accountable" rapists and torturers of the innocent, the innocent, that the bushite OPENLY rob from with American's hard earned tax dollars funding. Funding through leadership directed towards their very own self destruction. See bushite, kill bushite, at least until we are granted living access to OUR corporate dead end news media to speak FREELY for ourselves without bushite lies tying US down for furthering that demon's hellish ungodly tyranny as an enemy to all our Humanity and Royal King Johnny.

Real Americans are those of US as humanity that believe in liberty as Justice for all. Demon bushite nazi whores, don't like those principles of freedom through evidentiary findings though, for their false deity, George W. bush Jr, wouldn't be stealing from the honest hard working blokes who live for a better day that way.

The Iraqi children did nothing to deserve such awful suffering and fright and death at the hands of the enemy

bushite. The bushite: who the demon anti-Christ states, are un-accountable to any rules of law in this Universe, like with his extremely foolish criminal decree, 13303. I kill mindless parasite bushite nazi enemy soldiers just for that alone as eternal defender, and I do it for to win some mercy for a real living God, who the fascist enemy bushite hold in their ungodly contempt as LIARS.

I have the backing of every real man alive on this planet, and we all know it. No voices of reason have apposed my factual claims in FREE Usenet, and Art Bell makes no attempt to defend himself as internationally painted enemy traitor, and that says a whole lot to Talk America. Why? Because Mr. Bell, the bushite propagandist, knows too, I speak and act truthfully, honorably, and righteously, while the talk radio american bushite lies, cheats and steals from America's America, that as bushite, leave undefended for criminal plunder in Your name call censored from classed enrollment. You have just as much a right to be here as I do, and the demon bush, he ain't no better than any of US when he is "excused" for the murder of well more than a hundred thousand confessed as completely innocent people on this planet called Earth.

The fascist control bushite, don't like You to think independently for Yourself, for we independents out here make them look as stupid as they are. Thank you very much for that not so secret info.

Through the pronounced bush demon's gaffes, embarrassments, and told complete total ignorance on subjects like the science of economics, the whys of constitutional law, or when the bushite takes credit for indiscriminate killing of our families and friends while parading it's all done in bush's name for our freedom, or for 9/11, doesn't fool me, and should get you thinking about reaching for your guns too, for bushite rapists and torturers will not walk this world freely un-accountable, for as long as we remain alive to hunt them down and kill them if so be. As the soulless disciples of the enemy anti-Christ, Our Mr. bush Jr., their "officially" granted legal immunity from all prosecution means nothing to me as a honorable man defending my humanity, or as living Creator, who brought all into this new world to be free, and can just as soon, take you all nazi bushite out the old school way.

REMEMBER: Demon bush is stupid, yaw, but he knows that he and rumsfeld with condi planned and carried out the

crimes of 9/11 with likely cheney orchestrating, don't ever forget that part when attempting assessment how good four more years in going to do for the state of freedom in Your dying world. Serious this situation truly is for everyone. Everyone.

Now, what are You going to do about this, DEMON George W. bush Jr. actually playing US like he would like to continue victimizing our dying world as ENEMY for four more years towards furthering lawless tyranny? Don't we already have it bad enough, that corporate journalists think there is actually some merit to George bush's re-election bid? Especially after that 9/11 thang? Then there is the needless criminal wars, fraught with embarrassing massive billion dollar criminal frauds as .oops, more government fuk ups? Then of course all the bushite thefts. I did a Internet Google search of "Tiger Team" and I found next to nothing in all the professional media corporate news outlets we have advertising on our information service providers top notched list as best sourced material. And that should say as much or more to you too, about who's really conning who. So, who cares about where this world is going? I do, and so should you too.

Johnny Wizard

/ / Cheney's command superceded the orders of the
Pentagon, the FAA or the White House. He is the number
one suspect in the murder of nearly 3,000 innocent
people. \ \

-

/ / The dark heart of this black-op beast is the
"Special-Access Program," created by Bush and Rumsfeld
in late 2001 and sent forth with this sinister dictum,
according to top intelligence officials: "Grab whom you
must. Do what you want." \ \

snpd

How can those who want accountability be termed anti-Iraqi? only through cowardly liars, is an American told America's not going to hunt down those who stole in their names for dying.

/ / "Few have though, as the town is still without electricity or water and full of unexploded bombs, our sources there tell us." \ \

snpd

Look, as this world's top cop, rare can a person understand my writing as such, but this, I'll make plain:

I'm here to arrest or kill bush and rumsfeld for 9/11.

If you can't as a man or woman of America help get those with the law who have stolen America's good name in other districts, so be it, to hell with you all. We, the America I dream about all alone, want bush and rumsfeld for 9/11, and we ain't going nowhere until our freedom to say as much is granted on higher ground.

However.

Billions upon billions of dollars have been stolen from soon to have once been, millions of American pensioners. Now, corporate news TV tells US, that money is lost to political indifference of the status quo getting to the bottom of rising back up with the stolen cash at hand, as if like, pulling a bunny rabbit out of your hat they might say.. Stolen Enron money for example: It's sitting in the Cayman Islands. Not hidden. In the Cayman Islands. The hypnotizing, sometimes devilishly clever billionaire bushite bankers will say, if you dare quest for further inquiry, "America will learn better for next time", then they pause, and look right back at you blindly.... waiting... and by golly, as if by magic, You just need to tell them: "there is always a first time for miracles". Solved. Our problems seem mostly related to the struggle, that solving many most critical of our issues, requires so little in effort by understanding, that many in the corporate world think the nature of truth just can't be so. Well... Simple. Demon bush doesn't want, [or seem at all interested] to having arrested General Ahmad, who according to the FBI, was the principle terrorist funder to the mastermind ring leader Mohammed Atta of the notorious 9/11 blame game fame. That should be all you need to know. The failure to con US into thinking otherwise is a ruse. The bushite corporatists mislead America away from the

freedom principles of following a criminal case to
attempt bringing about a resolution. Getting
those who done did do America wrong on 9/11 is where
true Patriots stand, and forever will. General Ahmad
and his bushmob cohorts need to be nabbed for public
trial when we're talking about truly fighting back those
that struck at the heart of America when they thought we
weren't looking in all directions. The bushite soldiers
are being led instead furthering as war criminals, for
we're told, they have no interest as the well being of
family and friends who love them back home getting the
wrong impressions. Don't let the bushite stand to get
away stealing for Uncle Sam. Because, Uncle Sam
wouldn't do that to our boys. Even to men who never
lost the dreams of a boy trying to be a good man, a
honorable and brave man, and a man that could be loved,
is no stranger to another believing in that same vision.

George W. Bush is a coward

<<<http://gadflyer.com/articles/?ArticleID=205>>>

-

/ / What is taking place in Iraq on a daily basis constitutes a terrible war crime. One has to go back to the Vietnam War or to the atrocities carried out by Nazi armies in Europe to find a parallel for such a systematic slaughter of civilians. \ \

They're mostly lifeless cowards the bushite disciples that drop bombs on the innocent and freedom loving.

snpd

-

Of Our Own

snpd

/ / "The helicopter fired on the Bradley to destroy it after it had been hit earlier and it was on fire," said Major Phil Smith of the 1st Cavalry Division. "It was for the safety of the people around it." \ \

Oops.. er.. the bushite mean

/ / Helicopters that flew in to protect the Bradley were then fired on from the ground and fired back, the military said in a statement. \ \

But the firing didn't come from the Bradley vicinity.. so, who cares how many Americans are lead to die then right? Traitors to Freedom, Justice, and Liberty are the enemy bushite liars who war God to steal from our Humanity with their blatant cowardice and betrayals.

snpd

Allawi "We intend to confront them and bring them to justice." Allawi is surely one wicked criminal enemy of Allah. Allawi seems to figure as the incredibly stupid, that by saying he supports the fight for Justice, he can't therefor be arrested or executed for the murders in Iraq that he has completely confessed to ordering.

Nor, apparently, under Allawi's brand of tyranny, can the enemy bushite be arrested for criminally destroying vitally needed Public utilities. or who has openly stolen Iraqi assets in the billions for "tax exempt" bush backers basking in the sun away from it all. All the while, working to convince God or Humanity that evidence is no longer required to convince ourselves on who is the guilty party.

/ / cheney: "[...] in fact these terrorist attacks are just criminal acts and that we're not really at war." \ \

Does America still hold a death sentence for the paltry criminal act of mass murder as so committed in New York City on 9/11 by bush and rumsfeld?, someone should ask private citizen cheney. You know?, cheney, who worked diligently to close the outstanding criminal investigations on said crime scene for whatever reason.

See bushite, kill bushite.

What Secret Mystery?

/ / Undated-AP - President Bush says a Senate report critical of his administration's reasoning for going to war in Iraq is "useful." \ \

Let's get something understood about the evil enemies of God, the hated degenerate soulless disciples of the demon anti-Christ, Our Mr. George bush Jr.. Both stated goals: ridding Iraq of weapons of mass destruction, and Liberating the people of tyranny, were sabotaged by indiscriminately assaulting the country, that had prior, under Saddam's leadership, granted full unrestricted access to do whatever bush pleased. [Did bush complain about prisoners not granted due process?, or demanding evidence as being an evident pre-requisite for real Justice to work for our Liberation?, or perhaps demanding right NOW where all the charitable oil-for-food funds went missing in his name?] There was nowhere in Iraq closed to immediate inspection, to illustrate as Kamel had proven with all relevant documents, [that he brought with him in several boxes],

http://globalresearch.ca/articles/RAN302B.html

that yes, in deed, the WMDs, some like anthrax, was burned beyond recognition back in 1992. But!!!, even if there were WMD uncertainly hidden secretly from everyone in Iraq, [along with Kamel claimed as highly reliable by almost everyone in bush's secret inner circle,] BUSH STILL, lowered his and his ilk's ability over the threat as so alleged, then excitedly sacrificed no less than three times 800, easy. making both claimed tasks far more difficult by paying his buddies for "whatever" over at commi, we're too dumb to know where American values went regarding Your freedom sucker, while leaving more

Americans to die sacrificed to benefit the bushite billionaire over billing backers. Left unaccountable by corporate american news standards of public accountability. It's only your direct family taken for by CNN and CBC's un-challenged selling of the bushite war crime spree my American friends. I've called literally hundreds at CNN in Atlanta, and as so, at CBC in Toronto regarding General Ahmad funding Atta, and bush's 9/11 plan dated 9/9, but they say, sadistically, it's not the story they've been presently still selling You about murdering now more than two hundred thousand innocent people as arguably, an acceptable alternative to not allow the support of Freedom and Justice in your real World dying.

Tommy Franks sabotaged the ORHA plan of gaining control over the nuclear facilities, [and preventing anarchy,] just so he and bush, [along with the clear collusion of the World Bank and IMF,] could "get away" robbing the Public central bank in Iraq of billions. Couldn't have been done as planned, without letting in those they begged by gun point to loot the Iraq Museum, so to collude with the bushmob's secret intent with furthering war crimes in America's name left forsaken. Bushdum Amerka.

http://globalresearch.ca/articles/ROT304A.html

/ / Do you mean to say that it was the US troops that initiated the looting? \ \

If you decide to use the tv antenna for your scanner, make sure to install a lightning arrestor on your antenna line, or unhook the scanner during storms. A nearby lightning strike can take out the RF amp transistor in the receiver's front-end. You should also run a ground wire up to your antenna mast to give the lightning a direct path to ground, which will help prevent it from entering into the transmission line.

Radio Shack has the pro 2052 on sale.

Living in a non-digital county this radio looks like an inexpensive
way of getting into computer "controlled" scanning.

Is the available software any good.
Is the radio worth it?
Are the frequency files in a std format (CSV or TXT)
Is their an S-meter or Band Scope?
Which software is best for the radio?

I would love to hear any comments on any aspect of this radio.

I am putting two scanners in my car. Right now I have a Firestik on a mag mount on the roof. I would like to split the signal so both radios can use the antenna, but I don't want to lose any signal strength in doing so. Or at least make any loss very minimal. If I have to add a second antenna, that would be better for me than losing some dB with a splitter.

Having said that, does a splitter exist that will let me share the Firestik but have the signal suffer minimal to no loss?

Thanks.

The DJ-G5 has a DC in socket on the side of the radio which can take a variety of voltages, I think(from memory) as low as 6V and up to about 15 Volts, although not much more than 13.8V is reccomended. For use with Rx only, try around the 12V @ half an amp and it should be fine.

Matt

Quite frankly, I was not familiar with the BC898T.

It also appears to be a relatively inexpensive way of getting into computer controlled (w/trunking) radio.

What software do you use?
What are the strengths of this radio (or weaknesses of the 2052) that influenced you to choose this radio?
Is the computer connection cable unique.

Does the software you use provide:

S-meter?
Band Scope?
Can you edit the frequency file in notepad, excel or other software?.

Thanks
Bruce

The Stridsberg multicouplers are a great product for feeding an antenna signal to multiple receivers.

But, a second antenna might be a better way to go ... depending on what you are trying to monitor.

For instance, if you were trying to monitor agencies on VHF, UHF and 800 MHz, it might be better to use the Firestick and one scanner for the VHF and UHF, and use the other scanner and an antenna designed for 800 MHz to monitor the 800 systems and channels.

Although the Firestick (and many other antennas) claim to work through 1000 MHz, their performance at 800 MHz and above is often very poor.

I use an 800 pigtail antenna (NMO mount on an "L" bracket) for the local 800 systems, and it is also useable for local VHF / UHF repeaters. Pigtails are available from radio shops, hamfests and mail order in black and chrome - to go with the color of the vehicle.

Uniden has free software you can download from their web site. They also have a more extensive version, that you can buy. Butel also has excellent software for this radio now!

I like it's size, layout, and controls. Audio is loud, and clear. It receives Mil-Air! It supports CTCSS/DCS decoding! 1000 Talk Groups. Modulation override, AM/FM/NFM.

The computer connection is an industry standard, DB9 RS232 Serial Port. Standard, off the shelf serial cables work fine, and are very inexpensive.

Here is the link for Butel Software: http://www.butel.nl/ You can check out the features there...as well as screen shots.

If anyone mentions the system lock-up problem, that the BC898-T had, it has been corrected with new firmware from Uniden. It should already be installed in current shipments, but if not, it's available from Uniden's web site, as a free download, and it very easy to install.

My IC-R2 is very sick.

It's not picking up ANY frequencies.

When squelch is at AUTO, I hear a faint hiss and it will scan MAYBE 10 channels a Minute! When at Level 1-9, I only hear a faint hiss when I hold the monitor (sql) key in.

Tried tuning my local FM radio stations (WFM) and nothing, just the same faint hiss.

I did a total and a partial reset with no luck.

A Pro-95 and AR8200 in the same room are loud and clear.

Nothing is rattling around inside! :\

What's wrong with it???? Should I fire up my torch and cook it? :(

Andy

>What is a pigtail antenna?

The typical antenna used in land mobile radio applications has a number of spiral turns in the center of the element ... similar to the tail of a pig.

And, "NMO" refers to the type of mating / coupler used at the base of the antenna element.

With an NMO coupler, the antenna element easily can be screwed on or off the base ... an advantage for going through the car wash, or if you want to switch elements for particular listening applications.

Does anyone do a "broadcast from Santa" on any of the HF ham bands that I could tune into for my children to hear on Christmas Eve? I seem to recall reading something about this in past years. Sure would be fun, and a great way to spark the young'uns interest in radio!

Message-ID: <UaydnbLHUotnqlHcRVn-jg@comcast.com>
Source record: 15875

Here is a little update, comparing the two:

I know the PRO-2052 does not have a mode switch (AM/FM/NFM). I was very certain that it did not cover military air either...but a brief review on Strong Signals, indicates that is does. I'm not able to confirm that, reading the specs.

Here is a link to Radio Shacks manual, for the PRO-2052. It does show "UHF" aircraft, 225~400MHz, but it doesn't indicate if it's AM, or FM.

http://www.radioshack.com/images/ProductCatalog/Manuals/OME20-432.pdf

Here is the link to the "First Impressions" review on Strong Signals;

http://strongsignals.net/access/reviews/reviews.cgi?type=display&rtype=fi&class=recv&num=019#CHANGE

I also forgot to mention, the BC898-T, also allows you to override default frequency steps, and change them! It also has a nice, large, tuning knob! It has the ability to scan trunked, and conventional at the same time.

The Radio Shack PRO-2052 feels cheap...all plastic, weighs only 1.7 lbs.

The Uniden BC898-T feels like quality...all metal, except for front panel, weighs in at a hefty 4 lbs!

I wonder if the antenna connector broke inside? Can you open it up to inspect it? I'm sure whatever is wrong could be repaired if you sent it back to Icom. On the other hand, you could eBay it for whatever you can get, then put the proceeds toward a new IC-R5 or something...it's better than torching it.

It's probably been viewed a politically incorrect, due to offending illegal aliens in our country, therefore not allowed under the New World Order!

Of course I'm joking, but with what I've been hearing on the news, it wouldn't surprise me! A local school here in Michigan, had their school band playing Christmas songs. Just music, no singing. Two parents complained that they were offended, because they could hear the words in their heads! If they were hearing the words in their head, I think the parents should have been committed. But NO!!!! The band was ordered to stop playing Christmas music, permanently!

Then we had another incident, where a school was putting on a play. They had different stage setups, for Kwanza, Muslims, etc. One parent had built a beautiful manger scene, with baby Jesus. Again, a few parents in the audience were offended, and ONLY the manger scene had to be removed! What a bunch of crap!!!

Did the antenna get zapped by static electricity recently? If so, you may
have blown the front end of the receiver.

Had the same thing happen in Marysville (north of Everett Washington). Seems
some school official didn't want the kids
singing Christmas carols because they would be deemed too offensive.

Then there's the on going debate about the green tree being a Holiday Tree
in one part of Seattle.

Never heard much of this Kwanzaa thing. Up here in Canada it's Hanukkah and
Christmas mostly, with Dhawhali
thrown in (a winter celebration for those of the Sikh faith that's been
happening for over 600 years

What is Kwanzaa?

Then on the 26th, its Boxing Day, where everyone goes to the Shopping Maul.

Happy Christmas to everyone.

i'd guess the connector has come loose on the wire to the PCB.common
problem.

crack it openb & resolder.
if you can't solder, get a local Ham to do it.

Kwanzaa is an African American holiday. More info here:
http://www.tike.com/celeb-kw.htm

My office was ordered two years ago, to stop displaying Christmas decorations, because one individual, out of about 50, who was Jewish, expressed that he was offended. We complied the first year, but we were outraged! They had been decorating that office for 25 years! The following year, we revolted, and decorated that office like it was Santa's home town. That person has since left the company. That was fine with me. I feel the same way about people who come to live here, in the U.S., because it's such a great country. If they come here, and don't like it, and are offended, we give them the right to leave, and go back home. Simple as that. We don't force them to come here, we don't force them to stay.

I have never been offended by anyone's desire to express their beliefs, as long as I was able to do the same. But it seems lately, that everything this country (USA), was built on, and stood for, is being torn down, and taken away. I think it's pathetic that everyone acts like this is ok with them, and waits until their in private, to complain. I think we need to speak up, and demand our share of the freedom we deserve as native Americans!

You can thank the weasels known as the ACLU (better fitting would be the Anti Christian Liberation Union) - for that. This country was "founded" on Christianity. Why the few should get their way - is beyond me. No one said they have to believe in our beliefs. Just as I am not forced to believe in theirs. IF I want a moment of silent prayer, that is my business if I pray to any deity. IF they want to sit there in that same moment picking their ass and sniffing it as a form of self religion, that is theirs. No one said we had to agree. After the popular Salem Witch hunts, this country even learned to allow them the freedom to express their own religion. Some witches do serve Satan, some say they worship the Earth! So be it. It WAS a free country to worship as one pleased. Now we have to stop for the few who choose not to believe. That is ridiculous.

Just like the schools teaching Darwin's theory... Hey, that is fine... I have no problem with that, but allow any other forms of creationism as well, even if it were to include being spawned by aliens if need be... Allow the children to learn the differences which exist and as they age, they can form their own opinions. Why should any ONE rule be shoved up someone's ass? In my book, the ACLU is going to be the downfall of this country. They all need taken out back and taught a lesson. Maybe that is the problem.... spoiled brats.....To used to getting their own way. If I were a Judge, I would find a way to defeat the ACLU every chance I got.

This country better wake up before it truly does go to hell - literally and/or figuratively. I believe in freedom of religion whatever it may be or to not believe. But those who do not believe in it, should also respect the rights of the religious. There are far too many religions in this country for these idiots to try to shut down. If they don't believe in God or Christ or even the devil, so be it. Close it off in their mind, just as you would any statue of say a non-existent Superman... Surely they don't think HE existed! Or even Santa for that matter. Look upon the Bible or Koran(sp?) as merely a comic book or some science fiction type novel if you so choose.

Believe in what you want, let the rest live their own lives. What we who wish to practice our forms of religion need to do, is just rally and show the ACLU cry babies we won't tolerate being pushed around. Talk about Anti-Christ, man these idiots are anti anything that the majority stands for. The more we rebel, the more they'll get the message. To fold like a house of cards, they will have won. I'm not saying to "break" laws, but setting out Christian Decorations - EVERYONE who wants to, will show these idiots we won't stand for it. Surely they can't prosecute everyone! Maybe we should start Class Action Lawsuits to reinstate our rights - just as people went up against the "giant" tobacco industry and won. Strength in numbers. REMEMBER - UNITED WE STAND, DIVIDED WE FALL. Show these sissies we won't give up our rights. They're only as big as we allow them to become. They've been getting their way for far too long

As to the Ham radio..... there used to be clubs or just individuals who would get on H.F. and do this every year. A nice gesture for the kids. More so - locally, ham clubs or individuals would go to the hospitals to visit children and allow them a chance to speak to Santa via 2 meters. These idiots who oppose this remind me of the many stories of Christmas where a person didn't get their request filled as a child, so they grew up to be miserable bastards to live with. I'm not in much of a Christmas spirit anymore (for personal reasons), but there is no way in hell that "I" would even dream of killing it for some child or family. That is my problem, not theirs. Why should they have to pay the price for one person? That isn't anymore fair to ask than what has been discussed above. I think some of this bull shit is coming from these talk show hosts on X radio and others, given far too much credit for their roles. Who are they to become like gods?

STAND UP FOLKS... Let your desires be seen and heard. Let them know WE demand our right to practice our religions.
MERRY CHRISTMAS TO ALL. And to those who don't believe - enjoy your day..... Thanks to us - the believers, probably a paid day off! Admit it, we aren't all that bad!

TBA

Doug,

Thanks for your reply.

If I can figure out how to open it, I'll check for that connector.

Merry Christmas,

Andy

Bill,

If it did, I wasn't around to notice that. If it's not a bad connector,
I'll send it back to Icom for repair.

Merry Christmas,

Andy

mike,

Thanks for your help. I'll have to open it up and do a continuity check.

Merry Christmas,

Andy

kinda the way I feel too , sometimes , but the " sad " facts are
(here in central California anyway) that we white anglos are a
small minority of the population and " the times they are a'changin ".
the latinos (mostly illegal aliens) make up about 56% of the local
population (1.2 million in our metro and about 1.8 to 2.2mil in
this county) and they are catholic. they want spanish spoken
in schools and around town and mostly want to import their
home culture into this country. they don't care much about speaking
american english or about american customs in general.
this angers the small minority of very vocal " born again christians "
because they think they are discriminated against. another 18 % to 28
% of the population is hmong , cambodians, pakis , hindus, and sikhs.
most of these are legal immigrants and LOVE to voice their new found
freedom of speech and religion. if they don't get their (in their
view) fair shake they are VERY vocal about it. TV in these parts
mentions ONLY the " holiday " season because mentioning " christmas "
can anger and discriminate against a LARGE portion of the local
population. (like in San Francisco, we have a large number of
different ethnic TV channels , most of which are Indian and mexican ,
there are more mexican speaking FM stations than english speaking ones
) I've NEVER seen so much trouble extended , in the media and stores
, to avoid trying to anger so many different groups.
it's a TOTALLY (insert rude expletive here) -up mess.

it's strange new world , here, and probably gonna get worse before
all is said and done. if you live in places where your ethnic and /
or religious groups are still in the majority or maybe just " par "
with the others , rejoice this " holiday " season ..... it may be an
endangered experience and due for major change .

k.............

now lets seeeeeeeee ...... whare'd I put that spanish / american
dictionary. want to go out shopping for last minute christm....... er
ah ..... " holiday " bargains but can't read those sale signs. ah aha
haaha ahhha ah a trippy ....

I have had scanners continuously for more than 20 years and I
understand most of them and I worked in the industry of 2x radios for
PDs and FDs and business. I think I retired too soon. Seems that the
way uniden has explained their 246 to me just leaves me hanging, they
are assuming that the purchaser of one of those things alread knows
about scat and lcn, ltr, etc.......arrrrgh, i haven't been able to
figure out how to program the damn thing. I get the conventional
channels ok, but damn, I havent figgered out the TT yet. I am missing
something ... they just don't explain it very well...

they won't hold your hand so to speak. otherwise it puts any of my
other scanners I have ever had to shame.... and I am (supposedly) an
extra class ham and 1st class lic holder - I guess that dates me...

I can figger how to clone and load but, I sure do wish I could tell
somebody where I live and have them send me a clone file to load for
my area. seems I can hear stations fairly well from new orleans over
to pascagoula (about 50 mile radius)

Well, I'm on the other side of the fence -- I found the BC246T easier to program than other trunking scanners I've used. (I've been listening to the local EDACS system for several years, and I've programmed it into three different scanners.)

Each radio system you want to enter -- trunking or conventional -- has three levels of detail: system, groups, and channels. Think of it like storing information in folders and subfolders on your computer. Stuff that affects the system as a whole goes into the system level, groups are for your personal convenience, and channels are where the listening happens.

For a trunking system, the system frequencies and other information (system type, system options, etc.) go into the system level entries. You divide your talkgroups into whatever groups you fancy. Then each channel is a talkgroup. All the information you need to program the 246 is information you would need to program any other trunking scanner, so there's nothing new -- just different.

I agree that there may be areas where the manual could be improved (although it's better than others I've seen), but if you've programmed other trunking scanners, you shouldn't have any problems with this. If you haven't programmed a trunking scanner before, be glad you're learning on this one!

I was born in britain i am prowd to be british.
what gets my going. is if i was to go to another country i would have to
abide by that country,s laws and there ways.
so why should we not be allowed to celebrate out culture in our country the
way we have dont for yeas...
why should some people who are are not british who are living in our country
be allowed to complain about our culures times of year we celibrate...
if these people dont like our ways why dont they just got home and dicktate
there own cultures and was....
i am not in any was a racist person i have many freinds of various races and
they hold the same veiws as me.

If the individuals used the software/radios to listen in on encrypted communications, it is against the law anywhere in the United States, unless of course the United States government is the one that is eavesdropping.

Yes Enthusiasts/Scanner listeners can listen up to communicatins, however those communicatins encrypted for law enforcement communication purposes aren't supposed to be heard by the general public.

Don't get me started on the M/ACom Open Sky system presently millions of dollars in the hole and they still can't talk to one another!!! And they want parts of that system to be encrypted as well!!

I wasnt aware that we were prohobited from celebrating our culture as we have done for years, this christmas was like any other (apart from working christmas day and boxing day) I did not feel restricted.

I celebrated it as I have done every other christmas I can remember, in the company of family and friends and with copious amounts of alcohol ;-)

regards

happy christmas & a merry new year to you all

Does the BC250D need the volume mod that older BC scanners needed to up the output of the earphone jack? I bought one to use at NASCAR races and need to know if the scanner can drive a pair of headphones at the track. I used a buddies BC200XLT last fall and noticed there wasn't much volume with his headphones. You could barely make out the drivers with all the outside noise.

Thanks,
Dave

4448. radio and antenna questions for 108 to 136 MHZ

Newsgroup: rec.radio.scanner
Date: 2004-12-27 09:52:24 UTC
From: Insert66 <Insert@ers.com>
Message-ID: <3rlvs0l2kjv6l6n54org29fd3n216ha5pl@4ax.com>
Source record: 15913

I would like to intercept the local airport frequencies
I tried a pro-82 with its default antenna and got little more than the
aircraft, .. no ATC . I returned the radio

I am now trying to decide if i should buy a better radio
and an add on / larger antenna

Or should i accept that local buildings are
going to make it impossible. I am 10 to 12 nm
from the airport. but have other buildings around me
Im on the 12th floor and have a balcony

would a discone do it?
is a base unit more sensitive than a hand held?

is the pro 82 considered sensitive?

what is the ideal antenna length for 108 - 136 MHZ ?

is it better to but aviation hand helds, as they may be
made for these frequencies?

would simply a taller antenna have made a difference with
the pro 82? It was simple enough to use

TIA for any replies

No.
More sensitivity in 144MHz.

most radios are the same ears wise
. an external aerial will make all the diff.

It is more likely that you either did not have the correct ATC freqs,
or the Pro82
that you had was defective. Ilive about 15 miles from the Lexington
Bluegrass
airport and I have no trouble receiving ATC and even the low power
field utiltiy trucks/equipemnt/people on my ancinet Pro34. With the
stock antenna.
With a old RadioShack diskcone, the one without the center "stinger", I
can monitor airports in a 30 mile range.
At 12 floors up you ought to get a perfect signal. Even with other
buildijng between you and the airport, you shouldn't have any trouble.
An diskcone on you balcony ought to open up lots of reception
posibilties.
The only other thing I can think of might be a stong local signal that
is overlaoding yoru front end. I have a friend who lives 1/2 mile fro
the LFUC
police transmitter, 1/4 mile from 2 different paging towers. Even he
can
receive very well when all 3 are quite. And is pretty obvious whne his
sanner is being overloaded. Hard to sdicribe, but the garbled speach is
a givaway.
Terry

Hardly. Can't you hear the local police, fire, etc. base/repeater stations from at least as far away? You just need a better antenna.

> is a base unit more sensitive than a hand >held?

Not necessarily. What a handheld usually lacks is a good antenna - as it lacks a good ground and the antenna itself usually is a duck. Attaching an external antenna to its jack will give you a big improvement.

>would a discone do it?

I'd try any VHF mag mount first. Just stick it atop the refrigerator.

A friend of mine is trying to decide between two job offers. One is for a Manager Trainee position at the local Radio Shack. Thought I'd get on here and solicit some input.

Good choice or bad choice?

4457. Re: radio and antenna questions for 108 to 136 MHZ

Sensitivity is probably not an issue, but the antenna type and location definitely is.

A 1/4 wavelength for the range of interest is calculated with the equation:

length = 234 / frequency (in MHz)

and the resultant length is in units of feet. The frequency you choose should be in the middle of the range of interest.

A very effective omnidirectional antenna design is the 1/4-wave ground plane, which you can Google for simple plans. Another possibility is to make a simple dipole antenna by taking a piece of the 300-ohm twin lead antenna wire (cheap and readily available at Radio Shack or Home Depot), then split the two wires with a utility knife for the distance of 1/4-wavelength you calculated and stretch the wires in opposite directions (like a T). Leave some extra length to go to your receiver (no too much) and connect the other end to a BNC connector, one wire to the center and one wire to the collar. Hang this antenna on your balcony outside vertically (away from metal objects) so that the center conductor wire is pointing up to the sky and the ground end is hanging straight down. This makes an effective omnidirectional antenna at and around the frequency you cut it for, and it should work very well with your altitude.

Bad choice.

Unless of course the other choice is scooping up elephant poop.

But still then, RS may be the worse choice.

While I have "normally" found the "help" at the shack lacking, I have no idea what they pay. My guess would be little. Normally the term "manager trainee" is a come on. What are they offering for pay / benefits? As for what the company would be like to work for they are probably all different. Like pretty much any chain store a lot depends on the person in charge of that store. One may be great to work for, another in the same town may have an asshole in charge.

He can check eBay for them already made in the $20-30 price range - and all
he will then have to do is stick it atop his refrigerator. By the time you
make one of these things - magnet, connectors, coax, rod - it will cost almost
as much.

A Mngr trainee means just that. You still have work your way up and earn it. How much he makes also depends on the area &/or location of the store, your underlings, etc. Does he like the job? Is he already working for RS. They will lie to you to get what they want (some - not all).
Does he have mngr and retail experience? Does he know RS products and electronics in general? Do his fellow grunts like him? Is he a salesmen with a proven track record? Does he like enjoy dealing with people / shoplifters? ;-)

If he ain't got that swing - it don't mean a thing..... yes I've been there.....

Agree. Radio Shack is smelly. But Future Shop (in Canada they are a minium wage help electronic store that has the worst Point of Sales system - you cash out at the sales guy's station then you have to stop at the enterance of the store to get your packages zapped out before leaving), and the sales guys stick to you like old gum on a shoe to get you to buy an extended warranty) is worse. They are really stinky.

Few if any of those dolts know a thing about computers. (I buy professionally from computer wholesalers and commerical resellers).

"Manager Trainee" is a glorified grunt. If this guy's friend wants to break into the real business world, go work in an office
and really get into the operations of a business (auditing accounts receivable, writing monthly reporting, answering the
phone, working out logistics, or assistant with the operations of an office.

Unless his friend wants to go into retail. Then Rat Shack may be a way in, but wouldn't stay there long unless there's actually
a posting where the friend is Second in Command at the store rather than being a glorified sales grunt getting paid 80% by commisssion with a title that doesn't mean anything.

Even write out a few courier slips (heck doesn't matter if you're an MBA. You will still fill out the courier slips!)

What he would get at Radio Shack is not much more business experience than working graveyard at the local gas station.

Best would be to review the other alternative against what the Radio Shack one is.

"Manager Trainee" is alot of standing at the cash register, and he will be on sales for the first while. That's before he gets a
few subordinates under him. Which will be quite awhile. "Movin' on up from the East Side and getting a piece of the pie" is dependent on how much the store makes each month (and Higher Authority is always watching). If he directly increases
the sales, then he'll be moved up (unless someone Up There moves somewhere else).

I'd check the store out. Check the guy who is the franchise owner (not nessesarily the Manager), check the staff to see if
they are happy where they are. Is this guy comfy with the junk that Radio Shack sells? (Most of it isn't junk, but some is)

Check and question everything.

i had thought that also, but the way one has to program with little or
no information of local systems, its really difficult to do, but it
will pay off. if youre lucky some of the pre-progged (9) will work.
living in mississippi on the coast, no one seems to have the complete
info. i found some at radioreference.com
once i found with a minimum setup you also have to make sure you are
in ID/SEARCH and not ID/SCAN which is somewhat counter-intuitive, I
started getting some edacs noise. I bet somebody's gonna make a
killing off the sw to program these things. I know the one that uniden
is so proud of ($70) is not worth a crap - from what I've seen of it.
I think if they had some sort of flow-chart showing the implications
of actions it would be more clear, but right now, it looks like a rats
nest. I used to write tech manuals, and I learned it is sometimes
extremely difficult to show effects of certain actions on paper
without hands=on experience. this is a new kind of scanner philosophy

Just a few corrections
4= designation for units assigned to the unincorporated areas of east county. All county patrol units not assigned to a contract city in east county are designated 4. West county units are designated 3. East county runs from the conejo grade, newbury park, oakpark, bell canyon, santa susana knolls grimes canyon and 118 to sand canyon.

E- stands for the area. you are right that at one time there was a F-frank area and it was incorporated with the E units. this has changed back. there are now f-frank cars assgned out of the moorpark station. the 3- stood for the shift, the 4 stood for what beat they worked.

4-east county E-beat- 3-shift- 4- area assigned.

Hi!

The only useful purpose I've seen for these radios is using
them to travel down the road (on a trip) with two different
vehicles. The license fee request is a joke, unless you are
in a large metro area where repeater users may monitor you
and try and cause trouble ... like a typical R.E.A.C.T.

user would!

For coverage, a 5-watt CB with a magnetic mount could blow
away any FRS unit.

Just my opinion ..... and I prefer to use my "Direct Connect"
talkie on my Nextel phone.

Charles

Perhaps, but they still manage a nice mile to mile and a half with their 3 inch antennas. And the FM audio quality would "blow away" any AM CB device.

> Just my opinion ..... and I prefer to use my "Direct Connect"
> talkie on my Nextel phone.
>

But also on this supposed road trip a set of FRS rigs cost nothing to use. BTW they are very useful for antenna and dish installation work, Around the house, at the camp site, amusement park, boating, hunting, etc...etc...etc...

The FRS radio is pretty good for keeping track of someone in a mall. The building walls reduces chatter from the outside, too.

A few years ago an emergency situation arose on Mt. Hood. The climber in distress called on his FRS radio and a child in Yamhill, Oregon (about 60 miles away) heard it and told his father, who called 911. The climber was rescued and the the child received national attention in the news. So, FRS radios can go a good distance if the sightline is good.

The GMRS is interesting. $5 for a radio and $75 for a license.
FRS is handy for working on antenna towers and much less expensive when one is dropped 150 feet than a 440 HT.

I have a couple of the 4 watt radios. Use them at work. We started with a couple of the cheaper 1/2 watt, then went to a 1 watt. The 1 watt GMRS worked MUCH better where you were going from one building to another, but we still often had trouble. When I bought the Midlands the problem went away. Now if one of us is in one of the elevators we can still talk and it sounds clear. They have an option to use lower power if you wish. If you do not bother to buy a license and are not using them to try to cause trouble I doubt you would ever hear from the FCC.
I have never taken these outside to "test" the range claim. The best I tried was at the ocean once. One of the kids had a rented motor scooter. They could ride it to the end of the place on the beach where they had it marked as "no motor traffic, and we could talk fine. It was several ,miles away. They were long past where we could still see them. Range will depend a lot on whether you are out side, or in a building or car. When traveling with other people we use them and they work much better than a CB because they are so convenient. If you decide to buy some get the 4 watt. They have gotten so cheap these days you may as well get the more powerful.

Free quick easy money Amazing !!!!!!!!!!!!
Date: 22 Dec 04

Comments

HOW TO TURN $6 INTO $6,000!!!!!! READING THIS COULD CHANGE YOUR LIFE! I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups, just like you are now, and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, Yeah right, this must be a scam,but like most of us, I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and address stated in the article. You then place your own name and address in the bottom of the list at #6, and post the article in at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: what have I got to lose except 6 stamps and $6.00, right? Then I invested the measly $6.00. Well GUESS WHAT!!... within 7 days, I started getting money in the mail! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00. By the end of the second week I had made a total of over $1,000.00! In the third week I had over $10,000.00 and it's still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more than that on the lottery!! Let me tell you how this works and most importantly, why it works....Also, make sure you print a copy of this article NOW, so you can get the information off of it as you need it. I promise you that if you follow the directions exactly, that you will start making more money than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in! It's easy. It's legal. And, your investment is only $6.00 (Plus postage) IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk - it really works!!!! If all of the following instructions are adhered to, you will receive extraordinary dividends. PLEASE NOTE: Please follow these directions EXACTLY, and $50,000 or more can be yours in 20 to 60 days. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to

the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success: STEP 1: Get 6 separate pieces of paper and write the following on each piece of paper;PLEASE PUT ME ON YOUR MAILING LIST. Now get 6 US $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase, your name and address, and a $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1-800-725-2161) and they confirmed that it is indeed legal! Mail the 6 envelopes to the following addresses:

#1)Randall Hines 22 Stature Dr. Newark
DE 19713

#2) Mike Sharrer 921 West State St. Coopersburg PA 18036

#3) Jeffrey Hyun 17414Stark Ave Cerritos,CA 90703

#4) James Adair the third 22 Over Rd. Feasterville PA 19053

#5) TSR Solutions 15907 Golden Eye CT Parker CO 80134

#6) Daryl L. 6063 Roosevelt Blvd Apt# 216 Philadelphia PA 19149

STEP 2: Now take the #1 name off the list that you see above, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number 6 on the list. STEP 3: Change anything you need to, but try to keep this article as close to original as possible. Now, post your amended article to at least 200 newsgroups. (I think there are close to 24,000 groups) All you need is 200, but remember, the more you post, the more money you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again, and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. Look at it this way. If you are of integrity, the program will continue and the money that so many others have received will come your way. NOTE: You may want to retain every name and address sent to you, either on a computer or hard copy and keep the notes people send you. This VERIFIES that you are truly providing a service. (Also, it might be a good idea to wrap the $1 bill in dark paper to reduce the risk of mail theft.) So, as each post is downloaded and the directions carefully followed, six members will be reimbursed for their participation as a List Developer with one dollar each. Your name will move up the list geometrically so that when your name reaches the #1 position you will be receiving thousands of dollars in CASH!!! What an opportunity for

only $6.00 ($1.00 for each of the first six people listed above) Send it now, add your own name to the list and you're in business! ---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS---------- Step 1) You do not need to re-type this entire letter to do your own posting. Simply put your cursor at the beginning of this letter and drag your cursor to the bottom of this document, and select 'copy' from the edit menu. This will copy the entire letter into the computer's memory. Step 2) Open a blank 'notepad' file and place your cursor at the top of the blank page. From the 'edit' menu select 'paste'. This will paste a copy of the letter into notepad so that you can add your name to the list. Step 3) Save your new notepad file as a .txt file. If you want to do your postings in different settings, you'll always have this file to go back to. Step 4) Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites, discussions.) Step 5) Visit these message boards and post this article as a new message by highlighting the text of this letter and selecting paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Congratulations...THAT'S IT! All you have to do is jump to different newsgroups and post away, after you get the hang of it, it will take about 30 seconds for each newsgroup! **REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200** That's it! You will begin receiving money from around the world within days! You may eventually want to rent a P.O.Box due to the large amount of mail you will receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.** Now the WHY part: Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625,00! With an original investment of only $6.00! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is: do you realize that thousands of people all over the world are joining the internet and reading these articles everyday?, JUST LIKE YOU are now!! So, can you afford $6.00 and see if it really works?? I think so... People have said, &quote;what if the plan is played out and no one sends you the money?

So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet. Remember: play FAIRLY and HONESTLY and this will really work.

Good GMRS radios (business band radios programmed to use GMRS channels) will have very good range especially with an external mag-mount antenna on the car. If you are licensed that is perfectly legal. There are also new GMRS repeaters popping up all over the place. The $75 (maybe $80 now) license fee seems high, but it will cover virtually anyone in your family for 5 years. Grandma, Grandpa, Mom, Dad, kids, etc.... If all the adults that will be using the license chip in on it, it's really not that bad. But if one person has to foot the bill, it's kind of steep. GMRS also allows you to use real mobile FM radios of the 25-40 watt power range, but they must be FCC approved UHF business band radios programmed for the GMRS channels. Duplex repeater operation is legal also as long as you are licensed, have a radio capable of it, and have permission of the repeater owner.

At the last meeting, on Oct 17, 2004 we agreed that meetings would be held from 1 to 5 pm on the third Sundays of odd-numbered months, at the Parm-Snow Branch of the Cuyahoga County Public Library (CCPL).

(1)LOCATION of NEXT MEETING on Sunday Jan 16,2005

As we did last time, we will hold the meeting in the large meeting room at the Cuyahoga County Public Library , Parma-Snow branch at 2121 Snow Rd in Parma. It is just a little west of Broadview Rd, across from McDonald's.(Snow Rd is the continuation of Rockside Rd west of Broadview Rd.)Take I-77 to the Rockside Rd exit and go West past Broadview Rd.

This is a private meeting room and holds up to 75 people. Available equiptment includes a large screen TV monitor, and it also has a digital projector for viewing the screen of a laptop (or desktop) computer. A 15 pin "monitor out" connection is needed on the PC. If needed,I can also furnish a mini TV camera for viewing the scanner display and also a laptop running Windows XP Pro that also has internet access. (Let me know if anyone needs to use these items.)

2) MEETING TIME

Sunday Jan 16, 2004 from 1pm to 4:45 pm. The library hours are 1:00 pm to 5:00pm on Sundays. Please turn off your scanners before entering the library. The meeting room is in the North-East corner of the building. Everyone can help setup and we should hopefully start the actual program by 1:15 or so.

3) MEETING TOPICS

Here is what Mark and Erik have been working on:

General MilAir:
- Callsign Database/Listing
- Recorded .wav Files
- MilAir Dictionary/Acronyms
- Web Resources
- Yahoo and Internet Groups
- Webpages of Interest

UHF/VHF:
- Aerial Refueling Frequencies and Map
- Cleveland ARTCC Frequencies
- Other MilAir Frequency Listings
- Proper search techniques and step size

They have also discussed the possiblity of touching on HF Monitoring and Satcomm Monitoring.

If anyone has any related topics that they would like to present, feel free to email Mark at kc8wlz@adelphia.net

5)MEETING PUBLICITY

This is going to be a great meeting, and maybe we can increase attendance if we publicize it a little. I have prepared the following text shown below, if anyone wants to fancy it up, make it into a flyer, and post it in the group files, maybe members would volunteer and get permission from libraries, electronic stores etc to post them. Or, feel free to post the text on related groups. Thanks

I am looking forward to meeting everyone at the meeting!
Scannear Jack
==========

NEXT NORTHEAST OHIO SCANNER GROUP MEETING
(NEOhioScanner@yahoogroups.com)
SUNDAY JANUARY 16,2004 from 1:00 to 5:00 pm

TOPICS WILL INCLUDE A PRESENTATION OF MILAIR SCANNING:

General MilAir:
- Callsign Database/Listing
- Recorded .wav Files
- MilAir Dictionary/Acronyms
- Web Resources
- Yahoo and Internet Groups
- Webpages of Interest

UHF/VHF:
- Aerial Refueling Frequencies and Map
- Cleveland ARTCC Frequencies
- Other MilAir Frequency Listings
- Proper search techniques and step sizE

LOCATION AND TIMES OF MEETINGS:

Meetings are normally held from 1 to 5 pm on the third Sundays of odd-numbered months,in the large meeting room of the Cuyahoga County Public Library, Parma-Snow branch at 2121 Snow Rd in Parma. The meeting room is in the North-East corner of the building.

DIRECTIONS:

Take I-77 to the Rockside Rd exit and go West past Broadview Rd. The Library is just a little west of Broadview Rd, across from McDonald's.(Snow Rd is the continuation of Rockside Rd west of Broadview Rd.)

The library hours are 1:00pm to 5:00pm on Sundays.

PLEASE TURN OFF ALL RADIOS BEFORE ENTERRING THE LIBRARY

We look forward to seeing you at the meeting. Meet us on-line

Yes, I saw that about 20 seconds after hitting send.
When posting to a forum where it will be read by people throughout the
US - heck - WORLD, might want to make the top line or subject where
the meeting is.

I quit reading after about the 10th line (well, really after the name
of the Library, and not recognizing it as anything local).

ROTFLOL!!
Have to remember that one. That is the only store (best buy), that I absolutely will not go into any more. I bought a Lap Top there years ago, and the assholes trying to sell me "extended coverage" for $400.00 was un real. After I got past the damn sales man, then the cashier started in. When I said "no just ring it up", he proceeded to tell me how glad he was he bought it for his because he "punched a hole in his screen". At that I stopped, looked at him and said " so if I buy this coverage, you are going to put it in writing that a year from now I can kick a hole in the screen and come in and get a new one"? He of course started back peddling, I laughed, told him I was not born last week, and left. I had this kind of experience with them a couple times before this, ever since that last time I have never set foot in there again. It just takes too long to get out the door with what you buy. The best part was when I complained and the company sent me a letter "claiming" the sales guys do not get anything for selling this added crap. They really expect me to believe those clown are that annoying because they are just bored? LOL

Adapt it to a cable tv splitter/amplifier, the amp will overcome the losses
and then some. Adjustable ones will give the most flexibility, and either
can be found in the junk drawer or at a yard sale.
The drawback is that they are wideband and will also amplify the bad stuff
i.e. pagers.

First off where are you?
Have you checked for the correct frequencies.
Transmissions are going to be line of sight. Chances are you are hearing aircraft airborne rather than on the ground. I live appx 1 mile from our airport and cannot hear the taxiing aircraft most of the time. I hear the controllers most all the time.
You could also be hearing high altitude traffic talking to the enroute facilities (Centers).

Thank you.

This is confirmed by an email I just received from RT Systems that
Ring=data and Sleeve=ground.

Now I am wondering if this single data lead (half duplex?) can be used
for radios with separate data-in and data-out leads, like the Kenwood
TH-F6A. The simplest approach would be to put the same data signal on
the data-in and the data-out.

Many thanks for your appreciation. To be honest I have just added two more Pro-2042s and one BC-250 to the mix. Also a G5RV antenna on the way. Took over 40 years of monitoring to accumulate it all. You only live once; buy radios.

How well does the antenna perform in the 30-50 Mhz range when FULLY EXTENDED? How does it compare to other handheld or base antennas?

Frank

It'll out perform any other handheld antenna on the VHF-lo band. It certainly cant perform as well as a well designed discone or a full length quarter wave whip. But then again your talking about a handheld and not a base or mobile unit.

When base loaded: It's good for 25 - 35 Mhz
When centre loaded: You may cut/adjust the tip to your preferred freqs
When top loaded: It makes a good performer from 27 to 500Mhz
At least it is much more rugged than a teleskopic whip.
A teleskopic antenna has has the advantage that it can be adjusted to
the frequency you want to receive within a very wide range.

I've seen longer telescopic whips like the Maxon WTA-1, which is a 48" CB whip. I wonder if the center-load on the Radio Shack actually does make up for it being only 26" when fully extended?

I am using such a telescopic center loaded whip with my handheld
scanner. It actually *does* work from 25Mhz up to above 500Mhz.
But you have to adjust carefully for optimum performance. It detunes
when touching or taking the hand off.
You should know: Length of an antenna much less than 1/10 of the
wavelength *allways* results in dramatic loss of performance. So a
tuned 48" antenna has its advantage over a 26" antenna for the desired
frequency range.

4506. Uniden 57XLT: modification to pre-programmed police channel

Newsgroup: rec.radio.scanner
Date: 2004-12-29 23:34:19 UTC

Hi,

Just wondering whether it was possible to reprogramme the
pre-programmed 64-channel police memory, as the frequencies programmed
into it are not applicable to New Zealand.

Any advice or other mods would be most appreciated.

Cheers,
Daniel

Yes, however there's few - if any - news servers anymore that actually support it. And I knew someone would reply, and of course then the few people who have a server that does support cancel would wonder why they're missing an article... And so forth. :)

The problem (and reason) no servers support cancels is there's no 'authentication'. The only real authentication is the from address. If I attempt to cancel your article, Forte Agent will say "Sorry, not your posting" or something. If I then change my e-mail address in Agent to match yours, boom, cancel request posted.

Mainly useless feature not really supported anywhere.

>Yes, you're right with that.
>All the best for the new year.

Thanks, same to you. :)

> company sent me a letter "claiming" the sales guys do not get anything for
> selling this added crap. They really expect me to believe those clown are
> that annoying because they are just bored? LOL

Had that experience at Future Shop (bought by Best Buy this year) in regards
to those annoying Extended Warranties.
Had an interesting conversation with one guy. He figured I needed an
extended warranty for a $60.00 USB hub.
He asked "what if something went wrong with it? With the extended warranty
it could be fixed for free". I said "if
something went wrong with it, I would just buy another one and be up and
running within an hour of leavng the store.
I'm not going to worry about losing the value of an item bought for $60.00
because by the time something happens to it,
it's only worth five bucks.

Had recommended a system to a friend (who is pretty sharp a retired nurse),
but wasn't technically savy so her and her
husband wanted me to go in with her to get a PC. So picked out the one that
best suited her needs, and then the extended
warranty song and dance number came up. I said to the guy "no extended
warranty". Explained to him that for minor things
and replacing components I can do it myself, and explained to him that I am
an IT Manager and buy systems for the company

I worked for. Also pointed out the various manufacturers of the items we bought and the fact that they are all high quality producers of computer items. He still insisted. But said "if you recommend an extended warranty one more time, this sale does not happen". He was silent.

Future Shop is notorious in Canada for overzealous salespeople (they pay them just a dollar or two above minimum wage, and the rest is made up in commishees), and that irritating second checkout system they have.

The sales people absolutely hate it when you go in there, find what you need and then take it to the sales cashier at the front of the store. Had one sales guy follow me and insisted to the sales girl that his name be put on the sale despite the fact that I helped myself.

They are all over you in the store like pests.

I only go in there to buy supplies simply because it is the closest store to where I live.

At least with Rat Shack, there's no second checkout. But I noticed some stuff they have in there is junk, mostly electronic toys. They used to be big on radio stuff (Realistic). Too bad they couldn't be a reseller for ICOMM Kenwood, and other amateur radio equipment. They have hte Pro series scanners but that's about it. I also noticed the previously large inventory of parts such as connectors and so forth has shrunk considerably.

But then again, I also wonder why Motorola never got into the scanner or amateur radio market, considering that they are are everything in regards to commerical VHF and emergency services radio.

The store I most often go to now is Circuit City. They a while back came up
with a deal where you can pay on line, go in show the receipt, and take what
you bought without fighting off the sales people and their "warranty's".
Ever since I found out about it I always use this. Bought a new TV last year
and used this. Waited till the one I wanted was on sale, went on line and
ordered it, went and picked it up. Much easier. I'm sure the sales people
hate this, but too bad. I think Best Butt offers this now too, but I would
not shop there anyway.
I got some junk mail from them after the sale offering the "extended
warranty", but that was much better than having to fight them off in the
store to get out the door.

From: User <user@host.net>
Message-ID: <cr2hj2moc1@reader1.panix.com>
Source record: 15843

Got a BC246T for X-mas that I am thinking about selling. I have a couple of RS scanners and I am not particularly interested in learning another rig.

I am looking for something along the lines of the 246T... handheld, same or better sensitivity, fast scanning, trunking... I would also really like full coverage (minus cell, I could care less). Not sure what scanners are in this same general category.

Any opinions would be most welcome.

Thanks.

4529. 9v, 6v in 12v car

I want to hard-wire my 9v and 6v scanners to my car but I don't want to use a cig lighter adapter (unless I can take the thing apart, I am putting the wiring under my carpet). I am not an electronics guru by any stretch of the imagination although I can usually solder without starting large fires.

Any tips or schematics for voltage converters to drop my car's 12v down to 9 and 6?

Thanks.

Look for some 3 terminal regulators. Especially if the current is under 1 amp. There are some that will handle more. A number might be like a LM7808 for a 8 volt regulator. All you do is mount them to a heat sink and you have 3 leads. One to the car's 12 volt source, one to the ground and an output wire. YOu will also need 2 capacitors, one on the input and another on the output. They are only about a dollar each.
Some are around that you can adjust the voltage with a resistor or two.

http://secunia.com/advisories/13129/
Secunia Research has reported a vulnerability in Mozilla / Mozilla Firefox,
which can be exploited by malicious people to spoof the content of websites.

The problem is that a website can inject content into another site's window
if the target name of the window is known. This can e.g. be exploited by a
malicious website to spoof the content of a pop-up window opened on a
trusted website.

http://www.strongsignals.net/access/content/mods.html

Although the resistor change in the original mod can improve performance, it has been found that the addition of a diode across the 470K resistor eliminates the squelch tail while retaining the hysteresis. Uniden has added this diode to the PRO-2052 and indications are that it will be part of the BC780 squelch circuit. The diode mod is recommended over the resistor mod unless you want to reduce the squelch hysteresis. A diagram has been added to show how to apply the diode mod to the PRO-2048.

Fair enough. I should keep my comments to myself. But since we are on the subject, I have used Linux for nine years and never ONCE been affected by a virus or suffered an attack from an uninvited user. I do not have adware on my computer, nor do I have to reboot every time I install a piece of software. I literally can do anything on my Linux laptop that I could do running Windows - I know, I tried going back to Windows a couple of times recently on my laptop just to maintain compatibility with work. A week later I went back to Linux. It costs less because I don't have to pay for nagware that is useful and it runs faster and cleaner by far.

Linux is inherently safer than Windows. Much safer. Not totally immune but effectively so in my opinion and experience.

Cheers.

If you have a capacitor on the output of any linear
VR IC you must include a diode in series with the
input +V to protect the VR IC against reverse
current tht will result from removing power with any
DC continuity to ground. LM78xx and LM317 are
tuff ICs but I destroyed several before I learned
about the diode. A 1n4002~1n4008 will work fine
and they are dirt cheap. It iaslo a good idea to put
a 2 or 3 amp fuse in seriers for some overcurrent
protection.

> affected by a virus or suffered an attack from an uninvited user.

Twelve plus years for me with Windows (various versions) for with the same
result. Your point is?

> I do not have adware on my computer,

Neither do I. Your point is?

> nor do I have to reboot every time
> I install a piece of software.

Neither do I. Not that rebooting is problem for me when installing software.
Why is rebooting a problem for you running Linux?

> I literally can do anything on my
> Linux laptop that I could do running Windows

I can literally do ANYTHING on my Windows systems using 5 FREE versions of
Linux on bootable CD's that I do in Windows. Your point is?

> - I know, I tried going
> back to Windows a couple of times recently on my laptop just to
> maintain compatibility with work.

IOW the work you need to do cant be done in Linux because Linux is
incompatiable with the work you need to do.....

> A week later I went back to Linux.
> It costs less because I don't have to pay for nagware that is useful
> and it runs faster and cleaner by far.

Yet again another unverifiable, unprovable comment....

> Linux is inherently safer than Windows. Much safer.

FYI...
http://www.linuxsecurity.com/advisories/index.html

From the daily Secunia security e-letter I get:

UNIX/Linux:
[SA13692] Mandrake update for koffice
[SA13691] Mandrake update for kdegraphics
[SA13689] Mandrake update for gpdf
[SA13686] Mandrake update for tetex
[SA13685] Mandrake update for xpdf
[SA13667] Debian update for imlib
[SA13666] Debian update for tiff
[SA13663] Debian update for netkit-telnet-ssl
[SA13656] SSLtelnet Unspecified Format String Vulnerability
[SA13646] Fedora update for xpdf
[SA13690] Mandrake update for cups
[SA13683] Gentoo update for ViewCVS
[SA13669] Fedora update for cups
[SA13668] CUPS xpdf "doImage()" Buffer Overflow Vulnerability
[SA13664] Snort TCP/IP Options Denial of Service Vulnerability
[SA13658] Red Hat update for SquirrelMail
[SA13672] Gentoo update for cups
[SA13662] Mandrake update for samba
[SA13653] Netscape Directory Server for HP-UX Buffer Overflow Vulnerability
[SA13696] KDE kio_ftp FTP Command Injection Vulnerability
[SA13688] Mandrake update for kdelibs

If you want to play with linux but don want all the hassles of having to have it installed on your hard drive, get hold of one of the free bootable Linux CD Roms that come with numerous computer magazines.

That way you can play with it without having to alter your system, and when you're finished playing you just reboot back into Windows.

I have five different versions of Linux that I can do this with, but after 'evaluating' them for most of last year, not one of them has 'done enough' to make me drop Windows as My OS of choice.

They're neither better, than, more secure than, or easier to use than Windows.... They're just another OS that Can be an alternative to Windows for those that want an alternative.

The only thing worse than the millions of Windows user that are unaware of the need to protect their computers from attack on the internet, are the millions of Linux users that believe they're imune from attack on the internet because they're running Linux.....
